NUMBER 31

NEW CALF CLUB BEING LAUNCHED

A new calf club for Washington County is being launched this week by County Agent, Milton H. Butten. The calves from the club will all be shown at the Washington County Fair and an effort will be made to show at least 20 at the National Dairy Show that will be held at Milwaukee this year. The breed and members of the club are as follows: The club will be limited to children between 10 and 18 inclusive. Calf must be owned by club member. Calf must be fed and cared for by club member. Record books sent out from County Agent's office must be kept from May 1 to September 1. Calf must be born after March 1. Calves are to be shown at the Washington County Fair. Calf must be shown by the club member that furnished free by the association. Grade and Pure bred calves show in separate classes. Grade calves must be sired by a registered bull. Premium awards will be made on a sliding scale as follows:

Pure Breeds
No. of entries 1-5, 1st, \$5.00; 2nd, \$3.00; 3rd, \$2.00; 4th, \$2.00; 5th, \$1.00
No. of entries 6-9, 1st, \$8.00; 2nd, \$7.00; 3rd, \$6.00; 4th, \$5.00; 5th, \$4.00
6th, \$3.00; 7th, \$2.00; 8th, \$1.00; 9th, \$1.00

Grade Entries
No. of entries 1-5, 1st, \$3.00; 2nd, \$2.00; 3rd, \$2.00; 4th, \$1.00; 5th, \$1.00
No. of entries 6-9, 1st, \$7.00; 2nd, \$6.00; 3rd, \$5.00; 4th, \$4.00; 5th, \$3.00
6th, \$2.00; 7th, \$1.00; 8th, \$1.00; 9th, \$1.00

Calves will be exhibited by breeds. One breed not showing against another here.

A special prize of \$12.00 will be awarded to the club member on the following basis: Having best cared for calf 50%. Exhibiting calf in show ring, 50%.

All boys and girls interested in the club are requested to write County Agent, Milton H. Butten, West Bend, Wis.

VILLAGE HAS NO DELINQUENT TAX

The village of Kewaskum goes down in the history of the county, as having no delinquent tax payers, on either real estate or personal property. The list as given out by County Treasurer Kuhnaupt, and which appeared in the columns of the West Bend Pilot, is as follows:

Name	Real Estate	Personal Property
Addison	\$48.62	\$11.90
Barton	2,070.70	661.13
Erin	1,215.54	95.87
Farmington	1,027.03	174.88
Germantown	110.08	22.58
Hartford	776.52	128.53
Jackson	115.18	5.91
Kewaskum Town	44.52	68.32
Polk	1,191.22	168.86
Richfield	316.23	10.92
Trenton	431.21	57.25
Wayne	131.81	53.22
West Bend	676.99	59.49
Village Jackson	289.52	
Village Slinger	298.46	22.80
City Hartford	3,536.99	461.57
City West Bend	1,500.49	148.76

TWO ORCHARD SPRAY RINGS FORMED

The orchard owners in at least two sections of Washington County are going to have clean fruit for sale this year.

At the pruning demonstration, conducted by Conrad Kitchner, University of Wisconsin fruit specialist, and held at Mrs. H. Seidmann's, town Farmington, Friday afternoon, a spray ring composed of the following members was formed: Ray Yahr, Joe Bell, Peter J. Schumann, Walter Seidmann, Pat Foley. These orchard owners have agreed to procure a power sprayer and spray their orchards under the direction of the County Agent and the Horticultural Department of the University of Wisconsin.

Besides this ring, Jos. F. Morawetz, living near West Bend, has ordered a clean power sprayer, with which he will spray his orchards and his neighbors.

Washington County fruit is as good as any we can buy from other states and the fact that orchard owners are beginning to take care of their orchards is good news to all residents of the county.

ELECTION HERE HOTLY CONTESTED

The election in the village and town of Kewaskum, was hotly contested on Tuesday, a large number of voters turned out to cast their vote. In the village D. M. Rosenheimer, was elected president, defeating his opponent by a narrow margin. Geo. Kippelman and Edwin Rommel were elected trustees, and N. W. Rosenheimer was re-elected supervisor. Other candidates elected are: For clerk, S. N. Casper, no opposition; treasurer, Wm. P. Quandt, no opposition; assessor, Frank Quandt, no opposition.

In the town of Kewaskum, the only opposition was for treasurer for which Albert Uelmen was elected. Other candidates are: Chairman, Gerhart Fellenz; supervisors, A. B. Rathbun and Frank Hillmes; clerk, Adolph Habel; assessor, Nic. Rodenkirk; Justice of the Peace, Fred Klein, and constable, Wm. Bremser.

Returns from villages and precincts are as follows:

TOWN OF OSCOLA
Chairman—Charles Twoling.
Clerk—Arnold Sook.
Treasurer—Charles Voigt.
Supervisors—Henry Dies and Hy. Ranthun.
Assessor—Earl Hennings.

TOWN SCOTT
Chairman—John Sauter.
First supervisor—J. W. Miller.
Second supervisor—Oswald Voigt.
Treasurer—Frank Hell.
Assessor—Adolph Voigt.
Justice of the Peace—Oscar Koch.
Constables—Paul Leifer, Ernst Bremser, George Krautkrauer.

TOWN OF AUBURN
Chairman—Stephen Klein.
Clerk—Frank Schultz.
Assessor—Henry Oppermann.
Supervisors—Jos. Schlatweiler and Art. Buss.

TOWN OF ASHFORD
Chairman—Berth Thelen.
Treasurer—Fred Hammann.
Assessor—F. J. Barth.
Constable—Ed. Scheid.

CAMPBELLSPORT
President—Jacob Kleinhaus.
Trustees—E. P. Messner, Joseph Smith, A. J. Sukawaty.
Clerk—T. F. Flanagan.
Assessor—Peter Uelmen.
Supervisor—H. A. Wrucke.
Treasurer—Jacob W. Schaefer.
Justice of the Peace—Wm. Ferber.
Constable—John Schaefer.

WAYNE
Mrs. Geo. Kibbel, Sr., visited Tuesday with Emil Backhaus and family.
Rev. Emil Leifer, Monday afternoon with John Forster and family.
Mrs. Wm. Backhaus, Sr., received the sad news of the illness of her brother, Peter Terlinden at Allenton.
The sudden death of Mrs. John Beisler, which occurred at her home Wednesday, came as a great shock to many friends here.
Quite a number of neighbors spent Thursday evening with Ph. Menzger and family to help Mr. Menzger celebrate his birthday anniversary. At midnight a delicious lunch was served by Mrs. Menzger, after which the guests departed for their homes wishing him many more such happy birthdays.

SLEET STORM DOES HEAVY DAMAGE

The heavy sleet storm which swept over this state, did considerable damage to telephone, telegraph and electric light lines. The storm started about seven o'clock last week Friday evening, and lasted all night and practically all day Saturday. The Wisconsin Telephone company suffered a heavy loss. It is reported that fifteen poles were broken off between Kewaskum and West Bend, and many more from West Bend to Menomonee Falls. Communication to the south was completely shut off. Between Kewaskum and Campbellsport, only one pole was reported broken off, and wires cut at several places. The Wisconsin Union Telegraph Co., also suffered a heavy loss, as many poles were broken between this village and Menomonee Falls. Trains were delayed for several hours Saturday and Sunday, due to communication being shut off between stations.

The Theresa Union Telephone Company had considerable damage done to their lines. The greatest damage was done near Theresa, where many poles were broken down.

The Badger Public Service Company suffered a heavy loss by damage done to their lines, and as a result Kewaskum was again in darkness from four o'clock Saturday morning until Monday evening.

DUNDEE
Dan Calvey and daughter Ruth were Campbellsport visitors Tuesday. John Burke and Ed. Keuper of Parkville were callers here Saturday afternoon.
Olga Schellhaus and Lucie White of Plymouth spent the week-end at home.
Mr. and Mrs. Aug. Wehn spent Sunday evening with Mr. and Mrs. Joe Brown.
Edgar Romaine of New Prospect was a pleasant caller here Saturday afternoon.
The results of last Tuesday's election can be found on the front page of this issue.
Mr. and Mrs. Carl Dins and son Carl visited Friday with Mr. and Mrs. Oscar Hintz.
Clem Browne, Marion Gilroy and Raymond Thayer were Fond du Lac visitors Friday.
Marion Gilroy, Clarence Daleague and Clara Thayer were Kewaskum visitors Thursday.
Math. Schuh of Milwaukee visited from Sunday till Wednesday at his home here at Long Lake.
Jas. Mulvey of Fond du Lac came here Monday for several days' visit with his daughter, Mrs. Joe Brown.
Aug. Krueger and Joe Browne and Mrs. Emilie Krueger and daughter Emilie were Campbellsport callers last Friday.
Mr. and Mrs. Geo. Henauer of Milwaukee came here Sunday to their home at Long Lake where they will spend the summer months.
The following were entertained at supper at Edgar Rommel's home Sunday evening: Mr. and Mrs. Geo. Romaine and Mrs. Ann Romaine, Mr. and Mrs. John Krueger and Mr. and Mrs. Elwyn Romaine and family, and a number of friends from Kewaskum.

LOCAL MEN WIN PRIZES AT DOG SHOW

Dr. Carl Hausmann and Joseph Eberle, were at Milwaukee last Sunday, where they attended the Wisconsin Kennel Club show, held at the Auditorium Saturday and Sunday. The doctor showed two dogs and Joe one. The former won eight prizes. The dogs known as Nophabe Kewaskum and Nophabe Terry won 1st Novice, 1st American Bred, 1st Limit Winner, Dog and Reserve Winner. A special green ribbon was awarded Terry, with three points toward the championship. Joe Eberle's dog won 1st Puppy prize, on Friday and Saturday of last week. The doctor showed his dogs at the Chicago Kennel Club show, where they won two prizes, 1st Novice and 1st American Bred. Dogs were entered in the show from all parts of the United States. To win the number of prizes above stated, is indeed quite an honor. We congratulate the doctor and Mr. Eberle on their success.

CAMPBELLSPORT
Paul Braun of Eden was a caller here Tuesday.
Joshua Dickman transacted business at Eden Tuesday.
Miss Anna Loehner was a Fond du Lac caller Wednesday.
Miss Lillian Bauer of Chicago spent a week with home folks.
Mrs. Julia Wyse returned Tuesday from a two weeks' visit at Milwaukee.
Mrs. Neul McIntyre of Fond du Lac is visiting relatives here since Monday.
Mr. and Mrs. Carl Collins of Milwaukee were pleasant village visitors Wednesday.
John Schaefer and Wm. Schaefer were business callers at Fond du Lac Wednesday.
Mrs. Philip Hausner and Mrs. Martha Condehl visited Wednesday at Fond du Lac.
Aaron Rudolph returned home on Monday, after several months' stay at Milwaukee.
R. P. Jaeger, Adam Jaeger and Peter Jaeger spent Monday at Fond du Lac on business.
Miss Marjorie Blackbird of North Fond du Lac spent a week at the Emmet Curran home.
Frank Ketter underwent an operation at the St. Agnes hospital, Fond du Lac, Wednesday.
Mrs. Charles Cole left Wednesday for several days' visit with her parents at Fond du Lac.
Wm. Schroeder of Larson, Wis., visited several days here with Mr. and Mrs. Art. Schroeder.
Mrs. Wm. Campbell returned home Tuesday from a two weeks' visit with relatives at Milwaukee.
Mrs. J. D. King of Janesville is a guest of the home of Mrs. Kathryn Theisen and daughter Ann.
Charles Seering returned Wednesday from Lily, Wis., where he spent the past five months in camp.
Mrs. Anna Mahoney returned home Wednesday from several weeks' visit with relatives at Milwaukee.
Mrs. Henry P. Scholler returned to her home at Random Lake, after several days visit here with relatives.
The Royal Neighbors will hold an apron and bakery sale at the Sweet Shop on Saturday afternoon, April 5, from 2 to 5 o'clock. Mrs. Geo. Yankow, Mrs. Ernest Klocke, Mrs. William Martin and Miss Irene Klocke have charge of the arrangements.

CIRCUIT COURT ADJOURNS

Judge Davison adjourned the present term of circuit court last Thursday until the latter part of this month, when the remainder of cases of the jury calendar will be disposed of. The following cases were tried last week Wednesday: Martha Drake vs. Chester N. Drake, both of Milwaukee, DeGrace was granted the plaintiff. Katharine Lang vs. Fred Wolfram and Sylvia Wolfram, Anthony Ziegler vs. Joseph Bernstein et al., and Charles Lewis vs. Walter C. Schroeder.

NEW PROSPECT
Wm. Becker was a business caller at Campbellsport Friday.
Edgar Bowen of Dundee called on friends in the village Friday.
Mr. and Mrs. Rich. Trapp were New Fane callers Tuesday afternoon.
H. S. Oppermann of New Fane was a pleasant village caller Monday.
O. M. Johnson and son Elroy were to Campbellsport on business Monday.
Miss Fittler of Campbellsport is spending some time with the John Tunn family.
Mrs. Rich. Trapp and son Gerhart called on Mr. and Mrs. Philip Koch at Lake Seven Tuesday.
Mr. and Mrs. Philip Koch of Lake Seven visited Saturday with Mr. and Mrs. W. J. Romaine.
Aug. G. Bartel, W. A. Kuert and E. A. Bartel were Kewaskum business callers Tuesday.
Mrs. Walter Jandke and son Elroy were Kewaskum and New Fane business callers Tuesday.
Mr. and Mrs. Geo. H. Meyer, daughter Janette and Mrs. J. P. Uelmen were callers at Kewaskum Tuesday.
Miss Condehl Bartel and August Bartel, Jr., of Campbellsport spent over Sunday with their parents here.
Mr. and Mrs. Herman Molkenhine spent Friday with Mrs. Molkenhine's sister Mrs. Minnie Wesenberg at Kewaskum.

WEEKLY TOLL OF THE GRIM REAPER

MRS. JOHN BEISLER
After a lingering illness of four years' duration, death summoned Mrs. John Beisler (nee Mary Gindt) at her home at St. Kilian on Tuesday, April 2, 1924, at 3 a. m. Mrs. Beisler was born Feb. 14, 1864, at Lomira, Dodge county, coming to her present home at St. Kilian in 1888. On May 21, the same year, she was married to John Beisler, who preceded her in death on Dec. 9, 1920. Eight children were born of this union, of whom the following survive: Rosa (Mrs. Chadley Eder) of the town of Kewaskum, John, Alvin, Veronica, Nick, Peter, and John, all at home. One son Edward died 14 years ago at the age of four years. Besides these she leaves two brothers, Jacob Gindt of LeRoy and Nick, P. Gindt of Lomira, two grand children, Clarence and Alvin, her daughter Deceased was a kind mother, a true friend to all who had the pleasure of making her acquaintance. Her absence will be keenly felt by her many friends and relatives. The funeral will be held today, Saturday, April 5, with services in the St. Kilian church. Rev. John Reichel will officiate. Burial will be made in the adjoining cemetery.

CARD OF THANKS
We, the undersigned desire to express our heartfelt thanks to all our neighbors, relatives and friends for the kind sympathy shown us in our late bereavement, the illness, death and burial of our beloved mother, Mrs. John Beisler. To the pall bearers, for the beautiful floral offerings, and especially to Rev. Reichel for his consoling words. To all who loaned teams and who attended the funeral. The Surviving Children.

ATTENDED FUNERAL OF HIS NEPHEW
Valentine Peters, was at Barton last Saturday, where he attended the funeral of his nephew, Herbert F. Peters, son of Mr. and Mrs. Theodore Peters of the town of Farmington. The young man met a tragic death, last week Wednesday, by fumes of escaping coal gas, at Milwaukee, where he roomed in the upper flat of Mrs. Frances Steimle's residence 900 1/2 Island Ave. When Mrs. Steimle called Mr. Peters in the morning, and received no answer, she walked to his room and found him and his roommate Roman Bohm unconscious. Medical aid was immediately summoned. The doctor succeeded in resuscitating Mr. Bohm, and after working three hours over Peters, signs of life returned. The unfortunate man was then removed to the Milwaukee Maternity and General Hospital, where he passed away at eight o'clock Wednesday evening of congested pneumonia, following asphyxiation.

Upon investigation it was found that the grate of the hot air furnace, which furnished the heat for the coal gas to enter the hot air furnace, had broken down, allowing the coal gas to enter the hot air furnace and get into the room. Mr. Peters was about 25 years old, and was employed by his uncle Ambrose H. Peters, a carpenter contractor. The deceased is survived by his sorrowing parents, by three brothers, Ed of Milwaukee, Ted of Chicago and Art, at home, and one sister, Sister Albana of St. Mary's Convent, Milwaukee.

BECHWOOD

People in this vicinity are busy hauling logs.
Albert Lohse was to Adell Tuesday on business.
John Held called on relatives at Batavia Sunday.
Art. Klein transacted business at Adell Tuesday.
Miss Elda Flunker was to Milwaukee Saturday on business.
Mrs. A. Weinbauer transacted business at Kewaskum Monday.
Mrs. Fred Hintz Sr., visited with Mrs. John Held Friday afternoon.
The election at the town Scott hall was very largely attended, Tuesday.
Mrs. Herman Krahn called on Mrs. Frank Schroeter Monday afternoon.
Mrs. Herman Krahn visited with Mrs. Frank Schroeter Thursday afternoon.
Oscar Bartel is employed at the Mrs. Chas. Koch place for the coming months.
Miss Emma Held spent Wednesday evening with Mrs. F. Schroeter and daughter.
Mrs. John Sauter and Florence Schultz called on Mrs. John Held on Wednesday.
Arno Weinbauer and Edgar Sauter delivered a load of calves to Adell for Mrs. Chas. Koch Wednesday.
Mrs. Chas. Koch entertained several of her lady friends at a quilting bee Friday afternoon and evening.
Miss Emma Held spent a few days visiting with friends and relatives and also a few days at her home in Batavia.
Mr. and Mrs. Chas. Firme and Miss Emma Firme and Mrs. Herman Krahn spent Sunday afternoon with Mr. and Mrs. John Held.
Lenora Bartel returned to her home Monday, after having been employed at the home of Mrs. Chas. Koch for some time.
Arno Weinbauer returned to his home Monday evening, after having been employed at the Mrs. Chas. Koch place for the past week.
Aug. Butke, Elmer Stance, Lenora Bartel and Mrs. J. H. Janssen and family called on Mrs. H. Glass and family Thursday evening.
Miss Ethel Herres and Kermosa Kuhn were pleasant callers at the home of Mr. and Mrs. Herman Schultz and daughter Florence Wednesday evening.
Another big snow storm visited our vicinity Saturday and Sunday. On Friday evening it began to rain and the temperature dropped to freezing point, causing such damage to telephone and electric lines in this and neighboring villages. In spite of this winter remedy had been expected that several villages would have been laid.

ACQUITTED OF MURDER CHARGE

The hearing of Percy Paul, telegrapher for the Soo line at Colgate, in the town of Richfield, who was charged with manslaughter in connection with the death of Herman Schall of this village on Feb. 28, was held before Justice Hayden in the council chamber in the city hall last Saturday afternoon. Paul, it was alleged, struck the blow which felled Schall, the late father of the late Mrs. Schall at Stern's store at Colgate and breaking his neck. A coroner's jury investigated Schall's death and rendered a verdict of accidental death. Some time later, however, Paul was placed under arrest by Sheriff Benke and put under bonds of \$5,000, to appear for a preliminary hearing before Justice Hayden on March 29. Twelve witnesses were examined and as the testimony brought out at the hearing was favorable to Paul, the charge against him was dismissed.—West Bend Pilot.

CEDAR LAWN

Alice Backhaus spent Sunday at the P. A. Kraemer home.
Lorina Damm visited a few days at Fond du Lac with relatives.
Miss Johanna Urban is engaged at the Mission House at Franklin.
Leo and Geo. Gudex looked after business at Oshkosh Tuesday.
Mrs. John Hughes and family visited the Jacob Scheid family Sunday.
Mr. and Mrs. Gust. Urban visited with the Jake Scheid family Sunday evening.
P. A. Kraemer took a load of people from here to Ashford Tuesday, where they voted.
Mr. and Mrs. John Damm spent Sunday with the E. gene Glass family at Campbellsport.
Frank Scher was taken to St. Agnes hospital, Fond du Lac, Tuesday, where he is receiving treatments for throat trouble.

WALCOUSTA

Will Thompson went to Fond du Lac Wednesday.
Almon Bustaff was a business caller at West Bend Tuesday.
Miss Irene Vandenberg spent Sunday at her home in Eden.
Will Wachs delivered hoes to market at Campbellsport Wednesday.
Alvon, Harold and A. C. Busler were Campbellsport callers Monday.
Mr. and Mrs. Richard Hornburg and Mrs. Oscar Bartel were Fond du Lac callers Friday.
Miss Schaefer is a daughter of Fred Schaefer, formerly of this village, and is now here. The Statesman joins her many friends in wishing her and her partner an abundance of success in their new undertaking.

FORMER KEWASKUM GIRL OPENS ART STUDIO

The Studio Art Shop will open for business next Saturday morning, April 5, under the management of Miss Helen Schaefer and Mrs. Ernst G. Franckenberg, the shop to be located over the Schaefer's Mustard Store. The ladies have purchased a stock of goods which they are sure will please the ladies of this city and vicinity. For the card or brochure party they have a big assortment of beautiful gifts, including handkerchiefs, handkerchiefs, fancy towels, Modern dolls, other fancy items, a fine line of children's clothes, ranging from infants to eight years, hand painted china, lamp shades, doll lights and practically everything in the gift line. The ladies will handle house made baking and candies. Miss Schaefer and Mrs. Franckenberg will also give instructions in china painting.—West Bend News.

Additional Local

Geo. Kippelman was a Milwaukee visitor Thursday.
Mrs. Geo. Kippelman spent Thursday at West Bend.
Mrs. Rosa Bauer spent Thursday with relatives at Fond du Lac.
Mrs. Ann Harter of the town of Auburn spent several days of this week in the village.
Edu. Wagner of Milwaukee visited with Dr. and Mrs. Geo. F. Brandt and family here Thursday.
Otto Graf was at Milwaukee last Sunday, where he attended the Kennel show at the Auditorium.
Mrs. Catherine Harter is at present spending several weeks with relatives and friends at Fond du Lac.
The Kewaskum Aluminum Company had a large sign erected on the roof of the factory building, this week. The sign gives the company's name, and extends the full width of the building, with letters three feet high. It is nice, neat and artistically gotten up and can be read from a distance.

METHODIST EPISCOPAL CHURCH (West Bend)—1854-1924

Re-opening and Re-dedication April 6th.
10:30 Dedicatory sermon delivered by Rev. H. C. Logan, D. D., Milwaukee. An hymns and special music by the choir, J. T. Bryant, director.
Rev. W. W. Adams, Organist. Male voices and orchestra.
2:30 platform service. Dr. H. C. Logan, presiding. Speakers, Rev. C. Rappert, Rev. A. C. Ott, West Bend, Rev. W. W. Adams, Oshkosh. Male voices and orchestra.
6:30 Evening League, 7:30 Sermon by Rev. Alfred Hoad, Chalmers, Wis. Music by Junior choir and orchestra.
Lenten services will be held every Sunday until Easter Day. Commencement of the Lenten season will be celebrated on Good Friday evening.
A friendly welcome extended at all these services.
W. J. C. Perry, Pastor.

AGED WANDERER IDENTIFIED

—Fred Koen, aged 84, the man found lying in the road near the Charles Galt farm, Mayville, one evening last week, has been identified according to Sheriff Fred W. Schlanck. Koen was held at the Police house at Mayville until his identity could be determined. Sheriff Schlanck received information from two sources as to who the man might be. A woman in the west part of the city stated that the aged man had stayed at her house on Sunday last few weeks. The woman said she knew him and that he had lived on a farm near Campbellsport where Mrs. Edith Vandenberg lives. Mrs. Vandenberg is said to have worked at Koen's home in Milwaukee, Koen's wife is said to have resided at Koen's home at all times.—Fond du Lac Communicator.

—According to a notice issued by the Post Office Department at Washington, D. C., all notices on rural routes are requested to have the enclosed D. O. number to be mailed. No checks will be accepted. This is done for the convenience of the rural carrier, and all notices must in the future arrive on hand or packages will not be delivered by carrier.

—Mrs. Arnold Hansen of Barton spent Wednesday here with her mother, Mrs. Elizabeth Koerble and other relatives and friends.

CHILDREN TO BE EXAMINED TUESDAY

The following children will be examined by the Dr. P. H. Pearce church and Dr. Luth. St. Louis church here tomorrow, Sunday:
Ev. Peace church—Hazel Haas, A. M. Weiler, Raymond Porschke, Raymond Roushniere, Wallace Schultz, Raymond Schaefer, Fred Siegel, Loren Keller, Reuben Schaefer, Herman Eisentraut and Erwin Botschlag.
Rev. H. L. Barth, Pastor.

The following will be examined tomorrow, Sunday: St. Luke church—Ludelle Raske, Florence Backhaus, Raymond Klein and Ralph Kohn.
Rev. H. H. Heidel, Pastor.

NOTICE
The Kewaskum Live Stock Shipping association will ship stock on Wednesday, April 9th.
Aug. Heberer, Manager.

ZEN OF THE Y. D.

A Novel of the Foothills

By ROBERT STEAD

Author of "The Cow Puncher"—"The Homesteaders"—"Neighbors," etc.

LIFE IN THE OPEN

Life in the open through the eyes of an author who is at once a man of affairs and a poet—this is the story of the "Zen of the Y. D." by Robert Stead. It's an adventurous life, for the author is the "Cow Puncher" who has seen the wide and the people grow large and individual in the mountains and the people grow large and individual in the mountains and the people grow large and individual in the mountains...

CHAPTER I

"Chuck at the Y. D. tonight, and a bed under the shingles," shouted Transley, waving to the procession to be off.

Linder, foreman and head teamster, straightened up from the half load of hay in which he had been awaiting the final word, tightened the reins, made a clucking sound in his throat, and the horses pressed their shoulders into the collars. Linder glanced back to see such wagon or implement take up the slack with a jerk like the cars of a freight train; the cushioned rumble of wagon wheels on the soft earth, and the noisy chatter of the sled teeth of the hayrack came up from the rear. Transley's "wuh" was under way.

Transley was a contractor; a master of men and of circumstances. Six weeks before, the suspension of a grading order had left him high and dry, with a dozen men and as many teams on his hands and hired for the season. Transley galloped all that night into the foothills; when he returned next evening he had a contract with the Y. D. to cut all the hay from the ranch buildings to the Forks. Transley traced his chain scraper, for mowing machines, and three days later his outfit was at work in the upper reaches of the Y. D.

The contract had been decidedly profitable. Not an hour of broken weather had interrupted the operations, and today, with two thousand tons of hay in stack, Transley was moving down to the headquarters of the Y. D. The trail lay along a broad valley, warded on either side by ranges of foothills; his which in any other country would have been dignified by the name of mountains. From their summits the gray-green uplifted limestone protruded, whiplashed clean of soil by the thousands of centuries. Here and there on their northern slopes hung a beard of scrub timber; sharp gulches cut into their fastnesses to bring down the turbulent waters of their snows.

Some miles to the left of the trail lay the bed of the Y. D., fringed with poplar and cottonwood and occasional dark green sycamores of spruce. Beyond the bed of the Y. D., beyond the foothills that looked down upon it, hung the mountains themselves, their giant crags pitched like mighty tents drawing placidly between earth and heaven. Near their four o'clock veil of blue-purple mist lay fanned about their shoulders, but later they would stand out in bold silhouette cutting into the twilight sky. Everywhere the silences of the eternal, broken only by the muffled noises of Transley's outfit trailing down the Y. D.

Linder, foreman and head teamster, continued his shoulder against his half load of hay and continued the scene with amiable satisfaction. The hay fields of the foothills had been a pleasant change from the railway grades of the plains below. Men and horses had fattened and grown content, and the foreman had reason to know that Transley's bank account had profited by the sudden shift in his operations. Linder felt in his pocket a few pine and matches; then, with a frown, withdrew his fingers. He himself had laid down the law that there must be no smoking in the hay fields. A carelessly dropped match might in an hour nullify an hour's labor.

Linder's frown had scarce vanished when hoof-beats pounded by the side of his wagon, and a rider, throwing himself lightly from his horse, dropped beside him in the hay. "Thought I'd ride with you a spell, Lin. That Pete-horse acts like he was at the Y. D. tonight?" "That's what Transley says, George, and he knows." "Ever at the Y. D.?" "None." "Know old Y. D.?" "Only to know his name is good on a check, and they say he still thrives on a good rope."

George wriggled to a more comfortable position in the hay. He had a feeling that he was approaching a delicate subject with consummate skill. After a considerable silence he continued: "They say that's quite a girl old Y. D.'s got." "Oh," said Linder, slowly. The occasion of the soreness in that Pete-

horse's off front foot was becoming apparent.

"You better stick to Peter," Linder continued. "Women is most uncertain critters."

"Don't I know it?" chuckled George, poking the foreman's ribs companionably with his elbow. "Don't I know it?" he repeated, as his mind apparently ran back over some reminiscence that verified Linder's remark. It was evident from the pleasant grimaces of George's face that whatever he had suffered from the uncertain sex was forgiven.

"Say, Lin," he resumed after another pause, and this time in a more confidential tone, "do you s'pose Transley's got a notion that way?" "Shouldn't wonder. Transley always knows what he's doing, and why. Y. D. must be worth a million or so, and the girl is all he's got to leave it to. Besides, no doubt she's well worth having on her own account."

"Well, I'm sorry for the boss," George replied, with great solemnity. "I allus hate to disappoint the boss." "Huh!" said Linder. He knew George Drakz too well for further comment. After his unlimited pride in and devotion to his horse, George gave his heart unreservedly to woman-kind. He suffered from no cramping niceness in his devotions; that would have limited the play of his passion; to him all women were alike—or nearly so. And to number of rebuffs could convince George that he was unappreciated with the objects of his democratic affections. Such a conclusion, to him, too absurd to be entertained, no matter how many experiences might support it. If opportunity offered he doubtless would propose to Y. D.'s daughter that very night—and get a boxed ear for his pains.

The Y. D. creek had crossed its valley, shouldering close against the base of the foothills to the right. Here the current had created a precipitous out-

"Do You Suppose Transley's Got a Notion That Way?"

bank, and to avoid it and the stream the trail wound over the side of the hill. As they crested a corner the silver ribbon of the Y. D. was unraveled before them, and half a dozen miles down its course the ranch buildings lay clustered in a grove of cottonwood and evergreens. All the great valley lay warm and pulsating in a flood of yellow sunshine; the very earth seemed amorous and content in the embrace of sun and sky. The majesty of the view seized even the unpoetic souls of Linder and Drakz, and because they had no other means of expression they swore vaguely and relaxed into silence.

Hoof-beats again sounded by the wagon side. It was Transley. "Oh, here you are, Drakz. How long do you reckon it would take you to ride down to the Y. D. on that Pete-horse?" Transley was a leader of men.

Drakz's eyes sparkled at the subtle compliment to his horse. "I tell you, boss," he said, "if there's any jackrabbits in the road they'll get tramped on."

"I bet they will," said Transley, genially. "Well, you just slide down and tell Y. D. we're coming in. She's going to be later than I figured, but I can't hurry the work horses. You know that, Drakz." "Sure I do, boss," said Drakz, springing into his saddle. "Just watch me lose myself in the dust." Then, to

CHANGING MILK FLAVORS AND ODORS

Undesirable flavors and odors in milk produced by feeding green alfalfa, green corn or turnips may be prevented by giving these feeds at the proper time or they may be reduced by thorough aeration of the milk, according to tests made by the United States Department of Agriculture. It is shown that green alfalfa produces much more pronounced "off" flavors and odors than does green corn. Even when 25 pounds of green corn is fed one hour before milking the milk is only slightly tainted; if fed after milking nothing undesirable is noticeable. Feeding 30 pounds of green alfalfa one hour before milking, or as little as 15 pounds, produced objectionable flavors and odors. In some regions root crops are used to supply succulents in the fall and winter, and among these crops turnips are one of the most commonly given.

himself, "Here's where I beat the boss to it."

The sun had fallen behind the mountains, the valley was filled with shadow, the afterglow, mauve and purple and copper, was playing far up the sky when Transley's outfit reached the Y. D. corral, and George Drakz had opened the gate and waited beside it. "Y. D. wants you an' Linder to eat with him at the house," he said as Transley halted beside him. "The rest of us eat in the bunkhouse." There was something strangely modest in Drakz's manner.

"Had you handed to you already?" Linder managed to banter in a low voice as they swung through the gate. "I—I—" protested Mr. Drakz. "A fellow that ain't a boss or a foreman don't get a look-in. Never even seen her. Come, you Pete-horse!" It was evident George had gone back to his first love.

The wagons drew up in the yard, and there was a fine line of harness as the teamsters quickly unhitched. Y. D. himself approached through the dusk; his large frame and confident bearing were unmistakable even in that group of confident, vigorous men. "Glad to see you, Transley," he said cordially. "You done well out there. So, Linder! You made a good job of it. Come up to the house—I reckon the missus has supper waitin'."

"I'll find a room for you an' there, too; it's different from bean' under canvas." So saying, and turning the welfare of the men and the horses over to his foreman, the rancher led Transley and Linder along a path through a grove of cottonwoods, across a footbridge where from underneath came the babble of water, to the house, marked by a yellow light which poured through the windows and lost itself in the shadow of the trees.

The interior of the house was the log cabin where Y. D. and his wife had lived in their first married years. With the passage of time additions had been built to every side which offered a point of contact, but the log cabin still remained the family center, and into it Transley and Linder were immediately admitted. The poplar floor had long since worn thin, save at the knots, and had been covered with edge-grained fir, but otherwise the cabin stood as it had for twenty years, the whitewashed logs glowing in the light of two bracketed lamps, and the reflections from a wood fire which burned merrily in the stove. The skins of a grizzly bear and a timber wolf lay on the floor, and two moose heads looked down from opposite ends of the room. On the walls hung other trophies won by Y. D.'s rule, along with hand-made signs of harness, lariats, and other insignia of the ranchman's trade.

The rancher took his guests' hats, and motioned each to a seat. "Mother," he said, directing his voice into an adjoining room, "here's the boys."

In a moment "Mother" appeared drying her hands. In her appearance were courage, resourcefulness, energy—fit make for the man who had made the Y. D. known in every big cattle market of the country. As Linder's eye caught her and her husband in the same glance his mind involuntarily leapt to the suggestion of what the offspring of such a pair must be. The men of the cattle country have a proper appreciation of heredity.

"My wife—Mr. Transley, Mr. Linder," said the rancher, with a countenance which sat strangely on his otherwise rough-and-ready speech. "I been tellin' her the fine job you boys has made in the hay fields, an' I reckon she's got a bit of supper waitin' you."

"Y. D. has been full of your praises," said the woman, as she led them into another room, where a table was set for five. Linder experienced a tinge of happy excitement as he noted the number. Linder allowed himself no foolishness about women, but as he sometimes sagely remarked to George Drakz, you never can tell what might happen. He shot a quick glance at Transley, but the contractor's face gave no sign. Even as he looked Linder thought what an able face it was. Transley was not more than twenty-six, but forcefulness, assertion, ability, stood in every line of his clean-cut features. He was such a man as to capture at a blow the heart of old Y. D., perhaps of Y. D.'s daughter.

"Where's Zen?" demanded the rancher. "She'll be here presently," his wife replied. "We don't have Mr. Transley and Mr. Linder every night, you know," she added, with a smile. "Dollin' up," thought Linder. "Trust a woman never to miss a bet."

But at that moment a door opened, and the girl appeared. She did not burst upon them, as Linder had half expected; she slipped quietly and gracefully into their presence. She was dressed in black, in a costume which did not too much conceal the charm of her figure, and the unbroken luster of her face and hair played against the softer background of her dress with an effect that was almost dazzling.

"My daughter, Zen," said Y. D. "Mr. Transley, Mr. Linder." She shook hands frankly, first with Transley, then with Linder, as had been the order of the introduction. She gave the impression of one who has herself, and the situation, in hand.

"We're always glad to have guests at the Y. D.," she was saying. "We live so far from anywhere." Linder thought that a strange peg on which to hang their welcome. But she was continuing: "And you have been so successful, haven't you? You have made quite a bit with Dad."

"How about Dad's daughter?" asked Transley. Transley had a manner of direct and forceful action. These were his first words to her. Linder would not have dared be so precipitate. "She's been a great summer, ain't she?" said the rancher, laying down his knife and fork and lifting the carving. "Transley, some more meat! Pshaw, you ain't eat enough for a chicken. Linder? That's right, pass your plate. Powerful dry, though. That's only a small bit; here's a better slice here. Dry summers generally mean open winters, but you can't never tell. Zen, how 'bout you? Old Y. D.'s been too long on the job to take chances. Mother? How much did you say, Mother? About two thousand tons? Not enough. Don't care if I do"—holding himself to another place of beef.

"I think you'll find two thousand tons, good hay and good measurement," said Transley. "I'm sure of it," rejoined his host, generously. "I'm carryin' more steers than usual, and I'll maybe run in a bunch of dogs from Manitoba to boot. I got to have more hay."

The Chinese boy served a pudding of some sort, and presently the meal was ended. "She's been a dry summer—powerful dry," said the rancher, with a wink at his guests. "Zen, I think there's a bit of gopher poison in there yet, ain't there?" The girl left the room without remark, returning shortly with a jug and glasses, which she placed before her father.

"I suppose you wear a man's size, Transley," he said, pouring out a big drink of brown liquor, despite Transley's deprecating hand. "Linder, how many fingers? Two? Well, swing them in the thumb, Y. D. If you please, just a little suffer. All set?" The rancher rose to his feet, and the company followed his example. "Here's ho— and more hay," he said, genially. "Ho," said Linder. "The daughter of the Y. D.," said Transley, looking across the table at the girl. She met his eyes full; then, with a gleam of white teeth, she raised an empty glass and clinked it against his.

and which makes use of a standard circuit. Low construction cost has also been taken into consideration.

The approximate list of material needed for the set is as follows: 1 6x15-inch panel. 1 9-inch deep cabinet. 2 25-plate var. cond. 1/2 pound No. 24 S.C.C. wire. 1/8 inch No. 8 round brass rod. 2 knobs and pointers. 2 3-inch dials. 1 rheostat with knob. 1 socket. 1 grid leak condenser. 1 phone condenser. 6 binding posts. Bus-bar wire, nuts, washers, bolts, etc.

Tube, "A" and "B" battery. As will be seen by the diagram, Figure 1, the circuit is the standard three-coil honeycomb, but uses spiderweb coils instead. The forms for winding these coils are cut from stiff cardboard 4 inches in diameter, into which are cut nine slots equally spaced and 1 1/2 inches deep. This leaves enough space in the center to place the mounting and also for the binding posts. See Figure 2.

Into these slots is wound, zig-zagging, No. 24 S. C. C. wire as follows: Primary 65 turns, secondary 40 turns and tickler 50 turns. No taps are taken, as tuning is done by variable condensers.

The secondary coil is mounted stationary, in an upright position on a block of wood and the primary and tickler coils on either side mounted on a special adjustable mounting so that the coupling may be varied. An idea of how this was done will be gained from the sketch, Figure 2.

A wooden block was mounted on the primary and tickler coils at a 45-degree angle and a hole drilled through, parallel to the horizontal diameter of the coils. A No. 8 brass rod was threaded on both ends, one end passing through the panel with a knot on it. A half-inch square brass post was mounted near the coils to act as supporting bearings. Set screws were placed through the tops of these posts so that a slight pressure from them would be sufficient to hold the coils in any position. As these coils are not varied much there will be little wear on the shaft.

Flexible leads are used to connect the movable coils and a set of flexible leads are provided so that the "B" battery may be mounted directly inside the cabinet. The cabinet must be made large enough to allow sufficient space for the coils to swing.

The variable condensers are each 23 plates, which will give a wave-length range of from about 200 to 600 meters. The panel should be shielded and the shield grounded to the ground binding post. The coupling control shafts are also grounded to this shield. The shield may be of tinfoil.

This is an excellent receiver for the broadcast fan who is troubled with interference from various sources. Any degree of coupling may be had by varying the distance between the primary and secondary. For instance, if interference is experienced, the primary is turned away from the secondary a bit and the condensers returned to the wave length to make up for the change in adjustment, and in all probability the interference will have disappeared.

This set was used with a WD-11 tube with 22 1/2 volts on the plate and an antenna 75 feet long. Being only ten miles from Newark and only three miles from Newark, no difficulty was experienced in picking out a certain local station and entirely excluding the others. Also, while the local stations were still going, the following other stations were tuned in and the locals entirely excluded: WJAX Cleveland, O. WGY Schenectady, N. Y. KDKA Pittsburgh, Pa. WFI Philadelphia, Pa. WJMA Chicago, Ill., and others.

It will be interesting to note that the coupling between the primary and secondary and between the secondary and tickler were left at about 45 degrees during these tests and tuning done only with the two condensers, the coupling being varied only slightly occasionally to clear up speech or stop oscillation of the tube.—New York Herald.

6. DX-Flex circuit.—Primary need not be touched if it has at least 60 turns. Secondary should have 60 turns. If less than 60, it should be loaded accordingly. Be sure the loading coil is placed within the variable condenser connections, so that the load coil really has the effect of increasing the size of the rotor.

7. Reinhartz circuit.—Insert in grid coil a 35-turn H. C. or similar coil for loading. In one design an extra tap was provided for this purpose and the coil goes between the last used tap and the extra one. The primary is best loaded by a 50-turn coil, tapped every ten.

8. Lighthouse set.—Insert a 50-turn coil in series with the antenna. It should be understood that it is impossible to state exactly how much loading is required in the antenna circuit of any set, since so much depends upon the size of the aerial itself. Where a series condenser is used, the loading coil should be of such proportions that WEAF on 492 meters will be brought in at nearly full scale, giving sufficient leeway to reach WJZ and WJW on 598 meters. Load coils may be honeycomb coils, or may be wound on a 3/4-inch tube of approximately the same number of turns. For those in doubt, the best solution is to construct a loading coil of about 50 turns, with a tap at every ten, and then try them all until the series condenser covers the range as it should.

9. "Perfect" Set.—Insert 50-turn H. C. coil in series with antenna, keeping off tuning controls the same, or substitute 75-turn coil for the 50-turn coil in use.

Strong Aerial Supports. When putting up an aerial some people make the mistake of using a small-size wire to hold the insulators. Use the same size wire as in the aerial.

Ways of Hooking Up Variable Condensers. Almost every radio set has a variable condenser in the circuit somewhere. The position of the condenser depends upon the work it is to do. Of course, by that it is meant what part of the circuit it is to tune, as the only use of a variable condenser, outside of using it occasionally for a by-pass condenser, is to tune some part of a set.

If a condenser is to be used in the primary circuit it is used to tune the primary coil. For local stations it is advisable to use as little capacity as possible and as much inductance as possible in order to make the set more selective for local reception.

But for distant stations it is best to use more capacity and less inductance. The reason for this is that by lessening the amount of inductance some of the resistance in the circuit is removed and by using more capacity its signals will be slightly stronger, due to the fact that the condenser will act as a sort of a stopping device, which will hold the signals back until they can build up enough to pass the condenser. If the condenser is to be used in the

RADIO

(Edited by G. Douglas Wardrop, Editor of Radio Merchandising)

By J. F. SUTTON

The need for an easily-controlled receiver will cover all broadcasting wave-lengths with a minimum number of controls is quite evident. I have witnessed the efforts of not a few who have attempted to construct receiving sets, especially those using the latest in circuits (it doesn't seem possible to obtain the latest as they are developed so fast), and have seen a great many failures in the attempts. Having not had the experience with the standard circuits they fail to recognize the anomalies of these circuits which show plainly in the more recent developments.

The purpose of this article is to help those who wish to construct a really good receiver which will be reliable and which makes use of a standard circuit. Low construction cost has also been taken into consideration. The approximate list of material needed for the set is as follows:

- 1 6x15-inch panel. 1 9-inch deep cabinet. 2 25-plate var. cond. 1/2 pound No. 24 S.C.C. wire. 1/8 inch No. 8 round brass rod. 2 knobs and pointers. 2 3-inch dials. 1 rheostat with knob. 1 socket. 1 grid leak condenser. 1 phone condenser. 6 binding posts. Bus-bar wire, nuts, washers, bolts, etc.

Tube, "A" and "B" battery. As will be seen by the diagram, Figure 1, the circuit is the standard three-coil honeycomb, but uses spiderweb coils instead. The forms for winding these coils are cut from stiff cardboard 4 inches in diameter, into which are cut nine slots equally spaced and 1 1/2 inches deep. This leaves enough space in the center to place the mounting and also for the binding posts. See Figure 2.

Into these slots is wound, zig-zagging, No. 24 S. C. C. wire as follows: Primary 65 turns, secondary 40 turns and tickler 50 turns. No taps are taken, as tuning is done by variable condensers.

The secondary coil is mounted stationary, in an upright position on a block of wood and the primary and tickler coils on either side mounted on a special adjustable mounting so that the coupling may be varied. An idea of how this was done will be gained from the sketch, Figure 2.

A wooden block was mounted on the primary and tickler coils at a 45-degree angle and a hole drilled through, parallel to the horizontal diameter of the coils. A No. 8 brass rod was threaded on both ends, one end passing through the panel with a knot on it. A half-inch square brass post was mounted near the coils to act as supporting bearings. Set screws were placed through the tops of these posts so that a slight pressure from them would be sufficient to hold the coils in any position. As these coils are not varied much there will be little wear on the shaft.

Flexible leads are used to connect the movable coils and a set of flexible leads are provided so that the "B" battery may be mounted directly inside the cabinet. The cabinet must be made large enough to allow sufficient space for the coils to swing.

The variable condensers are each 23 plates, which will give a wave-length range of from about 200 to 600 meters. The panel should be shielded and the shield grounded to the ground binding post. The coupling control shafts are also grounded to this shield. The shield may be of tinfoil.

This is an excellent receiver for the broadcast fan who is troubled with interference from various sources. Any degree of coupling may be had by varying the distance between the primary and secondary. For instance, if interference is experienced, the primary is turned away from the secondary a bit and the condensers returned to the wave length to make up for the change in adjustment, and in all probability the interference will have disappeared.

This set was used with a WD-11 tube with 22 1/2 volts on the plate and an antenna 75 feet long. STUDEBAKER LIGHT-SIX TOURING CAR

\$1045

Mark This Example of what Studebaker alone can do

STUDEBAKER is the world's largest maker of quality cars. Our assets are \$90,000,000. We have \$50,000,000 in model plants. Our sales have almost tripled in three years, because of our matchless values. Last year, 145,167 people paid \$201,000,000 for Studebaker cars.

Come and learn why

Come and see, before you buy a car, the reasons for this success. See this Light-Six Touring Car, for instance.

Built of the finest steels. Of the very same steels we use in the costliest of our cars. On some we pay makers 15% premium to get just the quality specified.

Built under an engineering department which costs us \$500,000 yearly.

Each car subjected in the building to 32,000 separate inspections.

Same steels, same workmanship as in the costliest Studebaker models.

Two great features

There are many features in this Light-Six found in no rival car. But we want to mention two in particular.

The motor is perfectly balanced. That means long life and freedom from vibration.

The reason is this: We machine all surfaces of our crankshafts and connecting rods by 61 operations. Just as was done in Liberty Airplane

Motors. This is done in no other car at our prices. Then we use more Timken bearings in this car than are used in any competitive car within \$1,500 of our price. And Timken bearings take up wear as no other bearings do.

Why this price?

This Light-Six Touring Car is priced at \$1,045. Built under ordinary conditions such a car would cost you from \$200 to \$400 more.

But we build 150,000 cars per year. We make our own parts. We build our own bodies in \$10,000,000 body plants. We have 12,500 up-to-date machines. Our motor costs are divided by enormous output.

The result is a value no other maker even tries to match in a fine car of this size. Come see what it means to you.

Send for the Book

Mail us the coupon below. We will send you free our new book that will inform you on five simple things which reveal the value of a car. For instance—

It will enable you to look at any car and tell whether it's been cheapened to meet a price or offers true quality.

It will tell you why some cars rattle at 20,000 miles and others don't. It shows one single point in a closed car which measures whether you're getting top or medium quality. The book is free. Clip the coupon now.

How It Excels

Steels are identical with the steels in the costliest car we make. More Timken bearings than in any competitive car within \$1,500 of its price.

Genuine leather cushions, 10 inches deep. Curled hair filling. All-steel body.

One-piece windshield—rainproof. Attractive cowl lights. Quick-action cowl ventilator. Non-skid cord tires.

Transmission and ignition locks. Perfect motor balance. The supreme car of its class.

Send coupon for book about it.

PICK BROTHERS CO., WEST BEND

Early Wisconsin

When the French explorers came to the territory of Wisconsin they found among the Indians some who intimated to the visitors that for a specified premium, which generally conformed to the ability of the prospect to pay, a safe voyage through their domain would be insured. The inference was emphatic that in the absence of such insurance the travelers proceeded at their own peril. There was not much system or organization to these primitive practices, but there was tremendous efficiency!

More than 200 years later, however, life insurance was reduced to a science and there was organized in this former French province, a life insurance company which has developed into the largest and most prominent financial and fiduciary institution west of the Alleghany Mountains.

The Northwestern Mutual Life Insurance Company was chartered by special act of the Wisconsin legislature. It began business in 1853 with 25 policyholders and \$200,000 of insurance in force. On the first day of January 1924, it had \$25,147 policies outstanding, involving insurance of about two billion seven hundred million dollars!

Since its organization the company has paid to policyholders nine hundred and twenty-three million dollars and it still holds, under the requirements of Wisconsin law, more than five hundred million dollars for them.

The Northwestern confines its operations exclusively to the healthful portions of the Union and it does no foreign business.

It has more than 48,500 citizens of the State of Wisconsin on its list of policyholders and being a mutual company, these policyholders are intimately and directly affected by anything which affects the interests of the company.

The Northwestern gives employment to about 2,000 Wisconsin citizens in this state, and it annually expends hundreds of thousands of dollars in Wisconsin for salaries and supplies. It has just paid the state \$861,000 in taxes for the privilege of doing business in Wisconsin for one year—a sum which is nearly one-third the total taxes paid by the company in all the other states and the national government, combined.

The by-laws of the company provide for the annual appointment of a committee of its policyholders who shall not be trustees, officers, junior officers, agents or employees, to examine into its affairs, transactions, records, books, assets and securities. The committee last appointed, and which reported

on January 25, 1924, consisted of four policyholders, two of whom were citizens of Wisconsin, Thomas H. Gill of Milwaukee, and Senator Max W. Heck of Racine, the latter being nominated by the Hon. W. Stanley Smith, Insurance Commissioner of Wisconsin. Senator Heck acted as Secretary of the Committee.

Its conclusions were as follows: "Our examination convinces us that the management is entirely efficient and fully abreast of the most advanced of its competitors; that, consequently, the various policy forms are liberal and equitable, the rates reasonable, the treatment of all policyholders uniform, purchases and security of investments safeguarded, all assets conserved, death claims promptly paid, litigation negligible, persons commendable and all branches of the business most economically conducted. The volume and quality of the risks, the surplus earnings and savings are growing healthfully, and we believe the great object of the corporation as a guardian and conservator for public benefit is fully realized."

The Northwestern Mutual Life Insurance Company was organized to SERVE—to serve men who appreciate the necessity of protecting themselves, their families and their estates. It issues modern life insurance policies to meet all the requirements of protection at the lowest possible net cost. It has general agencies in Milwaukee, Racine, Madison, Hudson and Oshkosh, and agencies in every other locality of the state, where free, frank and full information will be given cheerfully to those who want to know about its policy contracts. Write or call upon them, or address

BATAVIA

Miss Bernice Mellis spent the week-end at Milwaukee.

Mrs. Amra spent a week with Mr. and Mrs. O'to Triplian.

Mrs. Krueger visited a few days with her mother, Mrs. Deekliver.

Rev. Karies occupied the pulpit in the St. Stephan church Sunday afternoon.

The Ladies' Aid of the Zion's congregation met with Mr. and Mrs. Art. Donath Thursday.

Mr. and Mrs. Orin Kaiser spent a few days with Mr. and Mrs. Luis Kaiser at Beechwood.

Mr. and Mrs. Frank Held were pleasantly surprised Tuesday evening in honor of Mrs. Held's birthday. A delicious supper was served, and all had a good time. All wished Mrs. Held many happy returns of the day.

Election returns for the town of Scott are as follows: Democratic President Jas. Reed, 3, Wm. McAdoo 5; Alfred E. Smith —, Delegates, Thos. J. Fleming, J. J. Hooper, Gust. Keller, John Kluyon, Martin Lueck, John Maron, Thos. O. Mallen, John M. Callahan, F. J. Schwalbach, J. P. Holland, B. J. Hastings, Adolph Pfeister, For Justice, Doerfler.

Republican, President R. LaFollette, 21, C. Coolidge 11, Vice President R. LaFollette 5, Coolidge 2, Chas. Hill 1, Delegates, John J. Benzen 59, Edw. F. Detmer 29, Herman Eken 48, C. Golte 44, H. Goodland 23, H. L. Heard 26, Lillie Johnson 48, Solomon Levitan 49, Ed. Phillip 22, Ed. Voight 52, F. Zimmerman 49, Chas. Schoenfeld 43, Robert Coldwell 20. Other election returns can be found on the front page of this issue.

County cement was unloaded here this week, which will be used at the overhead bridge just north of the city limits.

Statesman Ads Get the Business

A Non-Skid Tandem---It's a McCormick-Deering, Too

The only objection ever made to the double disk principle has been completely overcome by the McCormick-Deering telescoping tandem hitch. It is almost impossible for the tandem on a McCormick-Deering to trail the disks of the front harrow.

This telescoping hitch holds the tandem rigidly in place on the straight-away, but is completely flexible on the turns. The McCormick-Deering tandem exactly splits the ridges left by the front harrow, and follows around the turns as naturally as the rear gears on your wagon.

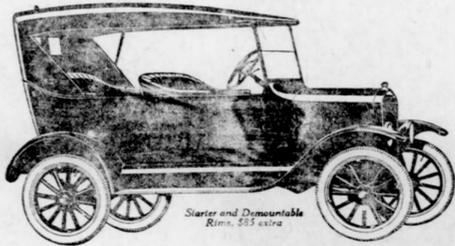

If you haven't already seen this splendid McCormick-Deering harrow at work we urge you to do so. We have one set up here at the store and will gladly show you just how it works. Come in. Let us tell you all about its rigid angle steel frame, bumper gang construction, dust proof bearings, easy-to-fill grease cups, adjustable snubbing block, and other features.

And while you are here we would like to show you the rest of our McCormick-Deering line.

The name McCormick-Deering stands for the best in Farm Machinery

LOCAL HAPPENINGS

—Good Friday, April 18.
—Mrs. Louis Nordhaus spent Wednesday at West Bend.
—Peter J. Haig spent Tuesday and Wednesday at Jefferson.
—Edward Brandt of Milwaukee spent Sunday with home folks.
—Herbert Beisler and Al. Roste were Milwaukee visitors Sunday.
—Clemens Reinert was a guest caller at Milwaukee last Friday.
—Geo. Kippenhan transacted business at Milwaukee last Thursday.

—N. W. Rosenheimer transacted business at Milwaukee Wednesday.
—Sheriff Gust. Benike, was a business caller in the village Thursday.
—D. M. Rosenheimer was a business caller at Milwaukee Wednesday.
—Mrs. A. A. Perschbacher and son Raymond were Milwaukee visitors on Wednesday.
—Mrs. and Mrs. Ed. Seip of Milwaukee spent Sunday with the Koch families here.
—The Woman's Club met at the home of Mrs. Otto E. Lay last Saturday afternoon.
—John Van Blarcom, Sr., of Milwaukee spent Saturday and Sunday at his home here.
—Miss Leona Klessig of Milwaukee spent Sunday with her parents, Mr. and Mrs. John Klessig.
—Robert Bachler is employed by the Ansty Lumber Products Co. at West Bend since Monday.
—Miss Laura Fischer of West Bend was a guest of Miss Adeline Kippenhan Saturday and Sunday.
—Ernst Kioke of Campbellsport visited his sister, Mrs. Ida Schmidt and family here last Thursday.
—Armin Barth of Milwaukee spent Sunday with his parents, Rev. and Mrs. H. L. Barth and family.
—Roman Smith local insurance dealer had the misfortune of fracturing his right arm on Tuesday morning, while cranking his car.
—Miss Helen Bruesewitz of Marshfield is employed as maid at the Republican House, she commenced her duties on Monday.
—Mrs. Wm. F. Backus returned home Tuesday, from several weeks' visit with her son, Dr. Alvin Backus and family at Cedarburg.
—The Wisconsin Telephone Company has a large crew of men at work repairing their lines, which were damaged by last Saturday's sleet storm.
—John Muehleis, who came near losing his life last week Friday, by being struck by a freight engine, is getting along as well as can be expected.
—J. F. Weber of Milwaukee moved his furniture to this village this week. He will make his future home with his daughter, Mrs. H. L. Barth and family.
—Mr. and Mrs. Wm. Krickel and Chester Perschbacher of Milwaukee and David Krickel of Campbellsport, spent Sunday at the home of Mr. and Mrs. A. A. Perschbacher.
—According to a report given out by the state tax commission, all property in Wisconsin is valued at \$4,846,765,000, which is a slight decrease over that of the year before.
—A number of neighbors and friends tendered Mr. and Mrs. Herman Gilbert and family a farewell party at their home Sunday evening. The evening was enjoyably spent in a social way.
—Beginning Sunday, April 6th, and continuing every Sunday there after until further notice, the local post office will be open from 7 to 8 a. m. Kindly arrange to get your Sunday morning mail accordingly.
—Miss Helen Thuesch returned home Saturday after spending the past week at Barton. She was accompanied home by her cousin Miss Pauline Berres, who visited at the Joseph Thuesch home until Wednesday.
—Mrs. Gerhard Peters of Lee, Ill., visited from Saturday until Thursday home with her son, Mrs. John Stahl and family. While here she attended the funeral of Herbert P. Peters at Barton last Saturday.
—A deal was closed this week whereby Arthur W. Koch purchased the lot opposite the post office building from Wm. F. Backus. Consideration private. Mr. Koch intends to erect a house upon same this summer.
—Miss Hildegard Gilbert, who for some time has been employed as stenographer in the office of the Kewaskum Aluminum Company, resigned her position last Saturday. She left for her future home at Milwaukee on Wednesday.
—Mrs. Theo. Schmidt and daughter Harriet returned home Tuesday from several days' visit with relatives at Theresa. They were accompanied home by the former's sister, Mrs. Hugo Bohn and daughter, who visited several days here.
—Walter Schaefer, manager of the local telephone exchange was at Theresa several days this week where he assisted in repairing the telephone line for the Theresa Union Telephone Co., which was badly damaged by last Saturday's sleet storm.
—Mr. and Mrs. Herman Gilbert and family, moved their household furniture to Milwaukee Wednesday, where they will make their future home. Mr. Gilbert being engaged in the shoe business here. Their many friends here regret to see them leave.
—John Berry Hayes, Professor of Poultry Husbandry at the College of Agriculture visited the Ogenorth Bros. farm located west of this village last week, and inspected their breeding flocks, and placed them on the accredited list under the supervision of the Department of Markets.
—Principal C. E. Nodoff and Miss Floretta Senn, teacher in the Grammar room, were at West Bend last Saturday, where they attended a meeting of the County Education Board in the office of Supt. M. T. Backley. The purpose of the meeting was to have a hearing for the selection of books to be used in the rural schools in the county the next five years.
—Due to a break-down of the large paper press in the Statesman office, last week Friday, press day, we were unable to get the papers out on schedule time. If you were one of them who did not receive your paper on the usual time, don't blame us, for we did the best we could under the circumstances. The press has again been repaired and is in good working order.
—Walter Belger was delightfully surprised Wednesday evening, when a number of friends and relatives gathered at his home to help him celebrate his birthday. The evening was pleasantly spent in playing cards and Banquet. Prizes were awarded as follows: Louis Kioke consolation, August Bilge, Jr. 1st, Ladies, Mrs. Henry Habek; 2nd, Mrs. Alb. Koehler and consolation Hattie Belger. A two course luncheon was served, after which the guests departed for their homes wishing Mr. Belger many more happy birthdays.

TONE UP, PURIFY IN THE SPRING

Every woman knows that her house has to be cleaned thoroughly every Spring. During winter, dust, dirt and germs accumulate in the corners, under the rugs, in the curtains "an" everywhere else. Just so with your system—it should be given a thorough cleansing, purifying this Spring. HOLLISTER'S ROCKY MOUNTAIN TEA will do the job slick and quick. It will clean your system, freshen and purify you all over—you'll enjoy living, eat better, sleep better—feel better.—Otto B. Graef.

The old spirit of fair play---
With the modern idea of progress

This bank stands for service—the broad, understanding service of a thoroughly modern, progressive institution.

But back of that—first, last and always—is the old-time spirit of fairness and co-operation which has been fostered through the years. An old, old idea has here taken on new meaning in the light of modern progress.

MY DAUGHTER WOULD CRY AT EVERYTHING

Nervous and Irritable. By Taking Lydia E. Pinkham's Vegetable Compound Became Entirely Normal

Clinton, Wisconsin.—"My daughter was in a very run-down condition, and would cry at every little thing she saw they so weak and nervous. As Lydia E. Pinkham's Vegetable Compound had helped me when I was a girl I gave it to her to build her up, and the results were all that we could wish for. I wish that every mother with growing girls would try it for these troubles girls often have. I had taken it myself before my girl was born, and she was one of the nicest babies any one could wish to have. I recommend the Vegetable Compound to women and girls and cannot praise it too highly."—Mrs. I. A. HOLFORD, Box 48, Clinton, Wisconsin.

Mothers can depend upon Lydia E. Pinkham's Vegetable Compound to relieve their daughters of these troubles so often have. They know from experience the value of the Vegetable Compound in the treatment of these complaints and many, like Mrs. Holford, give it to their daughters.

FOR OVER 200 YEARS

Haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

SELDOM SEE a big knee like this, but your horse may have a bunch or brace on his ankle, hock, stifle, knee or throat.

ABSORBINE will clean it off without laying up the horse. No blister, no half-gone. Concentrated—only a few drops required at an application. \$2.50 per bottle delivered. Describe your case for special instructions, and send for W. F. YOUNG, Inc., 518 Lyman St., Springfield, Mass.

The Black Swamp
The Black swamp, extending from the Sandusky to the Maumee river, and covering an area of over 120 miles in length and an average of forty in width, was entirely avoided by early settlers in northern Ohio.

By an Indian treaty the United States government acquired a strip of land to make a road through the swamp, but nothing further than the preliminary surveys being accomplished, the land was later transferred to the state, and the first road was completed in 1827.

In accordance with a state law passed in 1850, a system of public ditches was introduced, which rapidly drained the swamp and transformed it into a fertile agricultural region.—Detroit News.

WOMEN CAN DYE ANY GARMENT, DRAPERY

Dye or Tint Worn, Faded Things New for 15 Cents.

Diamond Dyes

Don't wonder whether you can dye or tint successfully, because perfect home dyeing is guaranteed with "Diamond Dyes" even if you have never dyed before. Druggists have all colors. Directions on each package.—Advertisement.

A Good Guess

Being short of copy, a Florida editor took down a volume of Poe's poems and copied "Annabel Lee." This has hung on the copy book and took his departure. His writing was so bad that the compositor had to call a consultation. They made out the words "Annabel Lee" and "home by the sounding sea." These words were all that could decipher.

"I guess it's a society item," decided the foreman. "Just say Miss Annabel Lee has returned to her home at West Palm Beach."

BACK ACHY?

Lame and achy in the morning? Tortured with backache all day long? No wonder you feel worn out and discouraged! But have you given any thought to your kidneys? Weak kidneys cause just such troubles, and you are likely to have headaches, too, with dizziness, stabbing pains and bladder irregularities. Doan's Pills are the remedy. Doan's Pills have helped thousands. They should help you. Ask your neighbor!

A Wisconsin Case

Mrs. John Miller, National Ave., O. Box No. 374, Medford, Wis., says: "A cold disordered my kidneys and I had a dull, steady ache in my back which would not go away. My kidneys didn't act at all properly. I used Doan's Pills and they cured me of the complaint. I haven't been troubled since."

DOAN'S PILLS 60c
STIMULANT DIURETIC TO THE KIDNEYS
Foster-McIlburn Co., Mfg. Chem., Buffalo, N. Y.

THE KITCHEN CABINET

WEEKLY MENU SUGGESTIONS

Breakfast should be a simple meal, adapted to the person's age, occupation and state of health. Most people enjoy a little fruit as a beginning. When oranges and grapefruit are not to be had there are apples, prunes and other dried fruits, all good.

SUNDAY—Breakfast: Waffles. Dinner: Fricassee chicken. Supper: Bread and milk.

MONDAY—Breakfast: Creamed chicken on toast. Dinner: Breaded veal. Supper: Creamed potatoes.

TUESDAY—Breakfast: Baked potatoes with drawn butter sauce. Dinner: Canned pears with whipped cream. Supper: Spanish hash with macaroni.

WEDNESDAY—Breakfast: Wheat cakes. Dinner: Pork chops with fried sliced apples. Supper: Cottage cheese salad.

THURSDAY—Breakfast: Fried mush. Dinner: Apple pie. Supper: Sour cream spice cake.

FRIDAY—Breakfast: Oatmeal with cream and sugar. Dinner: Fried perch or trout. Supper: Omelet.

SATURDAY—Breakfast: Scrambled eggs with bacon. Dinner: Broiled round steak. Supper: Baked pork and beans.

Waffles.
Mix and sift one and one-half cups of flour, one-fourth teaspoonful of salt and one-half teaspoonful of soda. Separate the yolks and whites of two eggs, beat well, add one cupful of thick sour milk to the yolks and stir in the dry ingredients; add three tablespoonfuls of melted butter after folding in stiffly beaten egg whites. Bake on a well-greased waffle iron.

Spanish Hash.
Chop three or four cold cooked potatoes, a slice of onion and one green pepper. Season with salt, pepper and a dash of mace; bind with a beaten egg and bake in a buttered pan. Serve with hot, boiled, buttered macaroni.

Cottage Cheese Salad.
Mix two cupfuls of cottage cheese with one-half cupful of walnut meats, a teaspoonful of minced olives or scraped onion, and salt and paprika to taste. Roll in small balls and place in nests of lettuce. Serve with any desired salad dressing.

The difference between pleasant and unpleasant people is mainly that the latter demand consideration and the former are quick to give it.

SEASONABLE GOOD THINGS

Cabbage is a vegetable which is rich in mineral matter and should be served frequently.

Cabbage With Cheese.
—Shred cabbage to make four cupfuls, cook in boiling salted water until tender. Drain and leave in a heated colander at the side of the range while preparing a white sauce by blending together two tablespoonfuls each of butter and flour, then pouring over gradually one and one-half cupfuls of milk; cook until smooth and thick; season with salt and pepper and add four tablespoonfuls of grated cheese and heat until dissolved. Place the cabbage in a hot dish, pour the sauce over it and serve at once.

Chicken Warmen.—Cook one fat chicken until tender with a piece of veal or two sweetbreads to extend the meat and help out in bulk. Cut up the cooked meat as for salad and place in a double boiler to keep hot. See that the chicken is well-seasoned while cooking. In the chicken stock cook three bunches of celery and one onion sliced. Remove the vegetables and also place them where they will keep hot. In the seasoned broth cook sufficient noodles to serve a nest of noodles for each portion, then a spoonful of the celery and the chicken on top. Garnish with croissants of bread and serve all very hot.

Stuffed Turnips.—Take even-sized half-pound turnips, cut slices from the top for a cover and scoop out the inside, leaving a half-inch shell. Cook the shells and the cover for fifteen minutes in salted water, then arrange them in a buttered pan, filling them with chopped seasoned meat, crumbs or rice. Cover with the slice taken from the top and fasten with a toothpick. Pour around them the water in which the turnips were cooked and bake until they are well done. Serve with the sauce poured around them. The portion scooped from the centers may be saved, cooked and mashed as a vegetable or served in a soup.

Baked Apple Salad.—Core six small uniform tart apples and place in a baking dish. Fill the centers with brown sugar and a lump of butter for each. Bake as usual, basting with a little water, then chill. Mix together one-half cupful of chopped peanuts, one cupful of quartered marshmallows with three-fourths of a cupful of mayonnaise. Fill the centers with the mayonnaise and cubes of jelly. Serve garnished with lettuce hearts.

Grapenuts mixed with enough melted chocolate to coat them, served with a bit of cream, make a fine emergency dessert and one which the children will like.

Ivory Grows on Trees
In Colombia, Peru, Ecuador and Brazil, ivory grows on trees. Chess men, ornaments, buttons, drawer knobs and other articles are made from this vegetable ivory which, dried and cut, looks like the real ivory obtained from elephant tusks. It is gathered in the form of hard, white, fine-grained, oval nuts about the size of a small potato, which drop from the wild tagua or ivory nut palm. The average young female tree produces from six to nine of these nuts a season.

Negligees for Easter Bride; Hats for the Wedding Cortège

IF SOME of the negligees that add so much grace and growing color to the lingerie departments of the big shops were moved over to the dress department they would pass for evening gowns. They are made of airy and supple fabrics, laces and nets. The negligee is privileged to use flowing draperies and goes somewhat farther in the matter of picturesque designing than any other of our garments. Most women aspire to own wedding gown the item of next importance in the wedding cortège comes up for consideration. It is the choice of hats for her maids. The very best that the art of millinery has to offer blossoms out in Easter and June weddings.

But this year it is fashionable to be conservative; brides are choosing gowns for themselves with an eye to getting much use of them after their initial appearance, and hats for their maids that will have a career to look back upon when summer is done.

NEGLIGEE MADE OF FLOWING DRAPERIES

These old-time and unexcelled favorites, leghorn and hair braid caperles, present themselves among the candidates for bridesmaids' hats. Very often they are trimmed with flowers. A leghorn with facing of georgette crepe and lavish trimming of narrow pleated ribbon appears at the top of the group of hats pictured. Crepe is folded about the crown and many loops of ribbon are massed at the side.

HATS FOR EASTER AND JUNE WEDDINGS

A bride and long hanging ends of ribbon proclaim it an ideal model to bridesmaids.

The shape at the right commends itself to the bride who is considering small hats for her maids. It is a crocheted straw, faced with crepe and trimmed with wild flowers. A beautiful hair braid, at the right, has a wide border of silk on the brim and rows of plaited narrow ribbon over the crown. A miniature tapestry piece in silk furnishes a front decoration and is laced in a frame of shirred ribbon and needlework.

Light brown hair braid, moire ribbon and a jeweled pin contribute a lovely foundation for a soft lace drapery in the all-brown hat that finishes the group. Come to think of it, there is nothing prettier for bridesmaids, or more useful for dressy wear, than lacey brown hats.

Collar and Cuffs of Organdie
Very new are collar and cuffs of long organdie embroidered. In Chinese colors with Chinese stitches. Bands of brilliant blue, lacquer red or green carry out the dominant note of the embroidery.

Smart Blouses
Yellow crepe de chine fashions most attractive blouses. Contrast is given by plippings of black and tiny white pearl buttons.

Frock Like a Coat
There is little to choose between the top coat and the tailored frock in some instances at present. One severe and smart frock is put on like a coat, and fastens with one hook on the left hip.

Cross-Stitching
Cross-stitching in two shades of yellow, brown or blue is used to decorate tailored blouses of cotton broad-

Pigeons Most Reliable Carriers of Army Orders

From this immortal pigeon has been used to carry messages, especially in war. In spite of the vast advances in means of communication, the feathered messengers still remain one of the most reliable means of sending word from exposed places, and the United States army has a special pigeon branch of the signal corps.

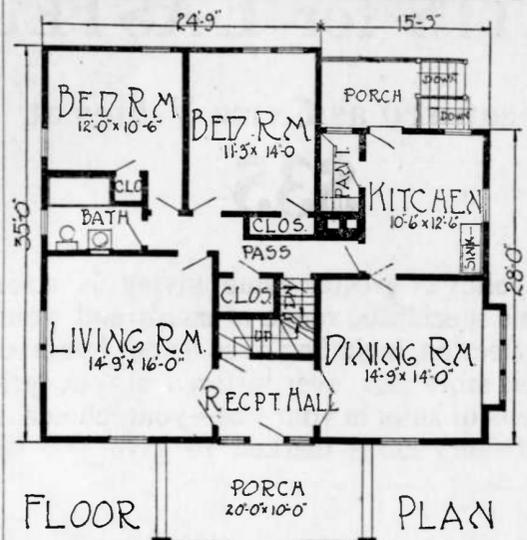

An idea of how valuable pigeons are in war may be had when it is realized that the United States signal corps had 470,000 birds overseas in the recent war and detailed 8,500 men to care for them. Many of the veteran birds—some of them actually battle scarred—are still in service. Down at Camp Wall in New Jersey, not far from New York, four hundred homers are housed and in training for use in emergency.

Bridges Over Seine

In Paris there are twelve great bridges over the Seine, with an average of only 845 yards between them.

Many a man's versatility is unimpeachable until he acquires the fishing habit.

Stucco and Frame Bungalow Containing Five Rooms

By **WILLIAM A. RADFORD**

Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

Small homes may be just as attractive as large homes. It all depends on the design. The addition of a porch, an overhang of the roof, or the treatment of the exterior walls, or perhaps the design of the roof—any of these things may change what would be otherwise an unattractive dwelling into an artistic and pleasing home.

A plain, two-gable small one-story house has been changed into an attractive bungalow type home by the addition of a porch and extending the roof in the home shown in the accompanying illustration. A glance at the floor plans shown reveals that the house is practically square, 25 by 40 feet. However, the third gable in the roof, which extends out over the porch, has transformed the appearance of the building. From a plain, unattractive one-story house, the bungalow has been converted into a most attractive little home.

One feature of the house which is unusual is the treatment of the exterior wall. The concrete foundation has been covered with rough stucco and the stucco extended part way above the first floor line. Above clapboards have been used, the walls up to the second story sill being painted white, while those above are given a darker paint.

The porch is large, being 20 feet wide and 10 feet deep. The entrance doors open into a reception hall, to the left of which is the living room, 14 feet 9 inches by 16 feet. To the right is the dining room, also a front room, 14 by 14 feet 9 inches. At the rear of the dining room is the kitchen, 10 feet 6 inches by 12 feet 6 inches.

The door at the rear of the living room opens into a short hall, at the end of which is the bathroom. Off this hall are two bedrooms, one 10 feet 6 inches by 12 feet and the other 11 feet 3 inches by 14 feet. Each bedroom has a closet, while a third closet off the hall gives plenty of storage space for the family.

The basement extends under the whole house and provides ample space for the heating plant, fuel storage and other storage. The high gables in the roof permit a good-sized attic, which is reached by stairs running out of the front hall.

A great many families prefer the bungalow type of home. The fact that all of the rooms are on one floor pleases the housekeeper, as it conceals

all the work on the one floor and eliminates stair-climbing. Besides, bungalow designs are very attractive, as they suggest comfort and convenience.

This design is rather unusual in both its exterior appearance and in the arrangement of the rooms, two features which will appeal to many home builders.

Porch Light Is Used to Add Attractiveness

Owners, and especially builders of suburban homes are generally on the watch for features which will add to the attractiveness of the place—planning special emphasis on the exterior. Everything must be made appropriate and in keeping with the surroundings.

Thus special care should be exercised in the selection of a proper lighting unit for the porch. In many such fixtures too often a lack of care and foresight is evidenced. The fixtures designed for use in the dining, living and bedrooms are usually chosen with a view toward their special fitness for their respective rooms, together with their effect on the surroundings, so why not select those for the porch in the same manner?

Hog Production Travels Circle

Amount of Breeding Determined by Profits Made the Preceding Year.

(Prepared by the United States Department of Agriculture.)

Hog raising in the United States is dominated by an innate tendency to fall into a vicious circle of successive over and under production, normally running two years from one extreme to the other. This is brought about largely by the fact that the amount of breeding at a given time is mainly determined by the profits made from hogs during the preceding year, which depend on the ratio between the price of corn and the price of hogs. If these up and down are to be eliminated, hog breeding must be based on a sounder view of probable future conditions than can be obtained merely from the memory of past profits.

Study Fluctuations.

So say economists of the Department of Agriculture who have investigated fluctuations in hog production from 1871 to 1915. These detailed studies were made by Dr. Sewall Wright, of the animal husbandry division, bureau of animal industry, and are part of a program of studies dealing with meat animals initiated some time ago under the general supervision of E. W. Sheets, assistant chief of the division. The period mentioned, 1871 to 1915, was chosen for study because the aim was to find out what relations exist between hog production and prices and the corn situation in normal times. Since the World War disturbed normal conditions, the war period was left out of the reckoning. The close connection between corn prices and hog production is due, of course, to the fact that about 50 per cent of the corn crop is consumed by live stock and is the principal element in the cost of producing hogs. Altogether about 40 per cent of the total corn crop is consumed by hogs.

It has been found that hog breeding reaches its maximum from half a year to a year after hog prices touch their peak in relation to corn prices, and begins to decline. This belated action by the breeders produces a surplus of hogs near or more later, by which time the hog-corn ratio is usually at or near its low point. On the other hand, breeding does not reach its low point until some time after the hog-corn price ratio has begun to rise again. There is consequently a swing to underproduction. Any cause leading to unusual profits or losses sets up oscillations in the number of hogs running about four years from crest to crest.

Should Study Conditions.

Apparently the price which the packer pays for hogs during a given season does not depend wholly on the actual supply offered. It is influenced to a greater extent by current and prospective conditions in the country as a whole, as indicated by the amount of breeding that has been done and by recent and current tendencies in corn prices. It is, therefore, suggested that the farmers would be well advised to study these conditions, instead of blindly rushing into hog production when prices are high and going out of the business when prices are low.

The department's investigators were struck with the fact that during the period studied the summer live weight of hogs marketed gave a remarkably close indication of the amount of breeding for the twelve-months' period ending in the following fall. Knowledge of the summer weight of hogs could thus have afforded a means of predicting pork production and winter slaughtering for the next year or more. Production, in fact, was more closely correlated with preceding summer weights and corn prices than with any of the other factors considered. Winter live weight, on the other hand, was determined largely by the preceding corn crop, and only secondarily by the amount of breeding done the preceding year.

Here is the way the department summarizes its study of the effect of the hog-corn ratio on future hog prices. Seasonal slaughter is determined in part by the amount of breeding during at least three years past, and in part by tendencies toward concentration in the summer season in which prices are high at the expense of the winter season, whenever the corn supply permits this to be done. This is why the corn crop has its maximum effect on hog slaughter in the summer after it was raised. There is a second peak of slaughter in the third following winter, due to the stimulus to breeding.

It is noted that while the farm price of hogs is very closely related with the packer's price, it lags behind the packer's price several months.

Oyster Shells Needed

When the hens are fed for eggs they obtain sufficient material for the whites and yolks but the grain feed they consume cannot furnish enough lime to make strong shells on all the eggs they can produce. A lack of lime results in soft shelled eggs which are often broken in the nests and this may lead to the egg-eating habit. Thin-shelled eggs are also produced and they often break in the crates and smear other eggs.

Best Fowls for Breeding

Do not allow the fowls in the breeding pen to become overfat. If the birds are of a small breed, such as Anconas, Leghorns or Andalusians, there is small chance of their putting on too much flesh, but if they are of the heavier breeds, such as Langshans, Brahmas or Orpingtons, you must make them work for their feed by scratching for it in deep litter.

Underfeeding Is Fatal

In many cases where live stock is lost, an investigation shows that a lack of feed is the cause. In some instances starvation lowers the resistance of animals which are bred to not receive enough nourishment to feed their own bodies and the bodies of their young; consequently they perish before parturition.

Marriage Certificates

In order to jibe with the eternal fitness of things marriage certificates should be printed on bond paper.

Sowing Naked Oats Is Not Advisable

Not Able to Compete With Best Common Variety.

(Prepared by the United States Department of Agriculture.)

During the last fifty or sixty years, attractive advertisements have led farmers from time to time to try to grow naked or hull-less oats. The very fact that the naked oat has gained no foothold in American agriculture after repeated attempts to exploit it is sufficient proof of its inability to compete with the best common or hulled oats.

Until a few years ago the variety commonly exploited was the Chinese Hull-less, which is now found growing on sterile mountain sides at high altitudes in northern and western China. Recently, however, some new hybrid varieties have been developed by crossing the Chinese Hull-less on the common oat. Of these, the Liberty Hull-less which was developed in Canada, has attracted the most attention. This new variety of naked oats has been grown on several of the field stations where the office of cereal investigations, bureau of plant industry, United States Department of Agriculture, is conducting experiments with oats. At no station has the yield of the Liberty Hull-less compared favorably with that of the best common variety. It is very susceptible to smut. It is necessary to treat the seed every year in order to avoid almost complete loss by smut.

While there is a small demand for oat kernels without hulls for feeding squabs and young chickens, it apparently will be better economy to buy ordinary oats from which the hulls have been removed than to try to grow hull-less or naked oats. For feeding farm stock, except hogs, the hull usually is considered an advantage, rather than a detriment, as it lightens the ration and increases its bulk. Not until high-yielding, smut-resistant and otherwise better varieties of naked oats are developed, and available will it be possible to recommend this type of oat as a safe crop for the farmer to grow.

Jars Sell for \$2,600

Kano Oshilua's collection of Japanese pewter tea jars, dating from the thirteenth century, brought \$2,600 for 50 pieces at the final session of the Oshilua sale in the galleries of the American Art association in New York. J. Wood was the buyer. The session yielded \$12,847 and the entire sales \$38,102.

Miss Lucy Aldrich paid \$200 for a cloth of gold altar cover, seventeenth century. A Chinese rug woven in designs of animal figures, eighteenth century, went to E. A. Sigel for \$200. K. Salto got a pair of bronze offering vessels of the Ming period for \$300.

Mrs. Van Gerve gave \$210 for a bronze flower vase made by the famous Takuni and \$1,150 for a bronze incense burner of the Tang dynasty. W. W. Seaman, agent, paid \$900 for an Imperial Chinese bronze vase of the Sung dynasty.—New York World.

Guineas Good Protection Against Hawks and Crows

Guineas are kept on many farms as a protection against chicken hawks, crows, etc., in the daytime, and as a night alarm against predatory persons and animals.

A flock of six to eight breeding birds is about right for the average farm. These should be replaced about every two years, at which age their usefulness as breeders practically ends.

Guineas usually mate in pairs, although a male will sometimes mate with two or three females. Better results in hatching will be obtained, however, if equal numbers of males and females are kept. During the breeding season the male will often be found sitting on the nest in the absence of the hen, and with her if the nest is large.

Feeding of Sugar Beets Is Not Economical Plan

Roots are palatable, succulent and nutritive but are low in protein and calcium. The sugar beet is one of the most palatable of the root crops fed to swine. Trials, however, have shown that the value of the sugar beet for fattening swine is so low that it is a very uneconomical feed. Occasionally it may prove profitable to turn the hogs into the field and harvest the beets in that manner, but as a general thing the feeding of sugar beets is not economical.

Free of Tuberculosis

There are now in the United States, according to a statement by the Department of Agriculture, more than 33,000 herds of cattle fully accredited by the government as being free of tuberculosis. Indiana has the largest number of these herds, 4,100. Wisconsin stands next with 3,907, and Minnesota third with 3,075.

Farm Hints

Ice harvested in winter spells sweet cream in summer.

We must preserve the birds if we would save humankind.

The farmer's problem is not so much in making a living as in learning how to live.

Test every ear of corn. If you have saved your seed corn. If not, buy only tested seed of high germination.

A problem soon to be undertaken by the Department of Agriculture is to standardize grades of live stock, meats and wool.

Speltz (white emmer) will give good yields on a fertile piece of black clay loam. This crop is highly esteemed as a poultry feed.

Sugar beet costs can be reduced materially through thorough soil preparation, which requires fall of early spring plowing, and a generous use of the culti-packer, or roller.

Cultivated grapes, while not so dangerous as the wild ones, will kill turkey if eaten to excess. Green corn, particularly during a very wet season, is also fatal, destroying thousands of turkeys annually.

Don't lose faith in your reliable brood sows. Hogs are somewhat low in price and corn is high. The higher corn goes and the lower hogs drop in price the quicker will be the return to improved prices.

It is largely owing to the fact that Barred Plymouth Rocks have been in the hands of these master breeders that they have made such rapid strides. They are just as easy to breed as any part-color bird.

Will Your Family Be Happy This Spring?

Suppose you have definitely decided to buy a Chevrolet this Spring.

That does not necessarily mean that you are going to get it.

Anyone posted on conditions in the automobile business will tell you that thousands of families are going to be unable to get cars this Spring. That has been true almost every Spring for years, but the shortage in April, May and June, this year, is going to be more serious than ever before.

The only way to be sure of a Chevrolet this Spring is to order it NOW.

If you do not want to pay for it in full at this time, any Chevrolet dealer will arrange terms to suit your convenience, so you can pay as you ride.

You will be surprised to learn how easy it is to pay for a Chevrolet.

CHEVROLET

Will Chevrolet Advance Prices? Ten makes of automobiles have already advanced in price. In spite of increased costs of materials, the Chevrolet price is still the same. How long we cannot guarantee. To make sure of your Chevrolet at present low prices

Insulation of Old Buildings Important

In rehabilitating an old building one thing which should be done is the insulation of the ceilings of the upper floors. The greatest amount of heat loss in every home is through the roof, a point which can be easily seen by noting the rapidly with which the snow melts on the roofs of buildings. Not only will there be a great saving in fuel but a cooler home in the summer will result. The Armour Institute of Technology, according to a test made with two inches of poured insulation over the lath and plaster, found a 63 per cent reduction in heat loss.

It is recommended in using a poured insulation of good quality, that a layer of tar paper be placed over the lath and plaster of the upper rooms ceiling and the insulation then poured on top of this to a depth of two inches. The cost of this method of insulating is very low considering the result; the material can be applied by the owner himself, as it is a very simple process. The cost of material for the average ceiling in a two-story house

of 700 square feet would amount to less than \$50, which amount will be saved in fuel alone and in addition will make the home much cooler in the summer. Such material is fireproof, and when poured between the joists makes a very effective fire stop.

Interior Finish Must Be Carefully Selected

In the choice of the lumber which you decide upon for the interior finish of a home be sure and take into consideration your decorative plan. Some woods are much better adapted to holding paint than others, and where enamel is to be the color plan of the room it is well to consider this point.

The high polished surface, such as mahogany, can be attained through the use of birch, which is probably the best interior finish where a highly polished varnished surface is wished.

of 700 square feet would amount to less than \$50, which amount will be saved in fuel alone and in addition will make the home much cooler in the summer. Such material is fireproof, and when poured between the joists makes a very effective fire stop.

Marriage Certificates

In order to jibe with the eternal fitness of things marriage certificates should be printed on bond paper.

Teach Children To Use Cuticura

Scalpaches and Itchings

Cuticura Soap Keeps the Skin Clear

BOSCHEE'S SYRUP

Alleviates irritation, soothes and heals throat and lung inflammation. The constant irritation of a cough keeps the delicate mucous membrane of the throat and lungs in a congested condition, which BOSCHEE'S SYRUP gently and quickly heals. For this reason it has been a favorite household remedy for colds, coughs, bronchitis and especially for lung troubles in millions of homes all over the world for the last fifty-seven years, enabling the patient to obtain a good night's rest, free from coughing with easy expectation in the morning. You can buy BOSCHEE'S SYRUP wherever medicines are sold.

For Doors That Stick

If you would avoid in your home the nuisance of doors that stick in moist weather, paint or varnish the tops and bottoms—places that are usually neglected because they don't show. These hidden edges, if not painted, are vulnerable points where the wood absorbs or loses moisture rapidly. Special danger points are the ends of the outside sashes, where the wood grain is exposed.—Popular Science Monthly.

Hall's Catarrh Medicine

is a Combined Treatment, both local and internal, and has been successful in the treatment of Catarrh for over forty years. Sold by all druggists.

F. J. CHENEY & CO., Toledo, Ohio

Where Speed Makes Beauty

Wherever crystals form rapidly their shapes will be more beautiful in all likelihood than when they form slowly. When they form rapidly they assume fantastic branching forms in some instances, but where they take a leisurely course of freezing or solidifying they tend to become more solid. This is one explanation of the beauty of the snowflake, which is a form of crystal.

All but Him

She—What a pity it is that handsome men are always concealed.

He—Not always. I am not.

Children Cry for "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 80 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it. The kind you have always bought bears signature of

Dr. J. C. Fletcher

CONSTITIPATION

Take a good dose of **Carter's Little Liver Pills**—then take 2 or 3 for a few nights after. They cleanse your system of all waste matter and **Regulate Your Bowels**. Mild—as easy to take as sugar. Genuine bear signature—Small Pill. Small Dose. Small Price.

BUY EARLY THIS YEAR

LAST YEAR thousands of individuals and commercial houses, who wanted the transportation service provided by Dodge Brothers cars, put their order in too late in the spring and were disappointed in delivery. The problem of immediate delivery of Dodge Brothers cars is going to be more acute this year than ever before. We are already feeling the pressure of an unusual demand.

Your order placed with us now will help to insure delivery of your Dodge Brothers car when you need it.

FOND DU LAC

A Handsome Showing of SUITS for EASTER

Featured as Extra Values at
\$35

AHERN'S policy of greater value giving is strongly evident in this specialized range of men's and young men's suits. The selection, including over seven hundred suits, is the largest this store has ever offered at one price. You will find dozens of suits in your size—your choice is almost unlimited and every suit is marked to give you unbeatable value.

Dependable New Suits

The fabrics in these suits are woven of two ply, long staple, all wool yarns making a cloth that wears well and holds its shape. The suits are carefully made, all important points being tailored by hand. Both men and young men will find many becoming styles and patterns in their correct size.

\$25

Finest Spring Suits

Here is a showing of suits for men who want the finest quality. The fabrics include rich silk and wool worsteds, French backs and unfinished weaves—cloths selected for serviceability and handsome appearance. Such leaders as Society Brand, Kuppenheimer and Michael-Stern have skillfully tailored the many styles.

Big Gypsum Bed.

A gypsum bed 36.5 per cent pure—extending ten miles inland for a mile along a branch of the Mosse river, midway between Cochrane and Jatare Bay, Ontario, is said to be one of the world's most important. It was but recently discovered. The outcropping can be seen at the river's edge, where the deposit is forty feet thick.
