

IS A HEALTHIER STRONGER GIRL

Because She Took Lydia E. Pinkham's Vegetable Compound

The fertile valleys of Oregon help to supply the tables of America. This is possible through the magic of the humble tin can. In one of the canning establishments, Julia Schmidt was employed. It was complicated work because she did sealing and other parts of the work. It was strenuous work and she was not a strong girl. Often she forced herself to work when she was hardly able to sit at her machine. At times she would have to stay at home for she was so weak she could hardly walk. For five years she was in this weakened condition. She tried various medicines. At last, a friend of hers spoke of Lydia E. Pinkham's Vegetable Compound and she gave it a trial.

"Everyone says I am a healthier and stronger girl," she writes. "I am recommending the Vegetable Compound to all my friends who tell me how they suffer and I am willing to answer letters from women asking about it." Julia Schmidt's address is 113 Willow St., Silverton, Oregon.

Girls who work in factories know just how Miss Schmidt felt. Perhaps they, too, will find better health by taking the Vegetable Compound.

Babies Love Mrs. Winslow's Syrup
The infants' and children's regulator. Pleasant to give—pleasant to take. Guaranteed purely vegetable and absolutely harmless. It quickly cures colic, diarrhea, flatulency and other like disorders. The open published formula appears on every label. *M.A. King, Distributor*

Taxi's Classification
Mary, four years old, seems to have been around a little. Some folks had called and had taken her and her mother to a party in another part of the city. The way was jolly, bumpy and bad. So thought Mary. Any strange auto had just one classification for her. As they started to return home the erstwhile innocent four-year-old piped up with: "Mother, do we have to go back in that d—n taxi?"

Bible Is Being Read More
The old hiding place isn't dependable any more, wives are warned. A Los Angeles man, turning the leaves of a Bible, found a \$5 bill.

Always Busy
Gregg—What does your wife talk about?
Hanks—About all the time.

Chance is a word void of sense; nothing can exist without a cause.—Voltaire.

A farmer can make grass grow; and he doesn't understand why city folks can't.

The soul never grows old.—Longfellow.

CORNS
Ends pain at once!
In one minute pain from corns is ended. Dr. Scholl's Zino-pads do this safely by removing the cause—pressing and rubbing of shoes. They are thin, medicated, antiseptic, healing. At all drug and shoe stores. Cost but a trifle.

Dr. Scholl's Zino-pads
Put one on—the pain is gone!

FRECKLES
can be removed. For real satisfaction use Dr. C. H. Berry Co's Freckle Ointment. It does the work. Ask your dealer or by mail prepaid. \$1.25 and 65c.

"Wild Boy" Beyond Reach of Science

The recent discoveries of children supposed to have lived their lives among animals, and who consequently developed animal habits, add interest to the "Peter the Wild Boy" exhibit at Berkhamstead School museum, although there is no reason to suppose Peter was a wolf-child.

Peter was found in 1725 in the woods near Hamelin, in Hanover, where he had subsisted on the bark of trees, leaves, and berries for an unknown period. When found he was apparently about twelve years old. A year later he was brought to England, but even under skilled tuition he was incapable of receiving any instruction, and never developed the faculty of speech.

He died in 1785, at Arter's End farm at North Cross, where he lived since his arrival in England, and on a brass plate in the church is a sketch of his head drawn from an engraving by Bartolozzi.—London Tit-Bits.

Preachers' Pay Raised

Every clergyman in Rhodesia is to have his annual allowance raised. The minimum pay is to be \$1,000 a year. This will be for bachelors, while a married man will be allowed \$500 additional for maintenance of his wife and \$150 for each of his children. These innovations were decided upon at the recent diocesan synod held at Salisbury. During the discussion the bishop of southern Rhodesia, who presided, asked: "If these attractive conditions, which I wholeheartedly endorse, come into force, what guarantee have you that all the bachelor clergy in the diocese will not be married by this time next year?" None could answer, but the step was voted.

"BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

- Colds
- Headache
- Neuritis
- Lumbago
- Toothache
- Rheumatism
- Neuralgia
- Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Drug stores also sell bottles of 24 and 100.

Elevator for Mount Blanc
Mount Blanc, Europe's tallest mountain, will soon be "climbed" by elevator. The cableway, with a car similar to a hotel elevator and carrying from 50 to 70 people, will soon be in operation from Chamoinix to the summit of Alpe de la Midi. The ascent may be made in two hours and without guides. Construction of the elevator cableway was started 11 years ago, but was interrupted by the war.

Defining Them
"Pa," asked little Lester Livermore, "what is an optimist?"
"An optimist, my son," replied sage Mr. Livermore, "is a man who lends his umbrella to a pessimist."
"And what is a pessimist, pa?"
"The same man after he has lent his umbrella."—Kansas City Star.

New Air Vehicle
An aerial bicycle consisting of a cigar-shaped balloon filled with hydrogen, below which is suspended an aluminum framework resembling a bicycle with handlebars and pedals that will work the propeller, has been invented in England.

Sweet as Usual
A scientific expert says that fish kill mosquitoes. But who wants to keep a fish on his hip when he's reading on the piazza?—Boston Transcript.

A deed has been drawn in Bangor, Maine, for a parcel of land with a street frontage of five inches and a depth of 100 feet.

Control Disease of Cucumbers

Eliminate Agencies by Which Destructive Ailment Is Wintered.

(Prepared by the United States Department of Agriculture.)

The most effective means of controlling the mosaic disease of cucumbers, according to the United States Department of Agriculture, consists in the elimination of the agencies by which this destructive disease is carried over the winter.

The cause of the disease is unknown, but diseased plants contain a form of infection which may be transmitted to healthy plants by such insects as the melon aphid and the striped cucumber beetle. The disease does not live in the soil and is not carried in the seed of the cultivated cucurbits, but is known to live from year to year in certain wild plants, some of which occur in most of the cucumber-growing sections.

Wild Plants Carry Disease.
The known wild plants which carry the disease are the wild cucumber, milkweed, pokeweed, two species of wild ground cherry, and catnip. The disease is carried over winter in the roots of these plants, except in the case of the wild cucumber which carries the infection in the seed. Insects feeding on these infected wild plants and on the cucumbers in the field spread the mosaic disease. In a number of fields where the average mosaic infection had been approximately 40 per cent, eradication of the wild host plants in and near the fields reduced it to 3 per cent.

Plants Are Dwarfed.
Mosaic cucumber plants are dwarfed, the younger leaves are mottled with green and yellow, and the fruits are mottled and misshapen; the darker areas forming warty projections on the surface. When such plants appear early in the season they should be removed immediately to prevent the plants that flowered first lose many leaves and become hard and woody.

CUTTING AND CURING DETERMINE GRADE OF SOME COMMON HAYS

Leaves Turn Brown if Allowed to Stand Too Long.

Late cutting and improper curing are the most common cause of low grades and low prices of hay, says Prof. L. A. Dalton of the New York State College of Agriculture at Ithaca. The usual difference between No. 2 and No. 3 hay is that No. 3 was allowed to become over-ripe or was cured in such a way that it lost its color and aroma. The time when the common hays should be cut are as follows, according to Professor Dalton: Timothy should be cut when it is in full bloom. If allowed to stand longer the leaves and stems turn brown. If allowed to stand too long many of the leaves turn brown and fall and the stems become woody. Mixtures of clover and timothy should be cut when the clover has reached full bloom. Red clover usually blooms ten days to two weeks earlier than timothy, but if the cutting is delayed until the timothy is in bloom the clover will be over-ripe. Alfalfa should be cut when one-tenth to one-fifth of the crop is in full bloom. If allowed to stand longer

Dusting for Insects Is Popular and Effective
Dusting insects has become so popular, and the dust guns so easy to use and effective, that dust is taking the place of liquid sprays. For ordinary garden use a coarse cloth sack tied to the end of a stout stick is a very effective duster for leaf eaters, but for some of the sucking insects that require a contact poison like nicotine a blower is best, for it will force the dust up under the leaves as well. You can get almost any kind of insecticide now in the powder form. The best time to use is very early in the morning before the dew dries off, or it will be difficult to sprinkle or spray the foliage with water to make the dust stick. There are combination dusts that will serve for both eating and sucking pests, and most gardeners will be wise to use them and use them freely.

Midsummer Sprays Will Check Damage by Moths
Coddling moth worm causes the "stings" on the side of apples. Summer spray for the pest, entomologists report, should be applied about ten days later than usual.

The "stings" are largely caused by the summer brood of the worm. It eats of the poison spray as it works into the skin of the apple, and is killed. The bluish left is the "sting."

Midsummer spraying will check the damage. The number depends in a large part on the number of worms that escaped the early spray. If the first spray was thoroughly applied there will be few worms left to do damage.

Both the worm and the adult moth shun the light and to avoid it they feed on the underside of the leaf. Thorough spraying is not possible from the top of the tank. The operator should circle the tree and spray from the bottom up, as well as from the top down.

vent further spread of the infection by insects. It is also advisable to use insecticides to reduce the number of insects. Where several fields are adjacent to one another it is essential that all growers co-operate in removing the wild host plants about their fields.

Danger Spots in Roads Are Now Clearly Marked

Danger signs in the Minnesota system of yellow-and-black markings on trunk highways, have general meanings conveyed by their shapes in addition to the specific warnings they give. Diamond-shaped signs warn of actual dangers on the road, such as a sharp turn. When the careful driver sees one ahead he always slows the speed of his car.

Square signs mark dangers near the road but not part of it, such as schools. They put good drivers on the alert the instant they are sighted. Octagonal and round signs always require a full stop. The eight-edged signs are posted in most instances at intersections of arterial routes to avoid collisions. Round signs of the same import but in a class by themselves, are used to mark railroad crossings, all of which are always dangerous.

Fresh Straw Is Liable to Stunt Plant Growth

Fresh straw plowed under sometimes stunts the growth of the following crop, according to soil specialists of the New Jersey agricultural experiment station. The straw acts as a medium for certain kinds of bacteria which multiply rapidly and which feed on the nitrogen that would ordinarily go to the crop. This explanation is borne out by the fact that when nitrogen is added with the straw, the harmful effects are prevented.

In very sandy soils, injury appears before a shortage of nitrogen can make itself felt. Apparently, the straw also introduces poisons which affect the tender seedlings.

The soil specialists of the station are now endeavoring to find methods of treating the straw so that both forms of injury will be prevented.

Not one of the Smith brothers, but Walter Mails, doing one of his famous impersonations. Walter can pitch a great deal better than he can play the trombone, and he says he's a great musician. After various journeys between the coast, Brooklyn, Cleveland and St. Louis, Walter is back again with the San Francisco Seals.

Silage More Palatable Than Fodder for Cows

An acre of corn has a much higher feeding value when fed to dairy cows as silage than it has when cured and fed as fodder. The superior value of silage over fodder is attributed largely to the smaller waste in the handling, curing, storing and feeding of silage and to its greater palatability. Principally because silage is much more palatable than corn fodder, more of it is consumed, thus making more nutrients available for milk production.

These facts are borne out by an experiment made by the Iowa Agricultural experiment station in which corn silage was compared to corn fodder in well-balanced rations fed to dairy cows. By giving corn silage a feeding value of \$4.50 a ton, or \$36.00 for an acre yield of eight tons, the relative value of corn fodder was found to be \$7.17 for a production of 3.4 tons per acre. However, as there is about 5 per cent greater additional loss resulting from curing fodder than there is from curing silage, the acre valuation of the fodder is reduced to \$16.21. An acre of corn fodder in these trials, therefore, was given but 45 per cent the value of any acre of silage for feeding to dairy cows.

Selecting Brood Sow

The brood sow is the foundation upon which profitable hog production rests. The care, selection, feeding and management of brood sows are important factors in this important and profitable industry. Many articles have been written upon these subjects by experienced hog raisers and authorities in swine husbandry, but methods that insure success are subject to great variation as evidenced by the results usually secured with the swine herd.

Agricultural Notes

Well-bred cows leave profits—monkeys pay no rent.

Even if low grade truck doesn't spoil on the market it spoils the market.

A good cow well fed will do her best—a poor cow poorly fed will do her worst.

All classes of sheep with the exception of little lambs and old sheep will eat and thrive on sweet clover pasture.

Growing chickens and laying hens need green feed the year round to grow best, keep in good health or to lay eggs.

Lime for the soil appears to be one of the best-paying propositions for farmers, for records from 17 states show an average return of 138 per cent on the investment.

"Poker Face" Is Done in Clay

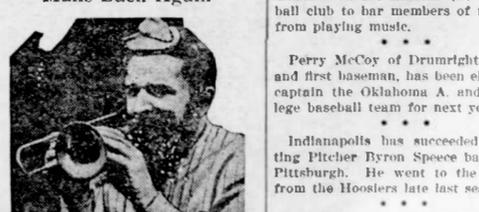

The classical facial features of Helen Wills, world renowned tennis player, have been molded into clay by Haig Patigian, famous San Francisco sculptor, and is attracting wide attention among those who have seen it. The bust is to be cast in plaster and will be later transformed either into bronze or marble.

To Halve Hole in One Is Rare Feat

Only one golfer in a thousand or so ever scored a hole in one, and but eight men in the history of the game have made two holes-in-one in a single round. But there is still a rarer feat, the halving of a hole in one. According to the American Golfer, it has been accomplished twice, once in America and once in England.

Mails Back Again

Not one of the Smith brothers, but Walter Mails, doing one of his famous impersonations. Walter can pitch a great deal better than he can play the trombone, and he says he's a great musician. After various journeys between the coast, Brooklyn, Cleveland and St. Louis, Walter is back again with the San Francisco Seals.

Sporting Squibs

Fencing is the favorite sport of Mussolini, the Italian premier.

Public golf courses are now found in all but 11 states of the Union.

William Miller will captain the 1927 swimming team of the University of Indiana.

Gene Sarazen played night golf at Briar Cliff, N. Y., three years ago and made a hole in one.

Under a new law in California the National Guard armories in that state may be used for boxing shows.

Uneasy lies the crown of the heavy-weight pugilist, with at least three men waiting to knock it off.

Boxing has taken a strong hold in Japan and, for the first time, a Nipponese boxing team will contend for honors at the 1928 Olympic at Amsterdam.

Dorothy D. Smith of Newton Centre, Mass., who has won the women's national archery title six times, began playing the sport as soon as she could walk.

Canadians lay claim to the oldest racing feature run continuously on the North American continent in the King's Plate, recently held for the sixty-eighth time.

The campus grind gets into "Who's Who" much more often than the football star of the University of California Alumni association finds. Well, no one ever has to look in a book to find out who the football star is.

Perhaps horse racing could be dealt with by extending the no-left-turn laws to race tracks, as long as they all turn that way.

The Edmonton Grads, champion girls' basketball team of the world, will be part of Canada's representation at the next Olympic games.

The only thing that Gene Tunney's tenure of the championship has proved is that his nickname of "fighting marine" must have been given him as a result of his war experience.

Fulton's Tin Jaw Brings Him \$50,000

Fred Fulton, the "Minnesota plasterer" of the prize ring, has the questionable distinction of having been knocked out more times in the ring than almost any other boxer.

He insists upon the last laugh, however, for he has reaped a \$50,000 fortune from his unimpressive career. Invested in a northern Minnesota summer resort, it earns him a handsome living, together with his plastering work. Every winter finds him at work with his trowel in Chicago.

GIANT SUNFISH IS BOON TO FISHING

Expert Says New Species Will Supplant Bass.

"Did you ever have a sunfish, a wee 'pumpkinseed,' grab your hook with such force that you thought you had a large fish?" asks E. C. Fearnow of fishermen in the June issue of Field and Stream. "Suppose a sunfish weighed two or three pounds," continued Mr. Fearnow. "What a fight he would put up and the delicious dinner he would make."

According to Mr. Fearnow such a fish has been discovered in Georgia—a giant brother of the scrappy little "sunny" weighing from two to three pounds. "A specimen weighing nearly three pounds was recently sent to New York to be mounted, while another specimen of over two pounds was forwarded to the bureau of fisheries. It is the opinion of the experts that a new species has been found, one that has apparently been overlooked by ichthyologists, or confused with the blue gill.

"Commissioner O'Malley of the bureau of fisheries has issued instructions for the collection of a brood stock for propagation at one of the bureau's hatcheries, and the new species will be held in a separate pond in the hope that an output of young fish can be obtained. While it is evident that the new fish belongs to the genus of sunfishes, it will not be possible definitely to classify the species until specimens of various ages are available for examination.

"For some years," concludes Mr. Fearnow, "there has been an urgent need of a fair-sized food fish possessing some qualities and not so predatory in its habits as the black bass for stocking our ponds, lakes and streams. The carp was introduced for this purpose but this species has not met requirements. The sunfish has a good reputation and it is very prolific, so if the weight can be brought up to that of the bass it will mean a great deal to every fisherman."

Dundee New Champ

Photograph shows a smiling champion of Joe Dundee of Baltimore, the new welterweight champion of the world. He defeated Pete Latzo for the title.

Ernest Orsatti, Houston's rookie outfielder, from the St. Louis Cardinals, has hit the apple with such ferocity that he has displaced Hack Miller from the regular lineup.

Hazen Cuyler, Pittsburgh's star outfielder, went out of the game indefinitely when he broke a small bone in a foot when sliding to third in one of the St. Louis games.

Although he pitched hitless ball for nine innings, Al Wicker of North Carolina State college saw his team defeated by Wake Forest college by the score of 5 to 4, due to wildness on his part and errors by his mates.

Paul Wanninger, former Yankee and Boston Red Sox shortstop, has been purchased by Cincinnati from the St. Paul club of the American association. Only recently he was returned to St. Paul by the Boston club.

Ping Bodie, veteran outfielder, who was a free agent, has been signed by the San Francisco Seals. It was sort of a home-coming for the roly poly one. It was in 1909 that the Seals won a pennant and Bodie was the hero of the season, with 29 home runs. It was not long thereafter that he was sold to the Chicago White Sox.

Our only objection to double-headers this summer is that six outfield errors a day would be almost too many.

In 1911 the Toledo club went through the entire season without winning a single game on the Minneapolis grounds.

There has been no scandal in baseball so far this season and bad weather has caused but few double-headers. The fans want a better break for their money.

Whistling Unforgivable Sin of Baseball Player

An unforgivable sin of baseball is the act of a player warbling a duty after his team has lost. One of the prize boners in this connection happened in the Texas league a few years ago. Jukey Aiz and his Port Worth Cats were in the thick of a hot pennant fight. On this particular day, his team was handed a 3 to 2 defeat and it was a bitter pill for Jake to swallow.

As the athletes wended their way toward the clubhouse, Pike of Aiz, who is not a smiling loser, heard an unmistakable jazzy refrain being whistled by one of his players. Aiz quickly covered the intervening space between himself and the whistler, a young pitcher who had dared to break one of the immutable laws of baseball after dropping a tough game.

The amazed Aiz immediately interrogated as follows: "What do you think this is—a minstrel troupe? Out on the solo!" To which the young and canary-like pitcher replied: "It's a free country, Mr. Aiz. I'll whistle if I care to." "You win," shot back the Fort Worth leader, "but always remember that you whistled yourself out of this ball club." The whistler left Fort Worth that evening.

Uses Eight Portsidors

When Manager Nick Williams of the San Francisco Seals saw that he could build up a team which would have a chance to win the Pacific league pennant this year he wasn't figuring on a left-handed complex. But the team has it. Opposition right-handed pitchers some days might even face the problem of throwing to the left side of the plate. All that is lacking is a catcher and a team of outfielders would be complete.

"Do you plead guilty to thirty-eight?" a magistrate asked.
"Oh, dear. No!"
"How fast were you going then?"
"Oh, I was speeding, all right. I thought you meant my age."

RADIO

Reception O. K'd by Music Critics

Improved Audio Amplification Elevates Radio to Higher Plane.

By JOHN F. RIDER
in Radio World.

The cause of the objections voiced by musicians against radio as a medium of musical entertainment has been removed. Simultaneously, with the same stroke, the goal of engineers in the development of audio-frequency amplification has been attained. This step was accomplished by one who has made many noteworthy contributions to the science of radio transmission and reception—H. P. Dornie, the eminent physicist and engineer. His patents cover such well-known items as the alkaline vapor tube, better known as the sodium tube; the spiderweb coil, and many gas content tubes used in radio. The audio-frequency achievement is the development of a new system of such amplification known as triphonic, utilizing new electrical principles of operation. The electrical phenomena utilized for the energy transfer between the circuits in this system is not to be found in existing systems and is the development of the inventor.

Timbre Kept Constant.

The greatest objection voiced by musicians against radio as a medium of conveying music has been that the reproduction was not natural; that is, it was either low pitched or high pitched. Furthermore, that the relationship in amplitude of the fundamental and harmonic frequencies when reproduced was not the same as that of the signal when transmitted into the microphone. A variance in this relationship changes the timbre of the sound, and a soprano sounds like a contralto and a violin like a cello. They also claimed that due consideration was not accorded by the receiver engineers to the electrical laws and physical laws pertaining to the conversion of sound into electrical energy, and the reception of this electrical energy and its re-conversion back into sound. Musicians agreed that when these laws are given consideration and the proper relationship maintained between the fundamental and the overtone frequencies, the reproduction in the home of the fun will be natural.

Impartial Amplification.

This new system fulfills the requirements and consequently nullifies the objections. The frequency range of the triphonic coupling units is from 37 to 10,000 cycles, with a practically flat curve between 50 and 10,000 cycles. This means that the amplitude relationships between the frequencies of a complex wave within this band will be retained without any accentuation or attenuation. In other words, if a soprano sang a 1,200-cycle note, which contained for the sake of argument the third, fifth and seventh harmonics with amplitude relationship of respectively 30, 5 and 2 per cent of the fundamental, they would be amplified uniformly and the amplitude of the fundamental and the harmonics would vary in the same proportion. This would make possible natural reproduction. If the fifth and seventh harmonics were attenuated, the timbre of the soprano's voice would be altered, and the reproduction would not be natural.

Another salient feature of this new system is the minimization of phase angle distortion in the coupling unit and tube combinations. This form of distortion is very seldom considered in the design of an average audio-frequency amplifier, and is extensively present in many cases.

How System Works.

The operating principle of this new system of audio-frequency amplification is the attainment of energy transfer through a medium of balanced electro-magnetic coupling and capacitive coupling, a system dissimilar to existing systems of audio-frequency amplification. The system is non-coupling and adaptable to average conditions without necessitating any special equipment. The standard tubes used for audio amplification are satisfactory.

The design of the units comprising an individual coupling unit differ as much physically from conventional audio-frequency coupling units as does the principle of operation from any conventional system. The balance between the electro-magnetic coupling and the capacitive coupling is automatic within each unit, as to frequency and the amount of power passed into the system.

Would Retain Complete Log of Matter Broadcast

That all broadcast stations be required to keep a complete log of matter broadcast is urged by Horace L. Ernst, a representative of the American Civil Liberties union of New York.

This is advocated in an effort to learn who and what is deemed desirable by certain stations, some of which he claimed are closed to many seeking free speech through the ether. He also expressed a hope that the commission will keep one ear constantly turned to the complaints and objections of the radio public, fearing that an insidious censorship by stations would keep some interests off the air.

Arcing of Granules in Resistors Cause His

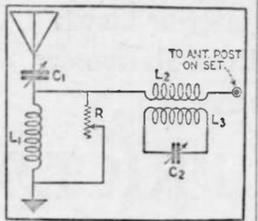

The cause of noisy grid leaks and resistors is simply explained. The minute arcing between carbon granules in the old-style resistors, using inked

Wave Trap Eliminates Station Interference

A filter, or wave, trap which will eliminate station interference is shown in the illustration. Its construction is fairly simple, there being only two parts, although the adjustment of this filter is somewhat complicated. However, once adjusted, it needs no further handling or dial twisting. The parts necessary for this wave are as follows:

- 1 variable condenser, .001-mf. low-loss type;
- 1 variable condenser, .0005-mf. low-loss type;
- 1 variable resistance, 0.25,000 ohms;
- 2 bakelite tubes, 3 inches in diameter, 4 1/2 inches long;
- 1/2 pound No. 22 DSC wire.

L1 consists of 55 turns wound on one of the tubes, L2 is 45 turns wound on the remaining tube. L2 is wound on top of L1, but is separated from it by a sheet of emery cloth, or waxed paper, and has ten turns. C1 is the .001-mf. variable condenser. The theory of this wave trap is as follows: The incoming signal flows through coils L1 and L2. The circuit comprising L1 and C1 is tuned to the frequency of the interfering station, and the condenser is then set at that position. The circuit including C2 and C3 is what is commonly termed an absorption circuit. The condenser of this circuit is rotated until the signal of the interfering station is heard at a minimum strength. The circuit, when

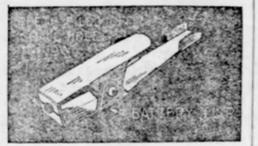

Efficient Wave Trap Which Can Be Constructed at Low Cost.

In resonance with the interfering station, will absorb almost all of the energy received from that station. The energy is received from coil L2, which is closely coupled to L1, and is also closely coupled to L1. In this way signals of other stations will be allowed to pass through, but that of the interfering station is dissipated in the absorption circuit. The resistance across L1 and C1 serves as a static leak, and is variable to obtain the best adjustment possible.—Radio News.

Wire Skinning Device Made From Battery Clip

In using the popular rubber-covered stranded hook-up wire, considerable trouble was experienced in skinning the ends for connections until the following simple tool was devised. It consists of a large battery-connection clamp, the teeth of which are filed smooth. A small notch in the jaws,

Insulation Remover That Is Made From a Battery Clip.

roughly the size of the skinned wire, is also made with a file. With this little tool you can do a neater job in a fraction of the time necessary to skin this type of wire with a knife, and there is no danger of cutting the fine strands of the wire.—Radio News.

Leaky Transformer Put All Sets to Humming

One of the most bothersome things to an owner of a radio set is the location of a leaky electric transformer in his neighborhood.

Radio owners of Waterboro, S. C., recently had so much trouble with their sets that the sale of radios decreased considerably. A radio dealer put experts on the job, who spent a whole day going over the city trying to locate the trouble, but it was not until evening, when the electric lighting lines were used, that they found it. It all was centered in a leaky transformer. As soon as it was repaired the buzz-sawing that had annoyed the radio fans disappeared.

Make New Radio Tube

Production of a radio tube which embodies the elements of three ordinary tubes together, with two stages of amplification, is reported to have been accomplished in Germany. This tube is only slightly more expensive than other types, it is said, and radio development is expected to be materially advanced by this invention. At present crystal and one-tube sets predominate in that country.

Set Explodes in Storm

During a thunderstorm recently in Stanislavoff, a provincial town in eastern Poland, a radio receiving set exploded and burst into flames. It was discovered that it had been grounded to a lightning rod instead of a water pipe and presumably had received the force of a flash of lightning, according to the official wireless station of Poland which broadcast the news.

Recovered Radium

Some detecting that would make Craig Kennedy proud was performed by Prof. J. B. Edwards of Georgia Tech in Americus, Ga. Several tubes of radium valued at \$4,000 were lost from the hospital. With mechanical devices perfected for detection of radium waves, Professor Edwards traced the receptacles and their precious contents to the city incinerator five miles away. Unscathed, the radium was returned. Hospital attaches believe the tubes became entangled in cotton that was discarded and thus were tossed into refuse receptacles.

Stern Position

Sympathizer—And did her father come between you?
Jilted Suitor—No—behind me!—Tit-Bits.

A dial radio phone has been invented by the United States army signal corps to help flyers talk to those on the ground.

Lord, give us insight as well as good intent; especially in the making of laws.

Many a would-be jolly good fellow might be really so if he would only stop telling jokes.

The virtue of justice consists in moderation as regulated by wisdom.—Aristotle.

A miser and a pauper undergo the same privations, but the miser gets enjoyment out of his.

A wise man knows the value of silence when a child begins to cross-examine him.

CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic, Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of

Something Wrong

Managing Editor—Why did you fire the weather forecaster?
Editor—His forecast for today was fair and warm, but I noticed that he brought an umbrella.

Not a Matter of Mind

"There's one time when a man's brains don't count."
"When is that?"
"When he's punching an adding machine."—Good Hardware.

A Clew

First Prohibition Agent—There is work for us at the prize fight tonight.
Second—Yes?
First—Yes. I read that both fighters will take many punches.

Strange!

"Who tied your tie?"
"Why?"
"It looks like a foreign hand."

Burglars Around

"That fellow steals a lot of bases."
"Yeah, maybe we'd better lock up the plate."

Modern Husbands

Husbands with billy-goat appetites are the easiest to live with.—Woman's Home Companion.

Kindness—a language which the dumb can speak and the deaf understand.—Bovee.

The great obstacle to progress is prejudice.—Bovee.

The sound must seem an echo to the sense.—Pope.

The less money a woman has to spend the more she talks shop.

Money isn't everything, but it reduces earthly fears one-half.

It's pretty hard to be good-natured and dishonest at the same time.

What sweet delight a quiet life affords.—Drummond.

He who considers too much will perform little.—Schiller.

And all that glitters is not gold.

No hope! He's gone!

"Flyosan ALWAYS kills," says Doc Fly

DON'T kill flies and mosquitoes one at a time. Flyosan—the first and only effective fly and mosquito spray (non-poisonous)—kills all the flies and mosquitoes in your house in only a few minutes.

But use Flyosan itself. Don't take chances with inferior imitations. Rid your home quickly, thoroughly, not only of flying pests but also of the filthy, deadly germs which each one carries.

"Swatting" only scatters these millions of disease-bearing germs. Here is the right insecticide for each insect:

FLYOSAN, Liquid Spray — kills flies and mosquitoes.

PETERMAN'S ANT FOOD — exterminates ants.

PETERMAN'S DISCOVERY, Liquid — exterminates bedbugs.

PETERMAN'S ROACH FOOD — exterminates that cockroach enemy.

PETERMAN'S MOTH FOOD — protects against moths.

You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

Peterman's has the right insecticide for each insect. The only whereever drugs are sold.

WAYNE, WISCONSIN

KITCHEN-KOOK

THE WORLD'S FASTEST COOK STOVE

City Gas Convenience for Homes Without Gas

Every home no matter where it is located can now have the convenience of gas for cooking and baking. **Kitchenkook** brings you everything you can ask for and more; cleanliness, safety, convenience, economy, speed—faster than city gas at a lower operating cost. It makes its own gas from common gasoline. Takes less than one minute to light it. All burners are ready for use at once; turn on or off like gas. No delay, no waiting, no smoke or soot; keeps utensils clean and bright. Be sure to see **Kitchenkook**, the wonder cook stove, in operation. Then you will know you can never be satisfied with any other cook stove. Sixteen attractive models.

Kewaskum Hardware & Electric Company

KEWASKUM, WISCONSIN

CHEESE MARKET

Plymouth, Wis., July 1.—On the Farmers' Call Board today 1,530 boxes of cheese were offered for sale and all sold as follows: 610 cases longhorns at 21c, 30 cases young Americas at 21c, 100 boxes square prints at 21½c, 765 daisies at 21¼c and 25 twins at 20c.

—The Kewaskum Electric Co. put up a wind mill for Mich Shea near Armstrong last week Tuesday.

Mr. and Mrs. Martin Rietz and sons Earl and Marvin of Forest spent Sunday afternoon with Mr. and Mrs. Otto Hinn.

Mr. and Mrs. Henry Butzke and family and mother spent the Fourth with Mr. and Mrs. Otto Hinn and family.

Mr. and Mrs. Otto Hinn spent Wednesday with Mrs. Arnold Butzke at St. Agnes hospital where she underwent an operation Sunday.

Tribute to Civil Engineer.

From the standpoint of the artist, the civil engineer type represents the highest type of masculine perfection. He has the imagination to conceive and the practicality and intellect to execute his conceptions.—Emily Nichols Hatch.

The Dog and the Egg

A big black retriever, named Peto, belonging to a farmer of East Leake, near Loughborough, England, has shown a partiality for a pullet, while being on bad terms with the rest of the feathered inhabitants of the farm. Every morning the pullet has walked over the dog's back to the end of its kennel and laid an egg. Peto immediately has eaten it, shell and all!

Life of Crank Axes.

The investigations of metal-frank axes on an English railroad has been increased in eleven years from 28,000 to 46,000.

Sensitive Scale.

The "grand balance" or scale used in the Bank of England is so sensitive that the weight of a postage stamp moves the index six inches.

Hot New Bathrooms.

Hot new bathrooms, with modern fixtures, are being put up in the new school building at the corner of Washington and Madison streets.

Garlic in the Milk

One minute after garlic is eaten by a cow the flavor is present in the milk.—Science Service.

BOLTONVILLE

Quite a number from here attended the picnic at Batavia Monday.

Leo Weiss spent Sunday evening with the George Hiller family.

Lillian Quass is spending the week with her sister, Mrs. Walter Liepert.

A large crowd from here attended the firemen's dance at Beechwood on Sunday evening.

Mr. and Mrs. Wm. Schoedel of West Bend spent Sunday evening at the O. Marshman home.

Mr. and Mrs. Art. Dettman and children of Bonduel spent a few days with relatives here.

Wallace and Nelson Rodenkirch visited from Saturday until Tuesday with relatives in Michigan.

Mr. and Mrs. Walter Liepert and children spent Sunday with the Emil Quass family at Fillmore.

Leo Weiss and sister Regina spent from Saturday until Monday with their sister, Mrs. J. Weyker.

Mrs. A. Rodenkirch, Mrs. J. Weyker and Regina Weiss called on Mrs. O. Marshman Wednesday afternoon.

Chas. Schnetzer of Milwaukee, Mr. Wahr of Chicago and Math. Kohler of West Bend called at the John Weyker home Monday.

Mr. and Mrs. Erwin Rohde and daughter of Milwaukee spent over the Fourth with the O. Marshman and C. Eisentraut families.

The sad news reached here of the death of Chas. Dulica, formerly of here. He passed away at his home in Milwaukee on July 1st.

Mr. and Mrs. Chas. Eisentraut and children, Mr. and Mrs. O. Marshman, Cora Marshman, Mr. and Mrs. Erwin Rohde and daughter of Milwaukee and Edwin Gerhardt of West Bend picnicked at Forest Lake Sunday.

HAGENBECK-WALLACE CIRCUS AT FOND DU LAC

Hagenbeck Wallace circus proclaimed as the foremost trained wild animal show of the universe, will shortly be in our midst. Billers have finished their work through this territory and bright and highly colored posters tell of the coming of Hagenbeck-Wallace to Fond du Lac on July 14.

Many new innovations have been created by Hagenbeck-Wallace for the 1927 tour. "The Geisha" said to be the greatest musical spectacle ever produced will open the exhibition, while "Blazing Glory" a patriotic presentation will bring the program to a close. Several hundred characters appear in "The Geisha" and the wardrobe and costuming is said to be the most pretentious of any circus spectacle.

The Hagenbeck standard in trained wild animal numbers has also been maintained and such noted subjugators as Clyde Beatty, Capt. Bernard and Bob MacPherson will send their jungle charges through sensational routines in the big steel arenas. In addition to the wild animal groups, there will be displays of domestic beasts. Several groups of Liberty Horses will appear in the rings, while the hippodrome track will be the scene of a Horse Show, second to none. Forty singing girls and forty prancing steeds appear in one display.

Other noted features include the Orrin Davenport Family of Equestrians, the Ward-Kimball Troupe of Flyers and Cheerful Gardner and the original Hagenbeck elephants. Plenty of clowns, to be exact fifty, will work all during the performances which start promptly at 2 p. m. and 8 p. m. The big double menagerie includes specimens from all portions of the globe, including highly valuable giraffes.

HOW TO TREAT IVY POISONING

Madison, Wis., July 7.—"If you come in contact with poison ivy on your summer vacation, immediately wash the parts of the body exposed with soap and water, followed by gasoline or ether to dissolve the oil of the plant.

This is the suggestion of the health committee of the State Medical society in a bulletin to tourists and those who frequent woods during summer vacation. The bulletin declares that poison ivy affects people differently. With some it becomes a very serious matter.

"This plant from which so many suffer is easily distinguishable by its three divided leaves," continues the bulletin. "Although poison ivy, poison oak, poison sumack abound in this state, poison ivy is the plant most frequently encountered by the unsuspecting city visitor to the country in spite of the fact that it may be so easily recognized.

"Since the advent of the automobile, poison ivy has become a city as well as a country problem due to the fact that more city folks get to the country than before and come in contact with the plant when changing tires or making roadside repairs.

—Mrs. Hannah Burrow returned home Wednesday from a week's visit with relatives at Milwaukee, while there she attended the wedding of Miss Georgia Guth, held there last Wednesday.

NOTICE TO PROVE WILL AND NOTICE TO CREDITORS

State of Wisconsin, County Court, Washington County—In Probate.

In Re Estate of Amelia Buddenhagen, late of the Town of Barton, in said county, deceased. Notice is hereby given, that at the special term of said court to be held on the 2nd Tuesday of July, A. D. 1927, at the Court House, in the city of West Bend, County of Washington, and State of Wisconsin, there will be heard and considered the application of Arthur Buddenhagen to admit to probate the last will and testament of Amelia Buddenhagen, deceased, and for the appointment of an executor.

Notice is hereby further given, that up to and including the 3rd Tuesday of October, 1927, is fixed as the time within which all creditors of said Amelia Buddenhagen, deceased, shall present their claims for examination and allowance.

And Notice is hereby further given, that all such claims for examination and allowance will be examined and adjusted in said County Court at the Court House in the city of West Bend, in said County and State, on the 1st Tuesday of November, 1927.

Filed June 21, 1927. By the Court: F. W. Bucklin, County Judge. O'Neira & O'Neira, County Clerk.

CEDEBURG STORE TO BE SOLD

Creditors have been advised by Julius Goetz, trustee, that the real estate of the Boerner-Kuether company will be offered for sale at public auction to the highest bidder for cash on the premises. This real estate consists of the large two-story store building at the corner of Center and Washington-av., and there is considerable speculation as to who will purchase the building. Rumors have been current that the Ed. Schuster company of Milwaukee might purchase it and start a large department store here, and it was reported that representatives of the Schuster company were in the city some time ago looking over the building.—Cedarburg News.

—Mrs. Charles Albrecht, son Arthur and daughter Elizabeth of Slinger and Deber Aulenbacher of Jud, North Dakota visited last week Thursday with Mr. and Mrs. L. D. Guth and with the Elwyn Romaine family.

Be Ready for Any Condition at Harvest

McCormick and Deering grain binders have long enjoyed a world-wide reputation for substantial construction and ability to stand up and do accurate work year after year. Now you can buy in one machine the best features of both the McCormick and Deering, with the addition of many new improvements.

The McCormick-Deering grain binder is the most substantially built and lightest running grain binder on the market. The improvements which enable it to cut grain so successfully and tie bundles with such consistent accuracy, also include features which facilitate adjustments when they are necessary.

Instead of wasting time in trying to make an old binder work another year, instead of risking the loss of grain, better see us now and place your order for a new improved McCormick-Deering binder, so that you will be fully prepared to meet every emergency when harvest time comes.

KEWASKUM, WIS.

—Miss Alice Becker of Milwaukee spent a few days with Elverena Becker.

—Mr. and Mrs. Frank Zwaska and family, Mr. and Mrs. Rudy Wagner and daughter Audrey, Mr. and Mrs. Wm. Tahlman, all of Milwaukee and Mr. and Mrs. Wm. Gabriel of Beloit and Mr. and Mrs. Jos. Kirschbaum of Chicago spent Monday with Dr. and Mrs. Geo. Brandt and family.

—Miss Ada and Meta Schultz entertained a number of their friends at a card party at their home last Thursday evening. First honors were awarded to Miss Lilly Schlosser and second to Miss Beatrice Kleinhaus. Dainty refreshments were served after the games. The card social was one of a chain of parties held for the benefit of the library.

—A surprise shower was given in honor of Miss Marie Kudek Tuesday evening, June 28, at the home of Mr. and Mrs. H. Kaiser 747-55th St., Milwaukee. The guests were as follows: Mr. and Mrs. Gregor Schmitz of Kewaskum, Mrs. L. Goetz, C. Goetz, Mr. and Mrs. H. Kaiser, Mrs. E. Goetz, Mrs. A. Goetz, Miss Irene Goetz, Miss A. Spitzer, Miss Smetek, Miss Otto, Miss A. Schneider, Miss Sauzer, Miss H. Straub of Campbellsport, Miss A. Schott, Miss E. Schott, Miss Kleinhaus, Miss M. Muck, Miss E. Fallman and Miss J. Lennart.

—The following spent the 3rd and 4th of July at the Albert Kocher home: Mr. and Mrs. Rob. Ebert and family, Mr. and Mrs. Albert Bloedorn and family, Mr. and Mrs. Emil Eichholz and family, Mr. and Mrs. Gustav Kocher and family and Laura Hetzel, Mr. and Mrs. Gust. Shaske, Mr. and Mrs. Louis Kocher and family, Mr. and Mrs. Herman Kocher and family, Mr. and Mrs. Andrew Groth and family, Mr. and Mrs. Ray Rosner and daughter and Mrs. H. Rosner, Mr. and Mrs. F. Scheider and family, all of Milwaukee; Mr. and Mrs. Fred Baumgartner, Mr. and Mrs. Wm. Baumgartner and family, Mr. and Mrs. John Schuppel Jr., and family and Mrs. Emma Schuppel, Mr. and Mrs. Chas. Janssen and family, of Kohlsville; Wm. Schuppel and sons of West Bend; Mr. and Mrs. Fred Belger Sr., Mr. and Mrs. Louis Klein and family from here and Mr. and Mrs. Paul Giese and Grandma Giese of Fond du Lac.

STATEMENT OF THE CONDITION OF THE

Bank of Kewaskum

Kewaskum, Wisconsin

At the close of business June 30, 1927

RESOURCES	
Loans and Discounts	\$ 593,985.05

Doings at Our State Capital

Madison—Senator William H. Markham's bill to restore the Horicon marsh was placed on final passage by the senate and passed by a vote of 18 to 6.

Assemblyman Earl D. Hall's bill placing a tax of 5 cents a pound on oleomargarine was engrossed by the assembly, 33 to 26.

The measure providing that "every person selling at retail any oleomargarine, butterine or any similar substance made in imitation or semblance of pure butter not made entirely from the milk of cows with or without coloring matter, shall pay to the department of agriculture quarterly, a fee of 5 cents for each pound sold."

By a vote of 21-9, the senate killed the Carroll bill for a continuous concrete highway from Milwaukee to Superior. The finance committee had recommended that a certain portion of the gas tax revenue over a period of four years be set apart for the construction of the highway.

By a vote of 16-15, the senate advanced the bill to abolish the department of markets, the livestock sanitation board and the land settlement board. The duties would be taken over by the department of agriculture.

The Chase bill increasing the license fee of foreign life insurance companies, and decreasing the fee of Wisconsin companies, was passed by the assembly, 67 to 13.

There will be an increase in the state revenue of about \$200,000 in the next five years under the measure, according to its proponents.

The initiative and referendum resolution of Senator C. B. Casperson, Frederic, was killed by a vote of 14-11, in the senate.

By a vote of 13-9 the senate refused to concur in the Duncan bill relating to inheritance tax refunds. The bill was then advanced to a third reading.

Whether or not manufacture and sale of home brew shall be legalized under the laws of Wisconsin has been submitted to Gov. Zimmerman for final decision. The senate, by a vote of 17 to 14, passed the Duncan beer bill after the measure had won in the assembly, 54 to 34.

This bill, introduced by Assemblyman Duncan, socialist floorleader in the lower house, proposes that penalties for violation of the state's prohibition laws shall not apply where the liquor in question does not contain more alcohol than 2.75 per cent by weight.

Creation of a citizens tax research board to study Wisconsin's taxation problems and recommend changes to the legislature has been approved by the assembly.

The bill outlining the personnel and duties of such a board was introduced by Senator Casperson and passed by the upper house before being killed by a 49 to 29 vote of the assembly.

Proposals of such a body was in line with the taxation policy of Gov. Zimmerman in his message to the legislature, urging careful study of tax problems before attempting to change present tax laws.

The minimum age limit of golf caddies in Wisconsin will remain at 14 years, the assembly having refused to override the veto of Gov. Zimmerman on a bill reducing the age limit to 12 years. The senate had passed the bill over the veto.

Gasoline bootleggers, so-called, will continue to ply their trade in Wisconsin with buckets, tanks and trucks. They and their methods were under fire in the senate, but the argument ended with the killing of an assembly bill designed to put them out of business.

The bill sought to confine gasoline deliveries to stations by providing that it could be transferred to a motor vehicle only from underground storage, through hose and pumps, and out-laying buckets as containers.

The lower house adopted a joint resolution by Assemblyman Seftenger, Oshkosh, requesting the federal Indian bureau to refrain leasing the Wolf river power site on the Monominee Indian reservation to private interests until congress convenes and a fair hearing has been conducted. It also asked congress to investigate the feasibility of making a national park of the river and timber tract on this reservation.

Stevens Point—A family of flying squirrels has joined the gray squirrel colony at the courthouse grounds and now the air as well as the trees seem alive with these rodents.

Manitowish—Mrs. Malinda Kadow's contention that interference of father-in-law and mother-in-law in her marital affairs caused the alienation of her husband's affection was upheld by a circuit court jury here which awarded the younger Mrs. Kadow \$5,000 damages.

Rhineland—Charged with violating the prohibition laws, five proprietors of bars in Woodruff and Minocqua were arrested in raids conducted by Sheriff Lloyd Brooker and his deputies.

Tomah—Part of highway 33, between LaVale and Wadewoo, has been resurfaced with gravel. This highway is only a few years old, but appeared to be completely worn out and new treatment was necessary on account of the great number of cars which travel over the route, which is one of the prettiest in the state.

News of Badger State

Platteville—Believed to be crazed by heat, Forrest H. Knapp, 54, committed suicide near here by blowing his body to bits with dynamite.

Kenosha—Contracts totaling \$275,000 were let by the board of education here for the new Roosevelt 24-room grade school. The building is to be ready Jan. 1, 1925.

Madison—The state railroad commission has authorized the Monroe Light & Fuel Co. of Sparta, operated by State Senator Howard Teasdale, to dissolve when no opposition appeared to the application.

Fond du Lac—A \$10,000 set of Croydon chimes will be installed in Plymouth Congregational church here as a gift of Mrs. Mary E. Whittlesley in memory of her husband, J. C. Whittlesley.

Neenah—A request has been sent to Secretary Hoover by officials of James P. Hawley post, American Legion, for federal approval of an airplane landing field here to be known as Neenah airport.

Sheboygan—Circuit Judge Michael Kirwan ruled that an ordinance passed by the council here in January annexing a section south of Sheboygan, known as Lakeview, is illegal because a petition urging the action did not contain a sufficient number of signatures of electors and real estate owners.

Rhineland—Charles Morrill, Jr., for more than eleven years treasurer of this city and one of northern Wisconsin's widely known municipal officers, was relieved of his duties and Arvid Kendall, former Rhineland lumberman, was appointed by City Manager Charles Grau to succeed him.

Green Bay—The entire assets of the Acme Packing Co., a \$1,000,000 "war baby," were sold at public auction here to Harry Mainster, Chicago, for \$65,000. The assets included notes that had a face value of \$534,000 at one time. One of the notes for \$423,000 was knocked down to a bidder at \$10.

Oconomowoc—The Rev. John E. Gimbel, of the Redemptorist seminary here, drowned in Lake La Belle just off the city park here. Father Gimbel was 25 and was ordained at the seminary last year. His home was in Davenport, Iowa. His body was found in eight feet of water, where he had been seen swimming a few minutes before.

Madison—Factory employment in Wisconsin decreased in June, the state industrial commission reports. "As compared with last month," the report said, "factory employment decreased 1.8 per cent in the number of persons on pay rolls, 8.8 per cent in the aggregate amount of pay rolls and 1.5 per cent in the average per capita weekly earnings of employees."

Superior—Old maids may lead a lonely life, but most of them know how to keep out of the poorhouse, according to Charles Cole, poor commissioner of Douglas county, who says it is unusual for an unmarried woman to apply for commitment to the poorhouse. Ninety-five per cent of the applicants for the poor farm are single men older than 60, according to Mr. Cole's figures.

Green Bay—St. Joseph's Orphan home, located just outside the city limits of Green Bay, will celebrate its golden jubilee and homecoming on Labor day this year. It was announced by officials of the institution, which on June 20 was organized 50 years. During these 50 years approximately 10,000 boys and girls have found at St. Joseph's a home where everything was done to supplement the home of which they had been deprived. Almost every trade and profession is represented among the former students.

Milwaukee—Market quotations: Butter—Creamery, fresh extras, tubs, 39 1/4; extra firsts, 38 @ 39c. Cheese—Twins, 22 @ 23 1/2; daisies, 22 1/4 @ 23c; longhorns, 22 @ 23 1/4; brick, 22 1/4 @ 23c; Umburger, 21 @ 21 1/4. Eggs—Fresh gathered firsts, 22 @ 22 1/4. Poultry—Fowls, 17 @ 20c; springers, 27c; broilers, 25c; roasters, 14c; turkeys, 18 @ 22c; geese, 14 @ 18c. Potatoes—Wisconsin, 100-lb. sacks, No. 1, \$2.00 @ 2.25. Barley—Choice to fancy, 64 @ 85c; fair to good, 60 @ 85c. Corn—No. 3 yellow, 97 1/4 @ 98 1/4; No. 8 white, 45 @ 47c. Rye—No. 2, 1.05 @ 1.08 1/4. Hogs—Fair to best butchers, \$8.50 @ 9.25; fair to good lights, \$8.50 @ 9.40; pigs, \$7.00 @ 8.00. Cattle—Steers, fair to choice, \$8.00 @ 13.00; heifers, \$5.00 @ 9.50; cows, \$5.25 @ 7.00; calves, \$11.00 @ 12.00. Sheep—Spring lambs, good to choice, \$12.25 @ 18.00; fair to good, \$10.00 @ 12.00; ewes, \$3.50 @ 6.00.

Monroe—E. O. Evans, superintendent of Evansville schools for five years, has been elected superintendent of schools here, succeeding Lester R. Cruets, recently named school head at Janesville.

Menasha—The Menasha Rotary club closed its first year with a record believed to be unique in annals of the international organization. During the last six months 100 per cent attendance records were established at all of the meetings.

Berlin—Dedication services for the new altar and pulpit of St. Paul's Evangelical Lutheran church, Fairburn, were held here June 23 and more than 300 persons attended.

Shawano—Following a drive in Shawano county for the re-operative marketing of cheese by the Wisconsin Cheese Producers' federation, the erection of a cheese warehouse here was authorized at a mass meeting of county farmers in Shawano. This warehouse will be the fifteenth operated and controlled by the federation.

GRACE CRASHES ON HOP FROM HAWAII

Flight Ends Disastrously When His Plane Falls and Is Wrecked.

Honolulu.—Richard Grace's flight from Hawaii to the coast of California ended disastrously when his plane, on a trial hop, crashed to earth near the village of Koloa. The fuselage and one wing were wrecked.

Grace returned, heartbroken, to his residence. "I did the best I could," he said. "Something was the matter with the rudder."

Leut. E. B. Koger, manager of the flight, collapsed. It was not decided if the 2,400-mile flight across the ocean will be abandoned. The plane's motor and propeller are intact, but considerable time will be needed to repair the rudder and wing.

Fenton, Mich.—Military and Masonic honors marked the funeral here of Lieut. J. Thad Johnson, Selfridge field flyer, killed recently when his plane, acting as escort for Charles Lindbergh, crashed at Ottawa, Ont.

Paris, France.—Battered by storm and blinded by fog, with compass out of order and out of gasoline, the giant transatlantic monoplane of Commander Byrd sped swiftly to the sea at Ver-sur-Mer on the coast of Normandy, valiantly completing its great transoceanic hop—but 175 miles west of its goal, Paris.

In the crash each of the flyers received a bad shaking up and all suffered a little from the shock.

Except for the mechanical function of the compass coasting to a halt, Commander Byrd has no doubt that he would have achieved his goal. The motors functioned perfectly during the whole trip—through fog, rain and wind; over land and sea.

The New York news here was dead tired from his three sleepless nights. He accepted in modest fashion the congratulations showered on him and seemed to feel keen disappointment at not having achieved his goal. But he tried his best to hold his head high, smile and accept what had happened at its proper value—in that it was merely a technical accident.

They came down over Ver-sur-Mer with gasoline and oil tanks empty and compass out of gear after hours of maneuvering above the clouds for a sight of a landing place or any hole in the cloudbanks that might permit them to get their bearings.

Fortunately none of the equipment was badly injured and in short time, despite the high waves and a stiff wind, they launched their raft, packed their most cherished instruments and gained the shore. For more than an hour they waited on the beach for daylight to come to give them their bearings, anxiously watching the plane that drifted at the mercy of the waves.

These fishermen found them and gave them a hand with the plane to tow it out of the worst danger.

When it at length was dragged as far as it could go in the falling tide, the Americans turned in for a long sleep. Commander Byrd estimated that he flew 4,200 miles from the time of leaving Roosevelt field until his landing at Ver-sur-Mer, France.

The duration of the flight was about forty-two hours.

Request of Stephenson for Parole Is Denied

Michigan City, Ind.—David C. Stephenson, former grand dragon of the Ku Klux Klan, and political power in Indiana, was denied a 90-day temporary parole from the Indiana state penitentiary here. The decision was made after a complete review of the case by the pardon board.

Stephenson is serving life for the murder of Madge Oberholzer. He sought leave to personally supervise an appeal to the State Supreme court. Newspaper men were conducted to the cell of the former grand dragon and he was informed by members of the board he could speak freely.

The pardon board, in denying Stephenson his 90-day parole, stated "there was no good and sufficient reason" why his request should be granted.

Attorneys preparing the Supreme court appeal announced they would continue.

Sapiro-Ford Libel Suit Set for September 12

Detroit, Mich.—Federal Judge Fred M. Raymond of Grand Rapids set September 12 as a tentative date for the retrial of Aaron Sapiro's \$1,000,000 libel suit against Henry Ford and the Dearborn Publishing company. A mistrial was declared two months ago when an afternoon newspaper published an interview with a woman juror against whom the defendants had filed charges.

Flowers-Rosenbloom in Draw

Chicago.—Tiger Flowers, the former middleweight champion, and Maxie Rosenbloom of New York slipped and cuffed each other around the ring to a ten-round draw in their recent ring battle here.

Bandits Raid Gamblers

Saint Antonio, Texas.—Three masked and armed bandits broke up three poker games at Fort Sam Houston and escaped with approximately \$8,000. It had been pay day at the fort.

TROTZKY IN DISGRACE

Leon Trotsky.

Moscow.—The dismissal for violation of party discipline of Leon Trotsky and Gregory Zinovieff from the central committee of the All-Russian Communist party is recommended by the presidium of the central control committee.

Both Trotsky and Zinovieff have been heading an opposition movement against the Soviet government, but the Stalin faction managed to rally sufficient strength to overcome the difficulties without, however, being able to lead the breach.

NO HEAVY TAX CUT TO BE LOOKED FOR

Administration Not Likely to Recommend Big Reduction.

Washington.—The administration will fight next fall to keep the projected cut in taxes under \$200,000,000.

More than half the surplus for the year was made up of nonpermanent revenue. Acting Secretary of the Treasury Ogden L. Mills declared in a statement analyzing the financial situation. Final official figures made this surplus \$835,500,921, the largest in history.

Without special and nonrecurring items which aggregate \$170,000,000 the surplus would have been about \$255,000,000, of which a considerable part is to be attributed to decrease in expenditure, some of which represents a postponement rather than actual saving," Mills said.

"Postponed" expenditures were shown in his analysis as \$55,000,000—\$20,000,000 from the failed deficiency bill and \$35,000,000 from deferred tax refunds. This would cut the surplus of a permanent character to \$210,000,000. The treasury contends a margin of about \$100,000,000 of expected receipts over expenditures is necessary to meet emergencies.

All but \$2,000,000 of the surplus has been applied to debt reduction, Mills said.

President Celebrates Fifty-fifth Birthday

Rapid City, S. D.—President Coolidge celebrated his own fifty-fifth birthday and the one hundred fifty-first of the nation in an old-fashioned gathering on the greensward in front of the summer White House at this place.

Cowboys, boy scouts and residents of this section of the state generally joined in the celebration. The president was the recipient of numerous gifts, including a horse, two pairs of "chaps"—one of which he donned—other cowboy equipment and birthday cakes galore.

Messages from practically every ruler in the world were piled high on the president's desk. All congratulated him on passing another milestone in his life.

Helen Wins Winner of Women's Tennis Throne

London.—Helen Wins achieved her ambition of becoming Wimbledon's tennis queen when she beat the graceful Senorita Elia D'Alvarez of Spain in a fine match that figured with brilliant rallies and superb retrieving strokes. The scores were 6-2, 6-4. It was the first encounter between the two since the memorable Monte Carlo matches a year ago last winter.

Illinois Income Tax Bill Killed in House

Springfield, Ill.—The state income tax bill was killed in the house. The proponents of the measure, largely comprising the so-called farm bloc, failed by eleven votes to marshal the constitutional majority required for passage of the bill—seventy-seven ballots. The vote was 66 to 63.

Oil Strike in Michigan

Owosso, Mich.—Oil was struck in the first well to be drilled in Shiawassee county. The well is located on the McGulneys farm, four miles northwest of Owosso. The oil tested 47 per cent gravally.

Heavily Insured Man Dead

Charleston, W. Va.—Robert E. L. Ruffner, thirty-nine, whose life was insured for approximately \$1,600,000, was found dead at the bottom of an office building elevator shaft.

Fine Organ for Cathedral

St. Louis.—More than 10,000 pipes, 375 stops, two consoles and a string orchestra effect are features of a large pipe organ which a factory here has contracted to build for St. Patrick's cathedral, New York, for \$124,000.

Wood Makes Announcement

New York.—Mud Gea, Leonard Wood announced definitely to newspaper men that he would, after his vacation in America, return to the Philippines as governor general.

AMERICAN FORCE IN PEKING HELD READY

Believed Adequate to Protect Lives and Property—Butler in Tientsin.

Peking.—With the Chinese civil war steadily approaching northward, the American forces in north China to protect American lives and property have reached 4,600 men, including 1,100 marines from the Tenth provisional regiment, with an aviation detachment, that were landed a few days ago in the Tientsin region.

Thus far there have been no indications of the early removal of the American legation at Peking, although plans for its removal have been formulated in case this should become necessary.

The Shantung offensive by Gen. Chiang Kai-shek, leader of the moderate nationalists, which was planned at a recent conference at Suchow with Marshal Feng Yu-shiang, appears to be in full swing.

Official and foreign reports say that conditions "approaching panic exist among the Japanese along the Shantung railway. Japanese residents at T'sinmu, capital of the province of Shantung, are pressing their consul to send Japanese troops to that city from T'singtau, but no move in this direction has been made as yet.

The United States consul general at Hankow has been instructed to assist in the evacuation of eleven American Roman Catholic Passionist mission aries, of whom three are women. The party is at present engaged in an arduous trip from stations in the province of Kwetchow and Szechwan, the only route open to the Yangtze river because of the war.

Butler Goes to Tientsin

Shanghai.—The United States transport Henderson sailed for Tientsin, carrying Brigadier General Butler commander of the American marine forces in China, who will establish his headquarters there.

Eight airplanes, which have just arrived from New York, two tanks and supplies are to be taken to Tientsin.

France May Pay Its Debt on War Stocks

Washington.—Intimations that France will pay off the full principal of her \$407,000,000 war stocks debt to this country in the near future were current in well-informed quarters here.

Normally, if France ratifies the Mellon-Berenger debt settlement, payment of the war stocks debt would be spread over 62 years, like the remainder of the \$4,000,000,000 she owes for war and post-war loans. Without ratification, however, the \$407,000,000 falls due in 1923.

Considerable weight was attached to reports that the war stocks debt, he wiped out before that time, in view of the meeting in New York of heads of the Bank of France and the New York Federal Reserve bank, as well as the Bank of England and the German Reichsbank.

Mine Owners of Ohio Vote to Reopen Pits

Columbus, Ohio.—Ohio's coal mines, closed since April 1, because of wage differences, will reopen July 15, either on a union or nonunion basis with the November, 1917, scale of \$5 per day in effect. It was unanimously agreed by the Ohio Mine Operators' association in session here.

Under provisions of the ultimatum to be served on union officers, they will be allowed until July 15 to accept or reject the compromise proposal, a continuously competitive scale, which in event of change in West Virginia or Kentucky fields, automatically would change in Ohio. The operators contended the 1917 scale will place Ohio mines a fair competitive basis and at the same time provide a means of employment for many idle miners and will furnish an adequate fuel supply for the state.

De Autremonts' Hunt Cost Half a Million

Spokane, Wash.—It cost half a million to put the De Autremont brothers behind the bars. Their pictures girdled the globe on more than 3,000,000 posters, and there were other expenses. The United States, the American Express company and the Southern Pacific railroad paid for the man hunt.

Conference Over Coal Wage Scale Fruitless

Chicago.—The wage-scale conference between Illinois bituminous coal miners and mine operators looking to "ending" the suspension of mining effective since April 1, when the old contract expired, was adjourned without an agreement having been reached.

Children Burned to Death

Woodland, Calif.—Two Japanese children, a girl, nine months, and a boy, two years, burned to death in sight of their parents, Mr. and Mrs. K. Masuda, when an automobile caught fire.

Plan Portuguese Election

Lisbon, Portugal.—The ministerial council is now considering a proposal for election of a president of the republic by general suffrage, say the newspapers.

Price on Bank Robbers

Pomeroy, Ohio.—Seven banks operating in Meigs county, signed an agreement to pay \$2,500 to any one killing a bank robber caught in the act of robbing a bank and \$1,000 for the capture of a bank robber.

Wilkins to Head Oberlin

Oberlin, Ohio.—Announcement was made that Dr. Ernest Hatch Wilkins of the University of Chicago has been selected to succeed Dr. Henry C. Fine as president of Oberlin college.

NO TROUBLE TO DESCEND GRADE

Cause of More Worry to Motorist Than Any Other Car Ailment.

The bugaboo of descending steep grades probably worries more motorists than any other problem of automobile operation. This is especially true in the eastern and western parts of the United States, where there are hilly or mountainous sections.

Descending a steep grade need not be a hazardous adventure, provided a few simple rules are observed.

Rules for Descending Hills.

If the grade is exceedingly steep, always throw the car into low gear. This offers resistance to the downward pull, because the rear wheels have to "turn the engine over." Always keep the throttle closed, but do not shut off the ignition, as this is not necessary. Driving down a steep grade in this way not only keeps the car under control, but makes excessive use of the brakes unnecessary, thus diminishing brake wear.

To stop the car while descending a grade, apply both the brake and the clutch. But if you want to stop suddenly, apply both brakes and do not touch the clutch until the car is nearly at a standstill. If the rear wheels start to slide, release the brakes for an instant and then apply them again.

When you stop on a grade in the city, not only apply the hand brake and leave the lever in reverse gear, but go further than this to be absolutely safe and turn the front wheels so that one of them rests against the curb.

When You Roll Backwards.

The experience of having your car stall on a grade and start rolling backwards need not be nerve-racking. If this happens when you are on a country road, let the car back towards the side of the road and partly across the road. Of course, you cannot do this if there are ditches. If you cannot steer the car to the side of the road, and the hand and foot brakes are both necessary to keep the car from rolling, shift into neutral and then try to start your engine. Open the throttle about one quarter, shift into first, and then, just as you let in the clutch, release the hand brake and the foot brake at the same time. Brakes that work as efficiently in reverse as forward, do much to prevent "that panicky feeling" when you are forced to stop on a steep grade.

Big Increase in Autos Predicted for America

That 40,000,000 automobiles will be running about in America by 1940, if the percentage of increase of the past several years is maintained, is the opinion of H. C. Crowell, assistant chief engineer of the Pennsylvania railroad, according to a statement recently before the annual convention of the American Railway Engineering Association at Chicago.

"At present the automobile is taking a prodigious amount of business, both freight and passenger, from the railroads," he said. "In fact, motor competition, along with the additional hundreds of miles of paved roads every year, have cut railroad receipts to the extent that many lines have abandoned formerly profitable suburban schedules.

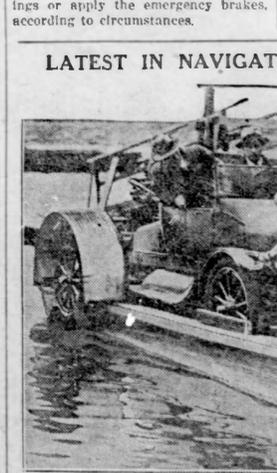

"Every railroad in America is seeking ways and means of making up this loss, but little progress has been made."

One-Armed Auto Driver Displays His Dexterity

Outstanding among the 10,000-odd taxi drivers of Paris, France, is Victor Coubard, crippled French war veteran who, though he lost his left arm at Verdun, has since driven 500,000 miles through the streets of Paris without causing a single accident of any kind.

With extraordinary dexterity Coubard manages to make his remaining arm do the work of two. His taxi running at full speed, Coubard lets go of the steering wheel for a fraction of a second so as to enable his only hand to blow the horn at street crossings or apply the emergency brakes, according to circumstances.

LATEST IN NAVIGATION IS SEA FLWVER

This sea-going flwver, made by Arthur H. Smith of Watrop, Wis., made from a discarded auto, a pair of paddle wheels steered from two pontoons. It works.

Phrase Is Explained

"Piston displacement" still seems to be a confusing phrase in spite of all that has been said and written of it. It plays a big part in the discussion of the latest cars, so having a succinct definition of it in mind may be helpful to those to whom it is not quite clear. Displacement is not the cylinder area, with which it most generally is confused. The area above the topmost point of piston travel in the compression chamber.

Lukewarm Water Should Be Used to Wash

No automobile ever should be washed with a new car during the first few months of use.

The best wash requires the car has been run for several months, the paint is set until it hardens, the wheels are scratched. Only engine oil should be removed. The car should be washed with lukewarm water. Alkali soaps should be used to remove grease. The car can be obtained in a new grade. Gasoline is out of the picture because it tends to eat away the varnish.

Lukewarm water should be used to wash the car. Cold water will not remove the dirt. Accumulation of dirt should be carried off by a stream of water. The hose should be kept with a sponge. This prevents the hose from being scratched. The car should be washed with lukewarm water. Alkali soaps should be used to remove grease. The car can be obtained in a new grade. Gasoline is out of the picture because it tends to eat away the varnish.

After a good rinse, the car should be dried by means of a clean cloth. The chassis should be kept in clear view. A light sweeping movement of the hand produces better results than a motion.

Clamp to Hold Tubes Is Key

When repairing a radiator, a clamp of the type shown in the drawing will be found useful. It consists of a series of curved strips, one of which is slipped snugly around three of the wooden base. The ends of the

Handy Inner-Tube Clamp

clamp are drilled and it is then fastened to a nut on one end of the tube. In use, the tube is placed on the base, with the clamp being pushed in the center and the tube secured. When it is pulled, the tube is held in place.

AUTOMOBILE HINTS

The most kind of lock-out device consists in picking a battery of lights.

A steep cliff and a bad road are especially dangerous to a car.

Probably none of the other hints for the car is as simple as the one acquired in the path of the freight.

The most appropriate punishment for the criminal who is sentenced to a term of imprisonment is a sentence to perpetual imprisonment.

CHAPTER VI—Continued

Send for the police. I've had enough of your d-d insolence."

CHAPTER VI—Continued

"It's my house. If you pay the rent, you can go in and get your clothes. If you don't, you stay out."

CHAPTER VI—Continued

"That's why I get on so well with you, Mr. Lippsky. You're the only one who doesn't mind me."

CHAPTER VI—Continued

"You shall sleep in the jail for this," Lippsky cried when the key was forced from him.

CHAPTER VI—Continued

"Where are we going, daddy?" she demanded, after she had passed Sing Sing's embattled walls.

CHAPTER VI—Continued

"I took a society leader from Boston to teach me just how gracious a gracious lady may sometimes be. For some incredible reason (in our hotel) there was a door leading from her bathroom into the hall, and, equally incredible, when a husky sweeper mistook his broom closet and pulled at the bathroom door it came open to admit him to the immediate presence of a society leader enjoying her bath."

such a funny place as this?" Suddenly she caught sight of Lippsky. "Who is that dreadful little creature?"

"I own this house, and I've come for the rent. If he don't pay, he goes to sleep in the village jail. I guess he don't mind. I guess it ain't for the first time. He ain't got no money. You say he's your father." Lippsky grinned. "Well, you got the chance to save your daddy from jail."

"My dear girl," he said easily, "the man is known widely as the village idiot. Nobody believes him. It does happen that my rent is due. By the way, how much is it?"

"Ninety dollars eighty cents," said Barnes. He took out a roll of bills and paid. He was left with seven dollars. His reward came in the relief the girl showed.

"It's a fad of mine staying up here," he admitted. "The air is good and I've been in training. I shall leave now. I think we'll go to New York as soon as possible. How lovely you look. You have those unforgettable violet eyes of your mother, but you are taller." The thought that he had nowhere to take her made him miserable, but he would not let her see it.

"When I came to a point," the girl said when they were in a New York-bound train, "when I was asked to drop my own name and take my mother's. Not that I minded being Nina Fessenden, except that it seemed as though I were publicly ashamed of you. I simply refused. There were awful rows. So I ran away. I was twenty-one and my own mistress. I sent all the jewels and presents back and started to earn my living."

"Nina," he cried with admiration in his look, "how could you possibly do what I've always failed in?"

"It wasn't easy at first," she admitted, "but I stuck it out and made enough money in secretarial work to come out to my own country second cabin. I tried to find you six months ago, but the silly clubs returned all your letters."

Neeland Barnes colored. "Must have mislaid the address," he said; "d-d carelessness of them. I shall report it. He wondered how she had run him to earth."

"When I got to New York I phoned the Knickerbocker. I knew it used to be your favorite club. I told the secretary, or whoever it was, that I was your daughter and simply had to find you. When I did they said you lived in Peekskill. I spent three hours looking and then that village idiot locked me in."

"I remember. His wife ran away and he shut himself up in his house and went mad."

"That is just what your aunt would say," he returned. "He did not go mad. He happens to be the best friend I have, and I shall ask him to let you stay the night there. Much better than a stuffy, noisy hotel."

"And tomorrow we'll get a cozy little flat. I've often wanted to look over the treets into Central park." (TO BE CONTINUED.)

Gracious Lady's Tact in Trying Situation

It took a society leader from Boston to teach me just how gracious a gracious lady may sometimes be. For some incredible reason (in our hotel) there was a door leading from her bathroom into the hall, and, equally incredible, when a husky sweeper mistook his broom closet and pulled at the bathroom door it came open to admit him to the immediate presence of a society leader enjoying her bath."

EXOTIC SHAWLS FOR EVENING; MILLINERY FOR SUMMER TIME

"SEE the new moon, make a wish and it will come true." Here's guessing the wish made by thousands of star-gazing women—Spanish shawl! Friend husband asks the "better half" to choose the gift she wants most—"Spanish shawl!" her eager reply. Daughter of the household is about to carry the "class honors." What shall devoted mother and father bestow upon their loved one as a graduating gift—Spanish shawl! Mr. and Mrs. Newlywed are on their honeymoon.

are lovely crepe de chine squares, in white or pastel color, unadorned save for long hand-knotted fringe. Silk squares with wide bands of silver or gold cloth bordering them are the smart thing in Paris. The centers are hand-painted or embroidered. This sort are fringedless.

Yes, we believe in evolution, speaking of course from a fashion standpoint. For proof, we cite certain taffeta hats as created, this season, by renowned Parisian modistes. See in

the picture how several of these modistes mark the evolution of grandmother's lovely log-cabin patchwork and other quaint patterns into the smartest twentieth-century millinery. Perhaps it is Italian art—mosaics which furnished the inspiration for the intricately interworked taffeta, also ribbon hats which are glorifying present-day millinery modes. Come the inspiration from what source it may, one thing is apparent—a new beauty note has been sounded by the milliner who is using taffeta in such unique and alluring ways as exemplified in the hats in this group.

Taffeta is a very important medium for the making of the better class of millinery this season. Many of our loveliest hats are built patch upon patch, fold upon fold of taffeta, displaying not only a fine workmanship, but also resulting color schemes which furnish subject matter for artist and poet.

Note the hat in the center of the picture. Isn't it reminiscent of the silk log-cabin patchwork you have been treasuring for years in that cedar chest of heirlooms? The narrow ribbons work out a delicate rainbow coloring, while the contour of the hat is the "very latest." Especially consider the stylish model, a side-back view of which is here given below to the left. The darker stripes are navy

blue, introduced into a medley of old rose, pale green, maize and gray taffeta.

The first hat shows stitched taffeta combined with narrow grosgrain ribbon. Folds of taffeta are criss-crossed into an artful design for the hat at the top to the left. The group is concluded with an all-taffeta hat with markings of fine pedaline straw. The tiny roses about the crown are formed of multicolored taffeta.

JULIA BOTTOMLEY,
(©, 1927, Western Newspaper Union.)

NECKLINES SOFTENED

The necklines of this season have been perceptibly softened. Usually a flower or a bow is perched at the shoulder to relieve any austerity.

TWO IN ONE

Two slips with one georgette dress—one self-colored, the other gayly patterned—make the one frock function as two.

FEATHER BOUQUETS

Bouquets of ostrich feathers, or combinations of French flowers and ostrich feathers give a very airy touch to the chignon dance frock.

VELVET FLOWERS

A simple gown of plum-colored taffeta crepe has for trimming only a girle of flat velvet flowers in the zinnia shades of red, cerise and purple.

Spanish Shawls Are Popular.

Spanish Shawls Are Popular.

Spanish Shawls Are Popular.

Some Summer-Time Hats.

the wearing of these lovely colorful befringed and embroidered silken shawls.

This rogue for the evening shawl is getting "more so." Not only the article is bringing joy to the exclusives who can afford them, but demand is in the ascendancy for silken squares of every type and color befringed and embellished in many intriguing ways.

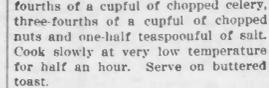

Either the new shawls are heavily embroidered, or they're not. Competing with the flower-covered types

The Kitchen Cabinet

(©, 1927, Western Newspaper Union.)
"I have health and sweet contentment,
And friends who cherish me,
And with all these daily blessings,
I'm as happy as can be."

EVERYDAY GOOD THINGS

For a meatless dinner the following will be enjoyed by the whole family.
Nut Hash.—Put one tablespoonful of butter into a frying pan, add two tablespoonfuls of minced onions and simmer gently until a light yellow, then add one tablespoonful of peanut butter; when well mixed add one-half cupful of milk, and

when the mixture boils add three-fourths of a cupful of chopped celery, three-fourths of a cupful of chopped nuts and one-half teaspoonful of salt. Cook slowly at very low temperature for half an hour. Serve on buttered toast.

Potatoes With Cheese.—Boil potatoes in their jackets, peel and cut into fine cubes, season with salt. Butter ramekins or glass custard cups and put in a layer of the potatoes, then a layer of grated cheese (the cheese should be rich and snappy), add another layer of potatoes and dot with bits of butter over the top. Set into a hot oven in a pan of water and heat until the cheese is melted. Unmold and serve at once.

Sunshine Cake.—Take six eggs, the yolks of three, one teaspoonful each of cream of tartar and flavoring, one-half teaspoonful of salt, one cupful each of sugar and flour. Add the sugar to the beaten yolks, then fold in the beaten whites and the flour which has been sifted with the cream of tartar and salt, add flavoring and pour the batter into an ungreased tube pan. Bake in a very slow oven at first, increasing the heat to brown lightly. Bake about one and one-half hours.

Pineapple Tarts.—Bake pastry shells in gem pans until firm but not brown. Fill with the following: To one can of crushed pineapple which has been carefully drained add one-half cupful of sugar and a tablespoonful or more of butter. Cook for eight minutes, stirring frequently. Pour into the pastry shells and bake until a film forms over the fruit. Serve with or without a meringue or whipped cream but garnished with red cherries. The pineapple juice may be used for a pudding sauce on steamed sunshine cake for dessert the next day.

Pineapple is almost universally well liked. It is nice for numberless desserts and especially well liked in salads.

The Camping Season.

As thousands are now fitting to the woods, streams and mountains, they should provide proper food to keep them in good health. Not every tourist can afford to stop at good hotels for meals. If not exercising by helping put up tents and preparing meals, the foods should be carefully chosen for digestibility. Too much starch and protein is the great fault in most eating. When taking long tramps and exercising freely any food goes well without any trouble.

When camping in one spot for a day a dessert of custard or fruits may be prepared and set into the cool earth or in a stream to chill, which will make a most gratifying dessert on a warm night.

Those who can enjoy the great outdoors, the fruit, the wild berries, the roots, leaves and herbs that are all so wholesome, not to mention the delightful mushroom which grows in such profusion everywhere, will benefit and radiate health every day.

Plenty of fruit and milk should form a large part of the diet. Too much coffee or tea, fried potatoes, ham and eggs and such foods will cause all kinds of fat-tending with the weather, the car, the company or the altitude, when the chief trouble is in oneself.

Watercress, which grows by the running streams, served with a bit of salt if one has nothing else, and bread and butter, will make a most tasty, satisfying meal.

With a little cottage cheese, which, too, may be bought at most farm-houses, a sliced orange and some lettuce, a few cherries or raspberries, you have a salad which is wholesome and rich in vitamins.

Adrift With Humor

BREAKING IT GENTLY

Murphy had been careless in handling the blasting powder in the quarry, and Duffy had been deputed to break the news gently to the widow.

HINTS TO FLAPPERS

"Never put up a poor mouth to your sweetie."

Versatile Chicken

Had an old hen.
Her name was Enza;
When I raised the kitchen window—
Infuenza.

Help Wanted

Man of the House—Don't say anything to your mistress, cook, but have you a policeman calling on you in the kitchen?

Valuable Obligation

"Do you recall the days you spent at college with pleasure?"
"Yes," answered Senator Sorghum. "They brought me many valuable experiences. The professors who loved a baseball game more than they did the classroom taught me a lot about human nature."—Washington Star.

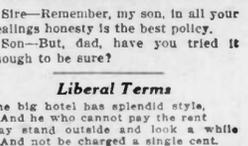

Happy World

Jerry—The landlord says if the rent isn't paid by Saturday—out we go.
Ted—Saturday! Fine. That gives us nothing to worry about for five days."

The First Qualification

"That boy of ours will be a big executive some day."
"What makes you think so?"
"It takes him so long to eat his lunch."

DOUBTING HIS JUDGMENT

Sire—Remember, my son, in all your dealings honesty is the best policy.
Son—But, dad, have you tried it enough to be sure?

Liberal Terms

The big hotel has splendid style,
And he who cannot pay the rent
May stand outside and look a while
And not be charged a single cent.

Always a Chance

Elder Sister—I suppose some day some man will come along and ask me to marry him.
Younger Sister—Oh, I wouldn't wonder—there seems to be a great demand for antiques nowadays.

Irresistible

"However did you manage to reconcile Madge and Marie?"
"I gave them a choice bit of gossip and asked them not to repeat it to each other."

Ever Notice?

Simpson—The newspaper printed your letter, didn't it? What makes you think the editors didn't agree with the statements you made?
Samson—They didn't correct the grammatical errors in it—or the misspelled words.

Fourth Degree

He—Was Jones a popular man?
She—When he died the coroner's jury returned a verdict of "justifiable suicide."

Might Do Better

Customer—Has this book got love in it?
Book Dealer—Sure.
Customer—Has it got humor in it?
Cowboys? Detectives? Action? Pep?
Book Dealer—What you want is a good dictionary.

Only Way

The Professor of Chemistry to the Student—What combination would you use to dissolve silver and gold?
"Get married."

Catastrophe Prevented

"Cat, taken to hospital, saved by stitches of surgeon," headlines a newspaper. A stitch in time saves nine lives.—Farm and Fireside.

No

Foolin'

The fight for business leadership is no monkey business in this day and age, as is evidenced by the latest report from commercial centers—and which has to do directly with the future of towns exactly the size of KEWASKUM

It has been learned that the big mail-order houses now maintain a department, the duty of whose staff is to read weekly newspapers from all over the country and continually make a survey of the different districts to learn of mail-order selling possibilities.

And, it is a fact—that immediately that department finds a town or country wherein the local merchants

are not using the local paper to advertise their merchandise to the trade—that district is immediately flooded with catalogues—because it is virgin territory and the mail-order houses have learned that they can do GOOD business there.

We pass this information to the leaders of KEWASKUM and assure them that all of our support is of course with them. We maintain a local advertising service which can be used to advantage—and for such service we make no extra charge. Come in or phone and we will call. Business goes to those who go after it.

CEPAR LAWN

A heavy rain storm visited this city Tuesday evening.

Mr. and Mrs. William Gudex and children visited at Kewaskum Sunday. John A. Gudex and son Leroy of West Elmore called at the former's father Sunday.

Mr. and Mrs. Clarence Stearns and son of Fond du Lac were here on business Wednesday.

Mr. and Mrs. William Majerius and children visited the Samuel Gudex family last Sunday.

Mr. and Mrs. Fritz Koening and son Fritz of West Bend called at the John L. Gudex home Thursday.

Mr. and Mrs. Joe Majerius and children of Kohler spent the Fourth with the William Majerius family.

CAMPBELLSPORT

Mr. and Mrs. John Guepe of Fond du Lac spent Monday here with his sister, Mrs. Stephen Bonesho.

Miss Kate Terlinden is making a two weeks' visit with her sister, Mrs. Wm. Kleinschay at Watertown.

Mrs. A. J. Sukawaty and children are spending a week with her sister, Mrs. Joseph Bauer at Beaver Dam.

Mr. and Mrs. Frank Strube and family of Milwaukee spent the week-end with Mr. and Mrs. Martin Knickel.

The Ladies' Aid of the M. E. church were entertained at the home of Mrs. John B. William on Tuesday afternoon.

Mr. and Mrs. Nicholas July and family of Milwaukee were guests of his brother, Rev. B. July and Miss Anna July Monday.

Jacob H. Kleinhans who spent four weeks in North and South Dakota, Yellowstone Park and Nebraska returned home Friday.

Otto and Robert Feuerhammer and Elmer Feuerhammer returned Tuesday from a four days' visit with the former's parents at Oxford.

Oscar Bonesho of Texas arrived on Monday for an indefinite visit with his mother, Mrs. Mary Bonesho and with the David Wenzel family.

Mr. and Mrs. Fred Tanner and family of Clintonville, Wm. Campbell Jr., Miss Ella Veidsteadt of Milwaukee were week-end guests of Mr. and Mrs. Wm. Campbell Sr.

Misses Lydia and Meta Terlinden Mrs. Edward Terlinden and daughter Virginia, Mr. and Mrs. Wm. Kleinschay spent Sunday at the Henry Kleinschay cottage at Lake Winnebago.

Mrs. Anna Steitz and son of Chicago arrived Friday for an extended visit with her mother, Mrs. M. Granger. Mrs. Granger was 102 years old in May. She is enjoying very good health despite her age.

Mr. and Mrs. Wallace Ward and daughters of Milwaukee spent Friday with relatives here while on their way to Leona and Wabeno. They returned here accompanied by Mr. and Mrs. Wm. Martin and family who spent the week-end at Woodruff.

EAST VALLEY

Mr. and Mrs. N. Garber of Chicago spent Friday at the P. Schiltz home.

Quite a few from here attended the firemen's picnic at Beechwood Sunday.

John Hammes of St. Michaels spent Sunday and Monday with his parents here.

Miss Cecelia Pesch of Fond du Lac spent the week-end with her parents here.

Mrs. Breier and son of Chicago spent Sunday with Mr. and Mrs. Peter Schiltz.

Mr. and Mrs. Jac. Schiltz and family of Milwaukee spent the week-end with relatives here.

Miss Celesta Pesch left Monday for Fond du Lac where she will be employed for some time.

John Schiltz and Lawrence Rinzel spent over the Fourth with relatives at Marshfield and Edgar.

Misses Ruth Reysen and Lorraine Pesch returned to their home after spending some time with relatives at Milwaukee.

Mr. and Mrs. John Seil of Cascade Mr. and Mrs. Peter Schiltz spent Monday evening with Mr. and Mrs. Julius Reysen and family.

Al. Rinzel, Josephine, Marie and Isabelle Blackmore spent from Saturday until Monday with the former's parents, Mr. and Mrs. P. Rinzel and family.

The following spent Sunday afternoon at the William Pesch home:

Mr. and Mrs. Ed. Kirsch and son, Mr. and Mrs. Alvin Kudek and son, Mr. and Mrs. Clarence Kudek, Bernice Steichen, Mrs. M. Rosbeck, Mr. and Mrs. Martin Rosbeck and family, Mrs. John Petersik, Mr. and Mrs. Frank Petersik, Mr. and Mrs. Joe Petersik, Frank Petersik and daughter Gertrude and Mr. and Mrs. John Ullrich, all of Milwaukee, Mr. and Mrs. John Petersik and daughter and Mr. and Mrs. Geo. Matthieu of Campbellsport, Mr. and Mrs. Alvin Westernman and Chas. Westernman of St. Bridgets, Roman Boegel of St. Kilian and Dr. Arnold Boegel of Theresa.

ROUND LAKE

Mrs. Sezmet and family are spending a week at their summer home here.

Clem Siermeister and Miss Beulah Calvey motored to Wausau and other places Friday.

Miss Dehlia Calvey and friend attended the band concert at Sheboygan Wednesday evening.

Miss Viola Metzfeld of Fond du Lac is spending a week's vacation with Beulah Calvey.

Mr. and Mrs. Henry Habeck and family visited over the Fourth at the Wm. Hennings home.

Mr. and Mrs. Edgar Meyer and family are spending a week's vacation at their home here.

Mr. Witzig and friend of Kewaskum were pleasant callers at the M. Calvey home Thursday evening.

Mrs. M. Calvey and daughter Dehlia and son Vincent attended the band concert at Kewaskum Wednesday.

A large crowd attended the 3rd and 4th of July celebration at the pavilion here, nearly 700 numbers were sold in all.

Atty. H. J. Engles of Chicago and the Misses Viola Metzfeld and Beulah Calvey attended the church picnic at Dotyville the Fourth.

There will be roller skating at the A. Seifert pavilion Saturday evening. Mr. Siefolt of Eden will have skates to rent. Everyone welcome.

What Your Profits Depend On

Farming can profit most by using the results of research, looking toward economical production, better quality, orderly distribution. This is applied common sense pure and simple. When a man engaged in any branch of the dairy industry is confronted with the question of whether it will pay him to invest money or time or both in promoting the big movements now going on for the bettering of milk, he should remember this outstanding fact, that the big men are doing it. There are lots of little men who are not. It's up to him to choose his company. Big men do not figure it a donation or expense when making up to date improvements for the better care of milk, and shipping milk to market of first quality only. Any work, time or money made use of for this purpose is an investment that is bound to yield good returns continually.
