## CHAPTER VIII

### The Inquest Opens.

It was only natural, after the late-ness of the hour at which I went to bed, that I should oversleep the next morning. It was well after nine before I entered the breakfast room; I found no one there but a servant who told me that the others had eaten some time before. When I had finished my breakfast I went in search of Bartley, and found him in the sun parlor surrounded by a mass of newspapers. He waved to me and went on reading.

The inquest was not to be held until one o'clock; and I wondered what Bartley wanted me to do with my morning. As if in answer to my thought, he looked up and said he was going into Saratoga on some errands, and suggested that I go with him and interview the girl friend with whom Ruth had intended to spend the night.

The first place we stopped on our arrival in town was at a large drug store, where Bartley asked to see the proprietor. When he appeared, Bartley placed a small object on the counter before him.

"Can you give me any idea," he asked, "what sort of a bottle that cork came from?"

The object was the little stopper with the red wax which he had showed me the night before. Picking it up, he examined it carefully.

"I don't intend to hurt your feelings," he said. "You are like all newspaper men, you enjoy building up a story out of nothing. In this affair, we won't let ourselves get sidetracked. We shall need all the clear thinking we can do."

"I have been going on the story that some one from outside came into the house and killed Slyke, a mysterious visitor who arrived after Lawrence had left. Perhaps the murderer was hiding in the house all the time."

"I give me an interested look and an approving nod.

"Suppose," I went on, "that the number was on the balcony. It was a good place to hide. It was so dark in there that he could not have been seen from the ground. Then let us suppose that Slyke heard a sound some time when he was in the room below the balcony, and went up to see what it was. The person may have been waiting for him to come upstairs."

"I have been going on the story that some one from outside came into the house and killed Slyke, a mysterious visitor who arrived after Lawrence had left. Perhaps the murderer was hiding in the house all the time."

## STATEMENT ON NATION'S BOOM

Comptroller of Currency Dawes Makes Public Report on Banks.

### INDUSTRY NEAR CREST OF 1920

United States Riding on High Tide of Prosperity, According to Official Figures—Resources Are Enormous.

Washington, May 14.—Henry M. Dawes, the new comptroller of the currency, conferred with President Harding and later made public a report not only marked improvement in commercial activities as shown by reports from national banks up to April 3.

"On April 3, 1923," Mr. Dawes said, "resources of \$2,829 reporting national banks were \$21,812,713,000, the reduction since December 29, 1922, was \$362,244,000, while an increase of \$1,762,311,000 is shown since March 10, 1922.

"Loans and discounts, including rediscounts of \$290,467,000, amounted to \$11,997,959,000, an increase since date of prior call of \$98,291,000, and an increase during the year of \$385,530,000. Of the total paper rediscounted \$215,191,000 was with federal reserve banks, and \$455,000 with the war finance corporation.

"The amount of paper rediscounted with federal reserve banks December 29, 1922, was \$186,512,000, and with the war finance corporation \$342,000; the amount rediscounted with federal reserve banks March 10, 1922, was \$269,818,000, and with the war finance corporation \$1,038,000.

"United States government securities owned by national banks amounted to \$2,694,207,000, an increase over December 29, 1922, of \$37,647,000, and an increase since March 10, 1922, of \$92,643,000. Other banks, stocks and securities show a reduction since December 29, 1922, of \$591,000, but the amount April 3, 1923, \$2,340,315,000, was \$290,310,000 greater than on March 10, 1922.

"Balances due from other banks and bankers, including lawful reserve with federal reserve banks, and items in process of collections, amounted to \$2,938,895,000, or \$120,560,000 less than on December 29, 1922, but an increase in the year of \$264,858,000.

"The capital stock was \$1,319,144,000, and shows an increase since December 29, 1922, of \$2,134,000, and an increase in the year of \$29,616,000. Surplus and undivided profits amounting to \$1,553,842,000 were \$50,645,000 below the amount December 29, 1922, and \$69,000,000 greater than on March 10, 1922."

### One Billion Subscribed to New U. S. Bond Issue

Washington, May 14.—The treasury's call for \$400,000,000 to complete refunding of Victory notes has brought subscriptions in excess of a billion dollars in cash and offers to exchange old securities for new. The books have been closed to further subscriptions to the issue of 4 1/2 per cent bonds, maturing March 16, 1927. A further flotation of short-term obligations will take place in June, but this issue may not exceed \$2,500,000.

### Willard Knocks Out Johnson; Firpo Puts "K. O." on McAuliffe

New York, May 14.—Two giants of the prize ring, Jess Willard of Kansas and Luis Firpo of Argentina, stand out as challengers for the title of Jack Dempsey. Willard knocked out Floyd Johnson of Iowa in the eleventh round. Firpo put the "K. O." on Jack McAuliffe II of Detroit in the third session. A crowd of 70,000 witnessed the fights in the Yankee stadium.

### Thirty Russians Seized in Plot to Kill Marshal Foch

Paris, May 14.—Accused of complicity in an alleged plot to assassinate Marshal Foch, who went to Poland to attend the army maneuvers, thirty Russian communists have been arrested in Poland. According to a dispatch received from Cracow, the communists, all of them young, planned to kill the marshal with dynamite.

### Rockefeller's Gift to Health Now Amounts to \$76,757,404

New York, May 14.—The Rockefeller foundation spent \$76,757,404 during the first ten years of its existence, according to a statement made public by Secretary Edwin R. Embree. The work has centered on public health and medical education.

### 60,000 Suicides in Germany.

Berlin, May 15.—Before the war 1,200 Germans took their own lives every year. Today 60,000 is the yearly toll of self-slain, an increase of 5,000 per cent, with the drop of the population from 70,000,000 to 59,000,000.

### Car Beheads Small Boy.

Muskogee, Okla., May 15.—Before the eyes of his father and thousands of persons, Myron Walker, seven-year-old son of E. M. Walker of this city, was beheaded beneath the wheels of a street car.

### Many Killed by Trolleys.

New York, May 12.—Eighty-nine persons were killed and 2,227 injured in street car accidents in New York in April, Special Deputy Police Commissioner Collier announced. Carelessness was blamed for most of them.

### New Member of I. C. C.

Washington, May 12.—Announcement was made at the White House of the appointment of Frank McManamy of Washington as a member of the interstate commerce commission, succeeding W. M. Daniels of New Jersey.

## DR. LUDWICK RAJCHMAN

Dr. Ludwick Rajchman, who is now in the United States, is executive health officer of the League of Nations.

## U. S. MARKET REPORT

### Weekly Marketgram by Bureau of Agricultural Economics.

Washington.—For the week ending May 12.—FRUITS AND VEGETABLES—Florida Spaulding rose potatoes, 37.00 per bbl. In city markets, 35.75 at shipping points. GRAIN—Chicago cash market: No. 2 red winter wheat, 1.23; No. 2 hard winter wheat, 1.20; No. 2 mixed corn, 81c; No. 2 yellow corn, 82c; No. 3 white corn, 46c. Average farm prices: No. 2 mixed corn in central Iowa, 82c; No. 2 hard winter wheat in central Kansas, 1.03.

DAIRY PRODUCTS—Butter, 32 score, 42 Chicago. Cheese at Wisconsin primary markets: Single daisies, 2 1/4c; double daisies, 2 1/4c; square America, 2 1/4c; longhorn, 2 1/4c; square prints, 2 1/4c.

### Chicagoan Offers to Pay \$15,000 for Dodging Taxes

Chicago, May 12.—Harry C. Moir, president of the Morrison Hotel company, one of the first wealthy Chicagoans to be indicted as an income tax dodger, is seeking a compromise in Washington to avoid trial on criminal charges. Attorneys representing Moir told Judge Cliffe that Commissioner of Internal Revenue David H. Blair and Attorney General Harry Daugherty had consented to a compromise providing Moir pays \$15,000 in addition to the taxes he is charged with evading in 1918 and 1919. This Moir has agreed to do, the court was told.

### Cabinet Members to Travel With President Harding

Washington, May 14.—When President Harding visits Alaska this summer, with a view to developing the latent resources of that territory, he will be accompanied by three cabinet members, Hoover, Work and Wallace, and lesser officials who have to do with the administration of the affairs of the territory.

### Dies at 103; Had Started to Read Bible for 72d Time

Marion, Ind., May 12.—At the age of one hundred and three years Mrs. Gabriella Hayes, said to be the oldest woman in Indiana, died at the home of a daughter in Eaton. She had started to read the Bible for the 72d time.

### Pennsylvania to Pay Pension to Persons Over Seventy

Harrisburg, Pa., May 14.—Gov. Gifford Pinchot signed the bill providing for old-age pensions. Applicants for pensions under the act must be at least seventy years old and possess other qualifications. The limit of the pension to be drawn is \$1 each day.

### 25 Families Burned Out of Homes.

Newport, Ky., May 14.—More than twenty families were made homeless and property damage estimated at \$125,000 was caused by fire which destroyed an entire city block here on Sunday.

### 46 Girl Graduates to Wed.

Berkeley, Cal., May 14.—Forty-six young members of the graduating class of the University of California at the annual senior women's banquet here announced their intention to give up the classroom for matrimony.

### Daylight Robbery in New York.

New York, May 12.—Holding at bay 20 employees of Osterman & Co., mattress manufacturers, three armed bandits Friday robbed the treasurer of \$1,500. They escaped in an automobile.

### Too Much Like Catching Dogs.

St. Louis, May 12.—That his job was "too much like that of a dog catcher" was one reason given by Prohibition Enforcement Agent Louis H. Gatter in explanation of his resignation from federal service.

## The Kitchen Cabinet

(© 1923, Western Newspaper Union.)

The luxury of all summer's sweet sensation is to be found when one lies at length in the warm, fragrant grass, soaked with sunshine, aware of regions of blossoming clover and of high heaven filled with the hum of innumerable bees.—Harriet E. Prescott.

### WHAT TO EAT

The codfish is one of our most common and well-liked fish. Codfish balls when well made make a most nourishing luncheon or breakfast dish.

Codfish Balls.—Cut the fish into pieces or shred it with a fork, measuring two cupfuls. Cook four cupfuls of potatoes until tender, drain and shake until dry.

Mash, add two beaten eggs, one tablespoonful of butter and a little white or cayenne pepper. Beat and mix well and drop by spoonfuls into deep hot fat. Drain on paper and keep hot in the oven. Serve very hot.

Baked potatoes and codfish gravy, made by making a rich white sauce and adding the shredded fish, or using a drawn butter sauce, makes a most wholesome dish. Sour cream instead of milk to use in making the white sauce is especially tasty with the codfish. Just try it.

Blankette of Veal.—Take three pounds of the best end of a breast of veal; wipe the meat with a damp cloth and cut into pieces two inches square. Add water just to cover the veal, a carrot scraped and cut into quarters, two small onions tied in a bit of cheesecloth with a teaspoonful of celery seed, two branches of parsley, two cloves and a bit of bay leaf. Cover and simmer until the veal is tender—about two hours; strain the broth, discard the vegetables and keep the veal hot. Melt three tablespoonfuls of butter, add three tablespoonfuls of flour, stir and cook until smooth, add the broth, add salt and pepper to taste and beat in the yolks of two eggs diluted with half a cupful of cream and stir into the sauce; cook without boiling, then add the juice of half a lemon and pour the sauce over the veal. Serve at once.

Sportman Trout.—Take two fresh young trout, clean, wash and wipe dry. Salt and pepper them and place in a narrow baking pan. Fill the pan to the top of the fish and bake until a light brown. The cream will make sufficient sauce and the fish will be well-seasoned.

Last night the unseen gases swung back to softly no one knew. The troops of dreary, darksome things that silently withdrew.

For down a way. All somber gray, Like phantoms put to rout. The blackness of the winter days slipped sighing, shuffling out. The long cold, purple shadows fled, and the late lingering snow.

To leave a patch of healing green where early violets glow.

### SOMETHING TO EAT

A few soups without meat may be acceptable at this time of the year.

Celery Soup.—Take one quart of finely-cut celery, add one quart of boiling water, cook five minutes in a closely covered fireless cooker or kettle, then place on a heated stone in a fireless cooker for two hours. Heat one pint of milk thickened with one tablespoonful of butter and four cooked potatoes. Put the celery through a potato ricer and return to the water in which it was boiled, add the thickened milk, season with salt and pepper and a dash of nutmeg, boil two minutes and serve.

One bunch of asparagus may be cooked the same way, making a delicious asparagus soup. A cupful of cream or rich milk with an egg stirred in at the last will make a more nourishing and richer soup.

Spring Vegetable Soup.—Place in a fireless cooker kettle one cupful of green peas, one cupful of asparagus, one-half cupful of carrots cut into small dice, two stalks of celery, two green onions and a small sprig of parsley; cook all in one quart of water (boiling) closely covered for ten minutes, then place in the cooker and leave for four hours. Rub the mixture through a sieve, add a tablespoonful of flour, two tablespoonfuls of butter; cook until smooth, add a dash of cloves, a teaspoonful of salt, a bit of cayenne; mix all together and serve hot.

Cauliflower Cream Soup.—Take two cupfuls of minced cauliflower, drop it into a quart of milk and let it come to the boiling point, cover and let simmer on the back of the stove for five minutes then place in the cooker for two hours. Thicken with butter and flour, boil up and serve with a teaspoonful of minced parsley.

Rice Pudding.—Wash one-third of a cupful of rice, mix it with one quart of milk, one-half teaspoonful of salt, one-half cupful of sugar, a grating of nutmeg and the grated rind of half a lemon. Bake in a pudding dish, stirring three times during the first hour of baking. Bake for three hours in a slow oven.

## Nellie Maxwell

Secret of Love.

By loving whatever is lovable in those around us, love will flow back from them to us, and life will become a pleasure instead of a pain; and earth will become like heaven; and we shall become not unworthy followers of Him Whose name is Love.—Dean Stanley.

Poer for the "Cop."

Dear Old Lady—Pardon me, Mr. Pooleman, but have you seen any pickpockets around here with a handkerchief marked "Susan"?—Yale Record.

**Dizzy Spells Due to Undigested Food**  
Dizziness and faintness after eating show that your food is not digested and is turning into poison and gas. Simple buckthorn bark, glycerine, etc., as mixed in Adlerika, expels all poison and gas from BOTH upper and lower bowel. Removes foul, decaying food-matter you never thought was in your system which poisoned stomach and made you dizzy and faint. Adlerika is EXCELLENT to guard against appendicitis. Edw. C. Miller, Druggist—Advertisement.

Here It Is!—The New

## International Manure Spreader

Run Your Eyes Over These Best-yet Features:

1. Roller Bearings. Roller bearings at seven points—the only spreader so equipped.
2. Double Ratchet Drive. Walking beam transmission from main axle eccentric and extra large ratchet wheel give easy, strong, steady lead. No pounding or jolting, due to extra-long movement of pawls on ratchet wheel—only two power impulses on ratchet for every revolution of 46-inch drive wheels. Box tapered to eliminate friction on box sides. Six feed speeds.
3. Qualifying Front Axle. Auto-type, permitting maximum. No pole-whipping. No strain on frame.
4. Power: Both Wheels. Power is transmitted direct from main axle to beaters, wide-spread spiral and manure conveyor—get through beaters to conveyor or vice versa.
5. Wheels Track. Rear wheels track with the front wheels, lightening draft.
6. Tight Bottom. There is no clogging, jamming apron, because the spreader has a tight bottom. Spreads anything. Retains all liquid manure.
7. Two Beaters. Two all-steel beaters with chisel-pointed square teeth work from both top and bottom of the load. Allow extra-high load.
8. Wide-Spread. The spiral behind the beaters gives the manure a third beating, and spreads it finely and uniformly beyond the wheels.
9. All-Steel Main Frame. Does not check, rot or warp. Wood box sides hold only the load. Frame holds operating mechanism independently of box; keeps alignment perfect.

The New International—made in two sizes—is unquestionably the best spreader value on the market today, and when you consider it in connection with its price, it is far ahead of all others that there is really no comparison.

We have a sample spreader set up for your inspection. Come in and look it over.

# Millions Wasted in Stale Bread

### Food Research Institute Puts Loss Each Year at From Five to Ten Millions.

New York.—Waste in stale bread runs the bakers and consumers of the country from \$5,000,000 to \$10,000,000 each year, according to the Food Research Institute, which has just completed a study of the problem, says the New York Times. As a means of reducing this loss, non-acceptance of return loaves, either through new laws, or action on the part of bakers, more efficient deliveries and better quality of output, are suggested by the institute. The principal source of loss is the return of bread to the bakers after it has become unsalable. The institute quotes the United States food administration as estimating that in 1917 the loss from the return of stale bread amounted to "upward of 600,000 barrels" of four a year.

The loss varies greatly in different bakeries in the same city, and at various times. Replies to questionnaires sent out by the institute indicated a very low average on the Pacific coast and a relatively high percentage in the northeastern states.

The Food Research Institute was established at Stanford university in 1921, at the suggestion of Herbert Hoover, by the joint action of the university and the Carnegie corporation, for the study of problems in the production, distribution and consumption of food. It is concentrating its efforts for the present on problems related to wheat and wheat products, and it was as a part of this work that it studied certain economic phases of the baking industry.

### Losses From Stale Bread.

Losses from stale bread constitute an important item of cost for large numbers of wholesale bakers, and to some extent for retail bakers as well, says a summary of the survey. "Large stale bread losses tend to raise the price of bread to consumers and to threaten the financial position of the baker. Moreover, since stale bread is largely used for animal feed, or even for fuel, whenever considerable volume must be disposed of the loss occasions a needless waste of food."

"Our study leads to the conclusion that, under proper conditions, stale bread losses exceeding 1 per cent of production are excessive, and that a figure of one-half of 1 per cent is an attainable standard. Losses above 1 per cent reflect objectionable trade practices, poor business management or both."

"Acceptance of returns of unsold bread from dealers is by all odds the leading factor in such losses wherever the loss is high. Where this practice prevails the loss is almost sure to be excessive. The abandonment of the common practice of taking back unsold bread from dealers is essential to the solution of the stale-bread problem. This change of policy would reduce certain dangers of food contamination as well as tend to cut down waste. The success of a no-returns policy, however, requires careful attention to other measures calculated to insure that bread reaches the consumer fresh."

### Needed in Sale of Bread.

"The principal requirements are the following: Bread of a high-keeping quality must be baked, so that bread a day or two old may be readily salable as fresh. Reasonable effort must be made to keep down the time between the baking of bread and its purchase by consumers. Dealers' requirements must be unguessed closely from day to day, with attention to weather forecasts and other information concerning coming events that affect bread sales. Production must be adjusted carefully to requirements, both in amount and in time. Bakers must cultivate the support of dealers and their

### Discarded Fiances Fly to "Green Peas"

Berkeley, Cal.—And now comes the "Royal and Mystic Order of the Green Pea." The latest secret society has been formed on the University of California campus by discarded fiancés. Its object, according to George Smith, its president, is to fight the wives of erudite coeds who play up to men students only to cast them aside. The constitution of the order defines a "green pea" as "one who has had a hard fall, who has suffered at the hands of woman, a man who has been jilted in love." The constitution provides also that the "greenest of the green peas" shall automatically become president.

### Oyster Beds in Atlantic in Danger of Extinction

Washington, D. C.—Extinction of the oysters in Atlantic coast waters is threatened by continued pollution of the oyster beds through industrial wastes, Dr. Thurlow C. Nelson of the board of shell fisheries and state experiment station, New Brunswick, N. J., told delegates to the seventh annual convention of the Central Atlantic States Association of American Dairy, Food, and Drug Officials.

# Alaskans Honor Early Explorer

### Hospital to Be Built in Memory of Hudson Stuck, Cowboy, Reporter and Clergyman.

Seattle, Wash.—The Alaskan Indian and Eskimo friends of the late Hudson Stuck, cowboy, newspaper reporter and minister, and finally missionary, explorer and author, are planning a hospital to his memory on four miles inside the Yukon river, a knoll overlooking the Arctic circle.

Archdeacon Stuck is the man who first made the ascent of Mount McKinley; or, as he called it, Mount Denali, giving it the Indian name. The official records of the American Geographical society, of which he was a member, and to which they were turned over, on his death, two years ago, by the Episcopal church, in whose missionary service he was engaged the greater part of his life. Stuck, who was also a Fellow of the Royal Geographical society, has related the story of his perilous adventure in "The Ascent of Denali," which was published in 1914.

### Distinguished Ancestor.

The blood of Hendrik Hudson flowed through the veins of Hudson Stuck. It was probably from this distinguished ancestor that he inherited the love of adventure, which carried him all the way from cowboy, post rider and newspaper man in Texas, to

### TRAPPED AND MARRIED

Here is Mrs. Herbert M. Milan, who was Miss Claire Lassiat when she married in San Francisco following a romance that had its inception when she was caught in an animal trap in the Sierras. She married the man who came to her aid.

tion, but has not yet been tested. Although not yet fully observed, they have clearly facilitated reduction in stale bread losses."

# Enter the Bridal Cortège; Midsummer's Adorable Hats

For the Maid or Matron of Honor.

THE bride, after determining on her own wedding gown, considers those of her maids and her matron or maid of honor, with a reference to the beauty of the wedding cortège and to the setting they will make for her own bridal array. She may choose picturesque things of bygone days to set off her most modern garb, or she may elect that all shall be of corresponding style, still maintaining the center of interest in her costume. With all the adorable frocks in current modes, suited to bridesmaids, and all the quaint fashions available, the way of the bride is strewn with sartorial roses in making a choice.

To think of bridesmaids is to say "tulle"; there are so many flower-like tulle frocks to make a colorful and gleaming background for the white of the bride. Probably nothing else is quite so popular as full-skirted, slim-

linery reaches its climax of beauty in midsummer and designers delight in a commission to provide headwear for bridesmaids. They take such occasion to make their dreams of picturesque and beautiful hats come true—to the delight of the maids—and they give their fancies freer rein than at any other time.

Four adorable hats, any one of which might be selected to grace the head of bride or bridesmaid, are shown here. They are worthy the wedding procession and the fairest of faces. Silver tissue with pale gray and silver lace and uncurled ostrich—in any color the bride may choose—account for the small poke shape and tiny, frivolous tuft to match. The tuft may be carried instead of flowers. This is a new and beautiful hat and will probably make the bride think twice before passing on to consider another model.

Headwear for Bridesmaids.

hooded frocks of changeable tulle for the bridal procession. Maids look their daintiest in them, and the bride who chooses them is sure to please.

Even more lasting are the exquisite frocks of fine embroidered batiste, trimmed with lace and worn over slips of colored silk. One of these is shown in the illustration and is recommended for the maid or matron of honor, when worn over a slip of the same color as that in the dresses of the maids. It is elaborated by a panel down the front of alternating rows of embroidered batiste and vul lace insertion, with fluted frills of val lace set in in groups across it. These frills are also set about the bottom of the skirt. The heavily embroidered side panels are outlined with insertion and the back of the skirt is plain. The crowning glory of this model is the small straight cape at the back of the bodice, much elaborated with tucks, embroidery and lace.

But perhaps her mind is set on a wide-brimmed hat; if so let her consider the lovely pattern in fine straw, faced with crepe and bearing a unique trimming of butterflies (made of feathers).

If the sagacious bride is considering hats that will prove useful after the wedding, the lovely model in hairbraid, with chiffon roses set against the crown, is likely to prove her choice. The upper brim edge is outlined with little ruffles of pleated-edged ribbon and the same ribbon makes a background for the chiffon roses.

Another hat that will appeal to many brides is a multicolored shape with applique of narrow braid and a scarf of malines about the crown. Ostrich droops from the side in a cascade of lovely color.

Brims Wide at Side. Picture hats are eye-shaped at the moment. The brims extend far and wide at the sides, but narrow sharply in back and front. Crinolite is still among the hat materials. Extravagantly big bouquets of fruits and flowers trim some of the models.

Black on Smart White Frocks. Frocks of white crepe embroidered in black or of white knitted silk with decorative motifs of black are as smart as they are new.

New Gloves. One pair of long elbow gloves of silk has a fluted ruffle following the seam from wrist to elbow. Emphasizing the length of the line is supposed to create the illusion of slenderness.

### Los Angeles Woman Tells of Wonderful Experience.

MRS. GUSSIE E. HANSEN.

Mrs. Gussie E. Hansen, of 916 West 52nd Street, is now numbered with the multitude of Los Angeles men and women who have realized the wonderful merits of Tanlac. In relating her experiences, Mrs. Hansen said:

"It is wonderful what Tanlac will do for one suffering from stomach trouble, nervousness and run-down condition. I have tried it. Before taking the treatment everything I ate disagreed with me so that I actually dreaded to sit down to the table. I suffered from constipation, had awful pains across my back, and was so nervous and run down I was in misery all the time.

"Tanlac was helping so many others I thought it might help me, too, and it certainly has. Why, my appetite is just splendid, and my stomach is in such good order I eat to my heart's content. My back doesn't bother me any more, and I sleep like a child at night. I can't say too much for Tanlac."

Tanlac is for sale by all good druggists—take no substitute. Over 37 million bottles sold.

More spinsters might marry if other women didn't marry so often.

# WOMAN'S HEALTH RESTORED

### She Claims Lydia E. Pinkham's Vegetable Compound Did It After Everything Else Failed

Milwaukee, Wisconsin.—"I feel that I ought to let you know about my case. I was ailing and could barely do my housework and washing I was so run-down, just from having one child. I took a lot of medicines and had doctors. Then I gave them all up and took Lydia E. Pinkham's Vegetable Compound and I feel wonderfully good now. I do everything that comes along, and we all take your medicine as a tonic when we don't feel just so. I am thankful for what the Vegetable Compound has done for my health and for my family."—MRS. MARY SAICHECK, 944 28th Street, Milwaukee, Wisconsin.

Letters like these testify to the value of the Vegetable Compound. These women speak from the fullness of their hearts. They describe as correctly as they can their conditions: First, those symptoms that affected them most conspicuously; and later the disappearance of those symptoms. They are sincere expressions of gratitude. For nearly fifty years Lydia E. Pinkham's Vegetable Compound has been praised by women.

### Uncle Sam to Make Fine Dairy Display

Preparation of the largest and most extensive single exhibit feature ever undertaken by the United States Department of Agriculture is now under way in the office of exhibits in Washington. It is being constructed to portray the development of the dairy industry of the country, and will be shown at the National Dairy show in Syracuse, N. Y., in October. The exhibit will combine a model of a dairy farm and a background painted so as to complete the illusion of a vast farm. Charles A. Corwin is shown above working on the great painting.

### Son Too Young to Love? Send Him to Chemist

New Haven, Conn.—When a young man, for that matter, an elderly chap looks into a fair lady's eyes and feels a funny sensation which he believes is "southern emotion" he is wrong. What he is experiencing is chemical reaction. This declaration of "chemical reaction" being the real primary and ultimate source of all those "divine emotions" was made by Dr. Joseph H. Hughes, professor of chemistry at the

Kansas Agricultural college, in an address here. Any emotion in fact, said Dr. Hughes, such as love, hate, jealousy, etc., is simply caused by certain secretions in certain glands.

Experiments carried on by Dr. Hughes tend to verify this, he said. Chemical compounds are also being experimented with which can change a person's nature.

It is estimated that the clothes moth destroys 10,000 tons of wool each year.

Some men would rather be wrong than right, whether there is more money in it or not.

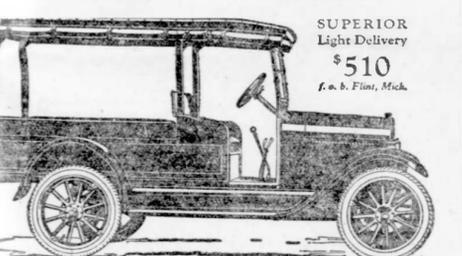

## for Economical Transportation OF Farm Products

Modern, progressive farmers, being also business men, now depend on fast, cheap motor transportation to save time, save products and get the money.

Chevrolet Superior Light Delivery, with four post body was built especially for farm needs. It has the space and power for a big load, which it carries fast at a very low cost per mile.

Chevrolet Motor Company Division of General Motors Corporation Detroit, Michigan

SUPERIOR Light Delivery \$510 f. o. b. Flint, Mich.

## Canada Offers "Last Chance" for Virgin Farms

Think of what you could produce on a farm of virgin fertility, without the burden of high-acreage cost. Think of what 20-to-40 bushel wheat would mean under these conditions, and of dairying and stock raising on cheap pasture land.

### Western Canada—Your Opportunity!

Western Canada is the farmer's land of opportunity. The lands of settlers who started out with little or nothing, are today the best of the best, with comfortable homes and farms, stock, dairy herds and the means of prosperity.

### Special Excursion Rates to Western Canada

To see what you can do on the land—see for yourself—judge of its value and make a special excursion trip of inspection will leave United States points on the first and third Tuesday of each month.

Form for requesting excursion rates, including fields for name, address, and agent information.

## CUT OPERATING TRACTOR COSTS

Much Depends on Depreciation, Fuel, Repairs and Upkeep, Interest and Lubrication.

### VARIES ON DIFFERENT FARMS

Expenses of Operating Three-Plow Machine Is Considerably Greater Than for Smaller Implements, but Does More Work.

(Prepared by the United States Department of Agriculture)

Every farmer who owns a tractor naturally is interested in the cost of operating his machine and in reducing that cost wherever possible. Cost of use, according to investigations made in corn belt farms by the United States Department of Agriculture, depends chiefly on depreciation, fuel, repairs and upkeep, interest, and lubricating oil.

### Cost of Operation.

While the cost per year and per day of operating three-plow machines is considerably greater than for two-plow machines, the greater amount of work done by the larger outfit, at least on drawbar operations, makes the cost per unit of work approximately the same for both sizes.

Depreciation is wholly dependent upon the length of life and the first cost of the machine. The depreciation costs as determined by the department's investigations are based on a first cost of \$500 and a life of 6.4 years for two-plow machines and of \$900 and seven years for three-plow machines. The depreciation cost for the two-plow outfit per year is given as \$78; for one day, \$2.41; for the three-plow outfit per year, \$120; and per day, \$4.53.

### Fuel and Oil Costs.

Fuel and oil costs are dependent on the amount of work done, and while this cost may be large for the season it will not be out of proportion to the work done. From the same investigations fuel and oil costs for the two-plow outfit was given as \$89 per year and \$3.06 per day; for the three-plow outfit \$108 per year and \$3.70 per day. Interest on the small machines amounts to \$17 per year and on the larger ones \$31. Repairs and upkeep costs are influenced by the care and attention given to the tractor and the ability of the operator to do his own repairing.

The annual depreciation, repair and interest charges do not increase in proportion to the amount of work done per year; consequently the daily cost of these items will be least for machines which do the greatest amount of work.

### ROOM FOR MORE PUREBREDS

Indiana County Agent Uses Figures to Show Farmers Need for Live Stock Improvement.

A census taken by County Agent Watson in Floyd county, Indiana, in 1921, showed that the county had 2,177 milk cows, of which but 90 were purebred and registered. There were 100 dairy bulls in use in the county, of which but 10 were registered. The census also showed that but 281 cows were bred to purebred bulls during the previous year.

The county agent used these figures in a county better-stock campaign, to show the farmers of the county the need for improvement in their live stock breeding operations. As a result of the campaign eight purebred bulls were bought and five scrub bulls were sold to the butcher.

### BEE DOES IMPORTANT WORK

Great Factor in Successful Fruit Production and Orchardists Recognize Value.

Bees are a very great factor in successful fruit production, and their value is recognized by orchardists. The work that bees do in cross-pollinating and fertilizing the flowers is a work which the orchard man could ill afford to do without. For that reason, if for no other, every precaution should be taken to protect the bees and allow them to perform their natural function, and produce not only profits in honey production for the beekeeper, but profits in the fertilization of the blossoms on the fruit trees of the orchard man.

### WEED SEEDS CAUSE TROUBLE

Many Noxious Plants Live in Soil for Years and Are Ready to Grow if Allowed.

Most crop seeds will not live over from one season to another in the soil, but many kinds of weed seeds will, so every time you sow a seed seed in place of a crop seed you are sowing future as well as present trouble. Many weed seeds will live in the soil 10, 20 or 30 years, or even longer and be ready to grow when they are given a chance.—Bureau of Plant Industry, U. S. Department of Agriculture.

### Adapted to Any Soil.

Repe is usually adapted to any soil that will grow a good crop of corn.

### Both on Sinking Craft.

A fool who farms or a farmer who fools are both on a sinking craft.

## SILVERMINE OAT IS EXTENSIVELY GROWN

Very Popular in Many of the Northern States.

Ranks First in Estimates Made by Department of Agriculture—Red Rustproof, Raised in South, Is Given Second Place.

(Prepared by the United States Department of Agriculture)

Silvermine, a midwestern white oat very popular in the Northern states, is the variety of oats most extensively grown in the United States, according to estimates made recently by the United States Department of Agriculture in determining the extent and distribution of the different oat varieties. Silvermine is grown on about one-sixth of the total acreage, or 6,304,000 acres, as determined on the basis of the last census—1919. Only 11 of the commercially important varieties were grown on more than 1 per cent of the total acreage.

Red Rustproof, the variety most commonly grown in the Southern states, ranked second with 15.3 per cent of the total acreage, or 6,015,000 acres. Swedish Select, a midwestern white variety, introduced by the department 25 years ago, was grown on 3,632,000 acres. Kherson and the closely related or identical variety Sixty Day, early oats from southern Russia, were grown on 3,350,000 acres, while two selections from Kherson, Albion (Iowa No. 103), and Richland (Iowa No. 505) were grown on 1,500,000 and 11,000 acres, respectively. These two selections were developed in co-operative experiments conducted by the department and the Iowa agricultural experiment station. Green Russian oats were grown on 2,228,000 acres, and White Tanager, a late sowing oat, on 2,227,000 acres. Other varieties grown on from 1 to 2 per cent of the total acreage were Early Champion, Burt and Lincoln.

### HOW TO CLIP WING OF FOWL

Cornell Experiment Station Outlines Plan for Performing Operation Without Disfiguring

When fowls won't stay inside the fence, it may be to be clipped, to protect the garden and flower beds. The Cornell experiment station recommends the following plan for clipping the wing so it will stay clipped without disfiguring the fowl:

Remove a few feathers around the second joint. Spread the wing out to its full width and you will see just beneath the skin on the outer edge of the second joint a small white ligament or cartilage. Insert a small knife blade under the ligament and cut it in two, pulling upward and outward on the knife. Then cut a piece from the end of the cartilage one-sixteenth of an inch long. This may be done with a pair of scissors or with a knife. The object in removing this section is so the cartilage will never grow together again. Since no major arteries are encountered, you will find this a very simple and practically bloodless operation.

### FOR IMPROVING LIVE STOCK

New Compilation Just Prepared by Bureau of Animal Industry on Purebred Sires.

"Methods Used Successfully in Bringing About a Wider Use of Purebred Sires" is the title of a new compilation just prepared by the bureau of animal industry, United States Department of Agriculture. The material is a six-page summary of various plans used successfully in different parts of the country to improve the quality of breeding stock kept on farms. The compilation is distributed in connection with the "Better Stock" campaign and may be had on application to the bureau of animal industry.

### ASPARAGUS NEEDS GOOD BED

Should Be Located Where Soil is Deep and Where Cultivation Will Not Interfere.

No spot in the garden is more valuable than the asparagus bed. It should be located where the soil is deep, and where it will not be in the way when cultivating other crops, as it is permanent. Because it is to stay in the same spot for years the bed should be well prepared before it is planted. Dig out deep and mix well with partially rotted manure so there will be ample humus in the lower soil, and then plant the roots—which should be two years old at least—spreading them evenly all around, and covering with five or six inches of soil.

### PUREBRED SIRES WIN FAVOR

Encouraging Increase Reported in Number of Improved Bulls in Wisconsin County.

In 1918 only 329 of the 1,257 bulls in service in Winnebago county, Wis., were purebred, according to reports to the United States Department of Agriculture. After two years of better-stock work the number of purebred sires had increased to 645. At the end of the third year the assessor's records showed 777 purebred bulls in the county. This record shows that at the beginning of 1922 over half of the bulls in service in the county were purebred.

### STRAW IS BIG POTATO HELP

Covering of Four to Six Inches Is Applied When About Time for Vines to Appear.

When potatoes are grown under straw, they are planted and covered as if they were to be cultivated, except they do not need to be covered quite so deep. The straw should not be applied until about time for the potato vines to show above ground, and it is then applied from four to six inches in depth.

## "IT SAVED MY LIFE"

The Feeling Tribute of a Woman to PE-RU-NA

READ HER LETTER—IT WILL DO YOU GOOD

"Pe-ru-na has been a Godsend to me. I feel safe in saying that it saved my life. I was all run down and miserable when I commenced taking Pe-ru-na, but am on the road to recovery now. I cannot thank you too much."

MRS. CHARLES ANSPAUGH, R. F. D. No. 7, Lagrange, Indiana.

A letter like this brings hope and the promise of health to every sick and suffering woman. Perhaps you know what it means to have your daily duties a misery, every movement an effort, stomach distended, pains in the head, back and limbs most of the time, nerve raw and quivering—not a moment day or night free from suffering. Do as Mrs. Anspaugh did. Take Pe-ru-na. Don't wait but start right away.

Time Will Tell. He—"Why, at this theater is the orchestra concealed?" She—"Why? Just wait until you hear it play!"

## SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper-advertisement.

### The Less the More.

Husband—Dear me. Another dress? Wife—But it's only a little one, dear.

Husband—Well, it's my experience that the less there is of your frocks the more they cost.

### WHY TAKE LAXATIVES?

Discovery by Science Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent medical authority.

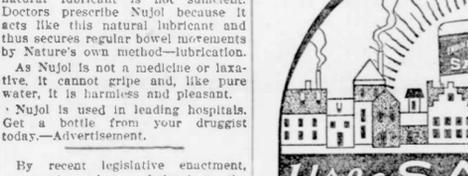

Science has found a newer, better way—a means as simple as Nature itself.

In perfect health a natural lubricant keeps the food waste soft and moving. But when constipation exists this natural lubricant is not sufficient. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication.

As Nujol is not a medicine or laxative, it cannot grip and, like pure water, it is harmless and pleasant.

Nujol is used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

By recent legislative enactment, women have been admitted to the practice of medicine in India.

Use SAPOLIO

## Facts About Australia.

In physical type the Australian tends to be long, lanky, alert, vigorous and choleric. The speech is neither American nor English, though there is a touch of Yankee nasality and of the flat Middle Western accent, says Charles F. Thwing, in his book, "The Human Australasia." As for standards of physical comfort and personal happiness, they are among the highest in the world. The typical home in Australia and New Zealand is a five-room bungalow, on a spacious plot, with flower and vegetable gardens. The climate has a Mediterranean softness, inviting to outdoor sport the year round.

### Window Boxes.

If you whitewash the inside of your wooden window boxes before putting in the plants you will prevent insects and also preserve the box.

It is small choice between one who grieves all the time and one who scolds all the time.

## Children Cry for

### MOTHER! Fletcher's Castoria is a harmless Substitute for Castor Oil, Paregoric, Drops and Soothing Syrups, especially prepared to relieve Infants one month old to Children all ages of

Constipation Wind Colic To Sweeten Stomach Diarrhoea Regulate Bowels

Aids in the assimilation of Food, promoting Cheerfulness, Rest, and Natural Sleep without Opiates

## The Chicago and North Western System, in Maintaining the Best Possible Service to Shippers, Has Its "Freight Service Committees" Constantly at Work on Every Division of the Road, Co-operating With Its Patrons

The membership of these Committees includes all classes of employes, division officers, conductors, brakemen, engineers, etc. It is a problem demanding team work—the reducing of damage claims to the lowest possible minimum.

Without the splendid work of the North Western employes, the enviable record of 1922 in the reducing of the causes of damage claims would never have been made. Not only those on the committees, but system employes generally are co-operating in service to shippers and savings to the carrier.

As an illustration of the interest taken in this work the cartoon is shown below as drawn by a Blacksmith's Helper in one of the System shops. It is typical of the appeals of employes to their fellow workers, and best expresses the pioneer spirit of the road that ran the first locomotive out of Chicago seventy-five years ago—the Pioneer.

Shippers interested in the details of the work of this Freight Service Committee of the Chicago and North Western Railway can obtain full information from any agent of the Company.

WOODPECKER, SPARE THAT TREE! This bird has been hanging around since we planted the acorn. He started his dirty work when this "buz-zard" was a little bush, and he seems to have grown up with it, but we are not going to allow the power to put him out. Thought and action are our best weapons. We may blow away a tall feather, or the top of his toptop, but he still hangs around. Let's load with buckshot for 1923 and blow the joy-killer, feathers, bill, bird and all, into smithereens.

# Royal Cords Rank First United States Tires are Good Tires

**ANNOUNCEMENT**—There was a shortage of Royal Cord Clincher Tires last year. Production is doubled this year.

Demand more than justifies this increased production. Whenever you have a chance to buy a Clincher Royal—take it.

#### FORD SALES PASS THE HALF MILLION MARK IN 120 DAYS

More than half a million Ford cars and trucks sold in 120 days. That is the astonishing record just established by the Ford Motor Company, eclipsing all previous sales figures and emphasizing more strongly than ever the right of the Ford to the title "The Universal Car."

From January 1 to May 1 sales of Ford cars and trucks in the United States reached the enormous total of 561,544, nearly twice the number sold at retail during the same period a year ago when the total was 283,752.

Even with its huge production facilities, now operating on a schedule in excess of 6,500 cars and trucks a day, the company is unable to keep up with the unprecedented demand.

April set a new sales record for the month, just as has every other month this year, and was the thirteenth consecutive month in which sales have run over the 100,000 mark.

Sales during April totaled 165,582 Ford cars and trucks, 50,000 more than were delivered in the same month last year when 115,282 retail deliveries were made.

New production records were established by the Ford Motor company for the week ending Tuesday, May 8, during which a total of 39,053 cars and trucks were turned out for domestic use, according to announcement by the Ford News. This exceeds by 192 the previous high record set the week before.

Daily production records went to a new high mark Friday, May 4, when 6,590 cars and trucks were assembled, beating the record of 6,573 established on Tuesday, April 17.

Fordson tractor production for the week ending Tuesday was 2,578. During the same week the Lincoln division of the Ford Motor company produced 176 Lincoln cars.

#### FIVE CORNERS

Miss Florence Senn was a Fond du Lac caller Saturday.

Jake Ferber and family visited with relatives at Theresa Sunday.

Miss Emma Volz spent the past week with relatives at Milwaukee.

Alphonse Volz of Milwaukee spent Sunday with the Misses Emma and Theresa Volz.

Mr. and Mrs. Oscar Glass and family spent Sunday with Mr. and Mrs. Fred Schleit and family.

Mrs. Hugo Volke and son Erwin visited from Wednesday until Saturday with relatives at Milwaukee.

Mr. and Mrs. Wm. Ferber and daughter Delia visited at the William Schleit home Friday evening.

Mr. and Mrs. Peter Senn and family visited with Mr. and Mrs. Elmer Grantman at Lomira Sunday.

Mr. and Mrs. Peter Senn and daughters Verna, Almedia and Marcella spent Thursday with relatives at West Bend.

Mr. and Mrs. Gerhardt of Campbellsport and Mr. and Mrs. Math. Thill and Clarence Schrauth of South Elmore spent Thursday at the Charles Rauch home.

Mr. and Mrs. John Kusster and family, Mrs. John Kusster Sr. of West Bend, Henry Miller and George Weber of Slinger visited with the Wm. Schleit family Sunday.

Mr. and Mrs. John Firks of New Fane, Mrs. Emma Krueger and family, Mr. and Mrs. Wm. Krueger and son and Earl Dreher of Kewaskum spent Thursday evening with Mr. and Mrs. L. Larson and family.

#### ELMORE

Henry Damm of Fond du Lac was a caller here Sunday.

Peter Boegel spent Thursday with Adam Schmitt here.

Arnold Thill was a business caller at Milwaukee Thursday.

Roland Boetche and family visited Sunday at Kohlsville with relatives.

Mrs. John Struebing and children spent Sunday with the Otto Schmitt family.

Mr. and Mrs. Adam Schmitt visited Sunday evening with the C. J. Struebing family.

Mr. and Mrs. Joe Gruenwald of Milwaukee called on the C. J. Struebing family Sunday.

Mr. and Mrs. Frank Damm of Fond du Lac called on Mr. and Mrs. Frank Matthews Sunday.

Mr. and Mrs. Wm. Senn and children visited Saturday afternoon with the E. Reinhardt family.

Mrs. Otto Backhaus and son Otto visited Sunday afternoon with Oscar Backhaus and family.

Misses Ella and Leona Backhaus of Bondel spent Saturday and Sunday at the Wm. Geidel home.

Art. Diels and family, Mr. and Mrs. Henry Techtman of West Bend visited Sunday with Mr. and Mrs. Frank Scheid.

Fred Kell and family of Kohlsville and Mrs. Henry Brandt and son Arthur of Wayne spent Sunday with Mr. and Mrs. Erwin Brandt.

Mr. and Mrs. Christian Backhaus and daughter Ione of Kewaskum and Mrs. Henry Gargan and children spent Thursday with Otto Backhaus and family.

#### NOTICE OF ADJOURNED ANNUAL SCHOOL MEETING

Notice is hereby given to the qualified Electors of Joint School District No. 5, of the Village and Town of Kewaskum, Washington County, Wisconsin, that the adjourned annual school meeting held May 3rd, 1923, has adjourned till the 1st. day of June 1923 at eight o'clock in the afternoon. Said adjourned meeting will be held in the High School room in the District School Building of said district. Dated May 14th, 1923.

L. D. Guth,  
District Clerk.

#### AUBURN

Mr. and Mrs. Alex Sook and son Elmer and Mr. and Mrs. Gust Dickmann motored to West Bend Sunday where they attended a birthday party given in honor of Bernice Schuur's second birthday.

As a result of installing water-works system, insurance rates for the city of Cedarburg will be lowered ten per cent.

# Chicago & North Western System C. & N. W. Ry. C., St. P., M. & O. Ry. Freight Rates and Valuation

Wide publicity has been given to the statement that the value of all the railroads of the United States does not exceed \$12,000,000,000, and that if such valuation had been used during the past three years in making rates all freight rates, including those on farm products, would have been materially reduced.

That statement disregards the railroads' right under the Federal and State Constitutions to earn a fair return on the value of their property, and denies the validity of the valuation made by the Interstate Commerce Commission.

It also disregards the fact that the railroads during the 34 months prior to January 1, 1923, did not earn 4 per cent on \$12,000,000,000, although authorized to earn 6 per cent on \$18,900,000,000.

If, however, a valuation of \$12,000,000,000 had been made the basis for rates instead of the valuation found by the Commerce Commission and the reduction had only applied to freight rates, that reduction could not have exceeded 2.1 per cent of the rates collected in 1922. This conclusion is emphasized by the following facts:

NET INCOME OF ALL CARRIERS FOR YEAR 1922	\$4,007,014,655
5 1/2% RETURN ON ASSUMED VALUATION OF \$12,000,000,000	776,665,960
EXCESS OF NET INCOME OVER THE RETURN ON THE ASSUMED VALUATION	86,665,960

A deduction of this excess of \$86,665,960 from the total gross freight revenues of \$4,007,014,655 would have reduced the gross freight revenues only 2.1 per cent. If this reduction of 2.1 per cent had been applied to freight rates, with no reduction in passenger fares or other charges, it would not, in fact, have increased the amount received by the farmer for his products.

#### GRAIN

A reduction of 2.1 per cent in freight rates means nothing to the individual shipper unless expressed in units with which he is familiar and be large enough to be recognized in commercial dealings. During the year 1922 the Chicago & North Western Ry. Co.'s average haul and rates on grain were as follows:

	Average Haul	Average Rates per Bushel	Reduction per Bushel
Wheat	197 miles	7.14 cents	1.5 mills
Corn	256 miles	7.25 cents	1.5 mills
Oats	210 miles	3.29 cents	0.7 mills

A reduction of 2.1 per cent in this company's freight rates would, therefore, have reduced its wheat rates 1 1/2 mills, its corn rates 1 1/2 mills and its oats rate 7-10 of one mill per bushel.

Experience shows that grain does not vary in price at country stations by less than one-half cent per bushel and ordinarily by not less than one cent per bushel. As a result, the assumed reduction in rates on corn and wheat of less than one-sixth of a cent per bushel would not have resulted in the increase of a single cent to the producer of grain.

#### LIVE STOCK

	Average	Reduction Rates per Cwt.	Reduction of 2.1%	Reduction per Animal, Cents
Cattle	240 miles	23 cents	4.9 mills	4.9
Hogs	210 miles	24 cents	5.0 mills	1.0
Sheep	352 miles	26 cents	5.4 mills	0.5

A reduction of 2.1 per cent would have reduced the rates on cattle less than five cents, on hogs one cent, and on sheep one-half a cent per animal, assuming cattle weigh 1,000, hogs 200 and sheep 90 pounds.

Such reductions mean little or nothing to the average producer of farm products, but a loss to the railroads of over \$86,000,000.
