Fullerton Post G. A. R. has furnished grave-stones for the deceased veterans and husbands of Mrs. Andrea and Mrs. George Altenhofen of Kewaskum. They are requested to call for them at Oscar Schlegel's at West Bend.

DEATH OF MRS. MATH. MARX.

The death of Mrs. Math. Marx, nee Elizabeth Felzen, occurred at her home in the town of Auburn, on Saturday, April 18th, death being due to heart failure. The deceased was born in Bengel, Germany, on October 31st, 1848, and came to this country when five years old. Later she was married to Math. Marx, who preceded her in death several years ago. Eleven children were born to them, of whom ten survive, namely: Maggie (Mrs. J. Bovung) of West Bend, Mary (Mrs. M. Goeden) of Port Washington, Anna (Mrs. G. Melling) of St. Michaels, Barbara (Mrs. J. Negele) of Chicago, Gertrude (Mrs. I. Theusch) of St. Michaels, Lena of Milwaukee, Katie, Theresa, Lizzie and Nicholas at home. Besides these there are fifteen grandchildren and two brothers. Deceased was a member of the local Christian Mothers' Society and was a lady highly esteemed by all who knew her. She was rather of a quiet disposition and with her quiet ways, out and upright spoken, friendly to all manner, she gained a host of friends who dearly enjoyed her society and very much regret her early demise. The funeral was held Tuesday from the Catholic church, Rev. Muenzer officiating. We extend our heartfelt sympathy to the bereaved children.

Mirth of a Murderer.

With the help of a little tool, not unlike a tin opener, our burglar cut two long slits—one perpendicular, the other horizontal—in the iron shop shutter. Then he wrenched the flap toward him, bending it with his powerful hands as one twists open the lid of a sardine tin. Another minute and he was inside.

Quietly and methodically he thrust precious stones and rings into his little bag, choosing those which besides being small were of great value. The bag was all but full when the jeweler himself appeared at the back of the shop. He carried a candle in one hand and a revolver in the other.

The burglar bowed very politely and said: "I did not care to pass by an old friend's house without stopping to bid him good day."

The unsuspecting jeweler allowed himself to be shaken by the hand, when, with a sudden thrust, the burglar stabbed him to the heart.

The bag was rapidly filled to almost bursting point, and before leaving the premises the burglar wrote a few words on a sheet of paper, which he pasted on the outside of the shop: "Closed on account of death in the family."—London Scraps.

Professional Etiquette.

An eminent physician had a valuable cow, which became sick and seemed likely to die. He asked an Irish servant who lived with him if he knew anybody who followed cow doctoring.

The doctor's groom said, "There's Jimmy Lafferty, who can cure any cow in the world."

"Well, then," replied the doctor, "go for Lafferty." The cow doctor accordingly came and treated the brute for four or five days, and on the lapse of due time he waited on Dr. Lewis and pronounced her cured.

The doctor, greatly delighted, put his hand on his pocketbook. "Well, Lafferty, what do I owe you?" "Owe me?" replied Jimmy, drawing himself up with dignity. "Nothing, sir. We doctors never take money of one another."

"My first impulse," said the doctor while telling the story, "was to throw his fee after him, but on second thought the whole affair seemed so ridiculous that I bowed him my acknowledgments with as much gravity as I could assume."—London Telegraph.

Gold is Everywhere.

Gold can most profitably be extracted from certain mines where the ore is rich and not too difficult to work, but should these deposits ever peter out there is no fear that the world would suffer for lack of a gold supply, for there are many other sources which are as yet untouched, but for working which profitable methods would be devised if need were. Granite, for example, contains an appreciable quantity of gold, and if it were not under present conditions too expensive a matter to extract it we should find Scotland and Cornwall rivaling the Transvaal and the Klondike. The sea also contains gold in solution, and the miner who invents a cheap method of getting it out will make himself richer than all the millionaires that ever lived. Gold is also constantly falling all over the surface of the world, blown to us in minute quantities along with cosmic dust, which comes from interstellar space.—Black and White.

Easily Stated.

A committee having in charge a local entertainment went to a noted editor to request him to take part in it.

"What do you want me to do, gentlemen?" he asked.

"We would like to have you give us a talk on spelling reform," they replied.

"Well," he rejoined, "I can give you my idea of spelling reform in one sentence. Just leave 'me' off the 'programme'."

A Working Majority.

"You can't get all of the people some of the time and some of the people all of the time. But"—

"Why go further?" interrupted Senator Sniffkins. "The two classes you have named constitute a safe working majority."—Philadelphia Bulletin.

The Deeps Are Dumb.

The greatest golfers seldom talk about their golf any more than the greatest cricketers talk about their cricket. It is the enthusiastic duffer who enjoys conversing about "his game."—London Truth.

Scholarship.

Genial Clergyman (visiting the village school)—Well, my little man, what do you do to school all day? The Most Promising Pupil—I wait till it's time to get out, sir.—London Opinion.

It is better to fight for the good than to rail at the ill.—Tennyson.
