

WISCONSIN HAPPENINGS

Important News of the Badger State Arranged in Condensed Form

Greenfield—While his companion waited at the wheel of a motor car, a lone gunman walked into the bank at Greenfield, near Appleton, thrust a gun in the face of the cashier and compelled him to yield up about \$400 in cash. Hacking out of the door, still keeping the bank employees covered, the gunman reached the street and jumped into the automobile of his pal and the two sped away.

Madison—Only twenty-one of the one hundred forty-one cities in Wisconsin pay their chief of police officer an annual salary which exceeds \$1,500 a year, according to figures just announced by Prof. Fred H. MacGregor, chief of the extension division of the University of Wisconsin. Cities which pay the highest salaries to their chiefs of police are Milwaukee, \$7,500; Madison, \$3,000; Racine, \$2,500; Kenosha, \$2,000; and Superior, \$2,000. A few of the small cities pay as low as \$25.

Madison—Construction of hard roads in Wisconsin virtually is completed for this year, the quarterly report of J. T. Donahue, state highway engineer, shows. The preliminary work on the surveys, plans and specifications for 1926 federal aid construction is actively under way. Of the one hundred thirty-five miles of concrete paving scheduled for construction during the 1925 season, one hundred twenty-four miles were in place at the end of the quarter of Sept. 30.

Baraboo—Amos Hull, Baraboo, veteran engineer of the North Western lines, who was retired after 48 years of active service, says he owns the oldest watch in point of service on the entire North Western system. Engineer Hull has used the same timepiece since 1881. During his service as an engineer Mr. Hull brought 20,000,000 persons to their destinations in safety and traveled enough miles to go around the world 100 times.

Monroe—A powdered milk factory that may be the first of a number to later boom this industry in southwestern Wisconsin is now in operation at Brownstown, nine miles west of Monroe. The plant will have a capacity of 125,000 pounds of milk a day, the supply being drawn from the numerous dairy farms in the immediate vicinity of Brownstown.

Beloit—Mrs. Sarah Walker, 96, of Rock Island, Ill., was the honored guest at the golden wedding anniversary of her son, B. J. Walker of Beloit. The celebration of the anniversary was held in the same house where the wedding occurred 50 years ago. Mr. Walker is 75 and his wife is 73. Mother Walker was one of the speakers at the anniversary banquet.

Kenosha—Grand Master Fred Marion, Milwaukee, dedicated the \$300,000 Masonic temple at Kenosha on Nov. 7 before 200 visiting Masons from southern Wisconsin. Rain and snow prevented the parade. A feature of the program was the presentation of a \$10,000 organ to the temple by Kenosha lodge, Order of the Eastern Star.

Neenah—Eleven refrigerated cars of a train of eleven, bound from Minneapolis to New York City, filled with meat, were derailed between Neenah and Madison Junction on the Soo line. Four of the cars tipped over but the damage done was not great. Traffic over the line was halted for six hours.

Kenosha—An increase of \$5,537,460 in the assessed valuation of real estate and personal property in the city of Kenosha during 1925 was reported to the secretary of state by Assessor John W. Stevens. The total assessed valuation in 1925 is \$68,304,120. In 1924 it was \$62,766,660.

Fond du Lac—The silver jubilee anniversary of the consecration of the Rt. Rev. Reginald H. Wedder, bishop of the Fond du Lac diocese of the Episcopal church, was observed with special services at St. Paul's cathedral Sunday, Nov. 8.

Waupaca—Fred Hess, 63, former Waupaca county assemblyman, died at his home in Waupaca. Mr. Hess, who was city marshal of Clintonville for 10 years, served in the legislative sessions of 1913, 1917 and 1921.

Surgeon Bay—For the purpose of marking hundreds of old historic spots on the peninsula and preserving many old historic trails, a move has been started in Surgeon Bay for the organization of a Door County Historical society.

Park Falls—Postmaster Herbst has been notified by the postoffice department that free mail delivery will be established in Park Falls, Dec. 16, providing that the streets are marked and houses numbered by that time.

Baraboo—The office of the master mechanic of the Madison division of the North Western road has been moved from Baraboo to Madison. Besides C. V. Axen, master mechanic, three other employees of the staff were affected by the change.

Madison—Eleanora Helitz, 14, daughter of Mr. and Mrs. Gustave Helitz of Mazoumie, near Madison, was fatally burned in her home when a kerosene stove which she lighted to prepare a meal exploded.

Madison—Nearly \$12,000,000 will be available for highway construction and maintenance in Wisconsin in 1926, preliminary estimates of the state highway commission indicate. The figures show that approximately \$11,937,800 will be available to counties. Counties will receive \$4,587,191 from the state and federal governments for construction of the state trunk highway system in 1926. Other highway funds will be divided as follows: For improvement of county trunk system, \$1,277,000. Maintenance of state trunk highway system, \$3,864,000. Maintenance of connecting streets in cities, \$127,000. Maintenance of state and city bridges, \$81,000. Maintenance of town and village roads, \$1,494,000. Maintenance of city streets, \$408,000.

Green Bay—Timothy Reddy, 92, town of Morris, Brown county, perhaps the only man in Wisconsin to have the distinction of fighting on both sides during the Civil war, is dead. Mr. Reddy, who was born in Tralee, Ireland, came to this country when a boy, settling in Brown county. In 1857 he went to Texas and on the outbreak of the Civil war was required to fight in the Confederate army, even though his sympathies were with the north. In 1865 he and a companion escaped into Mexico and then took a ship to New Orleans from where they reached a northern city and enlisted in the Union army.

Oconto—Awards of prizes in the Wisconsin potato exposition at Oconto were announced by the Judges, R. E. Vaughn, Melvin Luther and J. W. Braun, of the college of agriculture, University of Wisconsin. Price county took first prize, with a score of 97. Henry Rahmlow, county agent, takes a banner and also the silver trophy hung up by the Milwaukee Association of Commerce. Other prize banners awarded were: Second, Oneida county, 96; third, Forest, 94; fourth, Oconto, 93; fifth, Barron, 92; and sixth, Rusk, 91.

Madison—The 1925 tobacco curing season is three weeks ahead of the average, the Northern Wisconsin Co-operative Tobacco pool says in its latest report. Since it is not uncommon to start taking tobacco down from the poles as early as Thanksgiving time, the pool states, it will be possible for some of the early crops to come down during the early part of November, providing the weather is suitable.

Milwaukee—Supt. Frank O. Holt, Janesville, has been elected president of the Wisconsin Teachers' association at the annual convention in Milwaukee to succeed C. J. Anderson, Madison. Mr. Holt has been president of the Rock County and Southern Wisconsin Teachers' associations and has been a member of the executive committee of the state association. He is also a member of the state board of teachers' examiners.

Madison—Alcohol, the urge to take another person's property, and "hard-boiled" auto drivers appear to inspire the chief part of post-war crime. At least, they are to blame for the largest number of the 7,207 criminal cases which came before the Dane county superior court during the six years from 1918 to 1925, inclusive.

Rice Lake—Four children in Rice Lake, Barron, Cumberland, Spooner, Hayward and other places in this region will be remembered at Christmas this year by the Elias' lodge of Rice Lake. Christmas cheer is brought into the homes of the poor each year by the Rice Lake Elias through funds raised by holding a carnival.

Sheboygan—The Rev. F. E. Murphy, who has resigned as pastor of St. Clement's church, Sheboygan, to accept the pastorage of St. Raphael's, Madison, has announced that the Rev. Paul Schaffel, D. D., for six years pastor of St. Joseph's, Waupun, has been tendered St. Clement's parish.

Fond du Lac—Sheriff A. A. Briggs, Fond du Lac, will be a cent richer by virtue of his office unless some one files a petition of administration for the estate of Andy Hughes, who died suddenly at North Fond du Lac. The cent was found in the pocket of the dead man, and as far as is known constitutes his sole estate.

Wisconsin Rapids—Bequests to religious and educational institutions amounting to more than \$20,000 were revealed when the will of George B. McMillan, Civil war veteran and pioneer resident of central Wisconsin, was made public in Wisconsin Rapids. Mr. McMillan, who was 85, died Oct. 27.

Rhineland—A campaign for 100 new members has been launched by the Oneida County Fish and Game Protection association. The association, which was organized a number of years ago, has developed into one of the largest conservation organizations in Wisconsin.

Madison—Higher fire insurance rates on Wisconsin farm property will be disappointed by the insurance department unless both premium and investment earnings of the insurance companies show a loss, Commissioner W. Stanley Smith indicated.

Stevens Point—The leather jacket worn by Bruno Knapp of Stevens Point saved him from being seriously wounded when a hunting companion shooting at rabbit peppered him with fine shot.

Eau Claire—Dr. Frank E. Wilson, rector of Christ Episcopal church at Eau Claire for six years, has announced he had declined a call to the pastorate of Trinity church, Highland park, Chicago, and would remain in Eau Claire.

Beloit—A savings deposit record 90 per cent perfect was scored by Beloit high school students during the last week, school banking reports show. Only two of three failed to put money in the bank on school banking day.

HOUSE BODY O. K'S \$111,036,000 TAX CUT

Reductions on Autos, Tires, Tobacco and Alcohol Voted.

Washington.—Reductions in the automobile taxes, the alcohol tax, the tobacco tax, the brokers' tax and some eight more excise levies totaling about \$111,036,000 were tentatively agreed on by the house ways and means committee, this indicating that the \$50,000,000 limit of tax reduction set by Secretary Mellon will not be getting surpassed.

It has been decided for the time being to repeal the levies on trucks and automotive parts and to reduce the tax on passenger cars from 5 to 3 per cent. Representatives of the automobile industry who appeared before the committee asked for the repeal of this tax and filed a signed pledge from the principal automobile manufacturers that the price on automobiles would be reduced in direct proportion to the amount of tax taken off. In reducing the levy from 5 to 3 per cent, the total revenue from passenger cars, which is about \$94,000,000, is cut to \$55,000,000.

It was also agreed to cut \$10,000,000 from the tobacco tax. This relief is from the cigar industry. The tax on alcohol was cut 50 per cent, being reduced from \$24,000,000 to \$12,000,000. Besides these reductions and the elimination of the tax on brokers, excise taxes were tentatively repealed on jewelry, firearms, with the exception of the tax on pistols, cameras and films, art works, use of yachts and boats, pipes, mah jongg sets and slot machines.

It is estimated that the total reduction in incomes to date total about \$182,000,000. When the reductions in excise taxes are added to this, a total of about \$297,000,000 is obtained.

Repeal of the publicity provision of the revenue law was approved by the house ways and means committee. The action was taken by Republicans and Democrats in working out what promises to be a nonpartisan tax measure.

As amended the provision would require lists of names of taxpayers to be made available to public inspection, but without the amounts of tax paid, as under the present law.

The committee retained the provision of the present law giving the house ways and means committee, the senate finance committee and special congressional committees the right to call on the treasury to furnish original tax returns.

The committee acted on corporation taxes, rejecting proposals to repeal the capital stock tax and modify the 12 1/2 per cent tax on corporation earnings.

Mitchell Brings Out More Accusations

Washington.—Col. William Mitchell, charged with being insubordinate to his superiors in the Army and Navy departments when he accused them of being "ritually incompetent," reiterated his charges before the court-martial and asserted that he could prove them.

Jury Ready to Try Father Who Killed "Human Husk"

Littleton, Colo.—Word pictures of Hazel Blazer—described by the defendant as a human husk without a soul, and by the prosecution as a spark of humanity—were painted in court as the state began introducing evidence in an effort to convict Dr. Harold Elmer Blazer on a charge of murdering his daughter.

Postal Rates Fail to Meet Expenses

Washington.—Recently increased postal rates will meet only half the increase in expense of the Post-Office department due to postal salary increases. Postmaster General New told the special joint congressional committee investigating postal rates. The rate increases will add about \$32,000,000 to revenues, making a total of \$929,000,000 in revenues while the salary increases add \$68,000,000 yearly to expenditures, he said.

Gov. Pinchot Seeks to End Hard Coal Strike

Harrisburg, Pa.—Governor Pinchot sent letters to W. W. Inglis, chairman of the anthracite operators' negotiation committee, and John L. Lewis, international president of the United Mine Workers, asking them to meet him to discuss the coal strike situation. The governor hopes to meet Mr. Lewis in Philadelphia and Mr. Inglis in Harrisburg.

\$3,000,000 Boost in Wages New York

New York.—The Western Union Telegraph company plans to distribute \$3,000,000 in salary increases based on merit to its land-line employees earning less than \$3,000 a year. Increases will become effective January 1.

TAX REDUCER

New portrait of Representative Clement Cabell Dickinson, Democrat, of Missouri, a member of the house ways and means committee which is now considering problems of tax reduction. Mr. Dickinson was a school teacher and lawyer, as well as prominent in Missouri state politics, before being elected to congress in 1910.

FRENCH SUFFER TWO REVERSES IN SYRIA

Druses Seize Town Near Damascus—Camp Evacuated.

London.—Two French reverses in the warfare around Damascus were reported. The Druses have seized Derat, seven miles south of Damascus, and have severed communications with Damascus by means of the Haila-Damasus railway. Mousaffir, a large French fortified camp south of Suedia, in the Jebel Druze territory, has been evacuated. The French command reporting that this was necessitated by a regrouping of forces.

Although the French communique says that there is nothing else to report in Syria, information from unofficial sources is that the situation in Syria is growing graver, with Arabs joining the Druse rebels, with Homs, about 80 miles north of Damascus completely isolated and closely besieged, and with Damascus under fire and in terror.

The Moslem leaders are preaching a holy war against the French mandate and their soldiers are showing a reckless disregard of life. With Damascus isolated and many of its inhabitants in flight, the French under General Gampelin are refraining from spectacular reprisals, but seek to continue their efforts to keep their hold in Syria under the rules of civilized warfare until the question can be taken up by the League of Nations.

In a dispatch which emphasizes the seriousness of the situation around Damascus, the Cairo correspondent of the Daily Mail says the insurgent leader Ramadan Pasha Ibn Sheldah has proclaimed himself military governor under a provisional government. Nessib Bey Bakry has been proclaimed civil governor.

Jury Ready to Try Father Who Killed "Human Husk"

Littleton, Colo.—Word pictures of Hazel Blazer—described by the defendant as a human husk without a soul, and by the prosecution as a spark of humanity—were painted in court as the state began introducing evidence in an effort to convict Dr. Harold Elmer Blazer on a charge of murdering his daughter.

Two Boys, Two Girls Killed When Auto Is Hit by Train

Kalamazoo, Mich.—William Stevens, sixteen; Harold Curlett, seventeen; Della Miller, fourteen, and Louise Wagner, fourteen, were killed when the closed car in which they were riding was struck by a train on the Michigan Central railroad at Douglas avenue here. The automobile was struck broadside, carried about 200 feet and toppled over an embankment 20 feet high. It then caught fire, the flames charring the body of Miss Miller before firemen who were called could rescue it from the tangled wreckage.

Rum Ships Off New York; Coast Guard Is Active

New York.—Fourteen ships are hovering along rum row, the New York World says, with cargoes of liquor for the holiday trade. Skippers of incoming vessels have told of renewed activities off the Long Island and New Jersey coasts, where last summer the coast guard reported the imaginary line of cheer had been cleared of its floating warehouses. Four new liquor ships have been reported in the coastal vicinity of Boston. Others have been sighted hovering off the southern coast.

Policeman Killed by Bomb

Chicago.—Policeman Fred M. Schmitz was killed by the explosion of a bomb at his home at 5233 West Van Buren street. An investigation failed to disclose the motive for the deed.

Counterfeits Flood Mexico

Mexico City.—Counterfeit American gold certificates of \$50 and \$100 denominations are flooding Mexico, and American secret service agents are on the trail of a gang.

Will Curb Dry Agent Killers

Washington.—The federal government is preparing to deny prohibition agents who kill citizens the right to trial in federal courts, Brigadier L. C. Andrews, assistant secretary of the treasury, warned on Sunday.

Ryan, Bridge Contractor, Dies

New York.—Patrick J. Ryan, former chief of police of Youngstown, Ohio, who later became one of the biggest bridge contractors in the country, died of heart disease.

WOULD MAKE HOOVER U. S. RADIO DICTATOR

Broadcasters in Meeting at Washington Would Limit Stations.

Washington.—Radio men of America would make Herbert Hoover dictator of the air. That became apparent at the first session of the Fourth National conference, called here by the secretary of commerce to discuss the many perplexing problems facing an industry that is said to be quickly approaching the status of a public utility.

A resolution expressed the opinion of the National Association of Broadcasters, which is included in the conference, as follows: "Be it resolved, That full authority be vested in the secretary of commerce to act on broadcasting license application; that he be authorized to use such means as he deems proper to ascertain the broadcasting need of the communities in which licenses are sought, with due provisions for court appeal."

A bill asking that Mr. Hoover be made virtual dictator of radio will be introduced in the next congress, the radio men said.

Use of radio broadcasting for advertising purposes received a wallop in the day's discussion when delegates demanded that "service to listeners" be a chief factor in determining the rights to the air. Mr. Hoover himself is in favor of some sort of government control. "The ideal situation, as I view it," he said, "would be traffic regulation by the federal government to the extent of allotment of wave lengths and control of power and the policing of interference, leaving to each community a large voice in determining who are to occupy the wave lengths assigned to that community."

The conference, the fourth of its kind, all of them called by Mr. Hoover to effect close cooperation in the interest of better radio service, brought to Washington 400 of the country's foremost broadcasters.

Probe of Nation-Wide Rum Plot Is Under Way

St. Paul, Minn.—The St. Paul Pioneer-Press says that five agents of the United States Treasury department have been in St. Paul for more than five weeks investigating alleged liquor conspiracies. The probe, the newspaper says, is part of a nationwide investigation of a gigantic liquor-distributing system extending from Philadelphia to St. Paul. Federal inquiries are being made in other cities, including Chicago, Milwaukee, Cleveland and Philadelphia. Eventually 100 indictments on conspiracy and bribery charges will be sought before a federal grand jury, according to the Pioneer-Press.

Five Women Found Dead; Suspect Poison in Wine

Hibbing, Mont.—Five women are dead as the result of poisoning or asphyxiation. A gas jet found open in the kitchen of the home of one of them is believed to have caused the death, although a coroner's inquest has been called to determine if wine, contained in small glasses, found before each of them, contained poison. The dead are: Mrs. Ellis Knutsisto, thirty-five; Mrs. Ida Hardy, thirty-five years old, her tonant; Mary Herzog, twenty-five years old; Mrs. Mary Ernatinger, thirty-five years old; Katherine Green, twenty-five years old.

Two Boys, Two Girls Killed When Auto Is Hit by Train

Kalamazoo, Mich.—William Stevens, sixteen; Harold Curlett, seventeen; Della Miller, fourteen, and Louise Wagner, fourteen, were killed when the closed car in which they were riding was struck by a train on the Michigan Central railroad at Douglas avenue here. The automobile was struck broadside, carried about 200 feet and toppled over an embankment 20 feet high. It then caught fire, the flames charring the body of Miss Miller before firemen who were called could rescue it from the tangled wreckage.

Rum Ships Off New York; Coast Guard Is Active

New York.—Fourteen ships are hovering along rum row, the New York World says, with cargoes of liquor for the holiday trade. Skippers of incoming vessels have told of renewed activities off the Long Island and New Jersey coasts, where last summer the coast guard reported the imaginary line of cheer had been cleared of its floating warehouses. Four new liquor ships have been reported in the coastal vicinity of Boston. Others have been sighted hovering off the southern coast.

Policeman Killed by Bomb

Chicago.—Policeman Fred M. Schmitz was killed by the explosion of a bomb at his home at 5233 West Van Buren street. An investigation failed to disclose the motive for the deed.

Counterfeits Flood Mexico

Mexico City.—Counterfeit American gold certificates of \$50 and \$100 denominations are flooding Mexico, and American secret service agents are on the trail of a gang.

Will Curb Dry Agent Killers

Washington.—The federal government is preparing to deny prohibition agents who kill citizens the right to trial in federal courts, Brigadier L. C. Andrews, assistant secretary of the treasury, warned on Sunday.

MARKETS

MILWAUKEE MARKETS.

Table with columns for Butter, Cheese, Eggs, Live Poultry, Hay, and Grain. Includes items like Creamery tubs, Extra firsts, Am'can full cream, twins, Daisies, Longhorns, Brick, Limburger, Fresh current receipts, Second, Fowls, Roosters, Springers, Turkeys, Ducks, Geese, No. 1 timothy, No. 2 timothy, No. 1 mixed, No. 2 clover, mixed, Rye straw, and Oat straw.

Table with columns for Corn, Oats, Barley, Choice to fancy, Fair to good, Light weight, Feed, Potatoes, Hog, Hogs, Prime, heavy butchers, Light butchers, Fair to good, light, Fair to best, mixed, Fair to select packers, Cattle, Hefers, Cows, Bulls, Calves, Sheep, Native lambs, choice, Culls, Ewes, Bucks.

Table with columns for MINNEAPOLIS MARKETS, Wheat, Corn, Oats, Rye, Barley, Flax, and CHICAGO MARKETS, Wheat, Corn, Oats, Rye, Barley, Ties, medium, light, packing sows, slaughter pigs.

The Kitchen Cabinet

How can anyone start the day properly if he wakes up in a room where the paint and wallpaper are constantly making faces at each other and the furniture?

HEALTH VALUE OF FRUITS

The healthful properties of fruit are now so well known and appreciated that while we may not care to go to extremes and support the claims of those who believe we should live exclusively on fruits and vegetables, and still we are willing to credit them with great virtue.

The citrus fruit is one of the most popular varieties. Lemon juice used to bleach and soften the skin is well known; as an aid to beautifying the hair, it may be so well appreciated. The juice of half a lemon in the glass water when washing the hair will soften and leave it light and fluffy.

Lemon juice applied to bites and stings of insects will relieve at once. As a mouth wash, lemon juice in a glass of water is good for the teeth, sweetens the breath, and swallowed, is good for a bilious condition. Oranges, while rich in sugar and vitamins, are high in mineral salts. Oranges act upon the bowels. Taken at night they are especially good, and even young babies thrive on a tablespoonful of the strained juice, given between feedings of milk.

A glass of orange juice is usually relished by the most delicate stomach and is recommended for biliousness. Grapefruit is said to contain a substance similar to quinine and has been recommended in case of malaria. For that tired feeling, which is called spring fever, it is said to be very good. Then where the fresh fruit cannot be obtained, there are canned varieties that are especially delicious, all ready to serve.

Those who have studied the properties of grapefruit say that the proper way to get its full value is to get it through the meat grinder, skin, seeds and all; cover with boiling water and let stand until cold. Strain and take in small doses three times a day. Those who like quinine will probably enjoy this.

Prune Whip Parfait.—Take one-half cupful of stewed prunes stoned and mashed, one-half cupful of raisins seeded and boiled in water—just enough to keep from burning; cut up eight marshmallows into one-half cupful of cream and steam in a double boiler until soft, then beat smooth, add a pinch of salt and whip into the other ingredients and set away to chill. When ready to serve blend in sherbet glasses, pour over whipped cream and sprinkle with broken pecan meats.

Acid cherries stimulate the gastric juices and are laxative. Prunes and figs are considered nature's best laxative. They are also rich in sugar and mineral salts.

All citrus fruits, in fact most of our fruits, are said to give an alkaline reaction. Plums and cranberries are the exception.

Savory Food.

Save the coarser outside stalks of celery and cut into half-inch pieces. Cook until tender, then put into a baking dish with a layer of thin white sauce, a layer of grated cheese, and repeat. Cover with buttered crumbs and bake until the crumbs are brown.

Larded Beef Tenderloin.

Cut the salt pork for larding from the firm portion under the skin. Cut the lardous one-fourth inch wide and as long as the pork slices permit. Chill the lardons in ice water before threading them and insert one fourth inch below the surface and draw through in a loose knot. Arrange in rows or triangles, dredge the tenderloin with seasoned flour, brown in a hot frying pan, turning often to keep from scorching. Then cook slowly until well cooked. Serve with baked bananas and:

Providence Sauce.—Put two tablespoonfuls of the trimmings from the salt pork into a saucpan to fry out. Add two spoons of onion, five of carrot, two spoons of parsley, a quart of a halfpint, a slice of green pepper and half a chili pepper; cook and soft, drain off the fat, add one-fourth of a cupful of vinegar and let simmer until the vinegar is reduced to one-half. To the fat add enough butter to make four tablespoonfuls, add the same amount of flour and cook until smooth, then add one and one-half cupfuls of brown stock, the vegetables and the vinegar, boil up once, strain over one-half cupful of suet and return cooked in boiling water until tender, add three tablespoonfuls of currant jelly and the same of orange juice.

Fried Egg Plant.

Parse and cut the egg plant into thin slices. Fill on a large plate and sprinkle each slice with salt. Cover with another plate and put a heavy weight on top. Let stand an hour or two, remove the weight, rinse each slice in cold water, wipe dry and in beaten egg, brown in seasoned crumbs and fry brown in butter. For fritters fry into batter and fry in deep fat.

Prudence's Daughter

By ETHEL HUESTON

Copyright by the Hobbie-Merrill Co. WNSU Service

CHAPTER VI—Continued

Prudence looked at Prudence for as long as she could, her eyes were fixed on the girl's face. She was so pale, so thin, so tired, so sad. Prudence's eyes were fixed on the girl's face. She was so pale, so thin, so tired, so sad.

"I don't know," she said gently. "What do you think?" So Jerrold carried it down to the office and sent for Duane. "It's none of my business, of course," he said. "Don't think I care how much you correspond with the family—and don't blame me—but I don't know what else to do with it. She gave it to me and said to bring it to you."

"I don't know," she said gently. "What do you think?" So Jerrold carried it down to the office and sent for Duane. "It's none of my business, of course," he said. "Don't think I care how much you correspond with the family—and don't blame me—but I don't know what else to do with it. She gave it to me and said to bring it to you."

Interesting Floor Plan Groups Rooms Around Central Dining Room

Floor Plan.

By WILLIAM A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all problems pertaining to the subject of building, for the readers of this paper. Write to him at the address given below. He is a professional architect and has had many years of experience as editor, author and manufacturer. He is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only enclose two-cent stamp for reply.

This is the day of the small house and compact designs are at a premium. No longer do people seem to care for large spaces which involve much work in keeping house, and the little home is most decidedly the thing. Some of these are bungalows and some are two-story houses with quite a few examples of the story-and-a-half house and a growing representation of double houses and bungalows.

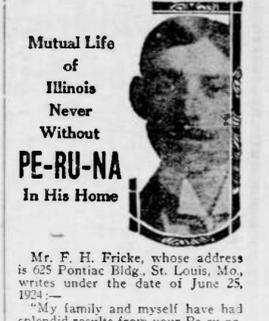

Perhaps the first thing which comes to our minds when small houses are mentioned is the bungalow, for it has for some years been the typical small home. When properly designed to avoid too low an appearance and to fit its site, the bungalow may be made most attractive and possesses much to recommend it to the prospective home builder.

The bungalow shown here is an excellent example of what can be done with this sort of house, and it offers not only a particularly charming exterior but also a rather unusual and interesting floor plan. The living room and dining room are grouped together, and a small kitchen is placed in the rear of the house.

The roof is extended at the center of the front to form a shelter for the front entrance, which is placed in the center of the house and opens directly into the dining room. This room has no outside exposure except from the front and it is the room about which the other rooms are grouped.

At one side of this dining room is the living room with French doors opening onto the terrace at the side and of sufficient size, 12 feet by 16 feet, to be a comfortable place. At the other side of the dining room is the kitchen. Placed in the front corner of the house as it is, it makes the kitchen work less of drudgery because of the attractive view which is possible through the large front windows.

Division Manager

Mutual Life of Illinois Never Without PE-RU-NA in His Home
Mr. F. H. Fricke, whose address is 625 Pontiac Bldg., St. Louis, Mo., writes under the date of June 25, 1924:
"My family and myself have had splendid results from your Pe-Ru-NA. We are never without it in our home. I wouldn't take a thousand dollars for what it has done for my family and myself. When I contract a cold I immediately take a dose of Pe-Ru-NA and get relief. I recommend Pe-Ru-NA everywhere." For coughs, colds, catarrh and catarrhal conditions generally Pe-Ru-NA has been recognized as reliable for over thirty years.

Sold Everywhere Tablets or Liquid

Hoosier Expression
Bill Henschel's contention that the Hoosiers have a "hoosier" all their own, was made apparent to a distinguished Minnesotan, a visitor at the national dairy exposition. Indianapolis' guest was trying to check with one of the downtown hotels as to whether a special dairy dinner had been given as yet.
"They have eaten and gone," was the startling reply.—Indianapolis News.

No more RHEUMATISM
IT'S GONE! That awful agony! Rheumatism can't stand the rich red blood that S. S. S. helps Nature build.
But rheumatism will bring pain and misery to your joints and muscles just as long as you are without plenty of rich, red blood in your system. It's the red-blood-cells that S. S. S. helps Nature build that drive out of your system the impurities that cause rheumatism. And until you do build up your blood to where it is pure and rich and red, you simply can't get rid of rheumatism.
And S. S. S. is the thing. Red blood conquers rheumatism. Everybody knows that.
S. S. S. means millions of red-blood-cells—means health all over. No more rheumatism. Nights of rest—days of joy, filled with the happiness of accomplishment—made possible by a body brimful of red blooded life, energy and vitality. That's what the end of rheumatism means—that's what S. S. S. brings to you. Get S. S. S. from your druggist. The larger bottle is more economical.

May Have Come Upon Lost Mormon Trails

Curious old rock trails recently discovered have caused the California State Historical society to launch an extended research into the routes of early day highways. The routes of the evidences found are those of the lost Mormon trails which more than a half century ago connected Utah with the Pacific southwest, according to the New York World.
More than 60 years ago San Bernardino, 22 miles south of Lake Arrowhead, was a Mormon village, planned after Salt Lake City, and to the southward ancient caravans creaked their picturesque way along the monotonous journey.
What is now known as Lake Arrowhead was at that time a rugged, mountainous section with rushing streams. The lost trails are believed to have traversed this section. With the coming of settlers, the mountain streams were stemmed and Little Bear lake was into existence. Later a huge earthen dam 1,500 feet wide at the

"The Starter Won't Work. Will You Take Me In Quickly, Please?"

mechanical contrivance, as it seems she often calls. The boy turned from the telephone and called out to the man in charge of the repair shop:
"Send a tow car for Miss Harner. She broke down out on Eleventh, other side of the park. She's in a hurry."
Before the man in charge could make a move or give an order, Duane was at his feet.
"Hold up that call a minute," he said with impressive authority in his tone. "I've got to speak to Mr. Harner. I'll be right back."
He broke into the sacred precinct of the president's office without ceremony.
"Listen, Mr. Harner," he began with boyish earnestness. "Her car broke down—Jerry's—and she phoned for a tow. May I go after her?"
Jerrold looked at him, laughed a little, shook his head. "Sure you may. And God help you."

Jerry sat patiently behind the wheel of her handsome little roadster, beneath the drooping branches of a great maple, a skeleton in the late fall, and waited for the tow car. Her thoughts were far from the quiet Iowa streets.

base, with a capacity of 775 acres of water, created Lake Arrowhead. In the virgin forest of oak, cedar and fir surrounding the present lake old roads wind through the trees to the water's edge, where they disappear to emerge again on the opposite side of the lake.
The historical research workers believe these trails once traversed the former mountain slopes and merged with the old Arrowhead trail in the desert, near Victorville and Hesperia.

Pergolas Are Now Part of Well-Kept Home

Pergolas are becoming more and more evident in the better homes of both town and country. Whether simple or ornate, they provide a sheltered nook on the lawn that may be fitted up with chairs, benches and tables to provide a very suitable substitute for the parlor in warm weather. The pergola may be built with one or more floors, lattice-work and pillars. Flowers and vines are, of course, a necessary part. There are several varieties of the nonflowering variety, particularly the ivy, which are acceptable, and the more popular varieties of flowering vines are the clematis, the trailing roses and geraniums.

Steel Girders Replace Old Wooden Joists

In most of the buildings erected today it is not uncommon to find steel used for the floor supports instead of wood as formerly.
In the smaller buildings the old form of wood joint floor construction is quite generally adhered to but steel is used for columns and girders. In setting the steel columns it is sometimes quite a task to get them plumb exactly correct.
The common way of setting these columns is to fix two base angles to the bottom and to these angles a plate is riveted. This plate provides a good bearing on the footing for the column and is an essential agent in helping to distribute the load evenly over the footing.
In placing the column in its final position it is customary to spread a layer of cement mortar over the footing and set the column upon the mortar, allowing it to bed itself in position.
It sometimes occurs, however, that

Seasoning of Wood Important in Building

In building one often finds a natural material with knots, sawwood, splits and moss. This is not in plank's nature, but it is in the nature of the wood. When they are to be used in building they must be of good quality, well seasoned. They must be nailed securely. Then, in order to avoid a possibility of twisting, they must be cross-braced and bridged. The wood must be seasoned. It must be brought to the building in a dry condition, nailed quickly into place; and if it should be dampened afterward, it should be allowed to dry out. It must be secured with many nails, braced and cross-bridged in a scientific manner. A building constructed in such a manner is rigid and substantial.

Outside Chimney

The outside chimney adds to the appearance of the house and is safer from fire hazard. Especially is this true of the chimney carrying the fireplace flue.
It is advisable to tilt the column slightly to assure its being plumb when the mortar hardens. This may be done by driving a couple of nails of a desired thickness between the plate and the top of the column footing.
Thus the column will be tilted and the degree of its tilt will depend upon the location of the point where the nails are driven.

Porches Need Paint

Porches especially need paint, even more frequently than does indoor construction, for they are outside structures and are easy victims of wind and weather unless properly protected.

Her Affliction

Little Millie had achieved great success at her school, and was being moved to a higher grade. Needless to say, her parents were pleased with her and anxious to hear how she would get on in the new class.
When she returned home at lunch time the first question her mother asked was this:
"Well, darling," she said, "how did you like your new teacher?"
"She seems very nice," replied Millie, "but I can't understand all she says."
"How is that?" asked her mother. "Does she talk too quietly?"
"Oh, no, mummy," returned Millie, "but—with the air of one who knows—I think she's got a predilection in her speech."

Beat Everything in Sight

Here is a good one about a little lad who was given his first watch the other day as a gift on his ninth birthday. His aunt tells the story.
"Although he seemed pleased," she said, "when he first opened the box his enthusiasm was quite restrained. But he dashed into the house on his return from school that day, and exclaimed jubilantly:
"My, but I've got a dandy watch!"
"I'm glad you like it," said his mother, duly pleased at his pleasure.
"Yes," he said, "it's half an hour ahead of Jim's watch, and it's a whole hour ahead of the clock in the drug store! Gee, it beats them all!"—St. Paul Dispatch.

Monk Man of Learning

The epithet "Admirable Doctor" was bestowed upon Roger Bacon (1214-1292), an English monk of the Franciscan order. He was without doubt the greatest philosopher of his time. His great work, the Opus Majus, was written about 1265, and first printed in 1733. It treats of nearly all the sciences. He was accused of practicing black magic; and in 1278 a council of the Franciscans, jealous of his superiority, condemned his writings and committed him to prison in Paris where he remained for ten years. He died at Oxford about 1292.—Kansas City Times.

Power of States Wide

Powers of congress are great within limits specifically laid down, but all where the powers are not mentioned. For instance congress cannot legislate on matters concerning health, labor or education of the American people. The Constitution gives congress the right to nothing except what it specifically authorizes. On the other hand the states can do anything that is not forbidden.

"You Don't Hear Me Kicking" Says the McCormick-Deering Engine

Rain or shine, gale or calm, hot or cold—the McCormick-Deering Engine chugs through its work willingly and economically. When there's water to be pumped, you can depend on a McCormick-Deering to do the job. When the churn needs turning or the cream separator, washing machine, or electric plant need power, the McCormick-Deering Engine does its work without a whimper. The fact is, it's remarkable how many jobs one of these sturdy engines can do on the average farm. The McCormick-Deering Engine crankcase is enclosed, and the cylinder is removable; two good features you won't find on other engines. And as you look the McCormick-Deering over carefully you find other important features that win you over to this make of engine. If you need power on your farm, better come in and see the McCormick-Deering; we'll warrant you'll want the engine when you get acquainted with it.

LOCAL HAPPENINGS

—Tony Schmitzer was a Milwaukee visitor Tuesday.

—Frank Moser, traveling salesman of Milwaukee was a business caller in the village Tuesday.

—Ralph Wellensak of Milwaukee was a guest of relatives and friends in the village Sunday.

—Arnold Boegel of Milwaukee spent the week-end with his parents, Mr. and Mrs. Wm. Boegel.

—L. P. Rosenheimer, B. H. Rosenheimer and Otto E. Lay were Milwaukee visitors Wednesday.

—Miss Frances Raether visited from Saturday until Wednesday with relatives at Milwaukee.

—A number from here attended the funeral of Andrew Strachota at St. Killian Saturday morning.

—Miss Camilla Driessel of Milwaukee spent Sunday with her parents, Dr. and Mrs. Henry Driessel.

—Mr. and Mrs. Jack Tessar and family of West Bend spent Sunday with the August Schaefer family.

—Miss Loretta Ebenreiter of Chicago spent Saturday and Sunday with relatives and friends in the village.

—Miss Crescence Stoffel of Milwaukee spent Sunday with her parents, Mr. and Mrs. Simon Stoffel and family.

—Mrs. August Buss and Miss Pearl Buss visited from last week Thursday until Monday with relatives at Chicago.

—C. M. Gage of Campbellsport was a pleasant village caller Thursday. This office acknowledges a welcome call.

—Carl Schnurr of Madison visited over the week-end with his parents, Mr. and Mrs. August Schnurr and family.

—Ed Koepke and gentlemen friends of Milwaukee spent Sunday with the former's mother, Mrs. Mary Koepke and family.

—Mrs. Sarella Parker of Highland Park, Ill., spent last Thursday and Friday with her uncle, Wm. F. Backus and wife.

—You are cordially invited to attend the "Pep" dance at Wietor's hall at Wayne Center on Sunday evening, November 15.

—Mrs. K. A. Backus left Tuesday for her home in Marshfield, after visiting two weeks with Mr. and Mrs. Wm. F. Backus.

—Mr. and Mrs. Roman Smith and daughter returned home Monday from Tomah, where they visited over a week with relatives.

—Miss Regina Rohling spent Tuesday and Wednesday with her parents, Mr. and Mrs. Math. Rohling and family in the town of Ashford.

—Edw. Weddig, who is employed by the Wisconsin Telephone Company, spent the week-end with his parents. Edw. is now at Watertown, Wis.

—John F. Schaefer, Carl Schaefer, Elwyn Romaine, Adolph Rosenheimer Jr. and Arthur Schaefer, were at Fond du Lac Wednesday afternoon.

—Mrs. Fred Bilgo and Mrs. George Steinke and son Adrian of Cascade spent Sunday with Mrs. August Bilgo Sr. and with Mrs. Minnie Mertes and daughter Mona.

—Mrs. Mary Ann Honeck and son Joseph of West Bend spent Sunday with Mr. and Mrs. Anthony P. Schaefer and family and with Mr. and Mrs. Clemens Reinders.

—A prize card party will be held at the St. Michaels hall, St. Michaels on Tuesday evening, Nov. 17. A fine lunch will be served after the games. All are invited to attend.

—Myron Perschbacher and college friends, Mr. Knapp and Mr. Ungroth spent Saturday and Sunday with the former's parents, Mr. and Mrs. A. A. Perschbacher and family.

—Mrs. T. L. Conners, daughter Bessy Mae, Mr. and Mrs. Lew Heartl and daughter Caroline of Marshfield spent Saturday and Sunday with Mr. and Mrs. Wm. F. Backus.

—Dr. E. L. Morgenroth and Emil C. Backhaus were at West Bend Tuesday where they attended a meeting of the school boards of Washington county which was held at the court house.

—The Bridge Club was entertained at the home of Mrs. Otto E. Lay on Tuesday evening. First honors were awarded to Mrs. D. M. Rosenheimer. Usual refreshments were served after the games.

—Ben Breseman visited from Saturday until Monday with relatives at Milwaukee. He was accompanied some by his mother, Mrs. Elizabeth Breseman, who visited a week and a half in the Cream City.

—Rev. H. L. Barth of Hinsdale, Ill., spent Thursday and Friday with friends and relatives here. He also attended the chicken supper given by the ladies of the Ev. Peace congregation on Thursday evening.

—Arnold Hanson was at West Bend Saturday and Sunday, where he had charge of the second trick at the railway station there, releasing Jos. Opgenroth, who attended the funeral of Andrew Strachota at St. Killian on Saturday.

—Mr. and Mrs. Val. Peters motored to Milwaukee Sunday. They were accompanied there by Mr. and Mrs. John Strachota and family, who spent the day with them here. They also attended the funeral of Andrew Strachota at St. Killian Saturday morning.

—The approaching marriage of Miss Laura Brandstetter, daughter of Mrs. Anna Brandstetter of this village, to Leo J. Sennott, was announced in the Holy Trinity church Sunday. The marriage will take place on Thursday, November 26th. (Thanksgiving Day).

—W. E. Shepard and family left this week for Woodstock, Ill., to attend the funeral of Mrs. Shepard's father, F. E. Hanaford. Mr. Hanaford was a veteran of the Civil War, and was one of five who made a successful escape from Andersonville prison and joined the Union forces and served till the end of the war.

SAYS:
"See Mrs. K. Endlich's ad elsewhere in this paper."
"SPARKLES"

DUNDEE

Mr. and Mrs. John Kraeger visited Wednesday at Fond du Lac.

Mr. and Mrs. Dan Calvey and daughter Alice spent Wednesday at Fond du Lac.

Mr. and Mrs. Louis Mielke and Miss Ida Blodgett were Fond du Lac visitors Wednesday.

Mrs. John Krueger spent the week-end with her father Killian Strobel at St. Killian, who was sick.

Evelyn Tuttle visited from Friday until Sunday with her grand parents, Mr. and Mrs. August Falk.

Mrs. Wm. Hennings visited with the William Ellison family at Sheboygan from Thursday until Sunday.

Lawrence Gilboy visited with his grand mother, Mrs. Anton Bauers at Campbellsport from Wednesday until Sunday.

Mr. and Mrs. Dan Calvey attended the funeral of the latter's father, Wm. Skelton at Mitchell Thursday morning.

Mrs. Dan Calvey spent several days the past week with her father Wm. Skelton at Mitchell, who was very sick with pneumonia.

Ed. Gilboy and son Zerial of Milwaukee visited with relatives and friends in this vicinity from Wednesday until Sunday.

Mr. and Mrs. C. W. Baetz, daughter Phyllis and Mrs. Emilie Krueger, daughter Emilie were Sheboygan callers Friday afternoon.

Oscar Marquardt who had an auction last Saturday, and sold every thing has moved in with his mother, Mrs. Emilie Marquardt.

Mr. and Mrs. Math. Schuh and family moved to Fond du Lac Saturday and Sunday where they will reside for the winter months. Their place of residence is 75 Everett street.

The following students had vacation from Wednesday until Monday: May Murphy, Beatrice Bowen, Phyllis Baetz, Walter Daleague, Carl and Math. Schuh on account of the teachers being to the convention.

—Mrs. Harry Stahl were Sheboygan visitors Saturday.

Mrs. John Pesch entertained her lady friends at a goose picking bee on Monday.

Mr. and Mrs. Chas. Firme and Mr. and Mrs. John Sauter were Sheboygan visitors Tuesday.

Mrs. George Meilinger and children spent Monday evening with Jacob Theusch and family.

A number of friends helped Mrs. Gustave Mehlius celebrate her birthday on Sunday evening.

Mr. and Mrs. Chas. Backhaus and family spent Thursday evening with John Pesch and family.

Quite a few young folks attended the dance at Fillmore Sunday evening. All report a good time.

Mr. and Mrs. Edwin Klug and Leo Marquardt spent Tuesday evening with Herman Wilke and family.

Mike Marx, Ray Smith and Fred Ma Kosky were callers at the Jacob Theusch home Tuesday afternoon.

Mrs. Richard Gosse and son Arthur of Cleveland, Wis., spent Sunday with Mr. and Mrs. Emil Wilke and family.

You are invited to attend the prize card party held at St. Michaels hall on Tuesday evening, Nov. 17, at 8 p. m. A fine lunch will be served after the games, and prizes will be awarded.

Mr. and Mrs. Fred Bruesser and son Allen and daughter Ethel, Mr. and Mrs. Herman Wilke and daughter Ieta and Erwin Matthias spent Friday evening with Mrs. Louis Wilke and family.

Miss Ruth Parrish spent last Thursday and Friday at Milwaukee, where she attended the teachers' convention. On Saturday and Sunday she attended the State Young Peoples' conference at Janesville.

—Mrs. Nick Klotz were at Fond du Lac Tuesday.

Steve Fuller spent Friday evening with friends at Waucoasta.

Mr. and Mrs. Erwin Prindle were Fond du Lac callers Tuesday.

George Eggers and Norman Seifert of Dundee called here Sunday.

Alvin Seefeldt called at the home of Charles Lichtensteiger Wednesday.

Misses Caroline Ludwig and Anna Gibbons spent Friday at Fond du Lac.

Steve Fuller spent Monday evening with Leo Sammons and Oscar Schultz.

A. B. Moore and Ernest Odekirk spent Friday evening with Frank Smith.

John Sammons Jr., attended the card party at Glen Valley school Friday evening.

John Lichtensteiger Jr., of Campbellsport spent a few days of last week with his brother Clarence.

Mrs. Oscar Schultz and sister Caroline Ludwig spent Sunday with their parents, Mr. and Mrs. Fred Ludwig.

Miss Hazel Buehner and friend attended the card party at Lake Denevu school which is taught by Miss Viola Flood, Tuesday evening.

NOTICE

Rev. B. E. Scholow of Fond du Lac will preach in English at the Ev. Peace church at 3 o'clock p. m. Sunday, Nov. 18th. Everybody is cordially invited to attend these services.

Special Saturday Sale

November 14th Ladies' Coats, Children's Coats, Ladies' Dresses and Hats

Saturday, all day, and evening, every Coat, Dress or Hat will be placed on sale with a 10% discount—For Saturday Only. New Coats and Dresses arriving daily.

Big Assortment of Children's Coats, Pretty Models with Fur Trimming

All Discounted 10% November 14

Boys' Clothing
50 Boys' Suits, ranging from 5 to 16 years in size will be discontinued.

RADIO

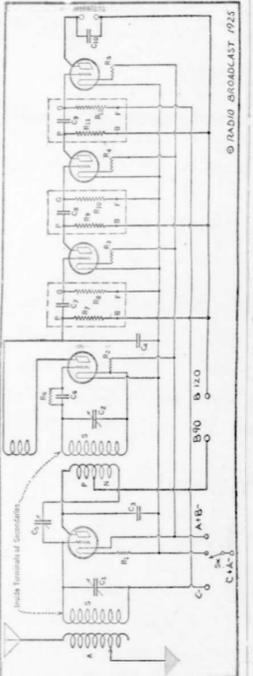

If you have a nonregenerative receiver and you desire to listen into pure CW code signals, the above method will be the solution. L1 consists of 50 turns of No. 22 DCC wire wound on a 3/4-inch tubing and tapped at every third turn. C1 is a .0005 mfd. variable condenser. The arrow coming from the A minus is the only variable portion of the coil and goes to the 16 taps. By varying these taps, closer or looser coupling between the plate and the grid can be obtained. Use a UV 201A tube with 67 1/2 volts on the plate.—Radio World.

Sixteen Stations in Three Minutes

Ideal Radio Receiver With but One Main Tuning Control.

One of the chief problems of the home constructor is that of trying to combine sensitivity with quality. It is generally admitted that the super-heterodyne represents the utmost in sensitivity but then, on local stations the quality is not what it might be. Possibly this accounts for the fact that many set manufacturers are no longer making a superheterodyne model but are going back to straight radio-frequency amplification. Many receivers on the market only employ a single stage of R. F. which will be found quite sufficient for general purposes. Two stages will only complicate tuning, or if single control is employed, the full value of the two stages is often not obtained.

"For a very long time we have been looking for the kind of receiver which

The Five-Tube Aristocrat Receiver.

would be easy to build, easy to operate and at the same time be comparatively economical," writes Arthur H. Lynch in the new Radio Broadcast Magazine. "In the receiver described here will be found what we consider a solution of the problem. There is but one main tuning control which makes the finding of stations so simple that a child can secure surprising results. In an actual demonstration, we have been able to show that by means of this single control and no other adjustments whatever, it was possible to hear sixteen stations in less than three minutes, with a single turn of the tuning dial. When other adjustments were made—and where is a DX fan who will not want to be certain that he is getting the last drop of energy out of his set?—we have been able to procure distance with volume, which few receivers other than a super-heterodyne could have accomplished. And above all, we have been able to secure tone quality which has been described by many of the radio design-

Hints That Will Be of Interest to Radio Fans

Too much wiring will increase losses in the set. The voltage test is the only proper test of a "B" battery. The minimum working voltage of a detector tube is about 170 volts. The low current consumption tubes will run off the battery a long time without having it charged. When passing the lead-in and ground wires through the same window, separate these wires a foot or more apart. The capacity of a variable condenser will be changed in regard to dial readings if any of the plates become bent. Sound vibrations are transmitted in great strength to the tubes when the loud speaker is resting on top of a radio cabinet. This will cause the grids and filaments to vibrate, which distorts the music. Keep the loud speaker off the cabinet and direct the sound away from the set. Unless a super-heterodyne is used,

ers and enthusiasts who have come to witness the performance of our new outfit, as being far superior to most receivers they have seen or heard. We believe this receiver will do much to aid radio in these music-loving circles. The present time has felt that radio reproduction was not sufficiently free from flaws to produce the music they love with true fidelity.

Famous for Tone Quality. "In the Radio Broadcast 'Aristocrat' there is one stage of tuned, neutralized, radio-frequency amplification, a regenerative detector, and three stages of resistance-coupled amplification. Before going, let it be said that the resistance-coupled amplification employed should not be confused with similar systems described in the past because it is now possible to maintain tone quality, for which this type of amplifier is famous, together with great volume, due to the foresightedness of some of the tube manufacturers who are now marketing what are known as high-Mu tubes. These tubes are specially designed for resistance-coupled amplification and the amplification per stage which is obtainable with them is far greater than has heretofore been generally possible.

"As was mentioned above, tuning is accomplished by a single dial. This dial is used to control a Hanscom single-control unit and is the main tuning control. It is a unique arrangement of two Kenler condensers, geared together in a manner which makes tuning of the antenna and radio-frequency circuits simultaneous. The panel is 7 by 18 inches and there is plenty of room on it for all the equipment necessary, when a sub-base is employed.

"The tuning inductances and the variable condenser assembly, antenna switch and battery switch are mounted on the main panel, while all the remaining equipment is either on the top or bottom of a 2 1/2 by 17 1/2-inch subpanel, which is suspended from the main panel by means of Benjamin No. 000 brackets. On the upper side of the subpanel are mounted the five tube sockets, three resisto-couplers, the grid condenser and leak mounting, and the variable neutralizing condenser. It is also possible to find room for all the binding posts, including those for the three connections for the C battery, if they are thought to be desirable. On the under side of the subpanel there are five mountings which are used for the filament ballast resistors.

- Lists of Parts. One 7 by 18 panel. One 2 1/2 by 17 1/2 subpanel. One Hanscom S. C. condenser unit. One set Eastern knockout coils. One Carter filament switch. Two Apex knobs. Five Benjamin sockets. Three Daven resisto-couplers with three .1 megohm resistors and one each .1 meg., .5 meg., and .25 meg. resistors. One Hammarlund neutralizing condenser. Two .304 Sanguino micro condensers. One Dubilier .5 microfarad by-pass condenser. Six Daven No. 50 mountings. One Daven leak condenser in new unit which combines the grid condenser and leak. Five Daven ballast resistors (the capacity of these resistors depends on the type of the tubes used). One Belden standard color, five wire cable. Two Benjamin No. 000 brackets. Two to six Ely binding posts. Two dozen 6 or 8-32 round head, brass machine screws, 3/4 inch long. "The five ballast resistors are shown in the diagram as R1-2-3-4-5. The selection of these will depend entirely on the types of tubes employed. The ideal combination of tubes consists in the use of two ordinary six-volt storage battery tubes for the radio-frequency amplifier and the detector, two high-Mu tubes for the first two stages of audio, with a semipower tube in the first stage.

EMBELLISHING TAILORED SUIT; WIDE-BRIM HATS AGAIN HERE

IT is a cunning art which can add embellishing touches and habit to a costume without detracting from its tailored aspect. Yet this is just what the French couturier accomplishes, a tailored suit which has ornate features. The illustration herewith demonstrates this truth. Note in the stunning suit to the right how fancifully fur and braid combine in a decorative way, yet

Two Paris Models.

rumor become fact. However, let it not be inferred that the little classifying shapes which have served us so faithfully and becomingly are to be crowded off the stage of fashion. Perish the thought! The small hat has won a fixed place in our esteem, and for all-around practicality and smart style it has no peer. However, there is something about the broader brims

which seems to "complete the picture," and it is very pleasing to know that fashion approves both brimless and brimmed headwear. The fact that honors are to be shared gives a zestful interest to the season's millinery notes.

The quartette of charming wide-brim hats shown here are typical of the trend of fashion. The ornate treatment evidenced in the hat shown last in the group emphasizes the "more trimming" movement. It is carried out in amber and brown colorings. The brim is a transparent metal mesh with dull gold soutache sewed row and row as a wide border. There is a bandled effect of the soutache encircling the satin sectional crown. The chrysanthemum, one on top and one on the underside of the brim shade from orange to brilliant henna. This model would be exquisite carried out in black and silver, for silver is particularly in favor this season.

A rocco ribbon wreath of flowers is festooned about the crown of the

Showing the Wide-Brim Hats.

are better than one when it comes to allowing extra fullness at the hemline of the skirt. The smooth-surfaced cloth is in the new blue coloring. Novelty is achieved in semi-tailored suits through solid embroidery done in self-colored floss. Even beads are sometimes introduced. Are we going to wear large hats this fall and winter? We are. At last the wide brim has arrived to fill its long-delayed return engagement with the world of fashion. Thus does

handsome but pictured to the left center. It has one of the shirred brims now so fashionable. A handsome ostrich novelty adds picturesque to the big-brimmed velvet and satin shape which is shown first in this group. Leaves cut out of velvet are applied on the felt crown of the model to the upper right. A silver ribbon traces its way about the crown, finishing in a pet bow. JULIA BOTTOMLEY. (©, 1925, Western Newspaper Union.)

Influence of the Ensemble. It is considered very chic to have one's bracelet, finger rings and hatpin ornaments of the same jewels or combinations of jewels. The ensemble idea is being carried further in accessories than ever before. Velvet Very Fashionable. A feature of the fall styles is the lavish manner in which velvet is employed for trimming on cloth, silk and chiffon frocks. Velvet Evening Coat. For fall and winter wear, nothing could be nicer than an evening wrap of geranium velvet with a collar of white fox. A very new note is struck by the entire coat being shirred so that a honey-combed effect is the result. Gold Collar and Cuffs. Very unusual are collar and cuffs of gold kid. Others are of gold moire silk.

Poison Will Kill Destructive Mice

Strychnine and Baking Soda Mixed Together Is Effective.

Field mice have already begun to attack the bark of young apple and peach trees, in spite of the fact that much green food material is still available.

Mounting earth about the trunks of the trees after the weeds and trash have been cleared away, and the use of wire netting or paper protectors help to prevent the damage, but poisoning is the most effective means, advises A. Freeman Mason, specialist in fruit growing at the New Jersey State College of Agriculture.

Poison Mixture. The United States Department of Agriculture recommends the following formula: Mix together dry, 1/2 ounce of powdered strychnine and 1/2 ounce of baking soda. Sift the strychnine-soda mixture over 1 quart of rolled oats, stirring constantly to insure an even distribution of the poison through the grain. Heat the poisoned rolled oats in an oven until thoroughly warm. Mix 3 parts of melted beef fat with 1 part of melted paraffin, and sprinkle 6 tablespoonfuls of this mixture over the warm, poisoned rolled oats, mixing until the oats are evenly coated. Allow the grain to cool and it is ready for use.

If large quantities of the bait are needed, use 1 ounce of strychnine, 1 ounce of soda, 8 quarts of rolled oats and 1 1/2 pints of the beef-fat-paraffin mixture. It is very important to have the beef-fat-paraffin mixture hot and the poisoned rolled oats thoroughly warm; otherwise it will not be possible to obtain an even coating.

Place Around Orchard. Tablespoonful quantities of the poisoned oats should be put in open-mouthed containers placed in the orchard. If mice are very abundant, a container should be used under every tree. A small drain tile makes a good container.

All poisoned baits and poison containers and utensils used in the preparation of poisoned baits should be kept plainly labeled and out of reach of children, irresponsible persons and live stock.

Soy Beans Excellent as a Supplement to Grain

Analyses show that soy beans are very high in digestible crude protein. The proteins of the soy beans are very well balanced in their amino acids, which makes soy beans an excellent protein supplement to corn, oatmeal, wheat and barley.

All feeding trials show soy beans to have a higher feeding value for swine than the seeds from most other plants. Soy beans are low in cellulose, and due to their high oil content, they frequently become unpalatable to swine, after a long feed.

Many trials have been conducted in which soy beans have been compared to cottonseed meal as the only supplement to corn in fattening swine. In 12 trials averaged, 100 pounds of ground soy beans replaced 65 pounds of tankage and 5 pounds of corn in the feed necessary to put on 100 pounds of gain. Pigs that are fattening on soy beans as a supplement to corn will not gain quite as rapidly as those receiving cottonseed meal.

Soy beans fed to hogs are very apt to cause the production of soft pork. It must be used only as a supplement to corn or other starchy feeds, and should never be used as a fattening feed alone. If soy beans are used in a corn ration to bring up the protein content of the ration only, bad results are not likely to follow.—B. W. Fairbanks, Extension Service, Colorado Agricultural College.

Winter House for Ducks

The house suitable for wintering ducks may be quite simple in construction. A good tight floor, well bedded with straw or leaves, good tight back and sides, a good roof and plenty of ventilation are the essentials. Simply because a duck is a waterfowl many people seem to think rain and snow make no difference in the winter time. They can stand much dry cold, but little wet cold weather. Your duck house need not be expensive, and inside furnishings not necessary. A house eight feet square will care for a pen of ducks.

Feed Dry Cows Some Grain

Dry cows that are to freshen within a few weeks, especially if in rather thin flesh, should receive some grain. Grain fed before calving returns an excellent profit as it enables the cow to start producing with a good reserve of flesh from which to draw. Equal parts of corn, sorgo, or barley, and of bran and oats make a good feed for the dry cow on pasture. If the pasture falls luscious and meat may be added. The cow should be in just as good condition as possible at calving time.

Select Breeders for Eggs

It may be well to again call attention to the necessity of selecting the breeders for egg production from the hens, not pullets, during November and December. These should be in laying condition unless molting, but pullets hatched not over one-eighth inch thick, a distance of six fingers width from these bones to the rear end of the keel bone, the abdomen be soft and pliable, the comb fine grained and red.

Winter Feed for Cattle

A splendid way to put breeding cows through the winter is to feed silage and velvet beans in pod. If velvet beans are not available, one pound of cottonseed meal per head daily is a splendid substitute. This ration is expensive, but brings the cattle through in better shape. It is recommended for those who have pure-bred cattle, which will command a better price than the scrubs or grades.

Protection Needed for Wintering Bees

Strong Cold Winds Are Always to Be Feared.

Already we have started to worry over the number of colonies we are going to winter successfully. It is time now to find some way to prevent winter losses and cease worrying.

If our fall management has been correct, we should now have strong colonies with at least fifty pounds of our best honey for winter stores. Some natural protection is of great value. In locating our apiaries, the windward side can be protected by a thick hedge, a building or a rough board fence. Strong cold winds are so much more chilling than calm days.

Now we have gone one step further and provide an insulation for our colonies. With four inches of dry planer shavings or leaves on all sides, six on top and four to six below, we can help a lot to keep a uniform temperature within the colony. Uniform temperature tends to decrease the colony activity in winter and decrease the honey consumption. Dry planer shavings are inexpensive and provide a first quality packing. Colonies should be packed singly, in twos, or fours. Larver numbers, close together, cause drifting in spring and necessitate too much moving. Packing, well done will reduce those heavy winter losses.—R. G. Richmond, Department of Entomology, Colorado Agricultural College, Fort Collins.

Protein for Poultry Is Necessary to Get Eggs

An experiment conducted by the poultry department at South Dakota State college, shows that although milk is a substitute for meat mash, if both the meat mash and the milk have to be purchased, the meat mash will supply the necessary protein to the chickens for less cost. A point in favor of the milk, however, is that it keeps the fowls healthier. The lactic acid in the milk seems to act as a tonic.

To combine the advantages of the two feeds, when both have to be purchased, it is advisable that the meat mash be wet with warmed milk or with the commercial semi-solid buttermilk diluted with warm water. This combination will cost but very little extra and will keep the chickens in good health.

In conducting the experiment, three flocks of 30 chickens each, were used. The semi-solid buttermilk was fed to one lot; the meat mash to the second, and buttermilk and meat mash to the third. All three flocks were also fed the regular scratch feeds. Practically the same number of eggs were laid by each flock during the time the experiment was carried on.

Free Chickens of Vermin Before Putting in House

Be sure the birds are clean and the poultry house free from lice and mites before putting birds in their winter quarters, say poultry workers of the Pennsylvania State college. A saline made of equal parts of lime, ointment and grease, mixed well together, may be applied under the wings and around the neck, using a piece about the size of a pea, or any good lice powder, such as sodium fluoride, may be used. Use a coal tar disinfectant as a spray, forced into cracks and crevices, to free the houses of insect pests.

Fit Runts for Market

Runts in the growing flock should be separated from the rest and pushed for market. They will grow much faster if they have comfortable quarters, separate and apart from the other fowls kept separate and well fed they will be surprised to see how fast they will grow and round out. But do not make the mistake of putting them back into the adult flock again. Once a runt, always a runt. The only proper use for such fowl is to market them just as soon as they are fit.

Dieted Cows Give Most Milk

By dieting his cows so that they received only sufficient rations to properly sustain them instead of all they could eat," a farmer at Urbana, Ill., has obtained more milk per cow than heretofore. The saving on feed was considerable in addition to the increased milk which rose from 10,152 pounds per month to 11,127 pounds. The change turned a loss of \$2 into a profit of 80 cents per cow.

FARM FACTS

- Don't forget to save plenty of farm and garden seeds.
- If you don't cover the ground in the garden the weeds will.
- See that plenty of ventilation is provided in the storage cage.
- Trees make our homes, schools and cities more beautiful. Plant them.
- Potatoes should be emptied and not dropped or dumped into the storage.
- A galvanized iron roof is a protection from lightning if grounded at two corners diagonally opposite. Ground cables should go down to permanent moisture and should be soldered or riveted to the roof.
- If potatoes are dug and allowed to lie during the heat of the day so that they become warmed through, the storage house or cellar should be left open at night to permit all the fresh air possible to circulate.
- Use the manure on the lighter and less productive spots on the farm. Much of the nitrogen and organic matter can be supplied in this way. It should be kept in mind, however, that additional phosphoric acid is needed to make a balanced plant food.

WRIGLEY'S

AFTER EVERY MEAL

Probably one reason for the popularity of WRIGLEY'S is that it lasts so long and returns such great dividends for so small an outlay. It keeps teeth clean, breath sweet, appetite keen, digestion good.

Fresh and full-flavored always in its wax-wrapped package.

Wireless Torpedo

A torpedo directed from the ground by wireless that is said to be capable of destruction in a radius of 100 miles from the firing base is the remarkable invention of Capt. Albany Roberts of New Zealand, says Popular Science Monthly. It is being investigated by the British ministry as a means of defense against future air raids.

MONARCH Breakfast COCOA

You will appreciate the combination of unusual quality and low price.

"Your uncle's death was rather premature, wasn't it?" "I don't know yet. I haven't seen his will."—Harvard Lampoon.

How Robert M. Koenig Found Remedy for Pimply Skin

For years my skin would break out every once in a while—and sometimes did very little to help me.

I read a doctor's article stating that pimply skin usually comes from the stomach—and bowels not getting rid of the poisons. I tried Carter's Little Liver Pills for a few days—and since that time my skin is smooth and clear. Now I tell my friends the right way of getting rid of a broken out skin—and also of steering clear of upset stomach and sick headache. Carter's are all you claim for them.

Irish Fight Vaccination

Vaccination is compulsory in the Irish Free State, but during the troubles of the last few years the enforcement of the law has been allowed to lapse. In many places the children have not been vaccinated for years. The government is now urging the local boards of health to insist on vaccination and to prosecute defaulters. But a feeling has grown up against vaccination and in Wexford the local authorities have refused to obey the government's instructions. The provision in the English law exempting from vaccination conscientious objectors to it does not apply to Ireland.

Women, Don't Suffer!

Kokomo, Ind.—"I was suffering with all kinds of aches and pains—head, back and side, dizzy spells and nervousness. The doctors tried to help me and I tried all kinds of remedies but got little relief. I was advised to try Dr. Pierce's Favorite Prescription. I hesitated on account of the failure of other treatments, but at last I tried it. One bottle helped me so much I got two more, and by the time I had taken them I was feeling like a different woman. It had relieved me of all aches and pains and made me well.—Mrs. Roy Griffee, 1225 W. Taylor St. All dealers.

CHAFING and RASHES promptly relieved and healed by a few applications of

Resinol

Quick Safe Relief

CORNS

In one minute—or less—the pain ends. Dr. Scholl's Zino-pads is the safe, sure, healing treatment for corns. At drug and shoe stores.

SOMETHING TO THINK ABOUT

By F. A. WALKER

A CLEAR TRACK

THE white lights are blazing encouragingly along your track, young man and woman, and the world is waiting open-armed to receive you. There is work to do for yourself, and your country. The shops and factories are calling you. The professions are opening places in their ranks for your acceptance. The smiling acres in pleasant valleys and on magnificent, health-giving hills are stretching out their plump, brown arms to embrace you in a friendly welcome. From everywhere comes the call to honor and prosperity. The old and worn are falling by the wayside; the young and vigorous must move up and take their places, full of promise and overflowing with riches. Mount your steed and whip him up. Do not be afraid. Nothing is impossible if you will accept responsibility intelligently and give the best that is in you. There are greater fortunes hidden in the future, waiting for development than are visible in the present, and the track is clear along the entire way. Keep going in all sorts of weather. Keep away from your own ugly moods, angry quips and storms of passion. Carry with you all the cheer, willingness and sunshine that you can.

COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Eoil to Dye.

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades or dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything! Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Success Briggs—It says here that a New York man has had his daughter arrested because she has "a mania for contracting debts."

Griggs—Let me have that article; I'll put it where my wife can see it.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

The ideal husband exists chiefly in the minds of women who have never had one.

He who has felt nothing does not know how to learn anything.—Rousseau.

DON'T BROOD OVER STOMACH DISTRESS

Don't lay awake nights and feel miserable all day—there's one right way to fix up your gassy, rebellious disordered stomach in such a short time that your heart will be gladdened.

Today Dore's Mentha Pepsin is the one remedy supremely efficient where acute or chronic indigestion or gastritis is making your days and nights miserable. Reports of its mighty power to overcome unbearable, near suffocating stomach agony have swept the land until today its sales are marvelous.

Get one bottle of this pleasant, speedy acting medicine today with the distinct understanding that if it doesn't help you—your money will be returned.

Boschee's Syrup

Has Been Killing Coughs for 59 Years. Carry a bottle in your car and always keep it in the house. 80c and 90c at ALL DRUGGISTS.

Oldest D. A. R.

Mrs. Louisa K. Thiers of Milwaukee, Wis., one hundred ten years of age, is the oldest living Daughter of American Revolution. Her father Seth Capron was a corporal on the staff of Washington all through the war for liberty.

THIS KEEPS US TWENTY

By DOUGLAS MALLOCH

A SHADOW will fall across us all. There never yet was a year all summer. And men will win To an empty inn Where never a light will greet the corner.

But the cloud will pass And we'll find the grass, And the spring will come with the buds returning.

And we'll trudge along When the inn goes wrong Till we come to a house where the lights are burning.

The wind will blow From the north, you know, And the snow will drift, and the ice will gather.

But the wind will bring To the south and bring Us clearer heavens and better weather. Why, all we need Is to wait, indeed, And to smile a little, and pray a plenty. The days we soiled Are what makes us old, And the days we hope are what keep us twenty!

HOW TWO WOMEN AVOIDED OPERATIONS

The Following Letters of Mrs. Thurston and Mrs. Beard Carry an Encouraging Message to Other Sick Women

MRS. ETHEL THURSTON

224 N. FINE STREET, LIMA, OHIO. "I want to tell you how your medicine has helped me. For weeks I suffered with awful pains from inflammation and I was in such misery that I had to bend double to get relief. I could not be touched or jarred, had awful pain all over my abdomen and could not touch my feet to the floor. It was impossible for me to straighten up and the pains never ceased. I took treatments for some time and finally was told I would have to have an operation. I do not believe in operations, and I had read so much about Lydia E. Pinkham's

Vegetable Compound that I told my husband I would try it before I gave up. I soon began to feel that it was doing me good. The awful misery began to leave me, also the backache. I have a good appetite and am gaining in weight. Taking the medicine was the best thing I ever did. I feel like it has saved my life and I do not hesitate to say so to my friends. At least it saved me from a dreaded operation and I am still taking it. I am willing to answer letters from women asking about the medicine."—Mrs. ETHEL THURSTON, 224 North Fine Street, Lima, Ohio.

Mrs. Beard's Letter

Eddy, Texas.—"I will write you a few words, thinking it will do some one else good. Two doctors said I would have to be operated on because for nearly twelve months I suffered from a weakness from which I could get no relief. I was restless and nervous and was not able to walk across the house. They said it was the Change of Life. I saw Lydia E. Pinkham's Vegetable Compound advertised in the newspapers, and as I could not get any help from doctors I thought I would give that a trial. I began with the liquid and it helped me some, then you advised me to take the tablet form and I began to improve rapidly. I have gained in weight from 106 to 170 pounds. I recommend it to all women with this trouble."—Mrs. M. E. BEARD, R. No. 1, Box 148, Eddy, Texas.

Fortune in Platinum

A mining pioneer of Vancouver, Charles F. Shaw, has discovered a deposit of chrome iron containing a large percentage of platinum. The deposit is on the banks of the Tulaman river, British Columbia, and the news of the discovery has excited such interest that over a hundred claims have been staked already. Platinum from Tulaman is not a new development; over 20,000 ounces have been won from other deposits in this region. Mr. Shaw's deposit, however, is the richest yet discovered there.

Self-Classified

Mrs. Brown had induced her husband to spend much of his spare time working in the garden. Finally their efforts were rewarded. A sprig of green appeared. It grew and flourished. Brown had his own ideas as to the nature of that sprig of green, but he kept his own counsel. Mrs. Brown's faith began to waver. Finally she asked, "What in the world is it? A weed?" Brown's bitter reply was, "It came up, didn't it?"

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

Big Profit; Quick Returns

Prof. Irving Fisher of Yale, the founder of the card index system, was talking about New York hotel prices the other day. "New York hotel prices," he said, "always remind me of a foreigner's visit to Chicago the year after the World's fair.

"Who is the owner of that palatial marble home?" the foreigner asked his guide.

"Pete Malvollio," the guide answered. "He brought a ham to the World's fair and cut it up into sandwiches."

Music 14,000 Miles

Phonograph music was recently transmitted by radio from England to one of the warships of the American fleet in Wellington Harbor, New Zealand, a distance of 14,000 miles.

There may be only one head to a family, but it's difficult to believe it when the millinery bill comes in.

SCHOOL DAYS

Your Last Name

IS IT BRIGGS?

BRIGGS is a more usual name than Bridge or Bridges, yet they both have the same meaning, and Briggs is the dialect variation of Bridge. Rigg is in the same way a form of Ridge, yet Rigg or Riggs is rather more usual than Ridge or Ridges.

In England the name is renowned as having belonged to Henry Briggs, a contemporary of Shakespeare and of the greatest mathematicians of his day.

There have been several distinguished members of the Briggs family here. One was George N. Briggs, one-time governor of Massachusetts and congressman. And another was Charles Augustus Briggs, an American theologian.

Occasionally there is a February with no full moon. Two such cases occur in the present century—1915 and 1921.

Mother's Cook Book

It is better laughing than crying. However the world go by! Though the laughing be only lying. It is better laughing than crying. So laugh—it is well worth trying. Though a tear-drop burns in the eye! It is better laughing than crying. However the world go by! —Stokley Fisher.

FOR THE FAMILY TABLE

FEEDING the family is a very important business and one which every mother will do well to study. Simple food well prepared is much more wholesome for all ages than the rich foods and hearty meats so often considered necessary.

Panned Chicken. Separate a chicken into pieces at the joints; set into a buttered baking pan, adding a bit of butter to each piece; pour in a cupful of boiling water or veal broth, add salt, cover closely and set to cook in a hot oven; let cook an hour and a half; baste the chicken once or twice and turn over the pieces when half-cooked. When done remove the chicken to a platter, surround with savory rice and serve with

Sauce for Panned Chicken. Melt three tablespoonfuls of butter; to it cook three tablespoonfuls of

flour and a scant half-teaspoonful of salt and a few dashes of pepper; when bubbling hot stir in three-fourths of a cupful of cream and the broth from the pan which should make a cupful or more. When boiling, strain into a bowl.

Raisin Pie. Grate the rind and add the Juice of two lemons and one orange, add one cupful of light brown sugar, two cupfuls of seeded raisins, one cupful of coarsely chopped walnuts, one and one-fourth cupfuls of water and bring to the boiling point; add four tablespoonfuls of flour blended with two of butter. Cook until the mixture is smooth, pour into a well-lined pastry plate, cover with a crust and bake for thirty minutes in a moderately hot oven until delicately browned.

For a family with a member or two who cannot eat sauerkraut, those who do must deny themselves a wholesome, tasty dish. Isn't it too bad that we cannot all sit down to such a dish as this?

Neenie Maxwell (© 1925, Western Newspaper Union.)

THE YOUNG LADY ACROSS THE WAY

The young lady across the way says it's interesting enough to go to the New York Stock Exchange once in a while, but she doesn't see why anybody wants to pay the prices they ask for a seat for the season.
