VOLUME XXXII

KEWASKUM, WISCONSIN, SATURDAY, FEB. 12, 1927

NUMBER 23

## DEATHS OF THE PAST WEEK

**DEATH OF MRS. NIC REMMEL.**  
After an illness of four months with a complication of diseases, Mrs. Nicholas Remmel (nee Margaret Harter) passed peacefully away into eternal sleep at her home here on Wednesday evening, Feb. 9, 1927, at 5:45 p. m. Mrs. Remmel was born October 18, 1844 in New York. In 1863 when 9 years of age, she came to the town of Auburn. In 1876, she was married to Nicholas Remmel. Four children were born of this union, as follows: Helen and Mary at home, Rose (Mrs. D. J. Harbeck) and Lorenz (Mrs. Louis Bath) of Kewaskum. Mrs. Remmel also leaves two brothers, John and Joe Harter and three sisters, Helen, Kate and Rose Harter. Mrs. Remmel was a lady highly respected for her talents and kindly qualities. She had a large circle of friends who will long remember with love and esteem the many kind deeds she did upon this earth. She possessed the charm that comes from a friendly heart and a kindly spirit that made her a friend to all that she met. A devoted Christian and a kind and loving wife and mother, counting for much in the life of her family. Though she had been in ill health at intervals for a number of years, she bore her suffering with patience and waited in Him who maketh all things right, until she answered the summons of the Master of life to the Great Beyond. The funeral will be held today, Saturday at 10 a. m., with services in the Holy Trinity church. Rev. Ph. Vogt will officiate. Interment will be made in the congregation's cemetery.

**DEATH OF MRS. FERD. TESCH.**  
Mrs. Ferdinand Tesch (nee Bertha Fleming), an esteemed citizen of Boltonville, died at 8 o'clock a. m., Monday, Feb. 7, 1927, after a short illness. She had attained the age of 79 years, 10 months and 8 days. Deceased was born in Neiklotz, Prussia, Germany, on March 30, 1847, and immigrated to America in 1872. In 1873, December 26th, she was married to Ferdinand Tesch at Cedar Creek, Wis., after their marriage they made their home in the town of Hartford, where they resided until 1880 when they moved onto a farm in the town of Kewaskum. After living here for three years they made their home with their son Herman in the town of Farmington, where they have since resided. This union was blessed with three children, two sons and one daughter. One son August preceded her in death in the year 1913 and her daughter Augusta died in 1914. She leaves to mourn, besides her aged husband, one son, two sisters and four grand children. The funeral was held at one o'clock Wednesday afternoon, with services in the St. Lucas Lutheran church here. Rev. Heidel officiated. Interment was made in the congregation's cemetery.

**DEATH OF MRS. JOHN DEVINE.**  
Mrs. John Devine of Parnell, died at the home of Dr. and Mrs. G. F. Murphy at Stratford, where she was recuperating from an operation, last Thursday, following a stroke of paralysis. Deceased was born February 21, 1846, in the town of Mitchell where she lived practically all her life. Mrs. Devine leaves to mourn, her widower, three daughters, Mrs. Murphy of Stratford and Martha and May at home, one son Lawrence at home, three brothers, Michael O'Reilly of Stratford, J. B. O'Reilly of Milwaukee and Terrance O'Reilly of Wauwatosa, Wash. and a sister, Mrs. James Gentry of Cascade. The funeral was held at 10 a. m., Monday from St. Michael's church in Parnell. Rev. Leo Schiffer officiated. Burial was made in the adjoining cemetery.

**TOWN LINE**  
Mr. and Mrs. Ernie Odschick spent Tuesday at Campbellsport.  
Mr. and Mrs. Leo Sammons and Mrs. Fred Ludwig spent Monday in Fond du Lac.  
Mr. and Mrs. Chas. Buehner and family spent Sunday with Mr. and Mrs. Robt. Buettner in Auburn.  
A. B. Moore and son Leslie spent Tuesday at Pickett where they visited with Mrs. Susan Moore who is ill.  
Mr. and Mrs. John Ludwig and daughter Marie and Misses Marie and Loretta Ludwig of Milwaukee, Mr. and Mrs. James Gentry, Mr. and Mrs. Oscar Schultz and family, Mr. and Mrs. Alfie Ludwig and family and Mrs. Fred Ludwig spent Sunday with Mr. and Mrs. Vilas Ludwig.  
A number of relatives and friends gathered at the home of John Sammons Sr., in honor of his 70th birthday Saturday evening, Feb. 5th. The evening was spent in dancing. Music was furnished by Henry Welsh, Irvin Pindie, Leo Sammons, Alvin Seefeldt and Chas. Lichtensteiger. At midnight a delicious luncheon was served by Mrs. H. Welsh, Mrs. Leo Sammons, Mrs. Irvin Pindie and Mrs. John Deane and Mrs. Chas. Lichtensteiger.

## NEXT SKAT MEET AT PORT WASHINGTON

The mid-summer skat tournament of the Wisconsin Skat League will be held at Port Washington August 27. This decision was reached at the business meeting held at Milwaukee last Sunday. The officers elected at this meeting were: President, H. A. Wrucke of Campbellsport; Vice-President, Oscar Roessler of Jefferson; Secretary, Oscar Schwemer of Milwaukee and Treasurer, Fred Altmayer of Green Bay. Following are the prize winners at the tournament held at the Auditorium, of nearby towns and cities:

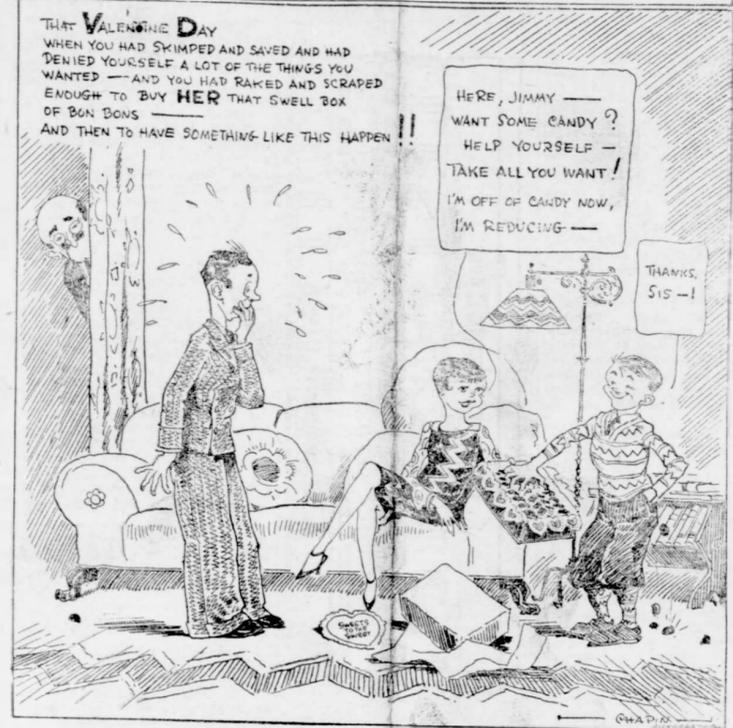

- 43—Frank J. Brah, Campbellsport.
- 45—Oscar Rosthke, Hartford.
- 47—B. J. Husting, Mayville.
- 56—John Ciriacks, West Bend.
- 66—George Adams, Port Washington.
- 67—Walter Weidman, Jackson.
- 68—John Dohr, Saukville.
- 71—Alvin Rosenthal, West Bend.
- 76—Gust. Schmidt, Port Washington.
- 78—Wm. Bartel, Campbellsport.
- 89—W. J. Gummi, West Bend.
- 97—W. C. Knippel, West Bend.
- 112—T. J. Shiners, West Bend.
- 122—Chr. Klaper, West Bend.
- 131—John Behrendt, Port Washington.
- 137—E. G. Franckenberg, West Bend.
- 151—Adolph Straek, South German town.
- 156—Wm. F. Hron, West Bend.
- 175—Frank Kreutzer, West Bend.
- 185—J. W. Herdt, West Bend.
- 198—R. Zessin, South German town.
- 199—R. M. Mueller, Belgium.
- 202—R. Weber, Campbellsport.
- 212—Hubert Callias, Theresa.
- 214—C. J. Hames, Belgium.
- 215—H. L. Haessly, Theresa.
- 221—A. J. Hemmy, Hartford.
- 223—Edwin Lemke, Thiensville.
- 227—P. Biever, Fredonia.
- 238—M. J. Rias, Belgium.
- 248—Val. Goring, West Bend.
- 249—A. L. Gardner, Jackson.
- 262—Henry Kls, Belgium.
- 275—Aug. Ruedelbach, Mayville.
- 285—R. Guse, Thiensville.
- 286—Jack Schoetz, West Bend.
- 299—J. M. O'Meara, West Bend.
- 302—Geo. H. Stern, Fredonia.
- 307—J. H. Niesen, Stratford.

**LOCAL POST HOLDS MONTHLY MEETING**  
The Kewaskum post of the American Legion, held their regular monthly meeting with a large number in attendance. Final arrangements for the Valentine dancing party to be held by the post at the Kewaskum Opera House, were completed. From reports received by the members of the post, the dance will be very largely attended. Among other business transacted at the meeting, was the observance of Memorial Day in this village. The work of decorating all the graves of deceased soldiers from the Civil, Spanish and World wars, was taken over by the post, in connection with the observance of the day, an additional feature will be added if present plans will materialize. A committee was appointed to investigate the matter of buying a large silk flag for the Kewaskum High School, and also to erect a flag pole on the school campus. Dedication exercises for the same to be held on Memorial Day. As which exercises the entire school will be asked to participate. It is also the intent, if possible, to have the newly organized High School band to furnish the music for the occasion.

**FIVE CORNEES**  
Lester Nigh was a Milwaukee visitor Friday.  
Peter Schroeten was a Fond du Lac visitor Tuesday.  
Russel Diekmann visited at the Peter Seem home Monday evening.  
Mr. and Mrs. Ed Terlinden and family visited with Mr. and Mrs. Wm. Ferber Sunday.  
Misses Alma and Sally Senn visited with Miss Frances Ferber at Campbellsport Sunday.  
Mrs. Wm. Ferber and Oscar Kreyer visited with Mrs. Wayne Marcher at Peebles Wednesday.  
Messrs. Jerome Harter, Martin Schrauth, Lester Nigh, Othmer Mische and Romona Enders visited several days with relatives and friends at Watono.

**CARD OF THANKS**  
We, the undersigned desire to express our sincere thanks to all our relatives, neighbors and friends for their sympathy extended to us in our recent bereavement, the illness and death of our beloved wife and mother, Mrs. Bertha Tesch. To the pall bearers, for the many beautiful floral offerings, to Rev. Heidel for his comforting words, to all who loaned cars and to all who attended the funeral. Ferdinand Tesch and son Herman.

## THE DARKEST DAY IN HISTORY

## FORMER KEWASKUM MAN GOES TO CALIF.

H. J. Ebenreiter of Plymouth and well known in Kewaskum, where he, for a number of years, successfully conducted a furniture store and undertaking parlors, in company with his daughter Alice are enjoying a several months vacation in "Sunny California." The Plymouth-Harold Reporter, published the following glowing article of the veteran furniture man:

"It's good news to learn that H. J. Ebenreiter, 76 years old and Plymouth's pioneer furniture dealer, is basking in the much advertised California Sunshine. Believe us if anybody deserves pie with every meal and his full share of fair weather, it is this local business man, who practically has retired and who can nonchalantly tell of the rough and ready colonial days when he made most of the furniture which he sold, and who holds a warm spot in his heart for those furniture factories willing then to extend to the struggling young Wisconsin furniture dealer whatever credit courtesies were required. Mr. Ebenreiter has earned the California vacations which he takes over and anon, and you can safely assume he and Miss Alice are taking in the best that Los Angeles affords in the way of comfort and entertainment because that is the way H. J. does things."

## "ELLA CINDERS" AT THE OPERA HOUSE

Fireside humor and pathos as exemplified by the comic strip of the home newspaper becomes a living, moving thing upon the screen in the picturization of "Ella Cinders," Colleen Moore's latest vehicle for First National, which begins an engagement at the Opera House Theatre on Sunday, February 13. That is the promise of Manager James J. Buss. The picture, made by John Mc Cormick, responsible for the highly successful screen version of "Irene," deals with the exploits of the once winner and victor of a small town movie contest promoted by swindlers, with a trip to Hollywood, all expenses paid, as the grand prize. With the conclusion of the contest, the girl schemes various from the scene, their pockets bulging with their disproportionate percentage of money derived from entry fees, while the heroine is left to shift for herself in a city overrun with beautiful Miss Moore, who is always delightful in Ella Cinders theme, can be expected to play her part in a drama of such background. She again has the services of Lloyd Hughes as her leading man and is surrounded by players of proven capabilities.

Alfred E. Green, her mentor in many past screen successes, directed Miss Moore in this new offering.

## HAS FOUR TOES AMPUTATED

Edward Campbell, a young farmer residing in the town of Kewaskum, located about three miles west of Kewaskum, and a son of Mr. and Mrs. Joseph Campbell, Sr., of St. Bridget's, had the misfortune of losing four of his toes on his left foot, last week Friday afternoon. Edward, in company with his father and brother Joseph Jr. were engaged in cutting down a tree on his farm, when in some manner the tree fell in the wrong direction, in an effort to run out of the path of the falling tree, Edward slipped, with the result that the tree fell on his foot injuring the toes so badly that all but the big toe on his left foot had to be amputated the following day. Mr. Campbell is a young married man and his many friends regret much to learn of his misfortune.

## A. C. BACKUS ELECTED AT HEAD OF STATE CHILD HEALTH

A. C. Backus, formerly of Kewaskum, and for many years judge in Municipal court at Milwaukee, but now publisher of the Milwaukee Sentinel, has been named Wisconsin chairman of the American Child Health association by Herbert Hoover, secretary of commerce and president of the association, for the third consecutive year. Proclamations for the observance of Child Health week on May 1 will be issued by President Coolidge, honorary president of the national association. Mr. Backus, as state chairman will appoint committee chairmen in cities, towns and villages throughout Wisconsin to function in co-operation with doctors, health departments, public schools, parents, welfare and civic agencies.

## MASQUERADE

The Random Lake Firemen invite you to come to the Grand Fire Mask Ball at the Random Lake Auditorium, Random Lake, Wisconsin on Tuesday, February 22nd. Music by Firme's Six Men orchestra. Liberal cash prizes for best masks given according to attendance. Masqueraders contesting for prizes must be on dance floor at 9:45 p. m. and take part in the grand march. Admissions: Adults 50c. Children under 14 years, free. We assure you a good time.—Advertisement The Random Lake Firemen.

## CELEBRATE SILVER WEDDING

A large number of relatives and friends of Mr. and Mrs. William Butzler were royally entertained at the Kewaskum Opera House last Saturday evening, in honor of their 25th wedding anniversary. Dancing formed the main pastime of the evening. At 11:30 a dainty luncheon was served after which dancing was again continued. Music was furnished by Schloesser's orchestra. Mr. and Mrs. Butzler are well known and highly respected citizens of the town of Kewaskum, and have the well wishes of their many friends for continued health and happiness that they may celebrate their golden wedding anniversary twenty-five years hence.

## EUCARISTIC CONGRESS FILM TO BE SEEN HERE

His Eminence George Cardinal Mundelein will present at the Opera House Theatre, Wednesday evening, Feb. 16, the official motion picture of the XXVIII International Eucharistic Congress of Chicago. All the ceremonies, meetings and deliberations on the Congress are shown in full in this remarkable film. Noteworthy are the scenes of the throngs hurrying to participate in the Spiritual Banquet of One Million Communions, the welcome and installation of the Papal Legate at the solemn Pontifical High Mass, the Solder meeting at Soldier's Field Stadium, the choir of 62,000 children and the scenes attendant on the invasion of Mundelein by a 600,000 pilgrims for the closing session and the Eucharist Procession.

## Church Notices

**PEACE EVANGELICAL CHURCH**  
9 a. m., Sunday School.  
10 a. m., English services.  
Wednesday evening choir rehearsal.

**WILL HOLD CARD PARTY FEB. 22**  
The ladies of the Holy Trinity congregation will hold a card party at the school hall on Tuesday evening, Feb. 22. The usual games will be played. All are invited to attend.

**WILL HOLD SKAT TOURNAMENT**  
Louis Heister, manager of the Kewaskum Lunch Room, will hold a skat tournament at his place on Tuesday evening Feb. 15. Prizes will be awarded according to number of players present. All skat onkels are cordially invited to attend.

## KEWASKUM HIGH SCHOOL NOTES

Editor-in-chief, Margaret Diesner. We regret to say that we forgot to mention the Dramatic Club party in last week's news that took place on January 31, 1927. This was held to initiate the new members. The evening was spent in playing games. On Friday evening February 4, a Wild West Rodeo party took place at the school Gym. The Rangers won in the recent magazine campaign and the Ropers and Riders tendered their party to acknowledge defeat. Philip McLaughlin, one of the business managers, was chief host. He conducted the regular Wild West drag-em-out-of-town games that were played. Several fierce cowboys were present. In connection with this was the Sophomore return party given in their honor by the Freshmen. Their entertainment consisted of dancing. Music was furnished by Mr. R. Melius. A good time was had by all those present. Members of the debating club are preparing a debate on the question: Resolved that the Federal Government Alone Shall Have Control of the Enforcement of the Volstead Act. They promise to give us an interesting discussion on the question soon. The Sophomores held their monthly meeting recently at which they chose their class colors: Old Rose and Silver.

## HONOR ROLL

The following students have an average of 90 or above for the second quarter:  
Margaret Miller.  
Ralph Kohn.  
Esther Bruesewitz.  
William Hopkins.  
Rosella Haug.

**Kewaskum Whitewashes Campbellsport**  
Last Thursday night our basket ball team trounced Campbellsport by a decisive score of 24 to 0. Kewaskum immediately scored when the game opened and continued to do so for the first few minutes of play. The spirit with which the boys started soon died down and the best Kewaskum could do at the half was to enjoy a 9 point lead over the "Bells".

When the second half started Campbellsport came back strong and were determined to beat their old time rivals. Their attempts were not successful, however, and they did not succeed in scoring once. Kewaskum in the meanwhile brought their lead up to 21 to 0 just as the final whistle blew. Porschbacher and Schaefer were high scorers for Kewaskum while Schwandt played well for Campbellsport. Although Kewaskum easily defeated Campbellsport they displayed a poor offensive. They covered this up, however, by laying an air-tight defense that could not be penetrated by Campbellsport.

## NEWS

Mrs. P. M. Rosenheiser was a visitor in the grades on Monday.  
The Fourth grade Language class is working on an illustration of "The Ugly Duckling."  
Oliver Kocher is ill with the chicken pox.  
Mrs. E. Koel visited school Tuesday.  
The second grade is working on a movie of "Little Black Sambo."  
The first grade is working on a "Community Book."  
Helmuth Lubitz is on the sick list.

## Grammar Room Notes

Last Friday the Kewaskum Grammar room basket ball team played the Lomira Grammar room team and were defeated by a score of 10 to 4.  
The 7th grade are writing a two thousand word essay on Asia.  
A reading contest took place January 28th. The winners are as follows:  
The best selection:  
1st prize—Henry J. Lay.  
2nd prize—Charlotte Lay.  
The most interesting selection:  
1st prize—George Koerble.  
2nd—Retha Jane Rosenheimer.  
The most beautiful selection:  
1st prize—Linda Rosenheimer.  
2nd prize—Elizabeth Martin.  
Editors:—George Koerble, "Bad" Lay.

## CELEBRATED HER 99th BIRTHDAY

Mrs. Louise Muenck of Fond du Lac was the guest of honor at a supper to a party of relatives and friends at the home of her son and daughter-in-law, Mr. and Mrs. Wm. Muenck, 191 East Thirteenth street, Fond du Lac, Saturday evening the occasion being her 99th birthday anniversary. During the day many friends called to extend congratulations. Mrs. Muenck has one son William of Fond du Lac, and eight grandchildren, Emil Muenck, Herman and Rose Hinn of Fond du Lac; Mrs. John Kranig of Osceola; Mrs. William Schultz of Waucousta; Mrs. Herman Butzke of New Prospect; and Otto Hinn of New Fane; and 17 great grandchildren.

## FIRE AT CONVENT AT CAMPBELLSPORT

St. Joseph's Convent at Campbellsport caught fire shortly before 6 a. m. Tuesday, causing a damage estimated at \$5,000 to \$10,000 to the east wing of the building.  
Four invalid nuns in hospital quarters on the third floor were rescued by firemen. One of the four nuns was overcome by smoke before rescuers reached her. The other three narrowly escaped being overcome. One of the nuns was confined to the hospital quarters by a fracture of one leg, while the other three were invalids. The four were carried to safety by members of the Campbellsport volunteer fire department. When discovered the fire had gained such headway that Chief Chas. A. Suckawaty of the Campbellsport fire department appealed to the Fond du Lac fire department for aid. The Fond du Lac department responded promptly, but when they reached there the local company already had the fire under control.

Campbellsport officials were unable to find any cause for the fire, but indicated a belief that it may have resulted from defective wiring.  
The fire was discovered by Sister M. Bernedette and a group of nuns who arose at 4:45 to attend to the convent chores. While returning from the barns, where they had milked the cows the nuns saw the entire east wing enveloped in smoke. The fire had gained headway when the Campbellsport department was called.

One-third of the basement, including seven or eight rooms was destroyed by the fire, including the dining and storage rooms. The fire broke through the walls and a small section of the stairways in the convent caved in. The quarters of the sister superior on the first floor were destroyed. The rooms of the Rev. Fr. John Berkman, convent chaplain, as well as the convent chapel, were damaged by water and smoke.  
The building is a brick structure approximately 90 feet by 240 feet. It is three stories high.

## ROUND LAKE

Earl Hennings was a business caller at Plymouth Tuesday.  
Miss Roma Seifert visited Friday with Leona and Edna Koehi.  
Clem Schmeister of Sheboygan visited Tuesday at M. Calvey's.  
Ed. Johnson of Eden Grove was a business caller Monday.  
Vincent Calvey delivered calves and played potatoe to Campbellsport Wednesday.  
Mrs. William Hennings visited Wednesday with her sister, Mrs. M. Calvey.  
Clyde Hennings and Harry Cook were Milwaukee business callers Friday.  
Misses Della and Beulah Calvey are visiting friends and relatives at Fond du Lac.  
Mrs. M. Calvey and son Vincent visited Friday evening with the A. Seifert family.  
Mr. and Mrs. George Buehner and son Kenneth of Elm Grove were pleasant visitors at their home here Sunday.  
Mrs. William Hennings and son Earl were visitors at the Henry Habock home at Fond du Lac Sunday evening. Mr. Habock is sick with tonsillitis.  
STRAYED—I lost my little Collie dog about eight months old, answers to the name of Rover. He jerks in one shoulder. He followed me on the road to Waucousta. Anyone knowing of his whereabouts please notify Mrs. Mike Calvey, Campbellsport, R. 4, Box 63.

## BRIDE OF HOUR SUED FOR DIVORCE

A judgement granting an absolute divorce to the plaintiff has been entered by Judge C. M. Davison of Beaver Dam in the case in which George Roberts, wealthy Fox Lake bank cashier, was suing Mrs. Esther Roberts, teacher in the West Allis schools. The banker charged that he had showered his prospective bride with jewels and other gifts of a total value of \$5,000 but that she had been most reluctant to wed and within an hour after she had accompanied him to a rural parsonage and participated in a marriage ceremony she had excused herself and fled, refusing there after to recognize him as her husband. The suit was tried at West Bend several weeks ago, the defendant failing to appear but communicated with the judge by telephoning to him that she did not desire any alimony or property settlement and declaring that she would enclose the banker's presents in a box and ship them to him.

## Certain Capacity for Best Results

### Why By-Pass Condensers in Audio Circuits Are Important Parts

If the stopping condensers in the grid circuits of resistance-coupled amplifiers are too small they defeat the very object sought in using resistance coupling—that is, amplification of the low notes. The stopping condenser is a series-connected condenser through which the signal must pass, and a small condenser offers a very high impedance to currents of low frequencies, so that these currents will be depressed. The degree of suppression at any given frequency depends, of course, on the capacity of the condenser and also on the plate resistance of the tube, on the coupling resistance in the plate circuit of the tube and on the grid leak resistance of the tube following the stopping condenser. For the ordinary values of these resistances and for the values of capacity of the condensers recommended by many designers of amplifiers the suppression is by no means negligible. In some cases the small condensers used will introduce as much distortion as poor transformers.

**Ideal Size of Condenser.**  
The ideal size of condenser in the grid circuit is one of infinite capacity, or one which is as large as is practically possible. But large condensers

are both expensive and bulky, and for these reasons the larger sizes are ruled out of consideration. Perhaps the largest that need be used is .1 microfarad unit. This condenser will introduce a distortion of less than 1 per cent for the lowest audible note. A condenser as small as .1 microfarad will not introduce more than 8 per cent suppression at 15 cycles a second and much less at higher frequencies. But a condenser of .005 microfarad, which is often recommended for resistance-coupled amplifiers, will introduce as much as 36 per cent suppression at 15 cycles and quite notable percentages at the higher and more important frequencies. That is far from distortionless amplification. The smallest stopping condenser that should be used under any condition is an audio-frequency amplifier that may be taken as .01 microfarad, and that should be used only for ultra-selective sets. For receivers of ordinary selectivity the choice should be from the capacity range of .1 and 1 microfarad. For the smaller of these the suppression at 10 cycles is less than 7 per cent.

**Distortion Is Introduced.**  
Objection has been raised to the use of the stopping condensers on the ground that it takes an appreciable time for these condensers to charge and that, as a consequence, distortion is introduced. That is not valid because the condenser does not charge, the voltage being the same on either side as far as A. C. is concerned. The small condenser is charged quickly and that is just how the suppression enters. R. A.

casting station to send out vibrating waves of a certain period, or frequency it will be necessary. In receiving this station, to adjust the receiving equipment to that same period, in order to get the best of results. The broadcasting station is like the man pushing the swing, and the receiving station like the other, there will be little result.

In practice, each broadcasting station is allotted, by the government, a certain specified period, frequency, or wave length, to which its equipment must be adjusted. By turning the dials of his receiving set, and thereby changing its period, the radio listener may then shift from one broadcasting station to another.

### Few Changes in Radio in Sight, Says Expert

Dr. J. H. Dellinger, chief of the radio division of the bureau of standards, declared recently while inspecting the Kolsper plant in Newark with a party of 40 members of the Institute of Radio Engineers that it will be several years at least before the present radio receiver will be changed to any great extent.

"People have quit waiting for some revolutionary discovery in radio to upset present conditions, and they are taking broadcast receivers into their homes in the well-founded belief that they are getting a standardized instrument which is not going to be out of date for many years," he said.

"Any doubling Thomases who are still postponing their enjoyment of present broadcast reception, anticipating some sweeping changes, are waiting in vain, I am afraid. Minor refinements may be expected continuously, but the basic operation and results, as found in the latest sets, will remain unchanged for some time."

Static and fading, which he considers caused by the sun, may be overcome in the future, but research is still far from the solution, he added. Experiments which may eventually cure fading are being made with a governor on a receiving set which will automatically increase sensitivity as fading begins and decreases it as signals grow stronger, but its perfection is not yet in sight.

"Before seeing Doctor Alexander's experiment I was very skeptical about radio 'movies,' but I am convinced it is only a matter of time and the development of discoveries already made. Vision by radio in the home may be the next important improvement. About eight or ten years from now I believe we shall be both listening in and looking in on distant theaters and operas while comfortably seated at home."

**"B" Batteries**  
There are four types of "B" batteries—small, medium, large and extra large. The extra duty batteries are designed for sets having five or more tubes. The large size of "B" batteries will do for three or four-tube sets and are generally used on the five-tube sets.

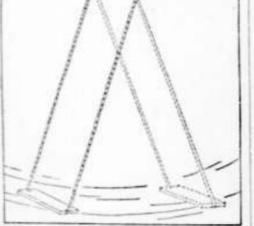

## SIMPLICITY OF RADIO

By POWEL CROSLY, JR.

RADIO WAVES, TUNING

When one talks over the telephone one has wires to guide the energy where it is supposed to go and an exchange girl to give one the proper connection. But what are we to do in listening over the radio, with no wires to guide the radio waves, and no exchange girls? We learn very quickly what to do after acquiring a radio set. We must be our own exchange girl, turning the dials and working the controls until we get the station we want. We are told that this act of playing exchange girl is called "tuning." But what happens when we turn all these gadgets?

To understand this we will go out into the yard and get in a swing. A porch swing will do, but a rope swing is better, because it will respond more

Showing How a Swing Has a "Natural Period" of Vibration.

promptly to the swings that we are going to make it do. We will get on the seat, shove off. Then we will push as hard as we can and see how high we can swing. One thing that we notice very promptly is that we have to keep giving pushes at just the right intervals in order to swing higher and higher. If we push at the wrong times—push back when we are still going forward, for instance—we will swing around like a sailor just come ashore with sea legs, careening this way one instant and that way the next and getting nowhere.

Then the swing tends to vibrate back and forth at a certain rate, just like a clock pendulum. By shortening the ropes, we can make the time of these swings, or vibrations, shorter—or by lengthening the ropes we can make it longer. The time required for one complete trip back and forth is called the "natural period" of the swing.

Now every electric circuit has a natural period, as far as the vibrations of electric current in it are concerned. This natural period is controlled by certain units in the circuit known as "condensers" and "inductances." Thus, by varying these units we are enabled to control the rate of vibration of the electric current in the circuit. Now obviously if we adjust a radio broad-

### Plug and Socket Safest in Making Connection

As a result of the increasing popularity of the house lighting circuit as the set's power supply, it is becoming more and more necessary to guard against shock. The use of double-pole open switches has been advocated by some advisers on radio matters, but it is condemned on grounds that this constitutes an ever-present menace to set operators. The safer plan is to use the conventional plug and socket, which can be handled without risk of shock.

### Batteries—Dry and Storage

A storage battery takes electrical energy, stores it in the form of a chemical action and then changes it back to electrical energy when the battery is placed in service. This action can be repeated many times before the battery is worn out. A dry cell develops electrical energy from a chemical action. In order to repeat the process when the battery is discharged it is necessary to renew the chemicals

### Use Soda to Clean Battery

When the terminals of the "A" battery become corroded the corrosion may be removed with a solution of hot soda water. Dip the rag in the solution and then apply to the terminal, rubbing very hard. After all of the corrosion has been removed coat the terminals with grease and this will prevent further corrosion.

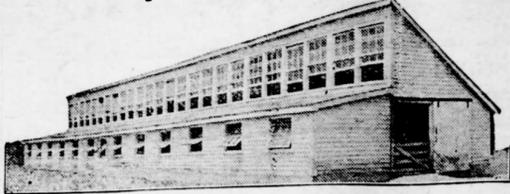

### The Making of a Lug

To make a lug on stranded wire strip off one-half inch of insulation, turn the fine wires back over the insulation remaining, wind three turns of bus bar tightly around the strands and then make a half-loop in the bus bar that extends beyond the end of the flexible wire.

### Paper Washers Aid Dials

If the edge of one of your dial scrapes against the surface of the panel in certain positions, remove the dial and place over the shaft two or three washers cut from ordinary note paper. These should raise the dial sufficiently to make it clear the panel.

## Economical Hog House Provides Ample Ventilation and Sunlight

By W. A. RADFORD

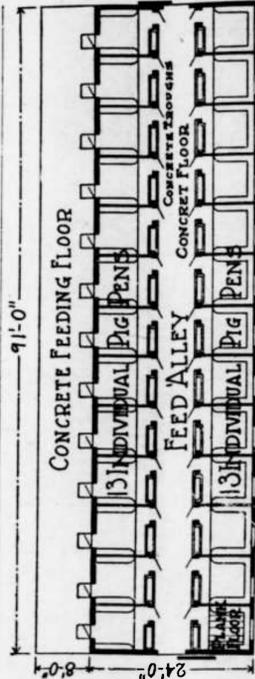

Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all problems pertaining to the construction of buildings work on the farm, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on the subject. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only include two-cent stamp for reply.

Proper housing is always an important factor in the successful raising of hogs. Too often it is neglected, however, when little expense and effort would be required to provide a good, serviceable, well-ventilated house, affording ample protection against cold and admitting much needed sunshine. One of the chief criticisms which may be made of the average hog house is that it is poorly lighted and poorly ventilated. If, in fact, any provision at all is made for ventilation.

A good but economical farrowing house which meets every requirement is shown in the photograph and plan. Probably not all farmers who make a business of hog raising would have 25 bred sows ready to farrow at once, but for those who are in business extensively here is a plan which can be adopted without great expense. For the smaller herd the plan can be reduced proportionately.

This is the saw-tooth roof type of hog house, facing south, which gives every opportunity for the late winter sun to get at all the pens through the two sets of windows. The need of ample sunlight is of equal importance with the need of good ventilation.

The house is of frame construction with a concrete floor and concrete troughs. On each side of the feeding alley, which runs through the center, there are 13 pens. These are, of course, plank floored. Outside, at the

back, is a concrete feeding floor so that the house may be used as a shelter during the hot summer months. The building measures 24 feet wide and 91 feet long.

### Floor Colors Should Blend With the Finish

Floors should be as mellow and inconspicuous in color as possible, but always in a color that harmonizes with the general finish of the room.

The finish of permanent flooring is highly important to the general appearance of the room, and the possible combinations of soft and hard woods, linoleum and composition floorings are of interest to anyone who is planning a home.

In general, hardwood floors are better and more durable, particularly if the floor is not to be entirely covered. If the floor is to be covered with carpet, soft wood is desirable; it is also used in country houses and successfully finished with paint or stain. The hardwoods include oak, maple, birch and beech. White pine, fir and red spruce come under the head of soft woods.

If a linoleum floor covering is desired, it should be laid at the time the house is built. Many housekeepers prefer tile and composition floors for the bathroom, kitchen and service quarters, as they are waterproof and can be cleaned with soap and water as often as necessary.

If hardwood floors are used, they can be finished with wax, or varnished with soft woods which are gilded at intervals. Linoleum floors should be waxed.

Rugs should be in keeping with the type of room, and should in nearly all cases be darker than the walls. Large rug designs are not desirable, the small all-over patterns are attractive in rooms with plain walls. If the walls are figured, plain rugs are in better taste. Plain rugs and carpets show dust more readily than those with all-over figures.

### Modern Kitchen Should Be Bright in Color

Make your kitchen charming if you would keep up with the times.

The modern housewife is in rank rebellion against the dull, the drab, the uninteresting. "Give me color," she says, "in my life, in my dress, even in my kitchen." And she is, it is only a matter of time and the development of discoveries already made. Vision by radio in the home may be the next important improvement. About eight or ten years from now I believe we shall be both listening in and looking in on distant theaters and operas while comfortably seated at home.

### Housekeeping Now Made Regular Art by Women

Women are more interested today in the appearance of their home than ever before.

A few years ago a woman's art found expression in hand-painted china, water-colored cards and souvenirs. Today a woman's art finds expression in the decorating and furnishing of her home, an art that is practical and constructive.

The evolution has been gradual. First it was interior decorating that occupied their attention. The heavy furniture of the stiff and uninviting parlor of a few years ago has given way to greater freedom that permits comfort and enjoyment in the home.

Having realized how delightful a home can be made by occasional rearrangement of furniture and new decorative color schemes, women have now turned their attention to the most conspicuous part of their home—the exterior.

### Folding Ironing Board Always Ready for Use

An ironing board that is always ready for use and never in the way, that is kept free from dust, that will not warp, crack nor split, that can be adjusted to a comfortable height, that has no hinges, folding legs, that is stable and strong, that requires no heavy lifting—these are some of the advantages offered by a folding ironing board in its built-in wall case that make it well worth the few cents a week that it will cost over the long time it lasts.

### Stand for Firm Floor Supports in House

Whether buying or building, make sure of abundant ventilation. Insist on having adequate footings, bedded upon firm bottoms. Watch the quality of brick and mortar used. Refuse to accept any compromise when it is a question of bridging a soft spot. Stand out for firm floor supports.

### Feeding for Veal

The calf which is to be fed for veal should be given all of the fresh whole milk that it will take. If a first class animal is to be produced, with dairy calves the calf is usually taught to drink from a pail. Generally from eight to twelve pounds of milk twice daily will be sufficient. This amount may be increased slightly as the calf becomes developed. If the calf is to be of finest quality it should not receive other than whole milk.

### Tender and Palatable Meat Is Most Desirable

If a farmer will fatten his helters and kill and dress them properly he will have very tender and palatable meat. A quick finish is desirable because it is economical, but beef that is fattened slowly may be very good too.

### Good for Hog Oilers

The waste oil from your tractors can be used for hog oilers, burning out stumps, mixed with ventral red for cheap barn paint, brushed on to automobile springs, mixed with lard or tallow for greasing wagons and heavy vehicles, lubricating binders and other farm machinery, as a basis for oil spray, sprinkling on roadway to keep down dust, and so on. But do not use it on leather or for preserving posts. Waste oil from automobiles is also good for the same purposes.

### Cull Out Poor Sows

It will not pay to carry sows through the winter if they are not satisfactory pig raisers. Sows that for any reason are not raising good litters should be fattened and sent to market. Old sows that are past the age of greatest usefulness should be replaced in the breeding herd by good gilts. Blindness, bad udders and sluggish disposition are frequently found with old sows. A sluggish, lazy sow is more apt to injure or kill her pigs.

### Applying Wall Paper

If walls have been calcimined one will have to wash this off with water or a solution of vinegar and water, to neutralize the alkalinity of the lime before applying wall paper. Then give the walls a coat of "size," paper dry, then you can apply the paper with assurance that it will not peel off. Use a good flour or cornstarch paste, or you can buy a paste prepared for the purpose.

### Proper Finish

The tone of a priceless Stradivarius violin is attributed to the varnish, which has preserved it for centuries. The tone of a house is determined by the quality of the finishing material used. It is a large extent the satisfaction of the home owner.

# Feed Beef for the Spring Markets

## Plan Is Favored Because of Low Price of Cottonseed Meal and Hulls.

Because of the low price of cottonseed meal and hulls this winter, winter feeding of beef cattle for the spring market might be a good venture for farmers who are favorably located for the work.

**Favorable Fattening Dates.**  
"The most favorable dates for fattening beef cattle are between November 1 and March 1," says Prof. R. S. Curtis, animal husbandman at the North Carolina State college. "Cattle do better in the winter months and there is not so much danger in feeding the meat. Those who wish to begin this work should do so at once, otherwise the finishing period may extend over into the warm months. Conditions then are less favorable for feeding cottonseed meal, farmers are busy in spring and the manure must be hauled out at an unfavorable time."

Professor Curtis states that when one starts to feed beef cattle with the meal, each animal should be given one pound daily and the amount be gradually increased so that a full ration be given at the end of 30 days. A safe rule to follow for the full ration is one pound of meal to each 100 pounds live weight of animal, using 2 1/2 to 3 pounds of hulls for each pound of cottonseed meal used. Where farm

roughages are available the hulls should be decreased. It requires from 90 to 120 days to put a decent finish on beef cattle. Rations should be given them twice daily and water and salt kept before them at all times.

**Gain of Beef Animal.**  
A beef animal should gain from 160 to 200 pounds during a feeding period of 120 days and under average conditions there should be a margin of two cents per pound between the buying and selling price. Most feeders figure that if they can break even and have the mature steer with 80 to 85 per cent of the fertilizing constituents of the meal in it, they have done a good piece of work. The finished animals are usually marketed during the early spring.

### Dormant Spray for Cherries

Sour cherries will not often require a dormant spray, but if needed the spray recommended for peaches may be used. The sprays are applied as follows, using lime-sulphur 1 1/2 to 50 or bordeaux 3-4-50 plus one pound of arsenate of lead: Make the first spray just before the cherry trees bloom, the second when the shucks are dropping from the young fruit, and a third spray following the second in about two weeks. To control cherry leaf spot, about two additional sprays should be applied after harvest. The interval between them should be about three weeks.

## LITTLE POTATOES ARE GOOD FOR PLANTING NEXT SPRING

### Avoid Tubers That Are Badly Sprouted.

Plant the small ones and save expense, is the advice of F. A. Krantz, of the division of horticulture, University of Minnesota, to potato growers who are beginning to think in terms of seed for next spring.

Mr. Krantz says that whole small potatoes are even better to plant than seed pieces from large tubers, provided they come from vigorous, healthy plants. If planted under weather conditions are unfavorable there is less likelihood of the whole small potato rotting in the ground than there is of the seed pieces cut from large potatoes.

"Growers who have kept up seed plots will be perfectly safe in planting their small, unmarketable stock," says Mr. Krantz. "The small seed potato should be firm in substance, with the first sprouts just beginning to appear."

### Fencing Aids Different Fields on Stock Farms

Any farmer who raises stock knows that fencing and subdividing his pasture so he can rotate the pasture gives 25 per cent more feed value to his stock because it eliminates the big percentage of feed that is trampled down. This soon pays for the price of the fence.

There is another gain, however, realized by the farmer who keeps his fields fenced off not only pastures, but corn, oats and wheat lands is able to turn his stock in these fields during the fall and winter. The stock not only benefits from the food value of the roughage but is at the same time scattering fertilizer on the fields.

A farmer who kept track of his expenses closely said that the saving of labor cost in distributing fertilizer, as well as the smaller amount of commercial fertilizer he had to buy, more than paid for his fence without counting the other benefits.

This farmer said: "Every farmer pays for a fence whether or not he has it, the only difference being that the farmer who has good fences gets a big return on his investment."

### Meat Is Most Desirable

If a farmer will fatten his helters and kill and dress them properly he will have very tender and palatable meat. A quick finish is desirable because it is economical, but beef that is fattened slowly may be very good too.

### Need for Pruning

Most fruit growers, even the more experienced ones, and their notions about pruning are changing somewhat from time to time as new evidence on the subject is advanced, and there will be more opening up of the older trees than has been the rule, during the next few years. There is no better time to see the need of this than when one can step under the branches and observe the large quantity of apples on the under and inner branches that are a liability.

### Good for Hog Oilers

The waste oil from your tractors can be used for hog oilers, burning out stumps, mixed with ventral red for cheap barn paint, brushed on to automobile springs, mixed with lard or tallow for greasing wagons and heavy vehicles, lubricating binders and other farm machinery, as a basis for oil spray, sprinkling on roadway to keep down dust, and so on. But do not use it on leather or for preserving posts. Waste oil from automobiles is also good for the same purposes.

### Cull Out Poor Sows

It will not pay to carry sows through the winter if they are not satisfactory pig raisers. Sows that for any reason are not raising good litters should be fattened and sent to market. Old sows that are past the age of greatest usefulness should be replaced in the breeding herd by good gilts. Blindness, bad udders and sluggish disposition are frequently found with old sows. A sluggish, lazy sow is more apt to injure or kill her pigs.

## DIURETIC STIMULANT TO THE KIDNEYS

Standard for Generations  
Says He Feels Like New Man  
"I can truthfully say that Dodd's Pills have done me more good than any kidney medicine I have ever taken. Am now like a new man. When I commenced taking these pills I was hardly able to walk across the room."  
Robert Flenor, Pine Village, Ind.  
Buy a box today at your drug store, 60c, or the Dodd's Medicine Co., 700 Main St., Buffalo, N. Y.

## FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

## FOR Coughs due to Colds

SUCCESSFUL FOR 60 YEARS  
30c & 90c At all Druggists

## Keep Stomach and Bowels Right

By giving baby the harmless, purely vegetable, infant and children's laxative, MRS. WINSLOW'S SYRUP brings soothing, gratifying results in making baby's stomach digest food and bowels move as they should at feeding time. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. Safe and satisfactory.  
At All Druggists

## Glow of virile Health

is in every drop of FORCE TONIC. It recharges the body with new energy, new strength, new endurance. At all druggists.  
FORCE TONIC  
"It Makes For Strength"

## Test of Spiritualism

A delicate instrument has been invented by Prof. Harry Price, director of the National Laboratory of Psychological Research in London, to establish definitely whether alleged spirits of dead persons do actually speak from space, as is contended by spiritualists at seances. Scientists are eagerly awaiting the first trial of the new machine.

## DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 20 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.

## The Truth

"Are you the defendant?"  
"No, I've got a lawyer. The guy who stole the car."

Success never comes to a man who is afraid to face failure.

Tact and talk are seldom friends.

## Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take ELIXIR MENTHA PEPIN FOR DISTRESSED STOMACHS or MONEY GLADLY REFUNDED.

You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your life is going to stop beating. Your stomach may be so cramped that your breathing is short and quick. You are dizzy and pray for relief—what's to be done?

Just one tablespoonful of DARE'S Mentha Pepsin and speedily the gas disappears, the pressing on the breast ceases and you can breathe deep and naturally.

Oh! What blessed relief! But why not get rid of such attacks altogether? Why have them at all? Especially when your Druggist anywhere guarantees DARE'S Mentha Pepsin, a pleasant elixir, to help you of money back.

## Children's Colds

Safely and quickly relieved—the exclusive LUDEN'S menthol blend is soothing—beating—and does not upset the stomach. Children love the taste.

MONARCH LEANS THE BARBER TRADE—The barber's shaver and embraces every phase of the profession. Best equipped and most modern barber saloons in the world. No more shaving or grooming can be treated with such a fine time of money. The Wisconsin Barber College, 381 3rd St., Milwaukee, Wis.

WE PAY YOU CASH for gold bridges, watch and jewelry, diamonds, discarded jewelry, and goods in WILLY'S GOLD BUYING CO., 415 1/2 Ave., New York City.

### As to Effeminacy

Ideas of what constitute effeminacy are purely a matter of geography, according to Frederick Thieler in an article in Liberty. "Chinese women wear long trousers that fit tightly around the waist and hips," he points out. "So do sailors in the American navy. Therefore, it is evident that a Chinese woman so dressed, observing the toughest tar of the battle fleet, would consider said tar effeminate and beneath the notice of a woman."

### Attention, Middle-Aged Women!

Fort Wayne, Ind.—"Dr. Pierce's medicines were a life saver to me at middle age. When I reached that period it seemed that I had all the ailments and distress that can come to a woman. My nerves gave way, I was so weak that some days I was not able to be on my feet at all. I had hot flashes, dizzy spells, backache and pains thru my sides. I was a complete physical wreck when I began taking Dr. Pierce's Favorite Prescription and Golden Medical Discovery. These medicines soon ended the suffering and distress and brought me thru this critical period a strong healthy woman."—Mrs. Ida Jackson, 421 1/2 Baker St.

All dealers. Tablets or liquid.

### New Skyscraper Idea

A 100-story skyscraper is being planned in New York city. Certain features of the steel design are being patented, notably a method of connecting each column to the girders in such a way as to make the building rigid and proof against swaying in a gale more than many other buildings of half the height. Heretofore most skyscrapers have relied solely on wind bracing in the side walls.

Wisdom is to the soul what health is to the body.—La Rochefoucauld.

## No Cold

Fever headache or gripe

Colds break in a day for the millions who use Hill's. Headache and fever stop. La Gripe is checked. All in a way so reliable that druggists guarantee results. Colds are too important to treat in lesser ways.

Be Sure It's HILL'S Price 30c  
CASCARA QUININE  
Get Red Box with portrait

### Need Only Say Anthracite

Anthracite is all that should be said when speaking of that kind of coal. The word comes directly from the Greek "anthrax," which means coal. Anthracite means "hard coal." To say "anthracite coal" is tautological. But businessmen require the word coal after it as it is only an adjective where anthracite is a noun. To avoid trouble and wrong usage many people say "hard" and "soft" coal.

## The KITCHEN CABINET

(By 1277, Western Newspaper Union.)

Are these the choice dishes the doctor has sent us?  
Is this the great poet whose works so content us?  
This Goldsmith's fine feast, who has written fine books?  
Heaven sends us wood meat, but the devil sends cooks.  
—David Garrick.

### EVERYDAY GOOD THINGS

A good, nourishing soup, served with croutons or crackers makes a good meal in itself.

**Bisque of Chicken.**—Cook a large chicken with three or four stalks of celery and an onion chopped fine and water to cover. When the meat slips from the bones skim the soup, remove the bones and chop very fine. Return to the heat and add the meat to the soup, thicken with a tablespoonful each of butter and flour cooked together, add a cupful of milk, a pinch of soda, a tablespoonful of minced parsley and a cupful of cracker crumbs. Bring to the boiling point and serve.

**Pea Chowder.**—Soak overnight one cupful of split peas. In the morning drain, cover with cold water, add a pinch of soda and simmer for three hours. Fry brown with one onion and a slice of fat pork. Add the drained peas, one can of corn and a cupful of milk. Simmer for half an hour, season with salt, pepper and melted butter, serve very hot with split toasted crackers.

**Salmon Salad.**—Mix one and one-half cupfuls of flaked salmon with one-half cupful of celery, two tablespoonfuls of chopped green peppers, one small onion chopped, salt and pepper to taste. Peel two tomatoes and cut them into dice and mix with the salad, or cut into quarters and use as a garnish. Arrange on a bed of lettuce and serve with mayonnaise dressing.

**Eggless Butterless Milkless Cake.**—Boil together one cupful each of sugar and water, two cupfuls of raisins, one-eighth of a grated nutmeg, one teaspoonful of cloves, a pinch of salt and one-half cupful of lard. When cool add two cupfuls of flour, one cupful of molasses, one-half teaspoonful of baking powder and one teaspoonful of soda dissolved in a little water. Beat well and bake in a sheet.

**Seasonable Foods**  
This is the season of the year when we enjoy a mince pie and plum pudding occasionally.

**Mince Meat.**—Take four pounds of lean beef, two pounds of suet, finely chop the cooked meat and take double the measure of fresh chopped apples, three quinces or an equal amount of pineapple, four pounds of brown sugar, two quarts of cider, four pounds of seeded raisins, three pounds of currants, one-half pound of citron finely cut, one tablespoonful of mace, the same of cinnamon and clove, two grated nutmegs. Mix all together with the suet finely chopped, season with salt to taste and cook all together for one and one-half hours. Bake with two crusts. This mince meat if canned hot will keep a year.

**Olive Salad.**—Line a salad bowl with crisp head of lettuce, cut one boiled beet and one potato into dice, chop one small cucumber and two hard-boiled eggs very fine, stone and chop twenty-four green olives. Pound to a paste two anchovies, dust with a teaspoonful of salt, pepper to taste, sprinkle lightly with four tablespoonfuls of orange juice. Pour over a French dressing, using four tablespoonfuls of oil to one of vinegar, adding salt, red pepper, onion juice and a pinch of mustard.

**Chili Con Carni.**—Cut two pounds of round steak into cubes. Melt two tablespoonfuls of butter and when hot add the steak, fry brown, then add one cupful of boiling water and four tablespoonfuls of rice. Cook until tender, add three canned red peppers cut into bits, one cupful of cooked beans, two parboiled onions, cut into pieces, one tablespoonful of flour, four cloves, one clove of garlic chopped, a teaspoonful of salt, and cook until the gravy is of the right consistency. Serve garnished with parsley.

**Smoked Tongue.**—Wash a beef tongue and soak over night. In the morning put to cook in a kettle of cold water, simmer gently for four hours, or until perfectly tender, adding more water if needed. When the tongue is cold remove the skin. Serve as a hot dish on a hot platter with the foot-end covered with parsley. What is left may be reheated in any well seasoned sauce or served sliced cold.

**Raisin Sandwiches.**—Stew raisins in a little orange juice until plump. Put aside to chill. Spread graham crackers with butter and cover with the raisins mixed with a little cream and maple sugar. Cover with another cracker and serve the sandwiches with a cup of tea.

When making lemonade save the lemon cups for various things. Kept in cold water they will keep fresh for several days.

### Nellie Maxwell

**Great Engineering Feat**  
In Los Angeles it was necessary to move a 60-ton bridge to make way for another structure. The bridge is one of the main traffic arteries, and so it was jacked up and put on rails. It was moved while traffic continued over it.

### Freed From Jury Service

Special laws in many states exempt from jury service lawyers, physicians, clergymen, teachers, policemen, firemen, soldiers and railroad employees.

### Geysers Found Only in Volcanic Regions

Iceland's chief boast is the original geyser. Geyser, which means "rushing," is an Icelandic word that has been adopted by all the world. Saxo, a Danish writer of the Twelfth century, made first mention of this hot spring, but it was not until the Nineteenth century that Bunsen, the German chemist, explained the action of such springs, after a visit to Iceland. There are geysers in most volcanic regions— notably in Yellowstone and New Zealand. Some of the American geysers spout as high as 250 feet. The original Iceland geyser is erratic; sometimes it will blow to a height of 150 feet, but ordinarily only 30 or 40 feet, and sometimes it gets peevish and will not show off before visitors. Geysers are caused by water coming in contact with hot rock underground under such conditions that steam is formed and the water is ejected.—Fathfinder Magazine.

### Star as Symbol

A large electrically lighted star burned nightly from Christmas until New Year's on top of the National cathedral at Washington. The star is 347 feet above the city, as high over the Potomac as the top of the Washington monument, counting the height of the apex and the height of Mount St. Alban, site of the cathedral.

### "Dandelion Butter Color"

A harmless vegetable butter color used by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 35 cents.—Adv.

In 1800, Robert Fulton invented a submarine boat which he demonstrated to Napoleon.

### Why Suffer Pain

From a cut or burn? Cole's Carbolic Soap stops pain instantly and heals quickly without a scar. Keep handy. All drug stores, 30c and 60c, or J. W. Cole Co., Rockford, Ill.—Advertisement.

Generally speaking, there is more wit than talent in this world.—De Rivarol.

## CORNS

### Ends pain at once!

In one minute pain from corns is ended. Dr. Scholl's Zino-pads do this safely by removing the cause—pressing and rubbing of shoes. They are thin, medicated, antiseptic, healing. At all drug and shoe stores. Cost but a trifle.

Folks!—This Remnant Sale offers extraordinary low prices, wonderful bargains and you will be well paid purchasing at this time.

## Pick Bros. Co.,

West Bend, Wisconsin

### \$500 IN DEBT— AND A BIG SUCCESS!

WHAT do you know of Timber Lake in South Dakota? William Chapel must likely didn't know much more about it than you do, when he went there from Minnesota. See how good he says of it today: "It is an opportunity to make five dollars in one dollar where I came from. Milk production here is the best paying business on the farm." He has 350 acres under plow—and owns them! Grows wheat, oats, corn, millet, potatoes. Raises hogs, cows, sheep, chickens and turkeys. In his garden he has everything he needs. "We have daily mail service," says Mr. Chapel, "good markets, roads, schools, churches and neighbors. Water is the finest to be had, and at small expense. Lignite coal can be had within a few miles, and is all the fire we use." If you want to know more about South Dakota, North Dakota or Montana, and the fine opportunities for industrial farmers, write Mr. H. P. Hunter, Agricultural Agent, C. M. & St. P. Ry., Room 796, Union Station, Chicago, Ill.

### NEW FANE

Miss Lorinda Yeast is on the sick list. We hope for a speedy recovery. Jake Schlosler of Milwaukee visited with his parents, Mr. and Mrs. John Schlosler. Miss Larson of the parochial school spent Thursday with Frank Ehnert and family. Miss Erna Diekmann of West Bend spent Saturday and Sunday with Eleanor Krewald. Mr. and Mrs. Ed. Krewald visited Monday evening with Mr. and Mrs. August Heberer. Mr. and Mrs. Henry Pick spent Friday evening with Mr. and Mrs. Wm. Hess and family. Mr. and Mrs. Otto Backhaus visited Sunday with Mr. and Mrs. Robert Yoost and family. Mr. and Mrs. Walter Bruessel spent Sunday afternoon with Herman Backhaus and family. Mr. and Mrs. Theo. Dworschak called on Mr. and Mrs. C. Fellenz Wednesday afternoon. Mr. and Mrs. Frank Ehnert and son Lester spent Sunday with Theodore Dworschak and family. Miss Elvira Rantman of Myra spent the weekend with her parents, Mr. and Mrs. E. Rantman. Mr. and Mrs. Erwin Kempf and son of Milwaukee spent Sunday with Hy. Moldenbauer and family. Mr. and Mrs. Nic. Laubach and family visited Sunday with Mr. and Mrs. Henry Laatsch and family. Mr. and Mrs. Henry Schultz and family visited Monday evening with Adolph Heberer and family. Mr. and Mrs. Adolph Heberer and family visited Sunday evening with Mr. and Mrs. Henry Moldenbauer and family. Mr. and Mrs. Frank Ehnert and son Glenway visited with Mrs. John Heberer at Plymouth Wednesday, who was operated for gallstone. Mr. and Mrs. Erwin Koch, daughter Janice and Audrey, Mrs. George Koerble of Kewaskum spent Sunday evening with Wm. Hess and family.

PARK AT WIDMEYER PARKING, FILLING AND GREASING STATION 424-426 Sycamore St. MILWAUKEE, WIS.

Paul Rosenthal and Robert Krautkramer delivered cheese to Adell on Tuesday. Mrs. F. Schroeter and daughter visited Sunday afternoon with Mrs. E. Glass and family. Mr. and Mrs. M. Krahn visited Sunday afternoon with Mr. and Mrs. M. Stahl and daughter. Mr. and Mrs. Ray Krahn were entertained at dinner at the home of Mr. and Mrs. John Held Sunday. Rev. K. Kerone will deliver an English sermon at 10 a. m. Sunday, Feb. 13, in the St. John's Ev. church here.

### BIG SALE OF FOX SKINS FIRST DAY

According to dispatches from New York City, the first day of the annual fur sale resulted in the disposal of \$500,000 of silver fox furs raised on the Ozaukee county farms of Fromm Bros. & Nieman Co. The highest price received was \$445.00 and the lowest \$22.50. The local company has over a million dollars worth of skins at the New York sale, and the unprecedented sale the first day was more than gratifying to the breeders.—Cedarburg News.

—William E. Backus returned home Monday from a two weeks' stay at Spring Grove, Ill., where he sold a carload of cattle, which he purchased at Rush Lake, Minn.

## Buick owners enjoy the savings of leadership

In purchase price and daily use, Buick owners profit by the savings of leadership.

The price of a Buick is moderate, but it buys a car built to the very finest quality ideals—one that would cost you considerably more, if it were not for Buick volume.

For years, the savings provided by great volume have been devoted to the enrichment of Buick value.

And for years, Buick owners have had a more dependable motor car—one in which high quality lessens upkeep expense.

Buy a Buick! It is an investment in economy and satisfaction.

THE GREATEST BUICK EVER BUILT WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM

Among other dates of auctions he has booked are: Feb. 19, at Plymouth; Feb. 21, at Frank Kudek farm, town of Kewaskum; March 10, at the Geo. Herman farm in the town of Theresa; March 12, at the Aug. Kirchner farm in the town of Wayne.

SAYS:  
"See Mrs. K. Endlich's add elsewhere in this paper."  
"SPARKLES"

—Conrad and Andrew Simon of St. Kilian arrived here Wednesday at the home of their aunt Clara Simon, after a two weeks' visit with their uncle and aunt, Mr. and Mrs. Eisenbacher in Wesley, Iowa where they own a 360 acre farm. They state that the land there is very level and easy to work.

—The following spent Sunday afternoon and evening with Mr. and Mrs. Jack Fellenz and family: Mrs. J. Janssen and daughter Helen, Mr. and Mrs. Peter Fellenz and family of Beechwood, Mr. and Mrs. Steve Klein and son Anton and daughter Lorraine, Walter Backus, Elmer Stange and Edna Stange.

—About 175 relatives and friends surprised Mr. and Mrs. Heman Salsin of Elmore last Friday evening in honor of their 27th wedding anniversary, in Gaff's hall, Elmore. At midnight lunch was served by Mrs. Mildred Sabish, Sella Weise, Olive Busch and Marcella Matthieu, after which dancing was again enjoyed until the early hours of the morning. All present wished the couple continued health and happiness so they may live to celebrate their golden wedding twenty-five years hence. A large number from Ashford, St. Kilian and Campbellsport were in attendance. Music was furnished by Fell's orchestra of Ashford.

—Eight prominent and well known businessmen in company with their wives of West Bend enjoyed a sumptuous seven-o'clock mutton dinner at the Republican House on Wednesday evening. The event was in the form of a Valentine party. The dining room table at the hotel was appropriately and artistically decorated in honor of the occasion. The party consisted of a jolly group, who were well pleased with the delicious meal accorded them. Before departing for their homes, they expressed thanks and appreciation to Mr. and Mrs. William F. Schultz, for the kind hospitality extended to them and the delicious meal they had the pleasure of partaking of.

**JAN. REPORT OF KEWASKUM-FARMINGTON COW TESTING ASSOCIATION**

In the month of January 238 cows were tested, 75 cows produced over 40 pounds of butter fat, 25 cows over 50 pounds and over 60 pounds. The honor for high herd for the month goes to Ed. Krautkramer, Kewaskum. His herd of 10 grade Holsteins averaged 1294 pounds of milk and 44.6 pounds of butter fat. The second high herd is owned by Frank Bruesewitz. His herd of 11 grade Holsteins averaged 883 pounds of milk and 35.6 pounds butter fat. The third high herd is owned by Henry J. Pieper. His herd of 17 registered Holsteins averaged 30.3 pounds of butter fat. The owners of 40 pound cows are as follows: Albert Heisler 7, Ed. Krautkramer 8, Louis Oppenorth 5, Frank Bruesewitz 6, William Gruble, Conrad Bier, Henry J. Pieper each 5, Otto Diekmann 1, Carmen Hammen, Carl Voigt each 3; Walter Liepert, And. Rodenkirch, Christ Schoofs, Carl Aurig each 2; August Bruesewitz, Joe Schoofs each 1; Louis Foerster, Herman Welland, L. F. Rosenheimer each 3; Fred Backhaus 2, Chas. Backhaus 1. The association averaged (including dry cows) 24.5 pounds butter fat per cow.

**MAYVILLE BREWERY RAIDED**

Federal agents raided an alleged still at Mayville Tuesday and the confiscation of large quantities of materials and implements which the agents believed had been used in the manufacture of illegal beer.

Four men two of them Mayville residents, were arraigned before United States Court Commissioner H. L. Kalllogg in the Federal building, Milwaukee, on Wednesday.

Milo Grabow and Harold Wendt, Mayville young men, and Walter Pfeil of Milwaukee were taken into custody by the federal agents when they drove up to the brewery in a truck from Milwaukee shortly before noon Tuesday. The fourth man was Clarence Wall, Granville.

It is reported that the federal squad confiscated 40 barrels of malt, a vat of beer which they claimed was illegal, a large copper cooling device, a number of motors and eight storage tanks with a 1,000-barrel capacity. The brewery raided is owned by Henry Steger of Mayville but was leased to a Milwaukee syndicate last summer, it is said.

**WEST WAYNE**  
Misses Sylvia and Elvira Coulter visited Sunday evening at the Arthur Ruppinger home.  
Mr. and Mrs. Geo. Kreiser and family of Lomira visited last Sunday at the Dave Coulter home.

# The Leading Lady

By GERALDINE BONNER

## STORY FROM THE START

While dependent over the entrance of her fiancée, Jim...  
"That's just what we want to know here were you?"  
"Sitting out on the balcony."  
"See anybody?"  
"No, I've been looking about. I went down the path to the pine grove and around the house but I didn't see a soul."  
"Why, who could it be?" said Anne.  
"Who, who?—she looked over the railing again—'No, were not all here, 'who outside?'"  
"Mrs. Stokes is." Shiloh spoke up.  
"I saw her walking along the ocean bluff as I came up from the point."  
"Shiloh is, Mrs. Cornell added.  
"She went out just a few minutes ago. I saw her from my window."  
"It can't be either of them," Basset's exclamation had given place to a look of intense interest.  
"I don't understand. Nobody could have come over here without being seen. I saw a woman from outside stopped him. It was a cry in a woman's voice."  
"What's that?" someone said, and before an answer could come, the cry was again—a high wailing scream, the words:  
"Shiloh! Shiloh! Shiloh's dead—dead—dead!"  
A clamorous mingling of voices rose from the group, combined in a single wailing note of horror. The men looked for the entrance and met Flora Stokes. She burst in between them, white as the ghost of Caesar, with her hands outstretched in a gesture of appeal.  
"Shiloh's murdered—dead—shot," each word was projected in a screaming gasp.  
Basset shouted at her, "Where?"  
And she waved an arm toward the balcony.  
"There—from the Point. She's gone there! She went over into the water, on the top of the cliff. She's murdered—dead—murdered!"  
As if she were dead, too, and of no consequence, they fled past her, a line of people streaming out into the terrace, excitedly conferring together. Only Anne stayed, her face as if overlaid by a coating of the white dust.  
She went to Flora and looked at her by the arm.  
"What was it?" she whispered.  
"I don't know. I don't know. I don't know." Anne ran after the others.

## CHAPTER IV—Continued

to that part of the path which faced the Point. A hollow intervened, extending to the water's edge in a mass of shelving rock. Across this hollow she saw Sybil appear on the end of the Point, coming up from the opposite side, and almost immediately heard the shot. Sybil had thrown up her arms, staggered forward and gone over the bluff. It all happened in a flash and Flora, though describing herself as dazed, had run down the path into the hollow and out on the rocks thinking she could catch her. But she saw the body go swirling by—far out of her reach, caught and borne along in the current. She had watched it, stunned, then had come to her senses and staggered back to the shore—and ran to the house. On the way there she had seen no one and heard nothing.  
Basset left her and went to the library to call up Forestville, the county seat. It was the starting point for hunting parties to New Brunswick, and Basset, a sportsman in his leisure hours, had stayed there several times assembling his guides and gear. On his last trip, two years ago, trouble with a guide had brought him in contact with the sheriff, Abel Williams. Over legal wrangling they had struck up a friendship and he remembered Williams as a man of some capacity, straight and fair-minded. If he was still in office it would simplify matters; to start out with confidence in the director would be a vital gain. He waited, the receiver against his ear, a foot drumming on the carpet, then a deep and growling voice hummed along the wire. It was Abel Williams.  
Williams would be down as soon as he could, with Mr. Rawson, the district attorney—an hour and a half to two hours, the roads being bad. The shore people had been told it was an accident—that's all right, couldn't hold an inquest anyway without a body and it was a good thing to keep 'em off. Better not let anything come out till they'd got the situation in hand, easy to fix at that end as the United American Press man was off fishing. They'd do a good deal better if the press was held off for a spell. Seeing where the island was and that there was no one on it but their own crowd, it would be possible to keep things out of the public eye till they had the work well started.  
Basset looked at his watch—nearly eight—probably two hours to wait. The best thing he could do was to get them together and keep them as quiet as he could. As he went down the path his mind collected and marshaled in order the facts he would have to present. They had all been in the house except Stokes on the balcony and Flora walking round the island. Stokes eaten into by a hopeless love, Flora on fire with jealousy and hate—passions that make for murder. "God, what's going to be the end of this?" he groaned to himself.  
He found them in a group near the pine grove, excitedly conferring together. Stokes had just returned with the electric torch and they were preparing to search the ground for footprints. Basset brought their activities to an end and shepherded them to the house. With dragging feet and lowered heads they trailed up the path and filed into the living room.  
Here, under the radiance of the lights, they looked at one another as if expecting to see startling changes and fell groaning into chairs, or sat, stiff and upright, with rigid muscles. Basset told them when the authorities might be expected and as the hour drew near, dread of the drama in which they found themselves stilled their tongues. The sea breeze, freighted with the acrid odors of uncovered mud and seaweed, blew through the room. Basset rose and closed the garden door, and eyes shifted to him, hung on his hand as it slid the bolt.  
He crossed to where Anne was sitting by the entrance. She had her back to the room and was looking out at the lights of Hayworth dotting the shore. He stood behind her chair and put his hand on her shoulder. Her fingers stole up and rested on his, icy cold. He bent till his head was close to hers and whispered:  
"Be up. Thank God this can't touch you in any way."  
Her fingers pressed an answer but she said nothing.  
Shine came toward them: "Those fellows were lucky who got off this afternoon. I might have gone with them if I'd had the sense."  
Anne answered this time:  
"Yes, they were more fortunate than we are."  
Mrs. Cornell, between sobs, spoke up:  
"But even if we were here they can't suspect us. We've got alibis, we're all accounted for. We were all in—"  
She realized where she was going and stopped. There was a portentous silence. Shine almost shouted, pointing out at the channel:  
"The tide's falling fast. They can't get into the dock here. How will they make a landing?"  
Basset answered:  
"In a cove at the upper end of the island. They've a dock there for low water. They have to make a detour that's all."  
Flora, who had been sitting with her hand over her eyes, dropped it and sat erect. Her breath came from her in a loud exhalation that was almost a groan. Every pair of eyes shifted to her, watchful, questioning, apprehensive.  
"Do you feel ill, Flora?" said Basset, moving to her side.  
"No—no," she looked wildly about.  
"But this waiting—it's so awful."  
Miss Pinkney suggested a glass of water, but Flora waved a hand as if pushing it away. Stokes rose and moved to a seat beside her.  
"They'll be here soon now."  
She sank back and closed her eyes. Her husband bent a sinner, sidewise look toward her, then laid his hand on one of hers. Her own turned and the thin fingers twined like clinging roots about his.  
"It won't be hard," he reassured.  
"Just give them a clear account of what you saw."  
She waved the other hand in front of her face, like a person in unendurable pain, who makes a vague distracted gesture for silence.  
Anne spoke from the door:  
"There's a light moving out from the shore."  
The statement shook them. There was a simultaneous stir of feet and bodies, a heave of labored breaths.  
Basset went to the entrance:  
"Yes—that's a launch. They're coming. I must go to meet them."  
He looked over the company, the haggard faces all turned toward him. Some of them wore an expression of yearning appeal as if he was their only source of strength in this devastating hour:  
"Now, remember there's nothing to get scared or rattled about. They'll ask you questions and what you must do is to answer them accurately—not what you think or imagine but what you know. Keep that in the front of your minds. The clearer you are in your statements the quicker you'll get through. And please stay here, just as you are. They'll probably want to see you right off."  
A numbness alike followed his departure. Anne moved from the door to a chair nearer the others. Stokes withdrew his hand from Flora's and straightened himself, jerking down his waistcoat and craning his neck up from his collar. The low rippling murmur of the receding tide were singularly distinct. Suddenly the shrill whistle of a launch pierced the night outside. Mrs. Cornell leaped as if the sound had been a weapon that had stabbed her:  
"Oh!" she cried, "why do they do that? Isn't Sybil being murdered enough to stand?"  
"For God's sake, keep your mouth shut," Stokes flung at her, glaring.  
The savage quality in his voice penetrated Mrs. Cornell's encasing tears. She shrank and slid the look of a frightened animal at Shine. Then the silence settled and they sat like those who have looked upon the head of Medusa.  
(TO BE CONTINUED.)

## Condition of Nerves Cause of Stammering

Almost every movement of our body is due to the involuntary obedience of our muscles to the directing will of the brain. This generally happens with our talking. We will to make certain sounds, and the proper muscles automatically force the wind from the bellows of our lungs here and there, against the roof of the mouth, through the teeth, and so on.  
It sometimes, however, happens that the nervous connection between the brain and the various sets of sound-making muscles is weak or has been damaged by some shock.  
Then the brain must either give its orders very slowly, something like playing an organ with one finger, or it goes faster must risk playing the wrong notes or getting the whole machine so tied up as to make gaps between the movements. In other words, the sufferer stammers and stutters more so when he is excited and tries to "play" quickly. Nor will he be cured till his nervous system is strengthened and he has educated his speech-muscles to obey him without question.

## Not All Affected Alike

The objects in a room which has been kept at an even temperature of heat will all be the same temperature, although some of them may feel colder than others to the hand or fingers. For instance, the keys of a piano will feel colder than the wood of the piano case. The difference is due to the fact that heat or cold will run through some objects more quickly than through others. When you touch a thing with your fingers you supply some of the heat of your body to the object through your finger. If the object is the tiling on the hearth or the keys of the piano the heat runs through it quickly and you get a cold impression in your finger. On the other hand, you will get a warm feeling when touching upholstery or wood because the heat runs more slowly through them.

## Earn Penny a Day

One cent a day represents the average income for the majority of working people in the country districts of India.

## Lavish Giver

For his bounty there was no winter in it; an autumn tawd that grew the more by reaping.—Shakespeare.

## Electric Motors are Manufactured in this Country at the Rate of About 1,000,000 a Month

Electric motors are manufactured in this country at the rate of about 1,000,000 a month.

## Return of Two Prodigal Stars

The past season witnessed the return of the two prodigal athletes, Babe Ruth and Grover Alexander, to much fame and money.  
Ruth and Alexander had been the "Peck's Bad Boys" of baseball. The Babe didn't take his baseball very seriously in 1925. Alex didn't take his any different until the season of 1926 was well on the way.  
Last winter Babe saw the error of his ways and settled down to business. The result, one of his best years, climaxed by a record-breaking performance in the world series.  
Once more he is baseball's greatest hero.  
Alexander, after being cut loose by Chicago because of a laxity in training, so the report said, turned over a new leaf and pitched St. Louis to a pennant and world series.  
The bad boys were simply very good.

## Modern Football Needs More Than Mere Tonnage

Many are the old football players who resent the basket ball tactics of modern football and who loudly extol the virtues of the old bone-crushing game. They imply that football is not the he-man game it used to be, and point triumphantly to the greater number of injuries which now occur during an encounter, with the explanation that the modern player is soft, writes Charles C. Buell, former Harvard captain in The Sportsman. Isn't it just possible that the very openness of modern football is the cause of these injuries? The old, crushing, head-on tackles of former years and of the present day rarely result in more than a few scars and bruises. The open-field tackle, so common today, requires speed and perfect coordination. Seldom is the runner checked or thrown backward. The old urge to hit hard and low is still very much in evidence, but it must be tempered with accuracy if the runner is to be brought down. The open-field ball carrier comes to the tackle, he comes hard, and it is only natural that minor injuries occasionally develop.  
"Glorified basket ball" is the term often used by the old "die hards," when referring to modern football. Let them play or teach others to play it. Experience is a great teacher and they will find that it takes both skill and nerve to throw a forward pass in the face of a fierce incoming line. They will discover that it requires a deftness of hand, quickness of eye, and rare courage to jump for a pass and catch it when there is a determined defensive back at one's shoulder. They will find that modern offensive and defensive line play require speed, agility, and football intuition in addition to mere tonnage.

## Two Practical Plans for Making a Hockey Stick

If you need an ice hockey stick, there are two ways to make it. The first is to bend the wood into shape, the other is to select a piece of wood that is already bent.  
Making the sharp bend is not easy with the equipment of the average home workshop, but you can have this done at a local mill, where they have facilities for bending wood, and making it stay bent. The rest of the shaping and finishing will be no trick at all.  
The other method: A tree branch is selected, elm preferred, that has the correct bend to it; this is first roughly hewed to shape with an ax, then finished to the form with spoke-shave or draw-knife, plane, file and sandpaper. After sanding smooth, a coat of shellac should be applied.—The American Boy Magazine.

## Swedish Star Arrives

Edwin Wide, the Swedish running star, and the man who has been known as "The Swedish Star" in the same manner as Nurm, is now training here for coming meets.  
Wide runs in the same manner as Nurm, vertically, with plenty of wide arm action to allow proper breathing. He expects to beat quite a few of the marks set up by Nurm in this country.

## Elect Sophomore Captain

H. L. Hoak, '29, will captain the Iowa State college cross-country team during the 1927 season. This is one of the very few instances in the history of Iowa State athletics where a sophomore has been chosen to captain the team. Hoak has just earned his letter for his first year of running for the Cardinal and Gold, although he has developed into the best of the younger barriers. Great things are expected of Hoak in the next few years that he is at college.

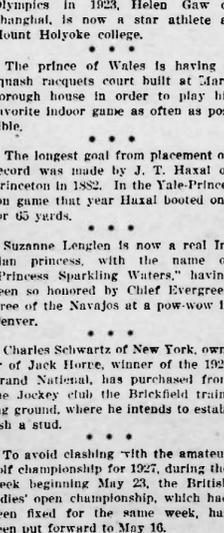

## Gained 47 Pounds in Football Game

In a game played on a muddy field, Frank Pauly, giant guard of the Washington and Jefferson eleven, went in weighing 250 pounds. Withdrawn after the third period and coated from head to foot with mud, he stepped on the scale in the dressing room and weighed 303 pounds.

## Sport Notes

There are seven golf courses in Japan.  
Great Britain has 900 hockey clubs affiliated in one national organization.  
The Penn Athletic club in Philadelphia has an 18-hole indoor golf links.  
University of Dayton (Ohio) had seven Hawaiians connected with its football team.  
The completion of two new golf courses at Pinehurst will give that section eight full-sized links.  
With a population of nearly 2,000,000, there is only one public golf course in the Boston district.  
A total of \$833,369.78 was collected at the gate for sports at Yale in 1926. Expenses amounted to \$670,201.63.  
No whips, blinkers or spurs will be allowed as equipment on two-year-olds at the Fair Ground race course, in New Orleans.  
K. Smith, a Norwegian ski expert, will instruct the Montreal Ski club members in this delightful form of winter sport.  
A yacht club in the sub-basement is the feature of a 15-story apartment house to be built in the East river district New York city.  
Charts kept during the football season at Michigan State college reveal that twenty-four players gained a total of thirty-three pounds.  
The longest golf drive on record is the one of 450 yards, made by W. S. Caldwell of St. Louis in 1920.  
A member of the Chinese girls' athletic squad in the far eastern Olympics in 1923, Helen Gau of Shanghai, is now a star athlete at Mount Holyoke college.

## Dunne, Harvard Coach

Here is a photograph of J. J. "Duke" Dunne, the former Michigan captain who has been an assistant to Glenn Thistlewaite at Northwestern university the past four years, and who has signed an agreement to become head line coach at Harvard. Harvard tried to secure Dunne's services last year.  
Compete for Gold Mashie  
The dustiest field in history will compete for the fifth annual gold mashie at Newport, R. I. It is announced by T. Saffron Teller, over whose private links the golf tourney will be held August 5, 6 and 7.  
George von Elm, national amateur champion, will lead a fast field of amateur stars which will include Jess Sweetser, Max R. Marston, Francis Outmet and Chick Evans.  
The meet as is customary will be over 72 holes.

## Sande Is Again Leading Jockey

Earle Sande, America's noted jockey, captured 22 stakes races last year ranging from a \$3,000 claiming race to the rich Riggs Memorial handicap, worth \$22,450 and the Fairmount derby, valued at \$24,725, netting his employer \$240,275.  
Alfred Johnson, who rides for Bardley Idle Hour stables, brought his master \$203,610 for the year, although not winning half the stake races that Sande did.  
Sande led Crusader to the tape first in the Cincinnati derby, and "out-smarted" Eric Blind to put Haste in front of Baggenbaggage, a one to two favorite in the Fairmount derby. Astride Haste, he also captured the Withers stakes.

## GETTING START IN BASKET BALL

### Getting Into Action Quick Is Best Plan.

There isn't a "best" way to start on the basket ball floor. Any technique that gets you into action fast is the one to use. Dodging, pivoting, turning, are the things you'll need to work on, writes Mitchell V. Charney in the American Boy Magazine.  
Many fellows find the proper execution of a pivot difficult. It is not so hard, really. What it requires is a firm, well-balanced stance, a good grip on the floor with the shoes, a rapid whirl on one foot that gives you a new facing. There are a dozen kinds of pivots. The legal pivot is the one in which you throw your hips into the hip of an attacker just as you whirl. A three-quarter pivot takes you almost all the way around and lets you pass in the direction you originally faced. Circumstances govern the kind of pivot you'll need, and you can pretty well suit your footwork to the exact case. But practice on footwork.  
There are two kinds of stops, one from a regular running stride which consists of planting the forward foot and throwing the body back—it may be combined readily with a pivot or turn—and another which is effected by a short forward jump bringing both feet down flat, body bent back.  
A "set-up" which gives all-round footwork practice comes in well in training periods. Here is a good one: Put a guard at the foot line and advance an offensive man dribbling at the basket. When this man reaches the guard he may stop, pivot, or fake a pivot and pass to a man trailing him. Another "set-up" has a guard to cover a man dribbling to the side line; there the man may either execute a pivot or pass to a trailer.  
Every branch of offense depends on every other branch, and a player can't be at his best in shooting if he's below his best in passing, or footwork, or dribbling. That's why personal per cent has to be developed all-round—why you won't be of most offensive value to your team unless your own personal per cent in each branch is up just about as high as you can possibly bring it.  
So work on all. But don't think that, because you've developed offensive ability, you're necessarily all you'll need to be.  
Last year Coach Louis G. Wilke, down in Bartlesville, Okla., had nothing but small men for his high school team. Pretty good small men, some of them—fighting and hard-working. But Billy Julian and Buddy Foster, the two first string forwards, had serious defensive weaknesses, and probably, if Coach Wilke had had capable substitutes at the start of the season, he'd not have used Julian and Foster. The difficulty with these two men was that they had a habit of rushing their opponents on defense. When they saw a man on the other side charging their way with the ball, they lunged out toward him at a terrific rate—and frequently saw the opponent dribble or dodge past safely.

## Clean Kidneys By Drinking Lots of Water

Take Salts to Flush Kidneys if Bladder Bothers or Back Hurts

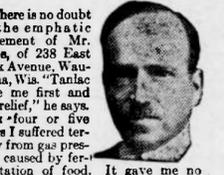

Eating too much rich food may produce kidney trouble in some form, says a well-known authority, because the acids created excite the kidneys. Then they become overworked, get sluggish, clog up and cause all sorts of distress, particularly backache and misery in the kidney region, rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.  
The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, begin drinking lots of good water and also get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush clogged kidneys and stimulate them to activity; also to neutralize the acids in the system so that they no longer irritate, thus often relieving bladder disorders.  
Jad Salts can not injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help keep the kidneys and urinary organs clean, thus often avoiding serious kidney disorders.

## Not a Mechanical Ailment

Recently, a rather nervous young man entered a downtown typewriter establishment. When asked by the office girl what he desired, he replied, "There's something wrong with my typewriter, and I wish you would send someone over to fix it." The girl called the service manager who inquired as to what the trouble might be so the repair man would have an idea as to what to look for.  
With an earnest look on his face, the young man replied, "I am not sure, sir, but it doesn't seem to spell right."  
Agreed With Her  
She—Jack, I love you because you're the sweetest, handsomest, most fascinating man in the world.  
He—And I love you, dearest, because you are so frank and truthful.—Boston Transcript.  
Woman indeed was born of delay itself.—Plautus.  
Patience reaches its noble climax in dressing a small and wigging boy.

## "I Was on the Rocks," Says Waukesha Man

Stomach trouble of over four years' standing, undermined health of Benj. F. Neha. Tanlac gave him 100% relief. Now in fine shape, recommends Tanlac from personal experience.  
There is no doubt in the emphatic statement of Mr. Neha, of 238 East Park Avenue, Waukesha, Wis., "Tanlac gave me first and full relief," he says.  
"For four or five years I suffered terribly from gas pressure caused by fermentation of food. It gave me no peace, but undermined my health and had me on the rocks. Often have I set down to read, only to jump up from the chair owing to pain and pressure of gas about my heart.  
"Today at 55, I enjoy the best health I've had since my early youth. I have no hesitation in saying that Tanlac and Tanlac alone is responsible for my present splendid health. It gave me 100% relief from all those distressing symptoms, and I heartily recommend it."  
Tanlac is nature's own remedy, made from roots, herbs and herbs. If your health is low get a trial bottle of Tanlac from your druggist today. Over 62 million bottles already sold.

## Whooping Cough Relieved

This dread cough is one of the most dangerous of children's diseases. There is no cure for whooping cough. It usually runs its course but few drops of this well known physical relief will relieve the violent coughing paroxysms, and avoid vomiting. No dangerous "dosing"—nothing to upset little stomachs. Glaxo also brings quick relief from whooping cough, colds, and croup.  
DR. DRAKE'S GLESCO CROUP REMEDY  
MOTHER GRAY'S POWDERS BENEFIT MANY CHILDREN  
Thousands of mothers have found Mother Gray's Sweet Powders an excellent remedy for children complaining of Headaches, Colds, Feverishness, Worms, Stomach Troubles and other irregularities from which children suffer these days and excellent results are accomplished by its use. They break up colds and regulate the bowels. Each one recommended by Mothers for over 40 years. Sold by Druggists everywhere. Trial package FREE. Address, Mother Gray Co., Le Roy, N. Y.

## PARKER'S HAIR BALSAM

Removes Dandruff, Stops Hair Falling, Restores Color and Beauty to Gray and Faded Hair. For Men and Women. Sold by Druggists.  
HINDERCORNS Remove Corns, Calluses, etc., ease all pain, soothe comfort to the feet, makes walking easy. Use by mail or at Drug Store. Hilaux Chemical Works, Patheque, N. Y.
