KEWASKUM, WISCONSIN, SATURDAY, APRIL 3, 1926

NUMBER 30

UNCLE FRANK HARTER PASSES AWAY OTHER DEATHS OF THE WEEK

On Saturday, March 27, 1926, at 7 a. m. at the old homestead, located four miles north of Kewaskum, occurred the death of Frank Harter, following an illness of several months. The immediate cause of his death is attributed to bronchial pneumonia. Mr. Harter was born October 11, 1845 in Buffalo, New York, to which place his parents had immigrated from Bavaria in 1840. In 1854 he came with his parents to the town of Auburn, making their home on the old Flint farm, four miles north of Kewaskum on Highway 55. In 1856, he came to his present home. His father (Jacob Harter) died in 1883, and his mother (Margaret) died in 1885. One brother Jacob Jr., died Aug. 13, 1905; two sisters Laura (Mrs. Schaefer) died May 11, 1925 and Mary in 1842. The following brothers and sisters survive: Joseph on the homestead; Margaret (Mrs. Nicholas Remmel) of Kewaskum; John of Kewaskum; Helen, Kate and Rosalia on the homestead. The funeral was held on Tuesday morning, March 30, 1926 with requiem mass in the Holy Trinity church. Rev. Sylvester, a nephew of the deceased was celebrant at mass, assisted by Rev. Vogt as deacon and Rev. Ruhman of Barton as sub-deacon. Interment was made in the congregation's cemetery. Mr. Harter was a well known citizen of this community and was affectionately called Uncle Frank, not only by those near to him but by his large circle of acquaintances as well.

"Frank Harter is dead. To a stranger this means very little—merely another soul released, another fireside with a vacant chair. But to those that knew him, these words mean very much. For more than three quarters of a century the name of the deceased has been a watchword of faith and charity, of patient self sacrifice, of love for his fellowman. Not only to his immediate family is the loss of him a momentous one, but to the other relatives, to a host of acquaintances that loss a serious calamity.

Yet his life was to all appearance a lowly farmer's life, devoid of special heroism, of great deeds. His early years were spent in faithful toil on his father's farm. After twenty-eight years with parents, brothers and sisters on the Wisconsin homestead, a desire to visit the South led him as far as Texas. Attracted by the promise of success in this new land, he had determined to purchase some property here and make it his home, when his people sent him word asking for further aid of his willing hands. This call from parents and brethren made Frank Harter abandon his project; and he returned home after an absence of four years. From that time until the end came a few days ago, he had labored for his people with such faithfulness as few men show—a life of patient perseverance, of simple faith, whose greatness is unfortunately so often hidden in obscurity. That is all, apparently that needs recording in this life that has passed.

And yet there is so much more—so much that the stranger cannot fully understand, much less appreciate. Without a child of his own to bless his latter years, this man was surrounded by loving children for half a century. He was looked up to, was loved almost to idolization by scores of nieces and nephews—each one of these just now feeling in the death of Uncle Frank something just as grievous as the loss of a cherished father. And why? His greatness that came to us bit by bit with our growing intelligence and appreciation; his example of faithfulness to God and man, his staunch honesty that showed itself just as well in his careful watch over his people as in his dealings with the friend and the stranger; his patience in laboring through his long life for his people, his generous hospitality and evident affection extended to all who came in contact with him. These will keep his name fresh in the memory of all, fresh with love, fresh with grief at the personal loss, fresh with thoughts will pass from the minds of his people and his friends, but the memory of Frank Harter will never fail."

JOHN G. EGGERS

John G. Eggers, age 41 a well known resident of Dunice, died at 2 a. m. last Saturday at his home near Dunice, after a lingering illness. Deceased was born Jan. 9, 1885, in Empire and had lived at his present home for 18 years. He is survived by a widow, two children, George and May at home, his mother, Mrs. Kate Eggers of Fond du Lac, two brothers Peter of Eden and William of Fond du Lac, a sister Mrs. John Worm of Wauwatosa. The funeral was held at 9 a. m. Wednesday from the residence and at 10 a. m. from Our Lady of Angels church in Osceola. Rev. Schmidt officiated. Burial was made in St. Mary's cemetery in Eden.

MRS. LENA DOMS

Mrs. Lena Doms, beloved wife of Chas. Doms, died at her home in Fond du Lac last Monday, after a short illness. Deceased was born in Wayne, Washington county, Wis., Sept. 13, 1884. She married C. F. Doms June 22, 1912. Besides her husband she is survived by two sons, William and Charles Doms of Fond du Lac; three daughters, Mrs. Viola Breshnam of Milwaukee; Mrs. Sylvia Wilhelms of Portland, Ore.; Mrs. Elsie Bastian of Fond du Lac; two sisters, Mrs. John Hess of Allenton; Mrs. William Ebert of North Dakota; her father George Schlercher of Allenton; two brothers, John of North Dakota and Fred of Missouri.

WILL CELEBRATE 2nd ANNIVERSARY

Saxe's Wisconsin theatre, the leading showhouse of the Badger state, will celebrate its Second Anniversary the week of April 3rd with the most elaborate program ever staged in a motion picture theatre. The present stage setting will be dispensed with in its entirety and a new setting of 2,400 square feet built especially for the anniversary program. Thomas Saxe, president of Saxe Amusement Enterprises announces that 41 artists have been engaged for the stage show at a salary of \$10,000. Bebe Daniels' latest photoplay "Miss Brewster's Millions" completes the program. Mr. Saxe also announces the appointment of William T. Cuddy as publicity director of Saxe Amusement Enterprises. Mr. Cuddy, one of the best known of the younger newspapermen will be remembered for his work as "The Poor Cass" during a five year period for the Milwaukee Journal.

ARRANGEMENTS FOR BAZAAR GETTING ALONG NICELY

The committee in charge of the bazaar, and cafeteria lunch, to be given by the Ladies' Aid of the Ev. Peace church in the school hall of the church is getting along nicely in making the preliminary arrangements. The bazaar will be given on Thursday, April 8th. Donations for this affair will be gladly accepted, and may be brought to any of the members of the Ladies' Aid. Though the committee is doing all they can, and judging from the way things are going along, the bazaar and cafeteria lunch will be a grand success, it can be and will be a still greater success if all the members of the congregation will lend a helping hand by making donations towards the affair, no matter how small or how large said donation may be, same will be greatly appreciated and gladly accepted. Cafeteria lunch will be served afternoon and evening. All are cordially invited to attend.

JOSEPH HELGERT

After suffering for nine years from an attack of paralysis and cancer, Joseph Helgert passed peacefully away in death at the home of his daughter, Mrs. Otto Graf in this village, at the advanced age of 79 years. Deceased was born in Austria near Prague. Immigrating to America 45 years ago, and settled at Milwaukee. Coming to Kewaskum to make his home with his daughter four years ago. His wife preceded him in death shortly before his coming to this village. Mr. Helgert was the father of eight children all of whom survive, and whose names are: Mrs. Otto B. Graf of Kewaskum; Charles of California; William, Jos., John, Andrew, Mueline and Elizabeth, all of Milwaukee. Deceased though not able to

EV. PEACE CHURCH

The Easter service at the Peace church, church promises to be of great interest. There will be a processional by the children of the Sunday School, who will also sing a song during the service. Immediately following the preaching service the Sacrament of Holy Communion will be administered to which members of any Christian church are cordially welcomed. Several new members will be publicly received into membership at this service. Services begin at 10 o'clock and will be in the English language. Everybody not having a regular church home is kindly invited to come and worship with us. The offering for this day will be given for benevolence—Ernst Irjon, Pastor.

HEAVY BLIZZARD TIES UP TRAFFIC

All the predictions of an early spring, such as the ground hog seeing his shadow, the presence of robins, March coming in like a lion, and going out like a lamb were upset in this year's weather conditions. March came in as a lion, but was a long way off of going out like a lamb for on Wednesday, March 31st, the last day of March one of the worst blizzards of the season swept over the entire state, tying up traffic in a nut shell on all public highways. Rural carriers were unable to cover their routes on Thursday and Friday, doctors found traveling over country roads with horse and sleigh a hard proposition, milk trucks were just about able to get through, trains were delayed for several hours, and the Wisconsin Bus Line suspended all bus service. It is reported that in some places along the country roads the snow is piled up from six to eight feet high. No serious damage was reported to telephone and telegraph companies.

COUNTY INCOME TAX \$49,230.54

(West Bend Pilot)
According to figures taken from the records of County Treasurer, Suhaupt by the editor of the Pilot, the sum of \$49,230.54 was collected as income tax in Washington county during the past year. Of this amount, the various towns, cities and villages retain 50 per cent, or \$24,615.27. The county retains 10 per cent, or \$4,923.05, and the state's share of 40 per cent is \$19,692.22. The amount retained by each of the paying districts in Washington county is as follows:
Addison \$ 227.89
Barton 729.37
Erin 17.51
Farmington 2,642.26
Hartford 130.19
Jackson 64.50
Kewaskum 19.58
Polk 61.46
Richfield 96.87
Trenton 74.65
Wayne 40.79
West Bend 165.91
Village Barton 90.16
Village Jackson 422.73
Village Kewaskum 558.17
Village Slinger 425.43
City Hartford 9,176.56
City West Bend 9,604.45
The sum of \$307.86 was returned as delinquent income tax in the county, as follows: Germantown, \$1.66; Addison, \$3.38; Trenton, \$3.00; Kewaskum, \$2.04; Barton, \$4.48; Jackson, \$9.43; Richfield, \$46.71; Hartford, \$6.15; West Bend, \$4.57; Barton, \$4.52; Slinger, \$12.16; Hartford City, \$82.11; West Bend City, \$127.65.

ALL IS READY FOR BIG EASTER DANCE

All is now in readiness for the big dance to be held at the Kewaskum Opera House on Monday April 5th. Mr. Heisler, manager of the Opera House, has done everything in his power to make this dance an enjoyable affair for all. He has engaged Firme's Novelty orchestra of Random Lake to furnish the music, and will go a long way in making good Mr. Heisler's intentions of making this dance one of the gala events of the season. Everyone is therefore cordially invited to attend.

NOTICE OF ANNUAL TOWN MEETING

Notice is hereby given to the qualified electors of the town of Kewaskum, Washington County, Wis., that the annual town meeting of said town for the election of officers and the transaction of such business as may legally come before the meeting, will be held on the 1st, Tuesday in April, A. D., 1926, being the 6th day of said month. Polls will be open from 9 a. m. to 5:30 p. m. Business meeting will be held at 1 p. m. A. D.
Dated the 26th day of March 1926.
Adolph J. Habek,
Town Clerk.

CANDIDATES FOR ELECTION TUESDAY

The spring election will be held next week Tuesday, April 6, for the purpose of electing officers in the various villages, cities and towns. The election in the village will undoubtedly be the quietest held here in many years, as there is but little opposition. The following is the village ticket to be voted upon:

President—D. M. Rosenheimer,
For supervisor—Otto E. Lay, Emil C. Backhaus and Wm. S. Olvin,
Trustees—Wm. Schaub, Fred Andrae, Elwyn Romaine and Otto Stark,
L. P. Rosenheimer, who was nominated for president withdrew his name.
Through a misunderstanding we erred in last week's paper in stating that L. D. Guth had been nominated as one of the supervisors; it should have read Emil C. Backhaus instead.

In the town election it promises to be more spirited as there is opposition for the office of supervisor, treasurer and assessor. Following is the ticket to be voted upon.

Chairman—Gerhard Fellenz
Supervisor—Frank Hilmes, Roman Backhaus
Treasurer—Hubert Fellenz, William Endlich.
Assessor—John Reinders, Nicholas Haug.
Justice of the Peace (2 years)—August Schnurr.
Justice of the Peace (1 year)—Alb. Uelmen.
Constables—John Bremser, Fred Klein.

The ticket to be voted upon in other towns and villages is as follows:

TOWN WAYNE
Chairman—Paul Justman
Supervisor—Wm. Coulter, Otto Griepentrog, John Kuehler and Walter Endlich.
Clerk—Adam Kohl
Treasurer—John Werner
Assessor—John Kuehl, Herman Kell
Justice of the Peace—Philip Schellinger and Geo. German Jr.

TOWN AUBURN
Chairman—Stephen Klein
Supervisors—Arthur Buss, William Wunder, Joseph Schladoweller.
Treasurer—Peter Senn
Clerk—Frank Schulz
Assessor—Albert Keis
Justice of the Peace—Wm. Hess.
Constable—Wm. Quandt.

TOWN OF ASHFORD
Chairman—Bert Thelen
Supervisor—Wm. Jaeger, John Boegel, Wm. Mathieu.
Clerk—J. W. Mauel and Math. E. Theisen.
Assessor—Anton Bertram
Treasurer—Frank Brath and Ferd. Hammen.
Constable—Thos. Franey and Clarence Berg.
Justice of the Peace—Math. Theisen

TOWN OF OSCEOLA
Chairman—Chas. Twohig
Supervisor—Fred Buslaff, Louis Mielke, Jas. Welsch and Henry Rantun.
Clerk—Arnold Sook
Treasurer—A. Scannell.
Assessor—Earl Hennings
Justice of the Peace—A. C. Buslaff and Wm. Hennings
Constable—Frank Salter, Oscar Bartel and Henry Ebert.

BREWERIES GIVEN PERMIT TO MAKE 3.75 TONIC BEER

The Annhauser Busch and Pabst companies have been granted a permit by Assistant Secretary of the Treasury Andrews for manufacture of 3.75 per cent malt extract. The product contains 25 per cent of "malt solids" thereby taking it out of the beverage class and putting it under the head of a medicine. However, the companies have promised Andrews to see that the product does not get into bootleg channels. The product according to officials will be given a six months' trial. Other breweries will also ask for a permit and dispense with the tonic.

A. C. BACKUS UNDERGOES OPERATION

A. C. Backus, former judge of municipal court, Milwaukee, but now publisher of the Milwaukee Sentinel, was operated on for appendicitis at Milwaukee Hospital on Tuesday afternoon. Mr. Backus was taken sick Monday night and Tuesday morning an immediate operation was decided upon. The operation was performed by Dr. C. A. Evans, who states that his condition is favorable. Mr. Backus has a host of friends in this village and vicinity, who join in wishing him a safe and complete recovery.

ORGANIZE LEAGUE

At a meeting recently held a base ball league was organized, known as the Valley League. The membership includes Beechwood, Batavia, Waubesa, Saukville, Grafton, Southwest Mequon and Thiensville. Albert Sauter of Beechwood was elected president, Al. Schultz of Batavia, vice-president, O. M. Eastman of Saukville, secretary and treasurer.

MOON LAKE REFUGE TO OPEN THIS MONTH

According to announcement made by the Isaac Walton league of Milwaukee, who purchased a large tract of land around Moon lake about 5 miles northeast of this village, last winter, for the purpose of establishing a game refuge, will open the same some time the forepart of this month, that is, as soon as weather conditions will allow. Members of the league will set out bird-houses, scatter feed for ducks and geese, provide cover for game birds, and begin planting wild rice and other aquatic plants and trees. Frank Grass of Sturgeon Bay, last year's legislative representative of the league will be superintendent of the refuge. Ducks and geese with their wings clipped, will be released in the lake to act as decoys to attract wild ducks and geese. The Walton league will be assisted by Edward Bean, director of the Washington park zoo at Milwaukee, to help them get the necessary birds, and to supervise their placement and care. The Waltonians and farmers will have a meeting at Kewaskum some time in the near future to talk over matters, when it will be very likely that a Walton chapter will be started here, to which anyone who desires can become a member.

"The farmers already are friendly to the project and have helped advance it," said Mr. Luening, president of the league. "We want them to thoroughly understand our purposes—to preserve valuable wilderness conditions, wild life, and waters which include the upper Milwaukee river. A Walton chapter will be formed at Kewaskum and will include farmers and others from surrounding towns in its membership. That organization may mean the future development of farmer chapters. There ought to be many of them, because the agricultural future of the state will be materially affected by what we do to protect waters, forests, marsh areas and many kinds of wild life, especially birds."

AREA TEST SHOWED 2.26% REACTORS

Out of 5052 cattle recently tested for the Kewaskum Creamery, 69 reactors were found, or 2.26%, which is a very low percentage as compared to other counties of the state. The reactors were slaughtered at Milwaukee. An account of the slaughtering appeared in a recent issue of the West Bend News and is as follows:

"Last Friday morning County Agent H. W. Geiffuss, accompanied by a number of interested people, business men and farmers, took the cattle so far condemned in the area test in this county to Milwaukee for slaughter. Some of the cows were slaughtered in the morning at Gunz' plant and the rest in the afternoon at the plant of Plankinton Packing company. "The party accompanying the county agent were: Hy. O. Regner, president of the West Bend Commercial club, Dan Schloemer, Louis Kuehltun, Oscar Klein, Washington Klein, John Gehl and Michael Gehl of here, Jos. Schoofs and Jos. Volm of the town of Kewaskum, Ed. Marth and Jac. Matenaar of the town of Barton, L. Timmer and D. Sliker of the town of West Bend and Ed. Murphy Miller and Hugo Bastian, also of here.

"With one exception, all of the cattle had tuberculosis, some so bad that the carcasses had to be sent to the fertilizer tanks, the disease having progressed so far that the meat was unfit for human food. The one exception was a cow which was tested but did not react, and which the respective farmer let go just to verify the value of the test and disprove the objection that tested cows are infected with the disease. Some of the worst infected cows were those from the L. Timmer farm at Big Cedar Lake.

"The visitors were shown the diseased parts, the tubercular lesions and growths in the lungs and other parts of the body. They could compare them with similar parts from sound cattle hung up alongside of the diseased parts. Mr. Regner said the sights were such as to kill the desire for meat for a time.

IS BADLY BURNED BY OIL STOVE

Mrs. John J. Pesch of Campbellsport was badly burned on Sunday afternoon about three o'clock, when her clothes became ignited while she was lighting an oil stove. Lighting the stove, Mrs. Pesch held the burning match in her hand while she waited for the flame to burn around the wick. The match ignited her clothing, and she became frightened and ran for the door. Realizing the danger of running she seized a small rug near the door and rolled it on the floor, smothering the flames. Mrs. Pesch suffered severe burns on her hands, abdomen and both limbs. Her presence of mind, however, in rolling in the rug, probably saved her life. Her 8 year old daughter, who was in the house at the time, helped her mother to quench the flames.

MRS. HERBERT BACKHAUS SUSTAINS SERIOUS INJURIES

Mrs. Herbert Backhaus of this village, met with serious injuries last Saturday evening at about eight o'clock when she was struck and run over by a Ford coupe driven by Wm. Holub of Oshkosh. Mrs. Backhaus was on her way home on Highway 55, after having done some shopping in the village during the evening, when she reached a point south of the concrete bridge near the Chas Geidel farm home, she was struck by the oncoming car which was also traveling in the same direction. The unfortunate lady was hurled beneath the machine and dragged along for some distance when she was released by her clothing tearing, she was picked up near the bridge unconscious in which condition she remained until the next morning. She sustained a deep scalp wound and other severe bruises about her body and head. Her condition, at first was thought to be such that she would not recover, she, however, is now getting along nicely and thought to be out of danger. She was immediately taken to her home on north Fond du Lac avenue and Dr. Hausmann called who is now treating her. A large portion of her clothes was torn from her body, and that she was not killed is a miracle. Mr. Holub driver of the car escaped injury. The car was slightly damaged.

Mr. Holub was placed under arrest and taken to West Bend by Sheriff Frey and placed in the county jail, where he remained until Monday morning when he received a hearing in Justice Hayden's court, when he was released under a \$300 bail on a charge of driving a car while under the influence of intoxicating liquor.

Mr. Holub, after hitting Mrs. Backhaus, it is reported drove along the concrete for some distance when his machine tipped over on its side.

Mrs. Backhaus is the mother of four children, and since last fall has been acting as substitute on rural route number four, to fulfill the vacancy caused by retirement of Mr. Muehleis who is now on the pension list.

Her many friends join in wishing her a safe and complete recovery.

MEMORIAL

In memory of Millicent Backus, who passed away April 5, 1924: Spring is again returning,
Sweet flowers will soon again bloom
But still our hearts are yearning,
We still feel Death's dark gloom.

Two years we've spent in sorrow,
The days were long and drear,
We've waited for the morrow,
When heaven would again be clear.

Slowly our hearts are healing,
Our Lord is giving us Peace,
His Love He's still revealing,
And bidding pain to cease.

When life's battles are no longer,
And faith has turned to sight,
Our hearts shall strangely wonder,
What paths led us aright.

Adolph Backus and family
Marshfield, Wis.
Nature's Way of Telling You of "Dan-
ford Times.

NIGHT AND DAY SHIFT AT PRISON

Unable to meet the demand for prison-made twine, Warden Oscar Lee of the Waupun penitentiary has decided upon operating the plant on a day and a night basis. This year's demand for jobbers, dealers, and individuals has exceeded all expectations according to Warden Lee. The average annual production of the prison twine plant is approximately 4,586,560 pounds. The twine sold under the trade name of "Badger Brand" is distributed by the prison on what is known as the state account plan. On June 30, 1924, the date for the last official biennial report of the state prison, there was a balance of \$509,227.63 in the revolving fund for the twine plant.

A FATAL FALL

This community was shocked this morning to hear of the sudden death of Max Schroeder, who had the misfortune to fall from a tree on the northwest corner of the Blumberg home at about 9 o'clock this morning. Together with Herman Macheel, the deceased was cutting a large limb which was hanging over the telephone wires. In some manner the limb swung around when it fell, knocking Schroeder from a limb he was standing on. He landed head first on the cement walk, a distance of about 20 feet. Mr. Macheel picked him up, but life had already flown.—Mayville News.

NOTICE

We will grind feed on Mondays, Wednesdays and Saturdays until further notice.
New Fane Milling Co.

'COHENS AND KELLYS'

The most capable hands in Hollywood have made "The Cohens and Kellys" the Universal-Jewel coming to the Opera House Sunday. It is coming with an all-star cast which includes some of the greatest old-timers of stage and screen, all of whom are comedians extraordinary.

Charlie Murry heads the cast, with George Sidney and Vera Gordon also featured. Others in the cast are Nat Carr, Kate Price, Jason Robards, Olive Hasbrouck, Bobby Gordon and Mickey Bennett.

The story is a comedy-drama of quick richness and the relations between a Jewish and an Irish family on the East Side, New York.

The Jewish family inherits a million dollars after having lived from the meager profits of a clothing store. That is the situation on which Harry Pollard, the great comedy director, has built the structure of his picture.

These who have seen previews of this picture assert that it is the funniest and most human picture they have seen for months. Laughter and tears alternate for an unusual effect leading to a surprising climax.

Ever hear that one about "The Cohens and Kellys"? It goes something like this: Cohen said to Kelly—But Wait! What's the use of telling you only one joke. See "The Cohens and Kellys" Sunday and enjoy all the laughs they ever made.

SCHOOL BID VOTED DOWN

At a special meeting held by the qualified voters of Jt. School District No. 5, Village and Town of Kewaskum on Monday evening, at the new high school building, for the purpose of deciding whether the board of education should dispose of the old school building and lot upon which it stands on East Main street, was voted down by the district. The building was put on auction sale last week Thursday afternoon, at which time a bid of \$2500 was made by Alex Klug. The bid was turned down by the district for reason that it was thought to be too low. A committee of three, consisting of M. W. Rosenheimer, John F. Schaefer and Theo. Schmidt, was appointed to work in conjunction with the board of education, in trying to dispose of the building, at a higher price.

MAN LURES GIRL TO HARTFORD, IS PLACED IN JAIL

Charles Shadow, 26, section foreman at South Byron, but whose home is in Iron Ridge, was arrested this week on a charge of enticing Nila Kiliser, aged 16, a minor, from her home. The warrant was signed by the mother of Miss Kiliser. Shadow, it is alleged, enticed Miss Kiliser to the home of his sister residing in Hartford from South Byron, where she was working for a farmer on Highway 15. She had lost her job and was afraid to return to her home, it was stated. Shadow was arraigned in Judge H. M. Fellenz's court at Fond du Lac, and his trial was set for April 2.—Hartford Times.

JUDGE DAVISON DISMISSES TWO CASES WITH COSTS

Attorneys that drag cases in courts to no apparent purpose may have a hint from the consequences resulting from such a course by the action of Judge Davison on Wednesday when he dismissed two cases that had clogged the court calendar here for a long time, with costs assessed against the plaintiffs. This is the course of an upright judge like our friend Davison should be expected to take in matters affecting taxpayers' pocketbooks. It costs about \$150 a day to maintain a Circuit Court when jury cases are pending. Nef said.—Port Washington Star.

NOTICE OF ANNUAL VILLAGE MEETING

Notice is hereby given to the qualified electors of the Village of Kewaskum, Washington County, Wis., that the annual election will be held on the first Tuesday in April, it being the 6th day of said month, 1926, A. D. The polls will be open from 9 o'clock a. m. to 5:30 o'clock p. m.
S. N. Casper,
Village Clerk.

METHODIST EPISCOPAL CHURCH

Fifth Ave., West Bend
Easter Sunrise service 7 p. m. Sunday school 9:30 a. m. Divine worship 10:30 a. m. No evening services.—W. J. C. Perry, Pastor.

CIRCUIT COURT ADJOURNS

Circuit court adjourned on Monday, after a two weeks' session. The cases left over will be tried in a special term in June.

Neenah—Complete control of all theaters in the Twin Cities was obtained by the Saxe amusement enterprises, Milwaukee. It was announced. They have purchased the Neenah and Doty theaters here and the Orpheum theater at Menasha from John Herziger, Neenah.

Fond du Lac—The Fond du Lac Association of Commerce has joined with like organizations of other cities in the Fox River valley asking the Northwestern and Soo Line roads to grant special rates to cities of the valley. Waupun and Green Lake from Chicago and Milwaukee, during weekends this summer.

Oshkosh—The new community hall and gymnasium being erected adjoining St. Peter's high school here will be ready for formal opening and dedication about April 20. A dedicatory program is being prepared. When finished, the community building will rank among the finest in the city.

Monroe—A Swiss cheese factory will be established here within a few days by the Phenix Cheese corporation. Manager Kenneth A. Harrison announces the ultimate capacity of the factory will be 15,000 pounds of milk daily. A price of \$1.75 per 100 pounds for milk testing 3.2 will be paid for the first six months.

Waupun—David P. Doty died at his home here. He was prominent in the republican party and was a member of the first state board of factory inspectors. Mr. Doty served as a member of the Dodge county board of supervisors for 35 years. He was a descendant of Gov. Doty.

Appleton—Improvements to cost approximately \$350,000 have been started at the local gas plant of the Wisconsin Traction, Light, Heat and Power company. One of the main additions will be the construction of a new gas container at a cost of \$80,000. The new container will have a capacity of 500,000 cubic feet.

New London—Steven Peckman, 12, of Royalton, four miles west of here, picked up what he believed to be a marble. When he started playing with it, it exploded. The "marble" was a dynamite cap and cost Steve his thumb, index and middle fingers of his left hand.

Losara—The annual village caucus here was thrown into a panic when a five-gallon tank of gasoline in an automobile owned by Sam Silverstein exploded just outside the hall, as Silverstein was filling the tank by lantern light. The caucus was adjourned as a result of the excitement.

Fond du Lac—Medical authorities are perplexed by a strange malady which has affected children living near the village of Sherwood, Fond du Lac county. It is claimed that at times the victims seem to have no control over their lower jaws and tongues, their jaws drooping and the victims being unable to draw them up for some time.

Oshkosh—Indisturbed by the agitation that has developed in some sections of the state relative to the bovine tuberculosis tests, Winnebago county cattle owners are going ahead with their plans for the area tests in this county, according to County Agricultural Agent G. A. Sell.

Madison—Fred Zimmerman, secretary of state, has announced his candidacy for the republican nomination for governor. Mr. Zimmerman said he would seek office as a "progressive republican."

Fond du Lac—Preliminary plans have been completed for the organization of a civic council here to include representatives of sixteen organizations.

Madison—Gov. John J. Blaine announced that he has appointed Harry E. Collins, Madison printer, as state printer to succeed David Atwood, who died recently.

Janesville—Pauline Gerhardt, 3-year-old daughter of Mr. and Mrs. Paul Gerhardt, Fort Atkinson, died here in Mercy hospital as the result of burns. The child set her clothes on fire while the mother was out of the house a few moments.

Fond du Lac—Purchase of the Eden creamery for a sum said to total \$20,000 by the Atlantic and Pacific Products corporation of New Jersey was completed here. The plant has a capacity of 20,000 pounds of milk daily.

Marinette—Six junior high school youths were sentenced here to six months each in the county workhouse for contributing to the delinquency of minor girls in connection with the investigation of alleged immorality involving 27 pupils at the school.

Janesville—Shippers of Janesville are planning to appeal to the interstate commerce commission declaring discrimination in freight rates and goods originating in eastern states and moving in the south.

U. S. PERMITS SALE OF 3 PER CT. BREW

Two Large Breweries to Make Medicinal Drink—Sold at Drug Stores.

Washington—Permission has been granted by the prohibition division of the bureau of internal revenue to two large breweries to manufacture a malt liquor containing 3.75 per cent alcohol by volume and 25 per cent malt solids, to be sold to the public through drug stores without prescriptions or dealer permits.

The permits, it was learned, were issued on a "six months' trial" during which the brewers are required to "aid" the prohibition division in the prevention of the sale of the malt liquor to the public for "beverage purposes."

Director of Prohibition James E. Jones gave his consent to the new brew after chemists of the bureau of internal revenue had reported that the tonic could not be used as a beverage. The chief difference between the new tonic and the old was explained. The malt extract contained in it is so high that it would be impossible to take the fluid as a beverage. It could be taken only in small quantities. The output is limited, it was explained, and the manufacture would be far more expensive than that of beer. A twelve-ounce bottle would cost 20 or 40 cents.

The tonic is described as a sort of sweet, sirupy substance of heavy appearance. It is intended for use principally in hospitals and by prescription of physicians, the main purpose being for convalescents. Malt tonics, it was explained, were used to a great extent for medicinal purposes before the Volstead act. Prohibition officials said there seemed to be a real need for something of this kind.

The permits were issued to the two breweries, it was said, after conferences between their representatives and representatives of the government. The permits were issued a fortnight ago and already one company, it was also learned, has written to wholesalers announcing it had been allowed again to manufacture the product with an alcoholic content of 3.5 per cent and a solids content of 25 per cent. In the letter the company wrote that the product would be "palatable, but not potable to an extent that it can be used as a beverage."

The letter said that wholesalers would be permitted to sell the product in quantities of five cases weekly to small druggists and twenty-five cases weekly to large druggists, and added that it "hoped it will not find its way into illegitimate channels."

No official regulation covering the manufacture of the malt liquor, as it is already called, has been issued by the prohibition department, and accordingly, it was said, there are no requirements for dealer permits or bonds to govern its sale.

Prior to prohibition the general run of beers contained from 3 to 6 per cent alcohol by content and 4 to 7 per cent solids. Beck contained 10.65 per cent solids and 4.53 per cent alcohol. American beer of the larger type was in three classifications—3.48 per cent alcohol and 5.08 per cent solids, 3.56 per cent alcohol and 6.50 per cent solids, and 4.12 per cent alcohol and 7.43 per cent solids.

WASHINGTON BRIEFS

The house committee on immigration, under the chairmanship of Representative Albert Johnson of Washington is working diligently in an effort to solve the undesirable alien problem.

Opposition to impeachment of Federal Judge George W. Enright of Illinois is expressed in a minority report prepared by three members of the house judiciary committee.

A military guard of honor for the tomb of the unknown soldier in Arlington cemetery has been ordered by Secretary Davis of the War department, and will take its station there within a few days.

Senators McKinley (Rep., Ill.) and Lenroot (Wis.) have announced that they will lead a fight against the reduction of appropriations for the elimination of bovine tuberculosis, as proposed in the conference committee report submitted to the senate and the house.

Fascists Celebrate Birthday Rome.—The seventh birthday of Fascism was celebrated here with imposing ceremonies in which hundreds of thousands of the "black shirts" took part. In Rome, Premier Mussolini and members of his cabinet reviewed a parade of 50,000.

King Asks New Cabinet Bucharest.—Following the resignation of Premier Bratianu and his cabinet, King Ferdinand asked General Averescu to form a new ministry.

Eleven Die in Sea Blast Grimby, England.—Eleven members of the crew of thirteen perished when the boilers of the trawler Salmonby exploded off Sprunhead. The vessel sank.

Doctor to Fly on Arctic Plane Washington.—Dr. Daniel O'Brien of Johns Hopkins university has been chosen by Lieutenant Commander Richard E. Byrd, U. S. N., to be medical officer on his forthcoming arctic trip.

POPULAR IN CAPITAL

Miss Claudia Read, charming daughter of Col. Beverly A. Read, U. S. A., and a popular member of the younger set in Washington.

COST OF FARM AID IMPORTANT MATTER

President Coolidge Will Require All Details.

Washington.—Prior to taking a definite stand with respect to proposed legislation for the disposal of farm surpluses, President Coolidge will require complete details of the cost involved.

It was stated at the White House that he has asked treasury officials and experts of the agriculture department to prepare estimates on the cost of the legislation now under consideration by the house committee on agriculture, the principal provision of which is creation of a \$250,000,000 revolving fund.

When the President receives these estimates, it was intimated, he may take a definite position on the projected legislation. So far he has withheld sanction of any proposal which would commit the government dealing with the agricultural surplus problem.

Proponents of the corn-belt bill, which would finance surplus agricultural products by the levying of an equalization fee, claimed national rather than sectional support was behind the measure.

Chester H. Gray, Washington representative of the American Farm Bureau federation, appeared before the house agricultural committee and read telegrams from federations in 16 widely scattered states, all of which endorsed the measure either specifically or in principle. The farm bureaus favoring the bill included Idaho, California, Nebraska, North Dakota, Michigan, Illinois, New Hampshire, Rhode Island, Tennessee, Pennsylvania, Maryland, Wisconsin, Kansas, Connecticut and Minnesota.

Chile Refuses to O. K. Proposal by Uncle Sam

Washington.—The Chilean government has declined to concur in the suggestion of Secretary Kellogg that the plebiscite to settle the Tacna-Arica dispute be suspended during the proposed cessation of representatives of the two countries in Washington.

The position of Chile was disclosed recently in a memorandum from the minister of foreign affairs to American Ambassador Collier at Santiago. The memorandum declared:

"Such suspension would mean a derogation to the uncertain and dangerous situation which was ended by the recent resolutions of the plebiscitary commission."

The memorandum argued that continuance of the proceedings, "which can in no way impair the negotiation of good offices, will reach a solution, which, once it is reached, even in principle, will mark the moment to consider the suggestion which your excellency has transmitted, without the difficulties it offers at the present time."

Communists Win in Paris

Paris.—Communists won two seats in the chamber on the second balloting in the second district of Paris for election of successors to two members who have died.

Philanthropist Dies

New York.—Mrs. Stephen V. Harkness, mother of Edward S. Harkness of the Standard Oil company, aged eighty-eight, is dead. She had given millions to charity.

Arab Women in Battle

Jerusalem.—Arab women are fighting France in Syria. Two battalions took part in a recent battle near Damascus and more are being recruited.

Jury for Traffic Cases

Washington.—The American Automobile congress adopted a resolution declaring that motorists had the right to a fair and impartial trial, and that jury trial should in no case be denied if asked for.

Fascists Active in India

London.—Fascist agitators are reported to be active among the princes and aristocracy of India. The India office, London, has ordered a complete investigation.

Blind Murderer to Die

New York.—Harry W. Cowan, fifty-seven-year-old hotel clerk and absconder, blind from a self-inflicted bullet wound, faces death in the electric chair for the murder of twenty-seven-year-old Edith Burton last December.

Japanese Wheat Tariff Raised

Tokyo, Japan.—The house of peers has passed the bill, previously adopted by the lower house of the diet, increasing the tariff on wheat and wheat flour.

U. S. KEEPS EYE ON LOWER CALIFORNIA

Capital Fears Hostile Base May Be Established at Magdalena Bay.

Mexico City.—One of the two American owners of 3,000,000 acres of land encircling Magdalena Bay, interviewed reports from New York of a grant to a Japanese syndicate of a strip of land in Lower California, 100 miles long by 40 miles wide, for the avowed purpose of producing rubber, stated that no concession had been granted Japanese on their land or in that vicinity, nor had any negotiations been opened or conducted with Japanese.

Washington.—With relations between the United States and Mexico already near the breaking point, announcement of a concession to a Japanese syndicate on the west coast of Lower California, Mexico, threatened to lead to new complications.

Senator Borah (Rep., Idaho), chairman of the senate committee on foreign relations, indicated that he regarded the matter as of the utmost importance. He said that he would take steps at once to ascertain the facts. If it is true that Japanese interests are to gain a foothold on the shores of Magdalena Bay, long regarded as an immensely valuable naval base, Senator Borah said it is a development to which his committee should give serious consideration.

The United States is particularly interested in the Magdalena Bay affair because of the possible menace to American commerce with any other power which might create a base there. Magdalena Bay, in addition to being one of the best natural harbors on the Pacific coast, could be used as a naval base, which would threaten if not disrupt communication between the United States Pacific coast and the Panama canal. It also could be made the basis for operations against Trans-Pacific and Hawaiian steamer lines.

High officials indicated that they would lose no time in learning the facts. Japanese invasions of Lower California have threatened difficulties in the past and the granting of the concession might shatter administrative plans for smoothing out the controversies over Mexican land and petroleum laws.

Reports from San Diego, Cal., describing the concession, said that besides the 2,000,000 acres extending along the shores of Magdalena Bay the same Japanese syndicate previously had acquired 1,000,000 acres along the Lower California coast near Escondido, only 135 miles from the United States border.

Officials were inclined to believe that the acquiring of this foothold on Mexican soil by Japanese commercial interests would be in conflict with the Lodge resolution as adopted by the senate on August 2, 1912.

This resolution was adopted by the senate by a vote of 51 to 4 after it had been brought to the attention of the senate that negotiations were in progress for the sale of about 4,000,000 acres of land in Lower California by an American syndicate to a syndicate in which Japanese interests would be largely represented. This situation also involved Magdalena Bay.

Report Shows Fraud in German Securities

New York.—Illustrating how American investors have been "artistically trimmed" through the purchases of German securities, a report issued by the Better Business bureau of New York city states that some American buyers of Germany bonds and money paid as high as 200,000 times the actual market value.

Losses were sustained principally in the midwest and western states, amounting to \$300,000 or \$1,000,000, the bureau said. Its report follows a long investigation made in co-operation with the German consulate.

The bureau stated that one of the most notorious swindles occurred in connection with the sale of the Munich loan of 1923, which on March 11 had an approximate value in Germany of 45 cents for each billion marks of bonds. Bonds of this issue were sold as high as \$40 for each million marks, the bureau declared.

Another example of extortion took place, the report alleges, in connection with the sale of Frankfurt-on-the-Main bonds, sold at a rate of \$45 a million marks. In reality, the bureau stated, this issue was worth but a fraction of the selling price and, in addition, dealers in these depreciated securities had advertised them as "good investments."

Seven Cremated in Home

Williams, Minn.—Seven persons were burned to death in a fire which destroyed a farm home two miles from here. A man and wife and their five children were victims.

Italy Enters Plane Race

Washington.—Entry of three seaplanes by the Aero Club of Italy in the Schneider cup race to be held at Norfolk, Va., in October, was announced by the National Aeronautic association.

Cost Woman Mayor \$9,832

Seattle, Wash.—It cost Mrs. Bertha K. Landes and her supporters nearly \$10,000 to obtain her election to the office of mayor of Seattle, where the compensation is \$7,500 a year.

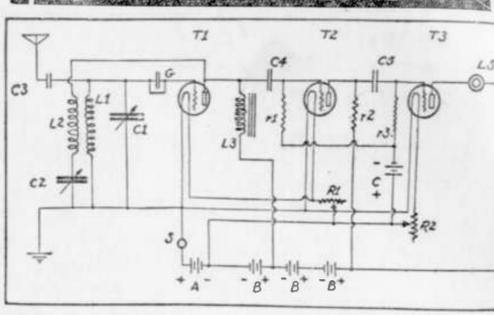

To Keep Theaters Closed

St. Petersburg, Fla.—A popular referendum here defeated efforts of Sunday amusement advocates to open theaters and other places of amusement on Sunday.

Delays Action in Strike

Washington.—The LaFollette resolution proposing senatorial investigation of the New Jersey strike will not be considered for a few days, the manufacturers' committee of the senate decided.

RADIO

A Simplified Three-Tube Circuit Designed for Ease of Construction, Operation and Superb Tonal Quality. Honeycomb Coils Used for Tuning.

By BRAINARD FOOTE In Radio World.

Listeners who prefer moderate volume, combined with almost perfect reproduction, will be interested in the simple entertainment receiver to be described. The faithfulness of its tone output is dependent upon the system of audio frequency amplification, which, in this set, is a combination of a stage of impedance-coupled amplification and a stage of resistance-coupled amplification.

In addition, the use of the half-ampere power tube is considered in the last stage. Since this tube requires about 135 volts of "B" battery, the use of resistance coupling calls for no additional plate voltage. Impedance coupling is adopted for the first stage since this provides superior detector action and greater detector output. Moreover, with a good impedance coil for the first stage, the quality is good. A honeycomb system of tuning is shown, with a primary coil made unnecessary by the expedient of employing a small fixed condenser as the coupling medium. Thus the assembly of the outfit is not difficult. The output of volume is not so great as can be obtained by the use of more tubes and more audio amplification, but on this very account its tone qualities are better and its operation more pleasing.

Will Operate Loud Speaker. A receiver of this character will operate a good loud speaker, either of the horn or cone type, to advantage. In the symbolic diagram C3 is the coupling condenser whereby the energy picked up by the antenna is delivered to the set. L1 and C1 form the tuned circuit of the set, L1 being a 50-turn honeycomb coil and C1 a .0005 mfd. variable condenser. Regeneration is handled by the "shunt" plate circuit L2 and C2, L2 being another 50-turn coil and C2 another .0005 mfd. variable condenser. The two coils are mounted by means of two honeycomb coil mounts. They should be as far apart as possible, so long as sufficient regeneration is to be had on the longest waves.

G forms the combination grid and leak and condenser, a .00025 mfd. condenser and 2-megohm leak. T1 and T2 are two 01A type tubes, whereas T3 is a power tube of the 112 type, taking 1/2 ampere at 5 volts. L3 is the coupling impedance for the first stage. It may be a special impedance

coil made for the purpose, or, with as good results, the secondary winding of a large-sized audio transformer. This stipulation is made to insure the use of an impedance coil having enough turns of wire and core iron to pass all the audio frequencies.

C4 is the coupling condenser for the first stage. A condenser as small as .002 mfd. will answer fairly well here, but better results are obtained both as to volume and range of musical tones if the condenser is made at .01 mfd. or even up to 0.5 mfd. A grid leak resistance R1 of 1 megohm or 1/2 megohm is required to properly bias the grid of tube T2 and to prevent it from becoming choked with negative impulses. Instead of the impedance just described, a coupling resistance is adopted for the second stage, since this is even better than an impedance when it comes to passing all the musical frequencies.

Power Stage. Resistance R2 should be approximately 100,000 ohms (0.1 megohm). Such resistances can be purchased in the form of an ordinary grid leak and all the essential resistances may be snapped into regular resistance clip-holders. These holders, which come with the resistances R2, should be well made in order that the heating effect of the "B" battery current that must pass through it may not alter its resistance and cause noises or distortion. Condenser C5 is just like C4. The grid leak R3 should have a resistance of about 1/2 megohm (250,000 ohms) to properly bias the last tube and prevent overloading or choking.

Tube T3 is a 1/2 ampere power tube used because its greater power will result in somewhat greater volume of output and a very marked gain in tone quality, since overloading is eliminated. A jack is provided for the loud speaker connection, the loud speaker LS being indicated at this point.

Now for a few remarks about the battery and filament circuits. Rheostat R1 takes care of lighting the detector and first stage tubes T1 and T2, while rheostat R2 handles the power tube. A snap switch S, located at the left end of the panel, serves to turn the set on and off. Thus the rheostats may be maintained at the proper points permanently.

A 4 1/2 volt "C" battery is employed, as indicated. Three 45-volt "E" units are required.

FOREFATHERS OF RADIO

By GEORGE LEWIS of The Crosley Radio Corporation.

The beginnings of radio may be traced back to the scientific work of James Clerk Maxwell, the celebrated British physicist. Maxwell was born at Edinburgh, Scotland, and conducted his brilliant researches at a com-

James Clerk Maxwell.

paratively young age, dying at Cambridge, England, when but forty-eight years old. He believed that light was due to waves in an invisible medium which scientists call "ether." He believed, further, that light was some kind of an

Some Antenna Hints for Better Reception

The radio listener, and especially those living in the large cities, are hampered sometimes to a very great extent by the presence of shielding objects, such as steel-framed buildings, metal-lathed rooms, guttering, etc. These obstacles are so often overlooked entirely that they greatly affect reception of all kinds, and sometimes render a receiver completely inoperative. These conditions can be remedied to a great extent by improving the antenna and ground systems of the installation.

Moderate-size metal objects within close proximity to the antenna and which are insulated from the ground, will not affect the efficiency of the receiver. It will in all probability alter the natural wave or frequency of the antenna, which will, of course, change the tuning. Such objects as metal window frames, screens, etc., do not affect conditions materially, provided their nonmetallic surroundings or supports are dry.

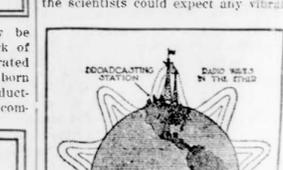

If there is a resistance to ground, the effect becomes serious and results will depend on the amount of the resistance involved. Well-grounded objects will act as a shield and will reflect or absorb incoming waves so that the energy is lost to the antenna.

Even though this energy is not absorbed to a great extent by the objects, a current will be set up in them which will give rise to a re-radiation and will be a frequency or wave length in proportion to the natural period of the object. This can, of course, be picked up by the receiver at a different point on the dials. It is advisable to keep the antenna clear of any metal objects and at right angles to guy wires, etc. Loop receivers cannot be operated in a room which is shielded with metal lath. Reception can be improved by bringing a short outside antenna into inductive relation with the loop. The lead-in itself can sometimes be laid over the loop.

Care of Baseboards. Keep baseboards from warping or absorbing moisture by soaking them in boiling paraffin.

electromagnetic phenomenon. It was these ideas of Maxwell's that led Hertz later to the discoveries that made radio possible.

If Maxwell were right in his assumption that light was both a wave motion and electromagnetic in nature, the scientists could expect any vibra-

Maxwell's Theory of Electromagnetic Wave.

ing electric current to send out waves of some kind, just as a vibrating violin string sends out sound waves. Maxwell's work was first published in 1872, but it remained for Hertz to establish experimental proof of his theories some fifteen years later.

Maxwell is honored among physicists as the mathematical wizard of his times. His theoretical work is the basis upon which much of modern physical science rests. Especially is this true in the realm of electrical theory, where his work is constantly referred to as the great authority which has inspired modern ideas of electricity. Radio scientists have Maxwell to thank for first having opened the door to the developments that have led to the modern science and art of radio.

Poull's Annual Easter Coat and Dress Sale

Ends Today, Saturday, April 3rd

Every one of our beautiful new *SPRING COATS* will have a special *Sale Price Ticket*. More reasonable than ever. More style and color than ever, and quality has not been forgotten. Be sure to see this splendid line of New Coats. Every Dress in our big stock will be marked at special *EASTER PRICES*. All the new models can be found here. The high quality and new styles will amaze you. It's still time to buy that new *EASTER DRESS*.

HOSIERY SPECIALS

Pure Silk Hose for Women

All the new spring shades, Rose Marie, etc. The greatest value we have ever offered. Special a pair **89c**

High Grade Pure Silk Hose

All shades and sizes, regular values \$1.95 to \$2.25. Easter Sale price a pair **\$1.69**

New Silk Scarfs

Values to \$3.00. Special Easter Sale price, each **\$1.95**

MEN'S SUITS

Splendid selection. 2 pair trousers **\$22.50 to \$35.00**

Men's Top Coats

New line just received **\$15, \$18 to \$24.75**

Boys' New Suits

Coat, vest, 1 pair knickers and 1 pair long trousers or 2 pair long trousers. Age 5 to 18 **\$12.50 to \$16.50**

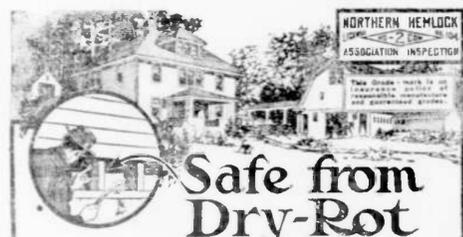

Boys' Suits

with 2 pair trousers at 20% discount

Complete Assortment of Fruits and Fresh Vegetables. Special Prices.

is a happy trait of Native Hemlock that gives *stability insurance* for your buildings down through the years. To this add these other essential advantages not possessed by any other structural lumber in equal combination:

- 1—Oversize studding, rafters and joists—8% to 16% more wood to piece—greater structural strength.
- 2—Contains no pitch—Northern Hemlock lath won't stain plaster and are more fire resistant.
- 3—Holds nails like a vise—keeps your structure rigid against wind strain and climatic rigors.
- 4—Easy to work—speeds up construction and lowers building costs. Carpenters like it.
- 5—Takes paints and stains perfectly.
- 6—And—It's Grade-marked with Licensed Association Brand and Grade stamped on each piece by the manufacturer, insuring uniform quality and guaranteed grades.

Then you will appreciate the big investment value in buildings constructed of genuine Northern Hemlock.

Ask your lumberman to show you the complete Northern Hemlock. Or write us for booklet, check list of helpful suggestions on building.

BATAVIA

Mrs. Schimmel returned from Plymouth Wednesday. Mrs. Elizabeth Easley returned from Milwaukee Saturday. Mr. and Mrs. H. W. Leifer were business callers at Adell Tuesday. Mr. and Mrs. Herbert Stark of Milwaukee spent Sunday in our burg. Chas. Baumbach of Milwaukee was a business caller in our burg Monday. Dr. and Mrs. Bemis of Adell were guests of Dr. and Mrs. Bemis Wednesday.

The Batavia Graded school bought one dozen folding chairs for the school school.

Mrs. Emma Schwensen spent several days with her daughter at Silver Creek.

The Parent-Teachers' association will have a meeting Tuesday evening, April 6th.

Mrs. Augusta Schmeider Friday for Fredonia for a week's stay at Herbert Witt's.

Mr. and Mrs. William Donath of Random Lake visited at T. H. Leifer's Tuesday.

The play given by the base ball club was a success in every way a large crowd attended.

The Ladies' Aid of the Zion's church was entertained at the Leonard Laux home Thursday.

The base ball boys will give a home talent play April 14th, in Random Lake auditorium.

Mr. and Mrs. Ed. Plaster returned Tuesday from a three months' visit at the home of Rev. Leuenberger at Surging.

Walter Berger, County Superintendent and Supervising teacher Miss Saunders visited the Batavia school on Tuesday.

Harold Liebenstein, Kermit Schultz, Gertrude Bloede, Aeteline Melus, Elvira and Verneda Laux, Plymouth High School students are having a two weeks' vacation.

Mrs. Adelia Holz and daughter Aethea and son Howard attended the confirmation in the Emanuel's church town of Seott. They were also entertained by Mr. and Mrs. Frank Bartel in honor of their daughter's confirmation.

TOWN SCOTT

Mrs. Clara Marquardt spent Tuesday with the Haack families.

Mrs. Paul Geier returned home after spending two weeks at Milwaukee.

Mrs. Frank Vetter attended the quilting bee at Mrs. Paul Doekliver's Tuesday.

Mrs. Chas. Backhaus spent a few days with Mrs. August Heberer at New Fane.

Mr. and Mrs. Theo. Otto and daughter spent Sunday with Mr. and Mrs. Anton Backhaus.

Mr. and Mrs. Ferdinand Ramel spent Sunday with Joe Moldenhauer and Mrs. Clara Marquardt.

Miss Elsa Backhaus returned home Sunday after spending two weeks at the home of William Enright at Boltonville.

Mr. and Mrs. John Poesch and daughters Leona and Anna attended the funeral of Frank Harter at Kewaskum, Tuesday.

Albert Kamrow and family spent Sunday with Frank Bartel and family in honor of their daughter Clara's confirmation.

Mr. and Mrs. Erwin Klein and Mrs. Maas and Alex Poesch, Arno Apperle and Manuel Schneider spent Sunday with Chas. Backhaus and family.

Mr. and Mrs. Frank Vetter and family spent Sunday with Mr. and Mrs. John Brandenburg and family, in honor of their daughter Vanelda's confirmation.

The following children were confirmed at the Emanuel Lutheran church Sunday: Ruth Kaudes, Clara Bartel, Vanelda Brandenburg, Elton Harter, Reuben Deman and Paul Deckliver.

NEW FANE

Helen Roland Nauman spent Sunday with Mrs. Wm. Uelmen.

Miss A. Uelmen of St. Michaels visited a few days at the Math, Herriges home.

Mr. and Mrs. Theo. Dworschak attended the funeral of Frank Harter on Tuesday.

Mr. and Mrs. Elmer Moldenhauer were guests of Fred Ehner and family Sunday.

Mr. and Mrs. Nick Laubach and family, Mrs. Joe Laubach were guests of Mr. and Mrs. Theo. Mertes Sunday.

Mr. and Mrs. William Starck and son William Jr., of Milwaukee visited a few days with Nick Laubach family.

Mr. and Mrs. Theo. Dworschak and daughters Beatrice and Bernice spent Sunday evening with Mr. and Mrs. A. Naumann and family.

Mr. and Mrs. Frank Ehmer and family, Mr. and Mrs. Oscar Muench of Beaulwood and Lawrence Keller of Kewaskum spent Sunday at Milwaukee with Mr. and Mrs. Harry Enser.

DISTURBED SLEEP

Caused From Bladder Weakness. Nature's Way of Telling You of "Danger Ahead"

J. H. Hanford, 7135 Yale Ave., Chicago, Ill., says, "For two years I have been troubled with gravel. Many times it would cause me to get up eight to twelve times at night, and it was very painful. Lithiated Buech cleaned me up in one week. I will be glad to tell or write my experience." Lithiated Buech is not a patent medicine as the formula is on the label. It cleanses the bladder as epsom salts do the bowels, driving out abnormal deposits, neutralizing excess acid, thereby relieving irritation which causes disturbed sleep. It is not a cheap medicine. The tablets cost 2 cents each at all drug stores. Keller Laboratory, Mechanicsburg, Ohio. Locally at Edw. C. Miller's.

CAMPBELLSPORT

The Ev. Luth. Immanuel congregation will have special Easter services Sunday at 2:30 p. m. at the Baptist church.—C. J. Gutekunst, Pastor.

Come in and see our selection of used Fords.

Schaefer Bros.

AUCTION!

At Present Bros. Barns, West Bend, Wednesday [Fair Day] April 7th.

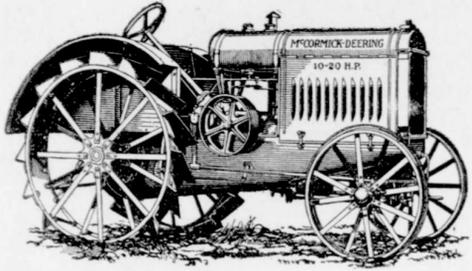

Beginning at 11 a. m. and 1 p. m.

Two car loads of Iowa horses, the kind that stand the climate and give satisfaction. Well broke and every horse guaranteed. 6 months time to pay.

PRESENT BROS.

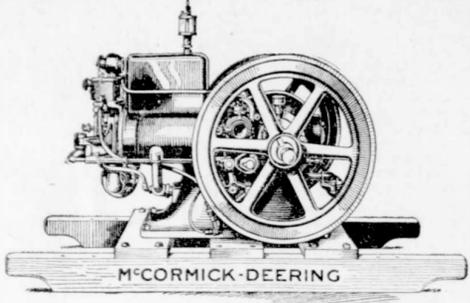

Washington County's Leading Horsemen West Bend and Plymouth

This Year, Win With Power McCormick-Deering Tractor

From the standpoint of effort the tractor owner has an easy time compared with the other fellow. He does not have to crack the whip over tired and weary horses. He has no chores to do. He has full power and full efficiency at his command at all times, regardless of heat and dust and flies. His tractor and tools may be made to work through twenty-four hours a day, if the season demands such extra speed, with utmost efficiency.

McCormick-Deering Engines

With the sturdy, rugged McCormick-Deering Engine pumping the water, running the washing machine, etc., you know the work will be done. And without the engine overheating or running up the operating expense. Every part of the McCormick-Deering is built for steady, important work. Dirt, sand and trash mean little to the McCormick-Deering, as the crankcase is enclosed. The cylinder is removable; in case of wear a new one can be inserted at low cost. The large water hopper permits a generous supply—no overheating.

"Good Equipment Makes a Good Farmer Better"

SAYS:

"See Mrs. K. Endlich's ad elsewhere in this paper."

—Mrs. Otto Graf was at Milwaukee Wednesday where she attended the funeral of her father, Joseph Helgert.

—Thursday, April 1st (April Fool's day), surely was a fooler as far as weather conditions were concerned.

—Norbert Becker of Milwaukee is spending his Easter vacation with his parents, Mr. and Mrs. Jacob Becker.

—Mr. and Mrs. Jack Rosenkirch and daughter Lucie of Milwaukee were guests of the Louis Bath family Sunday.

—Be sure and attend the Bazaar and Cafeteria lunch at the school hall of the Ev. Peace church on Thursday, April 8th.

—The regular monthly stock fair held here Wednesday, was not largely attended on account of bad weather conditions.

—Miss Manila Klessig of Park Ridge, Ill., is spending her Easter vacation with her parents, Mr. and Mrs. John Klessig.

—Leo and Mike Skupniewitz were at Cleveland, Wis., several days the forepart of the week, where they did electric wiring.

—Firmes' orchestra of Random Lake will furnish the music at the Easter dance at the Opera House on Monday, April 5th.

—Mr. and Mrs. August Ebenreiter, son August Jr., and daughter Kathrine of Chicago visited over the week-end with relatives here.

—Reserve your date for Thursday, April 8th., and attend the bazaar and cafeteria lunch at the school hall of the Ev. Peace church.

—Mr. and Mrs. August Kumrow and Mr. and Mrs. John Nauman of West Bend spent Saturday with friends in the village.

—Mr. and Mrs. Walter Bruesel of Milwaukee spent the week-end with the former's parents, Mr. and Mrs. Jacob Bruesel and family.

—Mr. and Mrs. Albert Schaefer and Miss Agnes Schaefer of Milwaukee attended the funeral of the late Frank Harter here Tuesday.

—The High School and Parochial schools closed on Thursday for the Easter vacation. They will again reopen on Tuesday of next week.

—Mr. and Mrs. Anthony Meyer and family of Milwaukee spent Sunday with Mrs. Sarah Van Epps. Mrs. Meyer remained here for a week's visit.

—Schlaefter Construction Co., of Campbellsport received the contract for the erection of a new parsonage for the St. Matthew's Catholic congregation of that village.

—Mr. and Mrs. Louis Doms and Mrs. Wm. Doms were at Fond du Lac Thursday where they attended the funeral of Mrs. Chas. Doms, who died at her home there on Monday.

—Miss Florence Rosenheimer returned to Beaver Dam Wednesday to resume her studies at the Wayland Academy, after spending a week's vacation with her parents here.

—Mr. and Mrs. Edward Mosch and family moved their household goods from West Bend into the Steichen residence on Wilhelmina street in this village where they will make their future home.

—The Bridge club met at the home of Mrs. Hubert Wittman last Thursday evening. First honors were awarded to Mrs. Theo. Schmidt. The usual refreshments were served after the game.

—Mrs. N. E. Hausmann and daughter Maude were Milwaukee visitors Monday, from here Maude left to resume her studies at the Wayland Academy, after spending a week's vacation with her parents here.

—Delores, daughter of Mr. and Mrs. John Andrae Sr., was taken to the Milwaukee Hospital on Wednesday, where she underwent an operation for the removal of her appendix. She was accompanied there by her parents.

—The following teachers left Thursday for their respective homes to spend their Easter vacation with their parents: Miss Marie Besola, South Germantown; Valeria Bogus, North Milwaukee; and Mabel Schley, Hudson, Wis.

—Ten applicants vied for the street carrier examination held at the new High School building last Saturday. The purpose of the examination is to get a carrier on route number four from this post office to fulfill the vacancy caused by John Madoleis, who is now on the pension list.

—John Marx received word last week that his sister Sylvia of Milwaukee, had a very narrow escape from serious injury when she was struck and run over by an automobile last week Friday. The accident happened on the corner of Lisbon Ave. and 88th street, while on her way to work, one of the wheels of the car passed over her arm near the shoulder causing painful injury to the member. Miss Marx, other than receiving a severe shock escaped other serious injury.

—The committee in charge of the bazaar and cafeteria lunch to be held in the school hall of the Ev. Peace church is doing all they can to make the bazaar a grand success. They, however need help from the different members of the congregation in the way of donations, and will appreciate a boost in that respect from anyone member, no matter how small or how large the donation may be, assistance of this kind will make the bazaar a still bigger and better one. All donations can be made to any of the members of the Ladies' Aid.

—Deputy Sheriff Joseph Eberie was a West Bend caller Monday.

—Arthur W. Koch was a business caller at Milwaukee Monday.

—Mr. and Mrs. Harold Keyes and son spent Tuesday at Appleton.

—Mr. William Hausman and family of West Bend were here Sunday.

—Miss Corinne Schaefer was a Milwaukee visitor over the week-end.

—Alfred Schaefer of West Bend spent Sunday with his parents here.

—Louis Bath was a business caller at Campbellsport Thursday evening.

—Mr. and Mrs. Louis Bath were Fond du Lac callers Monday evening.

—Mr. and Mrs. F. E. Calvin spent Sunday with relatives at West Bend.

—Ed Brandt of Milwaukee visited over the week-end under the parental roof.

—Mrs. August Bass and Mrs. John Kohn were Milwaukee visitors Tuesday.

—Don't forget to attend the Easter dance at the Opera House Monday, April 5th.

—Miss Leona Klessig of Milwaukee spent Sunday with her parents, Mr. and Mrs. John Klessig.

—You are cordially invited to attend the Easter dance at the Opera House Monday, April 5th.

—Maple syrup time is near. A number of farmers are busy tapping trees and also cooking the sweet sap.

—Raymond Quandt of Milwaukee spent the week with his parents, Mr. and Mrs. Frank Quandt. Mr. Quandt is confined to his home on account of illness.

LOCAL HAPPENINGS

—Franklin Backhaus spent Monday in Milwaukee.

—Edwin Miller was a Milwaukee visitor Monday.

—L. P. Rosenheimer was a Milwaukee caller Tuesday.

—March came in like a lion and went out like two lions.

—Peter Haug was a business caller at Fond du Lac Thursday.

—Deputy Sheriff Joseph Eberie was a West Bend caller Monday.

—Arthur W. Koch was a business caller at Milwaukee Monday.

—Mr. and Mrs. Harold Keyes and son spent Tuesday at Appleton.

—Mr. William Hausman and family of West Bend were here Sunday.

—Miss Corinne Schaefer was a Milwaukee visitor over the week-end.

—Alfred Schaefer of West Bend spent Sunday with his parents here.

—Louis Bath was a business caller at Campbellsport Thursday evening.

—Mr. and Mrs. Louis Bath were Fond du Lac callers Monday evening.

—Mr. and Mrs. F. E. Calvin spent Sunday with relatives at West Bend.

—Ed Brandt of Milwaukee visited over the week-end under the parental roof.

—Mrs. August Bass and Mrs. John Kohn were Milwaukee visitors Tuesday.

—Don't forget to attend the Easter dance at the Opera House Monday, April 5th.

—Miss Leona Klessig of Milwaukee spent Sunday with her parents, Mr. and Mrs. John Klessig.

—You are cordially invited to attend the Easter dance at the Opera House Monday, April 5th.

—Maple syrup time is near. A number of farmers are busy tapping trees and also cooking the sweet sap.

—Raymond Quandt of Milwaukee spent the week with his parents, Mr. and Mrs. Frank Quandt. Mr. Quandt is confined to his home on account of illness.

—See Cohens and Kellys at the Movies Sunday night.

—Buss & Buss, managers of the Kewaskum Movies treated the Kewaskum High School basket ball team to a free movie show last Sunday evening, in honor of their good work done in the Tri-County association.

—William Ferber, Justice of the Peace of Campbellsport, and who has entered the old time fiddlers contest at the Retlaw theatre, Fond du Lac, where he won two second prizes and also a first prize in a contest held at West Bend recently, was a pleasant village caller Tuesday. While here he attended the funeral of Frank Harter.

There's a hundred thousand Cohens and several thousand Kellys. And you've heard a hundred thousand jokes.

About the Cohens and Kellys. And you'll get a hundred thousand chuckles.

And several thousand guffaws. When you see the Cohens and Kellys at the Opera House Theatre.

—Adolph Rosenheimer, Jr., was at Milwaukee last week where he attended a meeting of the Cedar Lake Yacht Club, held at the Wisconsin Club. The club has an enrollment of 199 members. There will be twenty boats participating in this season's races at the lake. A schedule will be published in this paper at a later date. Maurice Rosenheimer was appointed as one of the members of the executive committee.

MARKET REPORT
Plymouth, Wis., March 26.—On the Farmers' Call Board today 14 factories offered 895 boxes of cheese and all sold as follows: 700 cases longhorns at 19 1/2c, 185 boxes square print at 19 1/2c and 10 cases of twins at 19c.

LOCAL MARKET REPORT
Wheat 1.30-1.40
Wheat 1.30 to 1.40
Barley 68 to 70

Easter

THE date of Easter is fixed by the occurrence of the Passover. But if there had been no Passover what more suitable time could have been selected for commemorating the Resurrection than the season when nature, apparently dead, comes to life again? "If a man die shall he live again?" has been the primitive interrogation of mankind from the earliest times. It expresses the universal hope—with the universal doubt. The doubt is resolved by the Resurrection: He shall live again. If the date for the recurrent celebration were to be arbitrarily selected, what date could have been better than that of the crowing of the rooster, the foliage draping the trees, the bloom-

ing of flowers and the singing of birds? It is an inspiring faith, that man shall live again. It is the antidote for the pessimism—only occasionally rising as high as stoicism—in the ancient world. It is intimately associated with all that is best in human life. Mr. Raymond Fosdick remarked the other day that the feet of those who carried Tut-Ankh-Amen to the grave are waiting at the door to carry out our civilization. This sounds like philosophy, but we suspect it is not. Our civilization is permeated with Christian ideals and ethics, a preservative, an antiseptic unknown to the civilizations that concern only the historian and the arch-

ologist. It contains the vitalizing element of democracy, which was unknown even in the Greek states and the Roman republic. And it possesses a command of natural forces which was not dreamed of 100 years ago. There is nothing in the pages of history in any way tending to oppose the belief that our civilization is permanent. "Ye are the salt of the earth," said the Founder of Christianity to those whom he had imbued with His spirit. Salt prevents decay. Other civilizations have decayed, but it may be that ours will not. And if it does not it will be due to all that is symbolized and reverently commemorated by Easter.

Moravian Easter Eggs Have Real Artistic Worth

Most Intricate Designs Are Painted With Patience and Skill.

It would seem, on first thought, that Easter eggs are a purely small boy or girl interest. Yet groups of grown-ups that gather around easter eggs at the Cleveland Museum of Art attest the fact that the most childlike thing, if it is well done, does not lose its attraction. Some of the visitors are interested in the gay colors, and the beautifully intricate designs; some are especially curious about the process of decoration; others question regarding the origin of this particular application of folk craft, and the customs and legends surrounding it.

In each Moravian, Polish and Bohemian village, in fact throughout all of eastern Europe, there is an old woman who colors the eggs for a number of families, in Rumania, more generally, each housewife still prides herself on the preparation of eggs for her own household. The designs on the eggs in the children's museum collection are very ancient. Their origin is found in leaf petals, flower outlines, bird feathers, the coil of the small shell, all long since conventionalized into stars, scrolls and other figures. There are also innumerable geometric patterns. The colors are simple and bright, made in the beginning from dyes prepared by the peasants themselves from herbs, gail and vegetable sources. Blue, yellow and red are the principal hues, though black is used with distinctive effect.

The Color Process. The method of putting the color on to the egg is quite complicated. It is somewhat like the process of batik. The old peasant woman first of all washes the eggs in sour milk and warms them by the fire where she has put some wax to melt. Using an instrument like a wooden pencil with a tiny metal tube at the end, she carefully draws lines or dots of points on the egg, varying the design on each.

Ceremonies Odd and Impressive in Latin Lands

Easter Observances That Seem Quaint to Us—Pilgrims Gather at Jerusalem.

Many quaint ceremonies grew up through the centuries in connection with Easter. Some of the oddest are those prevailing in the Latin countries, Spain, Portugal, Mexico, and in fact all the Latin-American nations.

Among these peoples, Judas the betrayer plays an important part, appealing strongly to their vivid imaginations. Harry L. Rogers writes in *Griff*. Holy Saturday is especially devoted to Judas, and on this occasion he is flogged, burned, hanged, and sometimes even blown up, in effigy. Booths are erected in many of these Latin-American towns, and figures of Judas, distorted and grotesque, are sold by the thousands. Ropes are then strung across the streets, or from house to house, from which the effigies are suspended, sometimes loaded with gunpowder. At a signal, the effigies are lighted, and the downfall of the betrayer is accomplished with appropriate deprecations.

Similarly, effigies of the Christ, Mary Magdalene, and the Virgin Mary play an important part in the celebrations in these countries, though unlike the figures of Judas, they are treated with profound reverence and respect, often being paraded through the streets by priests and lighted by hundreds of candles.

The ceremonies at Easter time in Rome, seat of the Holy Catholic church, are particularly elaborate and impressive. But it is in Palestine among the holy places, that the most impressive celebration of Easter occurs. From every part of the world, thousands of pilgrims assemble at the holy sepulchre. On Monday of holy week, the pilgrimage to the River Jordan takes place, and some 30,000 of the faithful, of every nationality, and almost every creed, splash in the consecrated waters at Jordan ford, dipping themselves thrice in honor of the Trinity, and filling bottles, pans and other receptacles with the miraculous waters.

Often ragged and footsore, the pilgrims visit the holy places—the Chapel of the Ascension, where believers may see the rock with the footprint of Jesus; the Garden of Gethsemane; the Grotto of Azony, where Judas kissed the Lord. Up the Via Dolorosa, with its fourteen stations each commemorating some act of Christ, the pilgrim crowd to the Church of the Holy Sepulcher, where they jostle each other in the undulation in the stone wall made by the shoulder of Jesus as he fell from the cross. Afterward this vast army of Armenians, Russians, Poles, Turks, Jews, Syrians, Europeans, and Americans, too, sometimes elbow each other in their eagerness to purchase the holy relics vended by fakirs in the market places.—*Griff*.

The Joy of Easter
In the gray of the early morning while yet the city slept, And only the old bell-ringer his watch in the church-tower kept, On a sudden the chimes of Easter fell like a silver rain, And the bells of mellow music laved weary heart and brain, "Awake, for the Lord is risen!" they sang. "The night is o'er, From the graves of sin or sorrow arise, rejoice, adore!" —*Griff*.

Old-Time Russian Easter
Russia has taken on something of its old-time religious aspect with the celebration of Easter in the orthodox manner. The bellies of Moscow's "forty times forty churches" usher in the festive season with the loud clanging of bells, which continue until early morning. The churches are filled to capacity. In most Russian homes votive candles are lighted in front of the holy icons and the family members scrupulously observe the ceremonies prescribed by the church.

Some Easter Data
Some interesting data in regard to Easter is that it has a range of 35 days on which to come. The earliest possible date for it to occur is March 22, although it has not fallen on that date since 1818. In spite of the fact that it was on the 23rd in 1856 and in 1913.

Pagan Easter Ceremony.
April 26 is the latest date for the little ones to watch for the rabbit's eggs, and such an incident is supposed to take place in 1606 for the first time in a long time. Back in 1885 it held off until the 25th, and only a few years ago we had a late spring when it came on the 23rd.

Most people do not plan very extensively on the spring work until Easter is past as the weather seems to be unsettled up to that time.

Do Not Improve Soil Unless Many Conditions Are First Right.

Legumes have had an important place in crop production for many centuries. No doubt one of the chief reasons for the great popularity of this class of crops is the fact that under suitable conditions they may have a very desirable influence upon the crops which follow them. The increased corn yields following the use of a clover crop as a green manure testify to the worth of legumes for soil-building purposes.

The idea of soil improvement is so frequently associated with the term legume that one often overlooks the fact that all legumes are not equally effective for this purpose, according to O. H. Sears, assistant chief of soil biology at the college of agriculture, University of Illinois. As a matter of fact, legumes not only differ in their ability to improve crop yields, but they may at times even have a tendency to lower the fertility of the soil. The extent to which legumes are valuable in soil improvement will depend upon a great many conditions. One of these conditions is inoculation.

Legumes are considered soil-builders primarily because they have access to atmospheric nitrogen, provided their roots are well supplied with nitrogen-gathering bacteria living within the nodules on the roots of the plants. Such plants are said to be inoculated. Inoculated legumes thus may secure their nitrogen from the inexhaustible supply of the air. If not inoculated, however, legumes, like other kinds of plants, must depend upon the soil for their nitrogen as well as their mineral requirements, and since they are heavy feeders upon nitrogen and other plant-food elements, they may be the most effective "miners" of soil fertility grown on the farm. To function as soil-building crops, legumes must, therefore, be inoculated.

Benefits Derived.
The method of utilizing the crop is another important factor in determining the benefit to be derived from the growing of a leguminous crop. Under the best conditions, even inoculated legumes secure only a part of their nitrogen requirements from the air.

Soil Improvement.
The idea of soil improvement is so frequently associated with the term legume that one often overlooks the fact that all legumes are not equally effective for this purpose, according to O. H. Sears, assistant chief of soil biology at the college of agriculture, University of Illinois. As a matter of fact, legumes not only differ in their ability to improve crop yields, but they may at times even have a tendency to lower the fertility of the soil. The extent to which legumes are valuable in soil improvement will depend upon a great many conditions. One of these conditions is inoculation.

Legging Off Field Peas and Corn Is Profitable
Legging-off trials resulted in returns of \$18.65 per acre from Canadian field peas and \$37.76 per acre from corn less cost of the legging operation, according to a report made by Superintendent O. A. Thompson to P. F. Townbridge, director of the North Dakota experiment station. The return was considered especially good in view of the fact that the field peas were badly damaged by unfavorable weather during May and June.

The average daily gain per hog for 120 hogs was 1.16 pounds on the peas, 6.22 acres furnishing pasture for eight days. The hogs were then turned in a ten-acre corn field, where they made a daily average gain of 1.7 pounds each for 17 days. The value of the gains was computed at 10 cents per pound.

Cheap Fruit Insurance
Spraying is cheap insurance against insect pests attacking fruit and garden crops. It is necessary for best results that the proper insecticide be used, that it be applied in a thorough manner, and at the right time. Spray schedules are now available for many of the more important insect pests of the orchard and garden.

SPRAYING TREES IN BLOOM IS HARMFUL TO INDUSTRIAL BEE
Little Insects Necessary for Pollination.

(Prepared by the United States Department of Agriculture.)
When spraying fruit trees, care should be taken to do the work at a time when there is the least danger of poisoning the honeybees which visit the blossoms and which are very necessary for the pollination of the flowers. While the United States Department of Agriculture is spraying fruit trees while in full bloom with arsenicals is particularly injurious to bees, according to tests which have been completed recently by the bureau of entomology.

Of course the beekeeper does not want his bees poisoned, says the department, because as a result his honey crop is reduced. The subject should be of even more interest, however, to fruit growers because with the loss of the honeybees they lose the most effective means of pollination in their orchards. In this respect the beekeeper, the fruit grower, and in fact everyone is benefited by honeybees.

The effect of arsenical sprays on the mortality of honeybees has long been debated, but only a few systematic investigations have been made to aid in settling the dispute. In the hope of answering definitely some of the questions so long debated, these tests were conducted. While they are limited in their scope, they do enable the department to make some recommendations.

Spraying apple trees during full bloom is not recommended because the codling moth can be as well controlled by spraying when 90 per cent of the petals have fallen, and because spraying when the trees are in bloom is injurious to insect pollinators.

Acid Phosphate Speeds Up Tomato Crop Growth
It has been found by the New Hampshire experiment station that acid phosphate speeds up the tomato crop materially, and makes it possible to beat the frost. They have used from five hundred pounds to fifteen hundred pounds of acid phosphate to the acre, in addition to twenty tons

Destroy Green Cabbage and Cauliflower Worms
The green cabbage and cauliflower worms that do so much damage to the leaves of these plants come from the eggs laid by the white cabbage butterflies. They are easily destroyed by spraying or dusting with any arsenical poison (arsenate of lime one ounce to two gallons of water), or pyrethrum powder may be dusted on the plants. It is difficult to get a spray to stick to the smooth glossy foliage of any of the cabbage family, but the spray may be greatly improved by adding one-half ounce of soap to each two gallons of the arsenical spray. Dusting early in the morning or after a rain with pyrethrum powder or any of the arsenical poisons is very satisfactory. A useful homemade dust is made by placing the dust material in a cheesecloth bag or sack or one made from any other thin, strong material, and then by going over the plants using a stick to beat the dust from the bag a very satisfactory job can be done.

Important Place for Legume Crop

Do Not Improve Soil Unless Many Conditions Are First Right.

Legumes have had an important place in crop production for many centuries. No doubt one of the chief reasons for the great popularity of this class of crops is the fact that under suitable conditions they may have a very desirable influence upon the crops which follow them. The increased corn yields following the use of a clover crop as a green manure testify to the worth of legumes for soil-building purposes.

The idea of soil improvement is so frequently associated with the term legume that one often overlooks the fact that all legumes are not equally effective for this purpose, according to O. H. Sears, assistant chief of soil biology at the college of agriculture, University of Illinois. As a matter of fact, legumes not only differ in their ability to improve crop yields, but they may at times even have a tendency to lower the fertility of the soil. The extent to which legumes are valuable in soil improvement will depend upon a great many conditions. One of these conditions is inoculation.

Legumes are considered soil-builders primarily because they have access to atmospheric nitrogen, provided their roots are well supplied with nitrogen-gathering bacteria living within the nodules on the roots of the plants. Such plants are said to be inoculated. Inoculated legumes thus may secure their nitrogen from the inexhaustible supply of the air. If not inoculated, however, legumes, like other kinds of plants, must depend upon the soil for their nitrogen as well as their mineral requirements, and since they are heavy feeders upon nitrogen and other plant-food elements, they may be the most effective "miners" of soil fertility grown on the farm. To function as soil-building crops, legumes must, therefore, be inoculated.

Benefits Derived.
The method of utilizing the crop is another important factor in determining the benefit to be derived from the growing of a leguminous crop. Under the best conditions, even inoculated legumes secure only a part of their nitrogen requirements from the air.

Soil Improvement.

A. Thompson to P. F. Townbridge, director of the North Dakota experiment station. The return was considered especially good in view of the fact that the field peas were badly damaged by unfavorable weather during May and June.

The average daily gain per hog for 120 hogs was 1.16 pounds on the peas, 6.22 acres furnishing pasture for eight days. The hogs were then turned in a ten-acre corn field, where they made a daily average gain of 1.7 pounds each for 17 days. The value of the gains was computed at 10 cents per pound.

Cheap Fruit Insurance
Spraying is cheap insurance against insect pests attacking fruit and garden crops. It is necessary for best results that the proper insecticide be used, that it be applied in a thorough manner, and at the right time. Spray schedules are now available for many of the more important insect pests of the orchard and garden.

SPRAYING TREES IN BLOOM IS HARMFUL TO INDUSTRIAL BEE
Little Insects Necessary for Pollination.

(Prepared by the United States Department of Agriculture.)
When spraying fruit trees, care should be taken to do the work at a time when there is the least danger of poisoning the honeybees which visit the blossoms and which are very necessary for the pollination of the flowers. While the United States Department of Agriculture is spraying fruit trees while in full bloom with arsenicals is particularly injurious to bees, according to tests which have been completed recently by the bureau of entomology.

Of course the beekeeper does not want his bees poisoned, says the department, because as a result his honey crop is reduced. The subject should be of even more interest, however, to fruit growers because with the loss of the honeybees they lose the most effective means of pollination in their orchards. In this respect the beekeeper, the fruit grower, and in fact everyone is benefited by honeybees.

The effect of arsenical sprays on the mortality of honeybees has long been debated, but only a few systematic investigations have been made to aid in settling the dispute. In the hope of answering definitely some of the questions so long debated, these tests were conducted. While they are limited in their scope, they do enable the department to make some recommendations.

Spraying apple trees during full bloom is not recommended because the codling moth can be as well controlled by spraying when 90 per cent of the petals have fallen, and because spraying when the trees are in bloom is injurious to insect pollinators.

Acid Phosphate Speeds Up Tomato Crop Growth
It has been found by the New Hampshire experiment station that acid phosphate speeds up the tomato crop materially, and makes it possible to beat the frost. They have used from five hundred pounds to fifteen hundred pounds of acid phosphate to the acre, in addition to twenty tons

Destroy Green Cabbage and Cauliflower Worms
The green cabbage and cauliflower worms that do so much damage to the leaves of these plants come from the eggs laid by the white cabbage butterflies. They are easily destroyed by spraying or dusting with any arsenical poison (arsenate of lime one ounce to two gallons of water), or pyrethrum powder may be dusted on the plants. It is difficult to get a spray to stick to the smooth glossy foliage of any of the cabbage family, but the spray may be greatly improved by adding one-half ounce of soap to each two gallons of the arsenical spray. Dusting early in the morning or after a rain with pyrethrum powder or any of the arsenical poisons is very satisfactory. A useful homemade dust is made by placing the dust material in a cheesecloth bag or sack or one made from any other thin, strong material, and then by going over the plants using a stick to beat the dust from the bag a very satisfactory job can be done.

Approximately a third of the nitrogen found in the legume plants comes from the soil. It is apparent, therefore, that the soil content of this important element can be increased only by returning a portion of the plant to the soil in the form of roots, stubble, residues, and as green or stable manure. A larger proportion of the tops must be returned in the case of some legumes than is necessary with others.

Nine-tenths of the soy-bean plant is contained within the tops, while about one-half the alfalfa plant is below the ground. Thus, removing the whole soy-bean crop and returning nothing in the way of manure or threshed straw would tend to deplete the soil, even though the plants were inoculated, whereas the removal of a crop of alfalfa would have a much less serious effect. Soil improvement can be accomplished therefore by returning a major portion of inoculated legumes to the soil in one form or another.

Radio Messages to Other Worlds?
Recent discoveries, made known by the president of England's Royal Astronomical society, indicate that the little dark star on which we live is situated not far from the center of the greater universe, something man in his conceited ignorance has always believed. For every sun, or twinkling star in space, there are many more dark stars or planets, which shine, if at all, by reflected light. This destroys one of primitive man's illusions that the sky and sun and stars were all created for the benefit of himself and his fellows alone. In these millions of unseen worlds there must be others similarly situated as our earth, on which the same forms of life have appeared and exist. One of these days radio may be perfected to the point where the people on one planet may exchange messages with those on another. It is a far-distant probability but not an impossibility.—*Capper's Weekly*.

DEMAND "BAYER" ASPIRIN
Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—*Adv.*

The Reason
Rev. J. D. Morrison of Camden, discussing the Baptist convention's resolution in favor of penalizing non-voters, said the other day: "The typical nonvoter, when you reprove him, resorts with some complacent and utterly absurd reason for his nonvoting course. "It reminds me of the man who complained to his wife: "A year ago you said our marriage was made in heaven, yet now you order me around something awful." "His wife answered calmly: "'Order is heaven's first law.'"

Service
"Walter, somebody took my overcoat." "Yes, sir, shall I find you another, sir?"

One forgets nearly everything except the times when he made himself ridiculous.

Poison Bran Best Remedy for Cutworm Invasion
Cutworms come in less periodically and they should not be confused with the army worm which appears much less frequently. The army worm works both day and night while the cutworms do their work at night. When cutworms are abundant the poison bran is the best remedy. It is made of bran with enough molasses to make it palatable to the cutworms, and the two mixed with pyrethrum. The bran may be sprinkled along the plants and it is the cheapest and most effective remedy. There is no reason to fear another attack next year on the same ground, although there are likely to be some. If they do appear when carrots and beets are up, then use the poison bran. The larvae or worms do not lay eggs as this is done in the moth or miller stage of the insect's life. If the pupae are numerous and they can be destroyed in some way that would help lessen the danger next year. If they march in numbers at night dig a trench along the plants to be safeguarded and put poison bran in the trench where they will eat it and die in droves.

Don't Suffer With Itching Rashes Use Cuticura
Soap, Ointment, Talcum sold everywhere. Sample free from Cuticura Laboratories, Dept. M, Malden, Mass.

FARM FACTS
Give the birds protection; they will repay you next summer. Practice crop rotation to hold down the danger of scab and other potato diseases. Start mixing poultry droppings with kysium, an excellent fertilizer and a convenient way of handling it. Plant a barn for your grandson. Two acres of white pine set now will build him a fine one in fifty years. Most farming machinery goes to the scrap heap after it has been used only 80 to 100 days, while railroads use a locomotive 25 years or more. The high price of posts makes the catalpa groves more valuable than ever anticipated. And it is surprising how rapidly the small catalpa trees grow into post size.

Strength and Energy this easy way
Simply drop a cake of Yeast Foam in a glass of water; let stand for five minutes; stir; let settle and drink the milky water, including the white precipitate. Or if you prefer, eat the cake with a cracker or a piece of butter. Easy, simple, palatable. Yet you get the full tonic value of the marvelous yeast plant. If you suffer from constipation, anaemia, boils, pimples, indigestion—don't fail to eat Yeast Foam regularly. Its beneficial effects will amaze you!

WOMEN FIGHT POWERFUL FOE

Struggle Against Ill Health

Find a Faithful Ally in Lydia E. Pinkham's Vegetable Compound

MRS. ADOLPH HANSEN
HOLMQUIST, SOUTH DAKOTA

Holmquist, South Dakota.—"I can not begin to tell you how much good Lydia E. Pinkham's Vegetable Compound has done for me. I was sick for about four years. I could not sleep, and I was always worrying, so one day we saw your advertisement in a paper, and I made up my mind to try the Vegetable Compound. I bought one bottle and did not see any change, so I got another bottle.

At the second bottle I began to feel better and I have used the Vegetable Compound ever since, whenever I feel badly. I recommend it and I will answer any letters asking about it.—Mrs. ADOLPH HANSEN, Holmquist, South Dakota.

Could Work Only Two Hours
Encanto, Calif.—"I bless the day I began taking Lydia E. Pinkham's Vegetable Compound. I was so weak and tired all the time I could not work more than two hours each day, then had to go to bed for the rest of the day. I read so much about the Vegetable Compound and I was so weak that I decided to try it. I now do my own housework—washing, scrubbing, and ironing—and then help my husband with his garden. I do not have that worn-out feeling now. I advise every woman to give your wonderful medicine a trial, and I will answer any letters I receive from women asking about it.—Mrs. STELLA LAY, Jamacha Road, Encanto, Calif.

A woman who is fighting for her health and her family's happiness is a valiant soldier. She wages her battle in her own kitchen. She has no thrilling bugles to cheer her on, no waving banners. If you are fighting this battle, let Lydia E. Pinkham's Vegetable Compound be your ally, too.

Will Electrify Tunnel

The new 7 1/2-mile Cascade mountain tunnel, costing \$16,000,000, of the Great Northern railway, which cuts off about eighteen miles of existing grades and curves, will be electrified. Power from hydro-electric plants will be utilized for train operation.

At Last

"Was the prisoner really insane?"
"Not until the cross-examiner got at him."

Fear follows crime and is its punishment.—Voltaire.

The real cause of bad breath

"You cannot 'cover up' unpleasant breath for any length of time. The only way to rid yourself permanently of it is by removing the cause.

"Sometimes poor teeth are responsible. But the commonest cause of a coated tongue and offensive breath is constipation. You may not realize that your intestines are slow in eliminating waste matter, or that your breath is objectionable. But others will notice it.

"Get rid of constipation, and your breath will become fresh and sweet. Even more important, you will notice an immediate improvement in your health and spirits."

Nujol relieves constipation in Nature's own way

Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Medical authorities approve Nujol because it is so safe, so gentle, and so natural in its action.

Nujol simply makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without

Wm. Odekirk and son Harry were Fond du Lac callers Friday.

Mrs. Willie Koch spent Friday evening at the Aug. Koch home.

Mr. and Mrs. Edw. Koch spent Friday afternoon with August Koch and family.

Mrs. Charley Schultz spent Saturday and Sunday at West Bend with relatives.

Mr. and Mrs. Albert Butzke left Saturday for a few days' visit with the Chas. Wundler family.

Willie Klabaun is spending a few days at the George Romaine home, where he was cutting wood.

Mrs. M. Wenzler and Mrs. Chas. Schultz attended the funeral of Frank Harter which was held at Kewaskum Tuesday.

Mr. and Mrs. John Furlong and Ernie Furlong, Mrs. M. Wenzler called on Mrs. Wm. Odekirk last Thursday, who was confined to her bed with a bad cold.

Mr. and Mrs. Maurice Wenzler and daughter Elizabeth, Mr. and Mrs. Ed Hornburg and family, Carl Hornburg, Mr. and Mrs. Peter Hahn spent Sunday with Mr. and Mrs. Gust. Lavrenz and family.

Mr. and Mrs. Maurice Wenzler and daughter Elizabeth, Miss A. Koch, and Mr. and Mrs. Robert Buettner and family, Wm. Klabaun, Miss Clara Koch and Miss Vera Hausbauer spent Sunday evening with Mr. and Mrs. Wm. Odekirk and family. It began Mr. Odekirk's 48th birthday. The evening was spent in playing cards. At 11 o'clock a plate supper was served by Mrs. Odekirk, Miss Vera Hausbauer and Miss Alina Koch.

WAYNE CENTER

Mr. and Mrs. Andrew Kuehl visited last week Wednesday evening with Herman Bruhn and family.

Mr. and Mrs. Peter Gritzmacher and Misses Vinelda Guenther and Beulah Foerster were guests of Mr. and Mrs. Roy Zuehke and family.

Washington Foerster visited Sunday afternoon at Campbellsport with his grand father, Conrad Herbel.

Mrs. Gustave Kuehl of Theresa is visiting for some time at her son Willie's place.

Mr. and Mrs. Art Schmidt spent Sunday afternoon at Allenton with Mr. and Mrs. J. Terlinden and family and also with Mrs. Peter Terlinden.

The following spent Sunday evening at the Herman Bruhn home: Mrs. Willie Straubing and daughter Margjory and son Milton, Milton Borchert, Alvin Foerster, Wilmer Hawig, Eddie and Willie Thurke and Jac and John Hawig.

INDICATIONS ARE THAT FEDERAL AID ROAD LAW WILL BE SAVED

The attempt to change the present Federal Aid Road law by cutting down the amount of the appropriation and wiping the secondary highways from the Federal Aid System gives every indication of facing defeat in Congress, according to F. A. Cannon of Madison, Executive Secretary of the Good Roads Association of Wisconsin, who has just returned from Washington where he spent ten days in an effort to defeat this movement. According to Mr. Cannon, the opposition to the present Federal Aid Road law comes from a small group of eastern states, but the tremendous sentiment throughout the country has aroused congress to the necessity of continuing the present law. The Committee on Roads of the House of Representatives has reported unanimously in favor of continuing the present Federal Aid appropriation amounting to \$75,000,000 per year, of which Wisconsin's share is \$1,873,000. They reported in favor of continuing the use of those funds on both the Primary and Secondary Federal Aid systems.

RED CROSS DOINGS

Fifteen boxes of Corinthian dried currants have been received by members of the Junior Red Cross of the Washington County Chapter as a gift from the Juniors of Greece to those of the United States. Until last year the American Juniors did not have opportunity to assist in Greece through their National Children's Fund. However, last autumn the Greek Red Cross requested assistance in establishing a sea-shore colony for 800 undernourished children inclined to serious illness, so the "Phaleron Summer Colony" has been established, to be supported jointly by the American Junior Red Cross, the Greek Department of Hygiene, the Greek Red Cross, and private subscribers among Greek citizens. The contribution of \$600.00 by American Juniors will be used for permanent equipment and the colony has been called the "American Junior Red Cross Camp."

FIRE DESTROYS HOME AND LEAVES FAMILY DESTITUTE

Fire which totally destroyed the farm home of Mr. and Mrs. George Leonard, five miles west of this city, on route 2, Monday night has left the family in destitute circumstances. They have seven daughters, ranging in age from 3 to 9 years, and besides the house being a complete loss the family lost all their clothing and household effects, and we understand no insurance was carried on the property or household furniture.—Plymouth Reporter.

Ask for "S&H" Green Stamps

We give \$2 in cash for each filled book. Do not overlook asking for your stamps—they are the discount you receive with every 10c purchase.

Important News to Everyone! Starting Monday, April 5th, Our 26th Anniversary Sales

—offering thousands of dollars worth of new, desirable merchandise at prices that will interest the

Ask For The Hostess She Makes Shopping Easy For You

When you come to the Boston Store the Hostess and her staff are here to personally shop with you and help make selections—so as to save time and patience.

She knows the location of every department in the store—she will show you just what items are advertised—and the very latest arrivals. With her aid, your shopping event will be an exceedingly happy one—all her services are cheerfully given without charge.

Ask any Hostess—she will quickly locate the Hostess for you.

Order By Mail

We will shop for you, if you yourself cannot attend these Anniversary sales. Your letters will receive the prompt personal service of our mail order shoppers. If there is anything you cannot get at your local stores, write us—we will be glad to send it!

Motor to Milwaukee!

A safe auto park is maintained by the Boston Store for its patrons opposite our store on Fourth Street. A two-hour period of free parking with every purchase of \$1 or more—after two hours, there is a nominal charge of 10c per hour.

Women's Rest and Waiting Rooms

A comfortable, home-like place where you can rest between shopping tours. Wash rooms and showers, bath with maid in attendance—no charge.

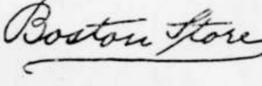

PEOPLE OF KEWASKUM

To this store, April means something more than the budding of Springtime blossoms, and April showers! It is our Birthday—and like all other Birthdays, we have made extensive preparations for this wonderful occasion. Beautiful new merchandise has been gathered from all parts of the world, much of it specially purchased and very specially priced.

Two Lively Weeks! Sale Starts Monday, April 5th, and Continues to Saturday, April 17th

Everything is in readiness! Many large firms have cheerfully co-operated with us—our merchandise experts and buyers have been working enthusiastically for months—every executive and sales-person has been eagerly awaiting this great event!

We want, especially, to impress upon our out-of-town friends, the high quality of merchandise offered by this store, coupled with very reasonable prices—the expert service and cheerfulness of our Salespeople—and the Fair, Square and Liberal Policy of our Store.

The Stores in Your Local Community

should always receive your first consideration and co-operation—but at times there may be things you need and want that cannot be supplied by your local stores, or times when you want larger assortments from which to make selections. It is at these times we wish to serve you, and acquaint you with our great store—12 acres of floor space, filled with new and desirable merchandise, and over a thousand salespeople to help you make selections.

NEW PROSPECT

John Tunn had a wood sawing bee Saturday.

School closed Friday for a week's Easter vacation.

J. P. Uelmen was a business caller at Campbellsport Thursday.

Ernst Hoelt of Crooked Lake was a pleasant village caller Monday.

Frank Flitter of near Campbellsport spent Friday with the John Tunn family.

"IT PAYS TO ADVERTISE"

A lion met a tiger
As they drank beside a pool.
Said the tiger, "Tell me why
You're rearing like a fool?
"That's not foolish," said the lion,
With a twinkle in his eyes.
"They call me king of all the beasts
Because I advertise."
A rabbit heard them talking
And ran home like a streak.
He thought he'd try the lion's plan
But his roar was a squeak.
A fox came to investigate—
Had luncheon in the woods,
So when you advertise, my friend,
Be sure you've got the goods.

DISTINCTIVE JOB PRINTING

It pays to be "individual" and distinctive in the use of printed matter. To use only such letter heads, bill heads, envelopes, window cards, statements, business cards, posters, invoices, etc., as reflect attractiveness and typographical neatness in production. We maintain a fine assortment of the better grades of paper stock, modern and neat type faces and illustrations to satisfy your every printing need. We can also help you in designing your printing needs.
