

RADIO

"Fully Shielded" Radio Receivers

Plan Enhances Selectivity, Sensitiveness, and Amplification.

The superior performance of completely and carefully shielded receivers has led to the widespread adoption of the phrase "fully shielded" in connection with any set having a stray piece of sheet metal in its anatomy. "Shielding," so writes Edgar Felix in Radio Broadcast Magazine, "is generally considered as a sort of electrical mudguard which prevents the scattering of undesired electrons upon neighboring circuits. So indeed it is, but the significant influence of shielding upon the performance of a receiver is hardly indicated by this limited conception. The containment of the energy in every element of the receiver strictly to the performance of useful service, accomplished by effective shielding, tremendously enhances selectivity, sensitiveness, and permissible amplification of the instrument.

The Principal Results. "Specifically, the principal results of complete shielding are: (1) Compactness, permitting the embodiment of many stages of radio and audio amplification in a receiver of small proportions without destructive interferences; (2) greater permissible amplification because relatively large radio- and audio-frequency currents can be conducted through circuits without consequent coupling to neighboring stages; (3) stable neutralization throughout the wave-length range, because all unwanted inductive and capacitive coupling is eliminated; (4) increased selectivity resulting from the use of more stages of radio-frequency amplification with consequently greater filter action; (5) uniform amplification throughout the wave-length range without increased tendency toward self-oscillation at the higher frequencies; (6) elimination of electro-magnetic pick-up (except that coupling purposely introduced through the primary of each stage's transformer) from the antenna and succeeding stages and, with it, the resultant broadening tuning; (7) reduced influence of static and power line induction because pick-up is limited to the antenna circuit itself; (8) greater mechanical rigidity attained by supporting effect of substantial shielding and chassis construction; (9) fireproof wiring, largely concealed in enclosed cases; and (10) reduced losses due to dust and dirt on condenser plates and other exposed parts.

The theory of shielding is quite simple," continues Radio Broadcast. "Any circuit carrying a radio-frequency current is constantly surrounded by electromagnetic and electrostatic fields. The extent of these fields is proportional to the energy in the circuits. The greater the amplification, the greater the need for shielding or, in its absence, for great spacing between stages. With small amplification, no shielding is essential, although it may serve usefully even in a receiver consisting of but one stage of radio amplification combined with a detector. A receiver with four efficient stages of radio-frequency amplification, however, approaches the limit of practical amplification and also the upper limit of energy which practical shielding can contain.

"Experimenters who have tried to shield without a thorough understanding of its proper application have been known to argue against it because they have obtained poorer results by adding shields in their receivers. But to argue against any and all shielding because of an experience with misapplied shielding is like condemning a twelve-room house because it cannot be built on a twenty-five foot lot. Unless a receiver is specially designed for it, shielding is as likely to decrease efficiency as it is to improve it."

Exclusive Wave Length If Above 5,000 Watts

It has been approximated roughly that the carrier wave of a 109-watt station may create interference over a distance of 100 miles, a 500-watt station over 500 miles, a 1,000-watt station over 1,000 miles, and a 5,000-watt station over 5,000 miles. Therefore, the deduction is that 5,000-watt stations should not be assigned to the same wave length excepting when located on the Atlantic and Pacific coasts of the country. By the same process of reasoning, every station above 5,000 watts should be assigned an exclusive wave length.

Milkman Intercepts Radio Message for Customer

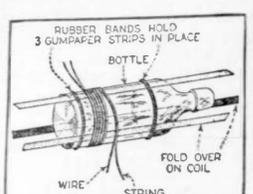

Hartford, Conn.—Before starting on his early morning deliveries, H. C. Jenon, a milkman of this city, makes a practice of listening in on his broadcast receiver. Recently he tuned down to the amateur phone stations on 150 meters and was very much startled to hear an amateur phone station in Ohio sending a message addressed to K. E. Warner, secretary of the American Radio Relay league, the amateur organization, at Hartford. Mr. Jenon, remembering that Mr. Warner was one of his regular customers, copied the message and delivered it on his regular round within the next hour.

Microphonic Tube Too Close to Loud Speaker

"Howling," says Radio Broadcast magazine, "results from a microphonic tube being within close range of the loud speaker. The most effective way to overcome howling due to micro-

To Make Coil Having Low Electrical Losses

The following is a description of a coil having very low electrical losses, and sufficient mechanical strength to enable it to be used under the most exacting conditions. This coil eliminates two undesirable features found in other low-loss coils, viz., the danger of short-circuiting turns, as in the "basket-weave" type, and the high distributed capacity, as in the "pick-the-bottle" type.

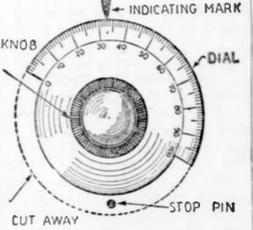

Showing Method Employed in Winding the Low-Loss Coil.

with the wire. Ordinary wrapping twine will be satisfactory for the smaller wire, but something bigger should be used for the larger sizes. When the correct number of turns have been wound on, fasten the end of the wire by another rubber band and remove the string. Apply a thick coat of collodion on the wire over the tape strip. Allow this to dry and put on a second thin coat. Moisten the tape not covered by the wire and collodion and press down while it is still sticky. When this dries, break the bottle and remove the completed coil.—Radio News.

Make Stop-Pin for Dial From Brass Escutcheon

Many of the older makes of variable condensers did not have stops built into them; so that they may be turned so far that the blank edge of the dial comes opposite the indicating mark on the panel, and the dial setting cannot be read without retuning the condenser. By cutting away the blank edge of the dial to a depth of about 3/8 inch, and leaving only the engraved edge (as shown in the illustration) a stop-pin can be used, which will prevent the dial from getting turned too far. The stop-pin should be driven into the panel on exactly the opposite side of the dial from the indicating mark on the panel. This stunt works particularly well with the old type of Remler dials, because they are of bakelite and cut very easily.

A stop-pin can be made out of a brass escutcheon pin with the head cut off. A hole which will just fit the pin snugly can be drilled into the panel opposite the indicating mark, and the escutcheon pin coated with glue and forced into the hole. It should be allowed to project about 3/8 inch, and the top should be rounded.—Radio News.

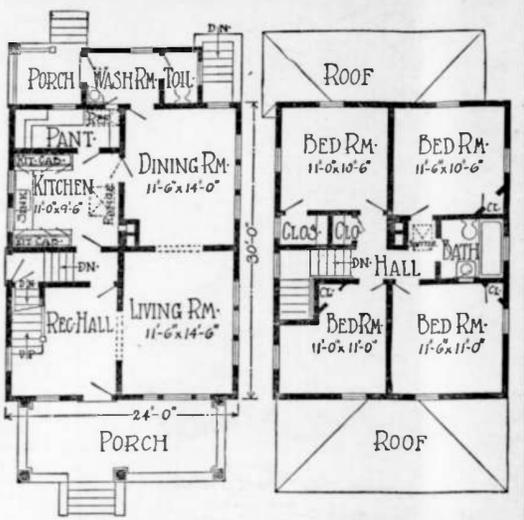

He Turns In on France to Find Out the Time

When the studio director of 310, the radio station at Melbourne, Australia, awakened one morning recently he discovered his watch had stopped. He also found that the only clock in his suburban home had run down. Scheduled to be at the studio at a certain time and having no means of learning the hour of day he had awakened he went to his receiving set and tuned in on various broadcast stations. Finally he got the station at Bordeaux, France, which sends out the time at regular intervals. By calculating the difference in time between Bordeaux and Melbourne he succeeded in learning, within five minutes, the correct time.

Follow the Dope!

In trying out a new hookup, do you follow the circuit diagram to the letter? If you don't, you probably will not get the results that the receiver is capable of giving. The published instruction for hooking up circuits should be strictly adhered to. If this is not done it is useless to complain that the circuit won't work and to burden others with questions as to why it doesn't.

Popular Square Type of House Makes for Low Cost, With No Waste Space

First Floor Plan. Second Floor Plan.

By WILLIAM A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1527 Prairie avenue, Chicago, Ill., and only include two-cent stamp for reply.

The square type of farm home has ever been popular, especially in the Middle Western states. It is an economical house to build, in that the foundations are straight and can be put in at the least possible cost. Then, too, there is no waste space in the house, which sometimes results from irregular wall and roof lines.

The home shown here, 24 by 30 feet, contains seven rooms, an unusually large reception hall, a washroom on

the first floor and a bathroom on the second. The arrangement and sizes of these rooms are shown on the floor plans.

There are many features to this house which will appeal to those who are contemplating building a new farm home. There is the wide, open porch at the front. This can be screened, or glazed, if desired. There is the large reception hall at the front, through which the kitchen can be reached. Stairs to both the second floor and basement run out of this hall. Each bedroom is a corner room, insuring light and ventilation.

Good Material Is Real Economy in Foundation

With the cost of building at a point where every dollar expended must be made to count a full 100 cents, the home-builder, the man who expects to be personally in touch with the operation, should be especially careful in the selection of materials.

What may appear to be justified savings in the original cost will be lost to the builder in the long run. In the average moderate priced house, it will be well to remember that the foundation is all-important. If a brick, stone or concrete foundation is provided, high-grade materials should be used and a careful selection made of the ingredients. Cement, lime, sand and stone are basic. Lime increases the strength of the whole foundation and at the same time insures water tightness.

Color and Trim Play Part in Home Beauty

In any decorative scheme, don't forget to consider the color of the woodwork.

When the wood used for window and door trim is oak, cypress, maple or birch, or any wood with a beautiful grain, a waterproof varnish will give luster and bring out the grain. Woods vary in shade from light to dark brown or red. The color scheme of the room should be kept in similar tones or warm colors. Contrasting colors can then be used in some of the furnishings to give the room animation.

The KITCHEN CABINET

(A 1927 Western Newspaper Union.)

"Wear a smile on your face, Keep a laugh in your heart, Let your lips bubble over with song: 'Twill lighten your load As you travel life's road And help other sinners along."

SUMMER PRESERVES

As preserving time is upon us, let us consider some of the old-fashioned recipes which have been cherished for years.

Preserved Peaches.—Peel perfect fruit and cut in halves, removing the stones. Drop the peaches into cold water to keep them from discoloring. When ready, drain carefully and for every five pounds of fruit, add four pounds of sugar, put one-third of the sugar with just enough of the water in which the peaches have been standing, to keep the sugar from burning. When well dissolved, put in a layer of peaches, and cover with a generous layer of the rest of the sugar, continue until all the fruit and sugar is used that the kettle will hold. Simmer until the fruit is transparent, skimming occasionally during the process. Take out the peaches with a skimmer and lay them on a platter, taking care not to crowd them. Put them in the sun to become firm. Roll the sirup until clear, removing all the scum. Return the peaches to the sirup just long enough to heat through. Pack in jars, putting a layer of fruit, then a layer of sirup until the jar is full. Seal as usual. If liked, a few of the meats from the stones may be cooked in the sirup, and added.

Tomato Preserves.—Peel very ripe but firm tomatoes, put them into a bowl and add equal weight of sugar. Let stand overnight. In the morning cook slowly, adding lemon slices or spices, such as ginger or cinnamon. When thick, seal as usual.

Preserved Pears.—Choose pears not over-ripe. For each pound of prepared pears, use three-fourths pound of sugar. Parboil the fruit in water to cover, remove and cool on a platter. Add the sugar to the water and boil; when the sugar is dissolved add the pears and simmer until the fruit is transparent. Allow one lemon for each ten pounds of fruit. Slice the lemon. Put the pears in jars, cook down the sirup and pour over them. Seal as usual.

Peach Chutney.—Prepare and peel three pounds of peaches. Put them into an agate pan, add a pint of vinegar and cook slowly until soft. Pound together in a mortar four ounces of onions, two ounces of garlic, five ounces of fresh ginger root. Add these to the peaches with six ounces each of raisins, minced nut seed and sugar. Add two ounces of dried chilies, a cupful of vinegar and simmer for ten minutes. Seal for winter.

When a cupful or less of leftover ment is at hand serve it with cooked macaroni, in layers with a white sauce. Bake until thoroughly hot and serve as a main dish.

Summer Drinks

There is nothing more satisfying to the taste and healthful as well, than fruit drinks. They are beneficial in toning up the system and thinning the blood. When one has provided a few quart of home-prepared grape juice, there are many ways of serving it for pleasant drinks. Add one-third as much ginger ale as grape juice to the glass, ice it and serve.

Grape Juice Nectar.—Bruise four sprigs of mint and add to a pint of grape juice with three tablespoons of lemon juice, a can of grated pineapple, one-half cupful of honey, a pinch of salt, four tablespoons of orange juice and a grating of nutmeg. Set in a cool place for an hour, then strain and serve with crushed ice added to each glass.

Loganberry and Ginger.—Chop one-half pound of preserved ginger, add four cupfuls of water and one cupful of honey or sugar. Cook gently for fifteen minutes, then stand for an hour. Blend three tablespoons of the ginger sirup with a cupful of loganberry juice, cool, strain, ice and serve.

Egg Lemonade.—Beat an egg or two and whip into a pitcher of lemonade. This makes a drink both nourishing and refreshing.

Coffee Ambrosia.—Make a quart of strong black coffee. Allow this to cool after straining, then add one-half cupful of sugar, a few drops of almond extract, a pinch of powdered mace, two cupfuls of fresh milk. Mix well and serve in glasses with a few spoonfuls of chopped ice and garnished with a spoonful of sweetened whipped cream.

Iced Tea With Mint.—Pound a pint of mint until the juice flows freely, then add two cupfuls of water and boil five minutes. Strain, add two and one-half teaspoonfuls of gelatin dissolved in half a cupful of orange juice. Strain and pour into a flat mold. Cut in squares when cold, the size of loaf sugar. Prepare ice tea, add each glass half full of crushed ice, add a square of the mint jelly and fill with iced tea.

Hope of the Eminent

"We eminent persons," said H. H. Ho, the sage of Chinatown, "parade our pictures to the world, hoping to be judged more by magnificent appearance than by what we write or speak."—Washington Star.

Important Consideration

Chap who says that it is better to complain to a man to his face than to do it behind his back forget to mention that it all depends on the size of the man.

ABOUT BEACH ENSEMBLES AND MATCHING PARASOLS

WHEN madam or mademoiselle lolls so happily, lazily under her vivid beach parasol or promades in the warm sands or perhaps prettily poses upon the pier as she does in this picture, she is expected to do so in gorgeous array.

In the selection of her beach robe, be it coolie coat or one of the large new shawl squares, her headgear, her sandals, likewise her bright parasol and gay cushions and all the accoutrement which goes to make up a perfect ensemble, nillady of fashion ex-

Silk in Vivid Stripes Popular.

cludes as fastidious taste as she does in the choosing of her most formal and fetching ballroom attire. And when she does just so, behold! a radiant picture of decorative display on the beach, such as this illustration sets forth.

For this "useful as well as ornamental" beach robe striped khaki kool is the preferred medium. The cap is also of this Romany-striped material. At every step of the way along this sandy shore one meets these sirens of the sea clad in spectacular beach array. Among the most popular beach coats which affect the picturesque in color are many of smart linen crash dashing printed, then bordered by way of contrast with black satin.

Of all the interesting beach styles none are perhaps more interesting, than are the capes and coats made of heavy unbleached muslin, decorated to simulate hand-painting. For instance an

headwear, neckwear, footwear, gloves, handbags, parasol, jewelry, bouquiers and other things down to the minutest detail. Especially is this so, since fashion has become so arbitrary on the subject, according as an evidence of correct dress, indicates than a perfectly appointed—used ensemble.

This demand for harmony in dress has resulted in a genuine "put together" spirit among couturiers, milliner, bootmaker, jeweler and others, who contribute to the containing of the fair sex. It is quite the proper thing to buy one's silk shoes at one's favorite bootery, in order to insure a perfect match to one's slippers, and as likely as not the salesmen will insist on showing you a handbag made of the selfsame leathers as the shoes you are considering.

This summer, matching parasols have especially entered into the scheme of things. Maybe it is a sub-

Parasols and Other Accessories.

artful all-enveloping cape with scarves at the throat is bordered to a considerable depth with a huge colorful fish and seashell design.

This new fashion of hand-painted unbleached muslin for resort wear bids fair to assume the proportions of a widespread vogue before the summer is past. One can make such clever coolie coats of the muslin, painting them as amusingly and gorgeously gay as one chooses.

Gingham, too, is receiving its share of notice for beach apparel and bathing suits. Cretonne, also, continues to entice the beach style, as it appears made up in robes, parasols,

shade of scenic print silk to match the scarf and hat which nillady chooses to perfect her ensemble such as is shown in this picture.

The latest fash for handbags and parasols to show some relationship, perhaps in color, perhaps in material. Snakeskin trimmings are finding their way into the realm of women's fashion most successfully. A new twist in the snakeskin handbag, with an interworking of the snakeskin in an accompanying umbrella. The illustration shows clever parasol and handbag sets, such as would add smartness to the street costume. Other a belt of snakeskin accompanies a parasol and handbag trimmed with the same.

Ribbon plays an important part in relating the hat to the parasol in that the identical kind used to trim the former also borders the latter. Outdoor gossamer ribbon is mostly favored for this.

MOTOR CAMPING MADE PLEASURE

New York Grounds Are Well Policed and Rules Rigidly Enforced.

Motor camping would be an unmitigated pleasure were all the camp sites as clean and free from rubbish as those in the New York state forest preserves, according to Earle B. Knox, writing in the Field and Stream Magazine.

The chief reason for the superiority of the New York camp grounds over those in many other parts of the country, Mr. Knox believes, lies in the fact that they are well policed and that rules are rigidly enforced.

Some of these rules which enable the state to render the public the greatest possible service with these camps, tents and open fireplaces, and at the same time keep them in harmony with their wild surroundings, are as follows:

1. No fires except for cooking, warmth or sun-drying purposes are permitted. No fire shall be lighted until all inflammable material is removed to prevent its spread.
2. Lighted matches, cigars, cigarettes or burning tobacco must not be deposited or left where they may cause fires.
3. No official sign posted, or statement maintained under permit, shall be defaced.
4. Peeling of bark or injuring trees is prohibited.
5. Dead or down wood may be used for fuel by temporary campers.

Sanitation Maintained.
Camps and adjacent grounds must be maintained in a clean and sanitary condition. Garbage and refuse must either be buried, removed, or burned. Waste materials must not be thrown into the waters, or waters polluted.

7. No tents (except canvas without platform) or wooden structures shall be erected or maintained in the forest preserve, except under written permission from the conservation commission. Tar paper shall not be used, except for roofs of open camps erected under a permit.

8. No one may claim particular site from year to year or the exclusive use of the same.

9. The use of the forest preserves or the improvements thereon for private revenues or commercial purposes is prohibited.

10. Any occupied tent or structure may be removed by the commission.

11. All campers will be held responsible for compliance with these rules, and any person responsible for injury of state property will be held liable for damages and penalty.

Perfect Drivers Great Menace in Large Cities

The mediocre automobile driver must save the traffic situation in our large cities today, says a traffic expert.

The inferior and the perfect drivers are causing all the difficulties and are responsible for accidents and traffic hiccups.

It is not difficult to understand how the inferior driver causes accidents to his own and other machines, but the "perfect" driver appears too perfect to be blamed.

The "perfect" driver never gets into an accident himself. He never violates a traffic rule. He never gives vicious traffic cops a chance to enjoy themselves at his expense.

The "perfect" driver careens down the street just to and not exceeding the maximum traffic speed limit. Pedestrians see him a block away, and even if they have the right of way they hesitate to cross the street as the "perfect" driver speeds toward the crossing.

However, he makes a "perfect" stop just to and not beyond the danger line, breaking no traffic laws but frightening pedestrians so that they fear to cross the street while they have a chance.

The "perfect" driver is always right. He is so absolutely and recklessly tight that other drivers and pedestrians fear him. He is the most disrupting element in the traffic situation.

Auto Lock Is Invented for Forgetful Drivers

Locks to safeguard automobile drivers against their own carelessness are being tested in the underwriters' laboratories at Chicago.

The forgetfulness of drivers of insured cars who park their cars unhooked and walk away with the feeling that the insurance company "can do the worrying" has induced the National Automobile Underwriters' conference to withdraw recognition of locking devices in the writing of insurance. To meet the situation a new lock is being developed.

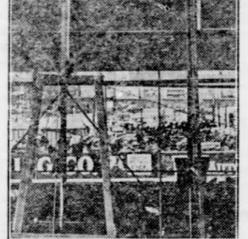

The new lock is so designed that when the driver switches off the ignition to stop the engine he automatically locks the car. Few drivers, insurance companies find, are in the habit of forgetting that an engine needs gasoline to keep running.

The breaking of the ignition circuit is almost a subconscious operation with the average driver.

The laboratories have recognized a number of locks so made that the mechanism which breaks the circuit also locks the car, but this lock is the first that performs both operations at the same time.

Dependable Road Burner Rises to High Position

An automobile dealer with a lot of ingenuity decided it wouldn't be a bad idea to advertise his wares, so he

Unique Advertisement. hoisted an old flivver 125 feet higher than the street level as an advertising attraction. It works!

American Diplomat Will Not Junk Old Machines

Larz Anderson, American diplomat of Brookline, Mass., believes that automobiles have personalities just like horses and refuses to junk any car he ever owned. Buying cars since the year one of automobile history, Anderson has probably the greatest assortment of types, special bodies, motors and what-not to be found in the world on his estate, "Weld." Around the whitewashed walls of the garage hang the portraits of his notable motor family. Each has its photograph taken in the days of its prime.

AUTOMOBILE HINTS

The muffler should be cleaned out at least once a year.

The majority of automobile accidents occur at intersections.

Humans don't really need intuition except when meeting a one-eyed car at night.

Springs should be tested to see that the tension is correct after the valves are ground.

You get fewer miles to the gallon in an expensive car, but they are horizontal miles.

The Central Railroad of New Jersey actually won a verdict of \$35 for injury of an engine from a truck. It is very seldom that Goliath gets damaged from David!

BOSTON "MOTOR MART" IS LARGEST GARAGE

"Motor Mart" at Park Square, Boston, is the largest garage in the world. It is eight stories high, and has 52,500 square feet per story. It is capable of housing 2,500 automobiles.

When Buying New Car
There are ten vital features which the buyer should demand when purchasing an automobile. They are:

1. Beauty.
2. Dependability.
3. Economy.
4. Power.
5. Riding comfort.
6. Handling ease.
7. Fine materials.
8. Precision in workmanship.

The 1927 used car, like the 1927 new car, is better than its predecessor.

A cynic is a man who sees nothing but the detours along the straight and narrow path.

The pedestrian who allows the grass to grow under his feet soon finds it growing over his head.

If one has given a clear, concise signal, the man behind has no valid excuse when he runs into one's car.

Monarch is the only nationally advertised brand of Quality Food Products sold exclusively through the mail. Monarch and operates their own mills.

British Put Capital in Agricultural Land

A clear idea of the vast importance of agriculture in England and Wales is provided by the census relating to the year 1925, that has recently been issued by the ministry of agriculture.

The present census shows that the value of agricultural land and buildings in England and Wales amounts to \$315,000,000; that a further \$35,000,000 is represented by working capital on farms, giving a total of \$1,800,000,000 (roughly \$5,500,000,000) invested in agriculture.

The last agricultural census in England and Wales was taken in 1908, since which time changes of the most far-reaching character have taken place in English agriculture. The present census, however, is far more comprehensive than was that taken in 1908, and for this reason comparison between present conditions and those existing 17 years ago are not possible in every particular.

Good Thing in a Way

Representative Vail on his return from Europe said of the relations between France and Italy:

"Oh, well, it's a good thing in a way. It keeps both nations at concert pitch—keeps them at their best. It's like the story:

"Two ladies were talking at the silver wedding anniversary of a very headstrong and arrogant couple whose marriage, against all probabilities, had turned out a great success.

"I never thought George would make her a good husband," said the first lady.

"George," said the second lady, "made her a good wife. She made him a good husband."

Fine Telephone Service

For two and a half cents the telephone service in Stockholm or Gothenburg will call you at any hour specified, will tell you the exact time and answer calls in case you are ill or away.

It also will take messages while you are out, or even away over the weekend, and deliver them when you return, call a busy number as soon as it is free and perform several other services usually done by an office assistant or valet.

The services are performed by special exchanges.

Preserving Hailstones

Two hailstones, each about an inch and a half in diameter, which fell at Elizabethtown, Pa., during a severe hailstorm in July, 1925, are still preserved by H. T. Horst. He is keeping the bits of ice in his refrigerating plant.

Every time a married man says that he is free from worry and care other married men give him the merry grin.

It intimidates the public somewhat to tell it that something it likes is "immoral," even if it isn't.

Farmers never have nervous prostration. That's what the outdoors does for them.

If the movie actor is a handsome chap, the play doesn't need much of a plot.

It is a question whether quotations from dead statesmen influence anybody.

It is difficult to get an old man to appreciate jokes other than his own.

It is a gay's work to make every man you meet glad he met you.

No wise person ever goes to a confidence man in confidence.

The poet's new suit is often only an "Owed to a Tailor."

This earth is our inn, not our home.

—J. H. Vincent.

Comedy Captions

A prize competition in the London Saturday Review, set by Princess Bithoco, called for humorous lines such as appear on the funny films. We select a few of those elicited:

"The only man who was not spoiled by being lionized was Daniel."

"He suffered severely from cold feet, but they were not his own."

"I left her in the Grand Canyon trying to get the last word with an echo."

"It was a town so full of lawyers that they changed the hotel's name to 'Wrights.'"

"It was the sort of street in which Cupid shot only with Pierce Arrows."

—Boston Transcript.

Knew Not What He Ate

A Mexican and an American who worked on the night shift of a Kansas salt plant ate their midnight lunch together. On several occasions the Mexican had rabbit meat in his pail, and he shared his supply with his comrade.

"Where do you get rabbits, Jose?" the American asked one night. "I can't find any."

"My wife she get 'em," Jose replied. "She said ever' night they come 'round house and make noise. She shoot 'em."

"Noise? Rabbits don't make noise."

"Sure," Jose asserted positively. "Go meow, meow."—Exchange.

Bible 1,000 Years Old

Parts of a hand-written Hebrew Bible said to be more than 1,000 years old have been discovered in the Jewish synagogue of Buchara, a town in the Russian province of Georgia, according to reports from Leningrad.

Thankful for Seeing Them

"What a lot of automobiles one sees nowadays," remarked the tall man.

"Yes, thank heaven!" returned his friend. "It's the ones we don't see that send us to the hospital."

Crowding Londoners

Statisticians have succeeded in figuring out that out of every 10,000 people included in the London census, 222 are Scotch and 230 Irish.

MANY NOTICEABLE IMPROVEMENTS AT ST. MICHAELS PARISH GROUNDS

Extensive improvements were made this summer by the St. Michaels congregation at St. Michaels. All parish buildings, church, school, parsonage, sister's residence, St. Michaels hall, cemetery chapel, all received a new coat of paint, one beautiful color effect carried all through, cream, with ivory and apple green trimmings. The crucifixion group on the cemetery was also redecorated. All the painting, which is a first class job in every respect was done by Mr. Philip Volm and his sons Ewald and Alois of St. Bridget's, town of Wayne. All paints and materials used were furnished by the H. J. Lay Lumber Co., of Kewaskum. St. Michaels congregation feels justly proud of their group of parochial buildings, which figure among the finest in this part of the state, as well as of the parish grounds and cemetery which are always kept in the best condition, a credit to those in charge.

St. Michaels congregation is one of the oldest parishes of the Archdiocese of Milwaukee, dating back to 1846. Six years ago the parish celebrated their diamond jubilee with great festivities.
Rev. J. F. Beyer, the pastor of St. Michaels congregation for the past 16 years, has always shown a great interest in the parish and in his flock, guiding the spiritual and material interests of his people.

AUTHORIZED Ford SALES SERVICE

Be Ready for Any Condition at Harvest

McCormick and Deering grain binders have long enjoyed a world-wide reputation for substantial construction and ability to stand up and do accurate work year after year. Now you can buy in one machine the best features of both the McCormick and Deering, with the addition of many new improvements.

The McCormick-Deering grain binder is the most substantially built and lightest running grain binder on the market. The improvements which enable it to cut grain so successfully and tie bundles with such consistent accuracy, also include features which facilitate adjustments when they are necessary.

Instead of wasting time in trying to make an old binder work another year, instead of risking the loss of grain, better see us now and place your order for a new improved McCormick-Deering binder, so that you will be fully prepared to meet every emergency when harvest time comes.

Don't Miss This Excellent Programme

ALMOST everyone ordering printed matter feels that they want "something different." They sense that to obtain such printing they must have either one or two things—special cuts or type. To outline or specify "just what they want" is a task beyond one inexperienced in the craftsmanship of printing.

When you let us do your printing you get all of this service free of extra charge. We know just which type faces to use to carry your message in the most effective way. In addition to this we have a complete line of cuts to illustrate your message—pictures which will attract readers and make them read.

No matter what kind of printing you want we can do it—deliver the job promptly—and at a price far below what you may pay elsewhere. Try us.

—Leo Marx of Milwaukee, son of Mrs. Martha Marx, formerly of this village, underwent an operation at the Hanover hospital last Saturday for the removal of his appendix. From late reports received here, Leo is getting along very nicely.

WATER DOUSING CASE IS AIRED

A case that attracted a good deal of local interest and crowded the court room was heard before Justice Anton Rahn last night. The complainant was John Loose who charged Mrs. Fred Weissbach with assault by throwing water. The defendant was found guilty and fined \$5.00 and costs or a total of \$13.30. The suit resulted when Loose, Frank Prochaska, Harold Jaek and George Nicolaus while fishing near the Weissbach property on Cedar Creek were showered with a pail of water thrown by Mrs. Weissbach. Loose received the full dousing and brought the action. The defendant admitted her guilt but said the act was committed in self defense and under great provocation. Justice Rahn after hearing both sides of the case, found the defendant guilty, who declared she would start action against the boys for parking a car without lights and would also appeal the action tried last night.—Cedarburg News.

KEWASKUM, WIS.

ST. KILIAN

Lester Strachota of Milwaukee is spending his vacation at his home here.

Leo Strobel and Russell Jaeger visited Sunday with the former's niece, Dr. and Mrs. Frank Romaine at New Holstein.

Mr. and Mrs. E. German, Miss Marie Flasch and Leo Strobel left Wednesday for Colby and other northern parts of the state for a several days' stay.

Misses Lucile and Frances Flasch entertained the following last Sunday: Rose Helge of New Ulm, Minn., Ida Dorn and Marie Cattanney of Fond du Lac, Esther Utchig, Lorraine and Fred Blonigan and Finter Schaub of Mt. Calvary.

There will be an auction sale of household articles and numerous other things at the residence of Mrs. K. Strachota Tuesday afternoon, July 26 at 1:00 o'clock sharp. Mrs. Strachota and family expect to move to Milwaukee in the near future.

The Port Washington Columbus defeated the Saint Kilian Saints last Sunday on the home grounds by a score of 19 to 10. There might have been a sure possibility for the Saints to get the game had four of their players been able to participate. Ashford will meet the Saints on the home grounds here next Sunday.

—Mr. and Mrs. Roman Backhaus and family, Mr. and Mrs. Arthur Stark and daughter Sarah and Nathan Quandt spent Sunday with Mr. and Mrs. Art. Eisenhut and family at Milwaukee. They were accompanied there by Lucile Eisenhut, who spent two weeks here.

—Walter Knickel, formerly residing here, but now at West Bend, was a buddy of Lieut. Lester J. Maitland, who made an aeroplane flight to Hawaii. Mr. and Mrs. Knickel were at Milwaukee Tuesday to attend the reception given the aviator.

—Figures recently compiled by the General Federation of Women's Clubs show that the greatest per family ownership of motor cars is in small communities, says a recent issue of Trends and Indications, published by Dorrance, Sullivan & Company.

Doings at Our State Capital

Madison—Reorganization of the state conservation commission to provide for a non-salaried body of six members received final approval of the Wisconsin legislature and awaits only the signature of Gov. Fred R. Zimmerman before taking effect.

The assembly, killing four attempted amendments of Senator R. Bruce Johnson's bill, concurred with the senate's passage of the proposal by a vote of 77 to 6.

One salaried commissioner administers the work of the conservation department under the system now in effect. The bill passed is patterned after the Pennsylvania plan, providing for six non-salaried commissioners and a paid executive officer under their direction. Expenses are allowed these commissioners while in attendance upon departmental duties.

Power to close seasons of fish and game in any locality in cases of emergency, to designate fish and game sanctuaries, acquire lands for preserves, forestry or park purposes and to regulate forestry matters is provided in the bill.

The action by the assembly is a complete victory for Gov. Zimmerman, who backed the senate bill, even to the extent of saying that he would call a special session if the measure were not passed.

After almost three hours' debate, the senate, by a vote of 16 to 13, killed the bill by Senator John E. Cashman of Denmark, to make \$3,000,000 available eventually for construction of a memorial to the late Senator Robert M. La Follette.

The Schumann bill calling for abolition of the marketing department, the livestock sanitary board and the land settlement board and placing their duties under the agricultural commission, had been advanced to a third reading but was killed in the senate by a vote of 15 to 13.

A bill was passed by the assembly designating the all Wisconsin legion band with headquarters at Appleton as the official state band, providing an appropriation of \$5,000 towards sending it to Paris to the American Legion convention in September, and further providing for a band contest each year under auspices of the university school of music to determine the official state band. This proposal now awaits action in the senate.

Comprehensive changes in the administration of the state income tax law, proposed in a bill by Sen. William L. Smith, received final endorsement of the senate and the bill was sent to the assembly by a vote of 18 to 8. A similar bill already has received the endorsement of the lower house.

Among other changes the bill calls for payment of income taxes on a three-year average basis instead of on earnings of individual years.

The bill is designed to simplify the tax law. A new method of figuring exemptions for individuals is provided. Under the present law an individual is allowed exemption on \$900 of earnings while a husband and wife are allowed exemption on \$1,000. The new plan would figure the tax on the basis of the entire income and then permit subtracting of \$8 from the total amount. Husband and wife with a single income would subtract \$17.50 on the same basis. Three dollars would be subtracted for the support of each minor child.

A bill designed to "clean up" the loose ends of the state automobile laws in line with the recommendation of the 1926 Hoover conference at Washington, was passed by the Wisconsin senate.

Under provisions of the bill the use of spark plug whistles is prohibited entirely, use of siren horns is extended to include traffic enforcement officials and such officers as are required to be equipped with sirens in addition to regular horns.

The bill also raised the speed limit on vehicles weighing three tons or more, advancing it from 20 to 30 miles an hour and on vehicles weighing six tons or more, advanced from 16 to 25 miles per hour.

By a vote of 21 to 9, the senate voted to abolish the board of public affairs and create a director of budget. By a vote of 61 to 24 the assembly approved the joint resolution by Assemblyman Alvin C. Reis providing for state acquisition and maintenance of power. The measure is a constitutional amendment.

Salaries of circuit judges are increased from \$9,500 to \$8,000 under a senate bill concurred in by the assembly.

The bill of Assemblyman Richard Kamke, Merrill, to abolish legalized boxing bouts in this state was defeated in the assembly by a vote of 52 to 24.

Madison—After two days of a membership campaign the Northern Wisconsin Co-operative Tobacco pool has announced that 1,000,000 pounds of tobacco had been signed on 200 new contracts.

Kaukauna—Three farm organizations of this district will hold a joint picnic here Aug. 14. Groups participating are the Farmers' Grange, the Equity Shippers' association and the Wisconsin Cheese Producers' federation.

Beloit—Jimmie, 18-month-old son of Mr. and Mrs. James Byrd of Rockton, was burned, perhaps fatally, when he tipped a pan of scalding water upon himself from a kitchen stove.

Blanchardville—Historic Hauges church, the oldest in the Hauges synod, will celebrate its seventy-fifth anniversary here in August. The church, now being repaired to welcome homecomers, has not been changed in the slightest detail from the original structure; except for replacement of weather-beaten siding.

News of Badger State

Oconto—Believing that the manufacture and sale of real beer is coming back before very long, H. F. Muehrcke, this city, has bought the properties here of the Oconto Brewing Co., which once supplied beer to a large district in this part of the state.

Galesville—The Galesville Canning Co. began its season's run of canning peas, operating its plant at full capacity with a force of more than 100 men and women. The plant usually has a six weeks' run, but is being operated on a decreased acreage this year. But 450 acres were allotted to growers this year.

Marshfield—Dates of the seven fairs comprising the Central Wisconsin Fair circuit have been fixed as follows: Merrill, Aug. 15 to 19; Wausau, Aug. 22 to 27; Neillsville, Aug. 31 to Sept. 2; Marshfield, Sept. 5 to 8; Chippewa Falls, Sept. 13 to 15; La Crosse, Sept. 20 to 24; Viroqua, Sept. 27 to 30.

Antigo—The Kraft Cheese Co. expects to begin the manufacture of powdered milk in its plant here about Aug. 1. Installation of equipment is now in progress. The milk powder, it is said, will be used in the manufacture of a new baby food. Other dairy products will also enter into its composition.

Marinette—The war department has granted permission to Lieut. Lester J. Maitland, Milwaukee, pilot on the trans-Pacific airplane flight from California to Hawaii, to come to Marinette, Aug. 18 to 20 for the State American Legion convention, according to a telegram received here by S. E. Eastman, commander of the local post.

Florence—An order to close Tourist inn leaves but one roadhouse in the once notorious "Little Hurley" district, for two other places, the Green house and Kelly's place on the federal highway between here and Iron Mountain, were burned last week. Both had been padlocked. The fifth place, Tar Paper Shack, burned about a year ago.

Sturgeon Bay—Door county's strawberry harvest will end this week with approximately 5,000 cases shipped. The crop is triple that of 1925, when 1,650 cases were shipped and is almost double that of 1925, but is still far short of record years. The most prosperous year was 1924, when 18,720 cases were harvested while 14,000 cases were picked in 1923.

Madison—The construction of the new Lutheran hospital visioned by the late Torger G. Thompson of Deerfield is assured. It was announced here by the Rev. O. G. U. Siljan of Bethel Lutheran church. Mr. Thompson, who died in 1924, bequeathed \$150,000 towards the hospital, providing that an additional \$100,000 be raised for a building costing \$250,000. The additional \$100,000 has been pledged.

Lake Mills—Repeating her record breaking performance, begun last year as a senior 2-year-old, Milford Ludwig Bess Burke has again freshened and established two new records for Wisconsin. She has produced, as a senior 3-year-old, 30.35 pounds of butter equivalent in seven days from 718 pounds of milk, and 124.08 pounds of fat, measured in butter, from 2,865.3 pounds of milk in 30 days. These are both state milk records.

Sturgeon Bay—The cherry crop in Door county will be much better than was predicted during the June drought. Due to an unfavorable winter and a long, cold spring, the cherry crop will fall far below the output last year, however. The early Richmonds are extremely poor, but the Montmorency variety will yield much better than was at first expected, growers say. It is expected that the crop will be about one-third as large as last season, when more than \$1,000,000 worth of cherries were sold.

Milwaukee—Market quotations: Butter—Creamery, fresh extras, tubs, 40c; extra firsts, 38@39c. Cheese—Twins, 2 1/2 @ 22c; daisies, 22 @ 22 1/2 c; longhorns, 22 1/2 @ 23c; brick, 22 1/2 @ 23c; limburger, 21 @ 21 1/2 c. Eggs—Fresh gathered firsts, 24 @ 24 1/2 c. Poultry—Fowls, 18 @ 21c; springers, 25 @ 29c; broilers, 22c; roosters, 16c; turkeys, 18 @ 22c; geese, 14 @ 18c. Poultry—Wisconsin, 10-lb. sacks, new, \$1.75 @ 2.50. Barley—Choice to fancy, \$4 @ 85c; fair to good, 80 @ 84c. Corn—No. 3 yellow, \$1.02 1/2 @ 1.03 1/2; No. 3 white, \$1.01 1/2 @ 1.02 1/2. Oats—No. 3 white, \$8 @ 8 1/2 c. Hys—No. 2, \$1.04 @ 1.05. Hogs—Fair to best butchers, \$9.25 @ 10.25; fair to good lights, \$8.50 @ 10.40; pigs, \$7.00 @ 9.00. Cattle—Steers, fair to choice, \$8.00 @ 13.00; heifers, \$8.00 @ 9.50; cows, \$5.00 @ 7.00; calves, \$12.00 @ 13.50. Sheep—Spring lambs, good to choice, \$13.00 @ 13.50; fair to good, \$11.00 @ 13.00; ewes, \$3.50 @ 6.50.

Green Bay—Undersheriff Michael E. Ryan, 53, and his father, Thomas Ryan, 94, died within 24 hours, the officer dropping dead as he was taking a prisoner to a train and the father after a long illness.

Darlington—The Lafayette County State bank was closed here following a decision of the board of directors to liquidate. Inability to collect sufficient of its outstanding paper to operate is said to have prompted the action.

Minocqua—While Elwyn West was plotting an airplane near Squirrel Lake, he was attacked by two American eagles, apparently angered because the plane approached their nest.

Tomah—Construction of a rail reclamation shop has been authorized for Tomah, according to announcement received by Supt. John Reinher from Milwaukee road officials. Selection of the site on the railway grounds and other preliminary arrangements have already been made, and work on the new building will start at once.

BRITISH YIELD U. S. PARITY IN CRUISERS

Japan Third Under Tentative 12-12-8 Ratio for 10,000-Ton War Vessels.

Geneva.—Twelve 10,000-ton cruisers for the United States, twelve for Great Britain and eight for Japan—such is the tentative agreement reported to have been reached at a private meeting of the principal delegates to the tripartite naval conference.

But though the conference has been revived by the mediation of the Japanese and the conciliatory attitude of the British, difficulties are certain to be encountered, according to observers.

The outstanding problem remaining is the size of the smaller cruisers and the caliber of the guns to be mounted. The British spokesman said that it would be exceedingly difficult for Great Britain to agree to even the reduced number of cruisers, as now proposed, unless the Americans and Japanese were ready to lessen the displacement in the second category of six cruisers and restrict the guns to six inches.

But the Americans may even ask the right to have the maximum of the second category placed at 8,000 tons instead of keeping it at 7,500, which represents the indefinite tonnage of the Omaha class of cruisers. The British tendency is to restrict the size to 6,000 tons and to keep eight-inch guns off the seas unless installed on 10,000-ton cruisers.

The American delegates apparently are aiming to convince the British that the American navy, whatever guns are carried, is not built against Great Britain because of close Anglo-American friendship.

The Americans point out that the British navy will be superior to the American up to the date of the termination of the projected treaty, no matter how fast Uncle Sam may lay down warships.

A preliminary Anglo-Japanese understanding concerning maintenance in commission of obsolete cruisers, it is believed, can be worked out.

As to submarines, it is deemed unlikely Japan will insist upon parity with the United States, merely asking for a proportion better than 5-5-3 established at Washington for capital ships.

If the alleged tentative agreement concerning 10,000-ton cruisers stands, it means a ratio of 5-5-3 in this particular warship, thus improving Japan's position.

Great Britain already possesses four 9,500-ton cruisers of the Hawkins class, and is building fourteen large cruisers, all but one of which have 10,000 tons displacement, and it has a program for nine other 10,000-tonners.

It is obvious, the British spokesman remarked, that the British admiralty must sacrifice altogether their building program in big cruisers and cease construction of some of those already under way if 12-12-8 is actually accepted as the tri-power proportion in 10,000-ton cruisers.

"All this," he added, "not only implies conciliation on our part, but the actual loss of a considerable sum of money, as it inevitably involves cancellation of contracts."

Ten Bathers Drowned in Chicago Territory Chicago.—Ten persons—a girl, a banker, four other men, and four boys—were drowned on holiday outings in the lower end of Lake Michigan or tributary waters.

Three of the deaths were directly due to a strong undertow on the beaches near Gary.

Five of the drowned, including the girl and the banker, met death when they pushed aside considerations of personal safety and went to the assistance of friends or relatives who were sinking. The dead include: Anthony Lucas, Sr., forty; Anthony Lucas, Jr., his son, nine; Miss Elsie Owen, eighteen; Steve Watson, twenty-four; Charles Jarmuth, thirty-five; Louis Dolewski, fifty-six; Adolph Wojewnik, eleven; Walter Wojewnik, his brother, nine; John Isom, colored, eight, all of Chicago, and Otto Brzesneski, thirty-three, of Calumet City.

Nine Lynchings in South in First Half of Year Tuskegee, Ala.—Nine lynchings were recorded during the first half of 1927 by the department of records and research at Tuskegee Normal and Industrial institute here. All of the persons lynched were negroes, the statement said, and were distributed among the states as follows: Arkansas, 2; Louisiana, 1; Mississippi, 1; Missouri, 1, and Texas 1.

\$291 an Acre for Iowa Land Cedar Rapids, Iowa.—Aaron B. Giegerich purchased the 42-acre farm of Emory B. Yoder here for \$12,240, or \$291 the rate of more than \$291 an acre.

9 Plunge Over Cliff Portland, Ore.—Dr. Stanton W. Stryker, prominent dentist, died on Mount Hood from injuries received when an alpenstock pierced his body when he and nine others in the party fell over a fifty-foot precipice.

30,000 Bushels Peaches Yield Mount Vernon, Ill.—The orchards of Ralph and Jurett McCowan, near Watsonville, will produce a record peach yield of 30,000 bushels this year, it is estimated by the owners.

Eighteen Governors to Attend Lansing, Mich.—Gov. Fred W. Green of Michigan announces that 18 governors have expressed their intentions of attending the governors' conference at Mackinac Island July 23 to 26.

Hoover to Tour Flood Area Washington.—Secretary Hoover intends making a further inspection of the Mississippi flood area early in the fall. If present plans are followed, the tour will begin September 7.

LODGE'S FOE DIES

William A. Gaston.

Barre, Mass.—William A. Gaston, Boston financier and prominent in Massachusetts politics, is dead here. He was sixty-eight. In 1922 he ran for senator against the late Henry Cabot Lodge.

U. S. TROOPS AFTER NICARAGUAN OUTLAW

Kellogg Orders Reprisal Following Sandino's Attack.

Washington.—Stirred by the attack of Nicaraguan forces under General Sandino on American marines at Ocotal, killing one marine and wounding two, Secretary of State Kellogg served notice that the American government will hunt Sandino as an outlaw.

Sandino, with far superior forces, attacked eighty-seven American marines and Nicaraguan national guardsmen, and after sixteen hours of fighting 300 of his men were slain and the rest routed, Charles B. Eberhart, American minister at Managua, reported.

"It was a very unwise move on Sandino's part," observed Secretary of the Navy Wilbur. The attack was accepted as Sandino's answer to the American demand that he disband and disarm his forces.

After the battle had raged for hours marine planes flew over the Nicaraguan forces, peppering them with machine gun bullets.

It was in reply to a letter from William Green, president of the American Federation of Labor, protesting against American "interference" in Nicaragua, that Kellogg revealed the purpose of this government to pursue Sandino as a bandit.

Secretary Kellogg, in his letter to President Green, said in part: "I have your letter in which you quote a telegram from the delegates of the Nicaraguan Federation of Labor stating American marines in Nicaragua threatened to attack Nicaraguans."

"The Nicaraguan forces are undoubtedly those headed by General Sandino. An agreement was arranged providing government forces and revolutionaries should lay down their arms. General Sandino alone refused."

"On June 14, the department was informed Sandino was reported as having held the managers of French and German concerns until payment in cash was made of \$5,000 under threat of burning their buildings. The department was informed the commander of the American forces considered it necessary to treat Sandino as an outlaw."

"With the exception of the small band under Sandino, peace has been effectively re-established in Nicaragua, and the United States, in accordance with its promise, plans to supervise the elections of 1928 that an opportunity may be given Nicaraguan people freely to indicate their choice for president."

Green advised a communication from Nicaraguans attending the Pan-American labor conference to the effect that marines were interfering with domestic affairs and their presence was threatening bloodshed.

Trio Hanged for Murder of Deputy Warden Klein Joliet, Ill.—Three men convicted of the murder of Peter M. Klein, deputy warden of the Joliet penitentiary, who broke jail three times, paid in full for their crime when they were hanged on one gallows in the Will county jail yard at Joliet.

National Air Tour Ends Detroit, Mich.—The 14 planes of the national reliability air tour returned to Detroit after a 4,000-mile journey which included leading centers of the East and Midwest. The last hop was from Grand Rapids, Mich.

1,000 Killed in Chinese Flood Shanghai.—Floods in south Anhwei province recently caused the deaths of more than 1,000 persons, belated reports say. Tens of thousands are said to be homeless.

Warn of Fake Oil Experts Washington.—Heads of the geological survey have issued a warning to land owners against persons who, representing themselves to be federal oil experts, seek to collect fees for testing areas for petroleum.

Massachusetts Man Heads Elks Cincinnati.—At the annual convention of the Benevolent and Protective Order of Elks here John F. O'Malley of Springfield, Mass., was elected grand exalted ruler.

NEW YORK WELCOMES FIVE OCEAN FLYERS

Byrd, Acosta, Noville, Balchen, Chamberlin Get Big Reception in Gotham.

New York.—Five American heroes of the air, Commander Richard E. Byrd, Bert Acosta, Lieut. George O. Noville, Lieut. Bert Balchen, and Clarence D. Chamberlin, pilot of the Bellanca plane Columbia, were greeted with such enthusiasm as returning celebrities never before have received, save perhaps Col. Charles A. Lindbergh, on their arrival on the Leviathan.

The ceremonies began when the queen of the United States line arrived at quarantine where the Leviathan was met by the official welcoming tug Macon.

Hundreds of thousands crammed Battery park, lined Broadway, jammed City Hall park, and stood for hours along lower Fifth avenue in the rain. The line of doughboys and sailors, artillery, cavalry, and finally the cars carrying the flyers and their wives passed up Broadway through lines of admirers who applauded the heroes.

Separate presentations of the city's medals of valor and speeches were made to Byrd and his crew and to Chamberlin. Commander Byrd responded for himself and his men, Chamberlin followed him.

Honolulu.—Ernest L. Smith and Emory B. Bronte, California flyers, who left Oakland, Calif., for a flight to Hawaii, arrived at Wheeler field, 25 miles from Honolulu as passengers aboard army planes.

They were taken off the island of Molokai, noted Hawaiian leper colony, 93 miles southwest of Honolulu, a short time after their monoplane was forced to land for lack of gasoline, 25 hours and 30 minutes after they left Oakland, Calif.

The Wheeler field crews roared a salute for the flyers as Smith and Bronte stepped from the army plane.

Smith immediately explained the S. O. S. messages asking assistance were sent "because it appeared at that time that our gasoline supply might give out and we were taking no chances."

Smith added, however, that they flew to Molokai successfully, exhausting their gasoline just as they reached land.

"We cracked up there because we didn't have another drop of gas," Smith said.

Both men declared they were feeling fine, although they manifestly were tired and badly burned from the flight. Scores of well wishers made the flyers welcome. Smith's mind mostly was on the plane.

"I'm going to hoist the motor out of the plane that lies over on Molokai island and take it back with me. The rest of the ship is a wreck," said Smith.

The twelve army planes flew over Honolulu in formation and a few minutes later swung onto Wheeler field before thousands of cheering spectators.

The army had sent out a squadron of planes to greet the civilian flyers as they neared Diamond head from Molokai in the planes of their army hosts.

Seipel Forces Regain Upper Hand in Vienna London.—Although sporadic street fighting continues and the death toll in the Viennese riots mounts higher, the conservative government of Chancellor Ignace Seipel has more or less completely regained control of the situation, according to dispatches from Vienna by indirect routes.

The whole of Austria, however, which since last week has been cut off by radio, telephone and telegraph communication from abroad, is still in the grip of a railroad strike; and with Italy reported to be pressing for the restoration of through railroad facilities, international complications are feared. While it is emphatically denied by the Italian foreign office that any threat of running through trains under armed guards has been sent to Austria, it is felt that some hasty action by the strong Italian element in the Tyrol, where traffic is paralyzed, may precipitate a crisis.

Canal Tolls Total \$13,357,135 Balboa, Canal Zone.—Panama canal tolls for the first six and one-half months of the year total \$13,357,135, Governor Walker announced. For the first two weeks in July, 240 commercial vessels passed through the canal, paying tolls of \$1,057,945.

Mother of 12 at 32 Manchester, Iowa.—Race suicide is no problem in the home of Mr. and Mrs. Frank Glennapp who have twelve children, including three pairs of twins. The father is thirty-eight, and the mother only thirty-two.

12,300 Legionnaires for Paris New York.—National officers of the American Legion report that more than 12,300 Legionnaires have made steamer reservations to attend the national convention in Paris in September.

Harry Wills Knocked Out Brooklyn, N. Y.—Paolino Uzcudun, the Basque wood chopper, knocked out Harry Wills, the black Panther, in the fourth round of a scheduled fifteen round bout.

Former Ambassador Dead Pittsfield, Mass.—Henry White, former ambassador to France and Italy and American delegate to the Paris peace conference, is dead in Lenox. Mr. White underwent an operation three years ago and had been in ill health much since then.

Americans Start for Lourdes Pittsburg, Pa.—Two hundred persons recently left Pittsburg for the shrine of Our Lady of Lourdes at Lourdes, France.

Avoid Loss of Soy Bean Seed

Cost of Harvesting Reduced One-third by Combined Harvester-Thresher.

Losses of soy bean seed at harvest time are greatly reduced and the cost of harvesting the crop is lowered about one-third a bushel from what it is with ordinary methods, when a combined harvester-thresher is used to gather the beans, according to tests made by the farm mechanics department, college of agriculture, University of Illinois. Use of the combined harvester-thresher is the most recent method of harvesting the soy-bean seed crop. To date the job of harvesting soy beans for feed or commercial purposes has been the biggest problem that the soy-bean grower has had to meet. In fact, the grief encountered in harvesting the seed crop has prevented a more rapid increase in the production of this legume, according to L. P. Blausler of the college farm mechanics department. The harvesting problem will become more important as the commercial possibilities of the soy bean are developed.

Methods of Harvesting. A survey made in Illinois gave the following methods which were used to harvest the 1924 soy-bean seed crop: Binder, 61 per cent; mower, 32 per cent; pickers, 3 per cent; self-rake reaper, 3 per cent, and pullers, 1 per cent. The same year 80 per cent used grain separators, 13.5 per cent used special bean threshers, and 5 per cent used combined harvester-threshers.

The first combine in Illinois was used by Garwood Brothers of Stoughton, in October, 1924, to harvest 212 acres of soy beans. That the machine made a successful demonstration is evident from the fact that seven combines were sold in Illinois by July, 1925, and twelve by October, 1925.

Tests have been made of the different methods of harvesting soy beans, and losses in some cases were found to be as high as 45 per cent. Tests of the combined harvester-thresher have given a loss of from 4 per cent to 30 per cent this past season even though the weather conditions were extremely bad. Beans harvested with the combine gave a much lower moisture percentage, and also were of much better quality. The combine can work from two to five days sooner than the threshing machine because the beans dry out much more rapidly standing than in shocks. There are still some fields of beans in shock waiting to be threshed.

Work of Illinois Machines. Each combine in Illinois has harvested from 200 to 350 acres of soy beans this past season. Twenty to 30 acres of soy beans can be harvested a day with two men, one to drive the tractor to pull the machine, and one to operate the combine. Two to three men and teams are needed to take care of the threshed beans.

A combine should cut from 250 to 300 acres of grain each day, with the overhead charges as low as possible. There are a number of acres of soy beans that have not been harvested because the combine was used quite successfully to harvest wheat, oats, red clover and timothy. The combined acreage in these crops justifies the purchase of a combine. The combine user in Illinois that he cannot get along in harvesting soy beans.

Repainting Farm Tools Greatly Increases Life and value of farm implements can be greatly increased if they are well painted. First brush to remove rust. Then wash with water, and after metal parts with gasoline or grease. Use any good, modern paint for metal parts, and a good paint for wood. Paint the 24 hours after the work is done. Wash your tools with similar implements with similar treatment.

Ways to Go Brins Listed for Ten ways for a man to make his farm more productive by the application of the laws of the Government of Nature. Here they are: 1. Grow only one crop. 2. Grow no live stock. 3. Regard chickens as garden nuisances. 4. Take everything that will grow on the soil and remove nothing. 5. Don't stop gathering over-crop-it to the wash away, then you will "boast" land. 6. Don't plan your operations. It's hard thinking—trust to luck. 7. Regard your crooked you would a oval mirror every tree, soil the water wear the cleared land, and it is in. 8. Hold fast to the way of the methods of living employed by your grandfather good enough for you. 9. The independence that you wish your capital in the form of capital. 10. Manage your farm every dollar you spend buy things you would like to buy if you had a good system of farming.

LIVE-STOCK CO-OPERATIVES ARE MAKING VERY RAPID PROGRESS Associations Located Mostly in Central States

(Prepared by the United States Department of Agriculture.) Co-operative live-stock marketing has increased rapidly in the United States in the last five years. There was little development in this direction until 1913, although the first live-stock shipping association of which there is a record was started as long ago as 1877. In 1920, however, more than 1,000 such associations were operating. By the end of 1925 the number had increased to 1,770.

These live-stock shipping associations are located principally in Iowa, Minnesota, Illinois, Wisconsin, South Dakota, Indiana, Michigan and Ohio. There are only a few associations in the western states and southern states and almost none in the North Atlantic region.

Besides the development of local shipping associations there have been attempts at times to organize central selling agencies. The first central selling agency, known as the American Live Stock Commission company, was incorporated in 1880 and was to operate on the Chicago market. Its business was quite successful, but the association was expelled from the Chicago yards by the Live Stock Exchange, which succeeded in obtaining court action on the allegation that the association was a dangerous monopoly.

In recent years attempts have again been made to organize co-operative commission companies. Twenty-seven such organizations have been established since 1917 at the important live-stock markets of the country. The volume of business handled by these associations in 1925 was more than \$2,000,000. The business was concentrated in shipping associations.

"Rat Killing Week" Suggested by So far as known no one has suggested a rat killing week though it is common knowledge that the rats of this country are worth more than \$100,000,000 a year. Rat colonies are found around straw stacks and adjacent to stables, barns, and quickly eliminate into the stables. M. S. Johnson, professor of zoology, University of Minnesota, suggests that a rat killing week be observed.

Soon after the completion of a farm in Cotuit, Massachusetts, Johnson and the farmer's dead rats which were seen on the surface to be eating the potatoes had surrounded the garden. This was the first time that a rat was seen on a farm in Cotuit, Massachusetts.

But the most promising method of getting rid of rat children when they are not in row colonies, is to poison with barium carbonate. It can be used in the preparation of four parts of any good otherwise available. Barium carbonate is a poison and must be handled carefully.

Selection of Good Seed Corn of Big Importance Every farmer should select not only enough seed corn to plant the acreage the coming spring, but should also keep in mind the following year when there may be a shortage of seed.

It pays to select seed from the standing stalk. An ear from a well-matured, strong stalk is more likely to produce stalks with plenty of vitality upon which will be produced ears similar to its kind. The stalk should not only be well matured, but should be selected. Experimenters show that ears selected from leaning and fallen stalks are more likely to be infested with disease than ears from standing stalks.

No experiment has ever shown that a stalk of corn bearing two ears will produce seed that will bring forth a like number of ears when planted. It is better to select the ears that are uniform throughout and solid. The ears should recline at the tips, but should break off without any ragged edges. A good ear should be a good ear. A good ear should be a good ear. A good ear should be a good ear.

Agricultural Cultivate the field early after showers. Watch soil water level. Water means possible yield. Make another planting of corn, snap beans, and peas. Stinking soil when wheat, brings a low yield.

Sunlight is the best fertilizer available. A good garden is a good garden. A good garden is a good garden. A good garden is a good garden.

CHAPTER VI—Continued

of danger if she remained," Peter Milman agreed. "Also, it would never do to compromise her in an affair which might be disastrous."

"We've been too busy with theories," said Fleming Bradley when the problem of Nita had been settled. What we are after should be original disassociations of ideas."

"I can't get that very clearly," said Neeland Barnes. "As I see it, all we want from Raxon is a cold million. Half of that goes to Milman and we split the rest."

"Exactly," Bradley returned. "That's the very point. How are we to make him give up a million? I don't know. You don't either. None of us knows. Obviously the thing is to get close to him. Into the house for choice."

"He doesn't know me," Milman declared. "But I cannot be seen, because Lodon, who has told me so much under the influence of my port and the belief that I never stir abroad and know nothing of outside affairs, is a frequent guest. The question is, would he recognize Barnes?"

"Certain to," Barnes said gloomily. "I haven't altered much since that day I threw him from the pier. What about Malet?"

"Probably not," said the sculptor. "In those days I was twenty pounds heavier, wore a moustache, and had a general air of bien-être."

"I am the man," Bradley declared. "I doubt if he has ever seen me. We never met squarer men," he said.

"I'm on their side, too. My mind is on their side, right or wrong. I don't know what to say. The business of his could not be as simple as anything irregular. He must accept your assistance."

"I shall tell Mr. Milman about it after luncheon tomorrow. He will be here equipped, specially for a certain sort of position, and will be getting it."

"I am not going to be a stenographer," he said. "I did that to support to come here. I shall take my position, so you won't have to be a stenographer's charity."

"It is a hard thing to say," he said. "I shall tell Mr. Milman about it after luncheon tomorrow. He will be here equipped, specially for a certain sort of position, and will be getting it."

"I am not going to be a stenographer," he said. "I did that to support to come here. I shall take my position, so you won't have to be a stenographer's charity."

"What Sort of a Comeback?"

know he talked to Malet for some time. It is I who must contrive to get into his house."

"In what capacity?" Milman asked.

"There you have me," the scientist admitted.

"We are safe to start by assuming," Milman cut in, "that Paul Raxon is always cautious. From the outside his house is impregnable."

"You mean," Bradley remarked, "that to get in one would have to be touched for?"

"Undoubtedly," said Peter Milman. "If someone socially prominent took you there, it might be all right. There was one curiously disquieting thing Lodon told me about Raxon. When he has injured a man he expects some retaliation, and takes the precaution of having the injured one watched. We know he dogged Barnes for years. Even now there may be those who know for what purpose we four are gathered here. I am not certain."

One Chance All That Time Accords to Man

How often you hear dad, or some other grownup speak, with a sort of half-sigh in his voice, of what he would do if he were young again. Time goes quickly when you are young, and you are only too likely to put off things you really should do.

Grownups look back to the golden days of their youth as the happiest time of their lives, but there is also something of regret in their backward glance. There are so many things they would like to have done, but didn't.

Unfortunately, time gives us just one chance.

Let's plan things now, then, so as to have as few regrets as possible when we look back from a grownup viewpoint. Let's get lots of exercise, so that the grownup person we're going to be is not so many years from now may be fit and strong. Let's not get into little habits of shiftlessness that will handicap the future. Instead, let

Nothing to Do With Horse

Frequently a thing or ill-timed happening is described as "a mare's nest," but it is doubtful if the user of that phrase has any definite idea of its meaning. Certainly "mare" in this case has nothing to do with a horse. It is really a corruption of "Mara," a malevolent creature who, according to tradition, possessed a store or nest filled with wonderful jewels to excite the envy of others.

This particular demon may never have existed, but it unquestionably influenced our speech, for whenever we refer to "nightmares" we are again unconsciously paying tribute to him.

Yanks' Famous "Murderer's Row"

tain but that Achilles speaks English as well as he does French."

The listeners were startled at the sudden change they saw on their host's face. Where he had been merely thoughtful and slightly worried he was now actively alarmed. He was leaning forward, examining something on the table before him. They remembered it was the electric dial, that ingenious device for the protection of his home against invaders.

The face of the dial was divided into six parts. These numbered sections would tell Milman on what part of the roof the intruder was. The three, pressing about him, saw that a red light suddenly illuminated the square marked 1. A hand moved very slowly to the square numbered 6.

"That," Milman whispered, looking relieved, "represents the weight. Six pounds means a large and prowling cat."

They heard a sudden exclamation. The weight went up a hundred and twenty pounds. The square numbered 1 was now in darkness and another was illuminated. They could trace the path of the trespasser. He was creeping near them.

"Achille," Milman whispered. "That would be his weight. The six pounds was when he rested a foot on it before putting his whole weight on the grating."

Peter Milman betrayed no nervousness now. Nolelessly he drew the sawed-off shotgun from its place. Then with a touch of a button all lights in the garden were extinguished. In the darkness the shades rolled back. Against the sky, bright with stars, the watchers could see a figure lying above their heads. Another light was switched on which left the group below still in darkness, but showed pitilessly on the trespasser. The gun was already at Milman's shoulder when Neeland Barnes made a jump for it and pulled the barrel down.

"My God, Milman!" he cried, white-faced. "It's my girl. It's Nita."

"Ah," said Milman with a curious smile, "so I perceive. A strange position in which to find a guest, is it not?"

"Inexplicable," said Bradley. He cast a suspicious look at Barnes.

"I think," Peter Milman went on, "we should like a talk with Miss Barnes."

"I'll fetch her," Barnes said eagerly. He was confused, ashamed, humiliated.

"You will be kind enough to remain here," said Milman. Barnes saw that he was menaced by that most dreadful of weapons at short range, the sawed-off shotgun. "I fear I must remind you that we must insist on an explanation from you, too. To allow you the opportunity of escape would be most unwise." He raised his voice a little, but he did not take his steady gaze from Barnes' face.

"Miss Barnes," he said, "will you be so kind as to come here at once?"

The girl's voice trembled as she answered. It seemed to them all there was a trace of defiance in her tone.

"I won't be a minute. It's not very comfortable up here."

The shades were drawn again and the lights switched on more fully. Neeland Barnes looked from one to the other of the men whose faces had been in the shadow. It seemed incredible that they could suspect him of complicity in this eavesdropping. It was plain enough what her errand was.

"Let me explain," he began.

Peter Milman stopped him with a gesture. "Wait," he commanded. "We shall hear you when your daughter comes."

Barnes sank heavily into a seat. He felt that Bradley and Malet looked upon him as a traitor.

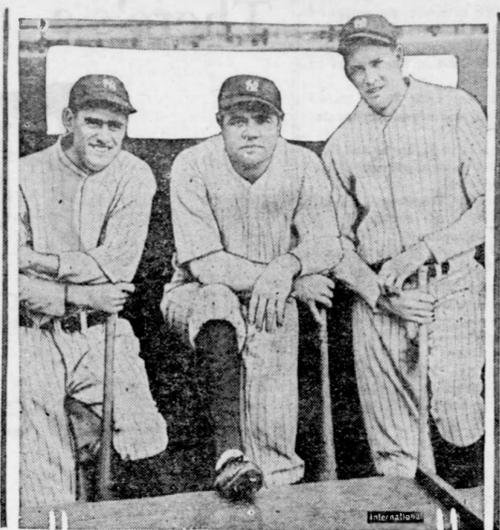

Nita was wearing a blue silk dressing wrap when she came into the Japanese garden. Her bearing was confident and unafraid. She came quickly to her father's side and put an arm about his bowed shoulders.

"Oh, Nita, Nita," he groaned. "How could you do such a dreadful thing as this?"

Malet, watching her closely, saw that she bent upon the sitting man a look which had something of maternal tenderness in it. It seemed strange to the observers that she stood there as though to defend her father from enemies. Of shame or embarrassment there was no sign.

"So you caught me," she said. "Well, perhaps it is best you did."

"Why?" Peter Milman demanded. (TO BE CONTINUED.)

Three of the hardest hitters in baseball whose slugging might bring world series pennant to New York. Left to right, Meusel, Ruth and Combs, who comprise the famous "Murderer's Row" of baseball.

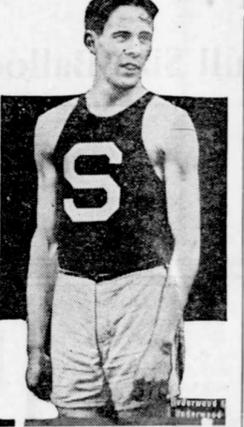

Every Hit Helped Swell Attendance

In a game played in 1896, at the baseball park of the St. Paul club, "Hunks" Hines knocked eight consecutive foul balls over the fence.

All were picked up by boys waiting outside of the grounds. Every ball was returned and, as a reward for their honesty, the boys were admitted to the game.

Charlie Comiskey, owner and manager of the Salts, shouted: "Keep it up, Hines, and we will soon have a crowd here."

Alderman Runs Fast

The photograph shows F. P. Alderman of Michigan university, who recently won the 100-yard dash in 9.9 and the 200-yard dash in 21.1 in the National Intercollegiate meet held at Chicago.

Sport Notes

Eugene Balderston was elected captain of the Cornell football team for next season.

And lest we forget, there is Bobby Jones who did not commercialize his international triumph.

Five freshmen athletes at Purdue university have won freshman varsity sweaters in three branches of sport.

They call it the wrestling trust, and yet its members don't trust each other, but demand cash bonds to guarantee every "hop."

Saddle horses and trotters are not true thoroughbreds, the only horses entitled to such designation being the thoroughbred race horse.

George Huff, director of physical welfare of the University of Illinois, is spending the summer in California. He is greatly improved in health.

The California Tennis club, for nearly 40 years located at Scott and Bush streets, San Francisco, now boasts a modern clubhouse with a grandstand capable of seating 2,000 fans.

The lowest score for 36 holes in a regularly supervised and recognized golf tourney is credited to George Livingston, a professional, who turned in a card of 133 at Nashville, Tenn., last year.

A few years ago golf was viewed as a rich man's game, but with the increase in public links and the reduction of playing fees, there is no longer an excuse to pass up the Scotch sport because of expense.

Frank Taberski will be the first challenger of Tom Huston for the pocket billiard championship in October.

The average Eskimo has 12,000 words in his everyday vocabulary without knowing anything especially about golf.

Well, with television in full blast, it may be possible for the "ringside seat" holder at a champion's lip fight to get an idea what is going on in the ring.

Diamond Notes

Australia has 51 baseball teams under control of an association.

Baseball now is almost as much a part of the national life of Japan as it is of the United States.

This Heinie Sand, who told about the propositions of O'Connell and Cozy Dolan, is a good workman.

Nick Altrock, baseball's jester, takes his golf very seriously and plays consistently in the low eighties.

"Bullet Joe" Bush, veteran big league pitcher, was released unconditionally by the Pittsburgh Pirates.

William Crouch, of Memphis, Tenn., has been elected captain of the University of Kentucky baseball team for 1923.

San Antonio, Texas, is said to have more people playing baseball than any other city of its size in the United States.

Clarence Mitchell, Phillies, is one of the few remaining spithallers in the major leagues. He throws left-handed.

The only way some of us have tried to explain John Traverser's famous home run is that he used a spring board for a bat.

John Barbee, a Harvard pitching ace, has won glory as a hurler. He has beaten the strong Holy Cross nine twice in a season.

Walter Johnson is one of the few prominent pitchers to accomplish the feat of striking out three pinch hitters in succession.

Ray Widdifield, Cleveland, has been elected captain of the 1923 Ohio State baseball team. Widdifield played first base on this year's Buckeye team.

Harry O'Boyle, Notre Dame football star, has been signed by the Des Moines Western League Baseball club for a tryout. He is an outfielder.

Eddie Farrell, shortstop of the Boston National League Baseball club, graduated from the University of Pennsylvania with a D.D.S. degree.

Lester Rounrich, a young right-handed pitcher, has been obtained by Reading from the Chicago Cubs. He had been with the big league club all spring.

George Mogridge, former pitcher of the Boston Braves and Washington Senators, has been named manager of the Rochester club of the International league.

"I doubt it," replied Rip Van Winkle when they told him he had been away that long. "It says here in yesterday's paper that Walter Johnson held the Ired Sox to three hits."

Robert Quinn, head of the Boston Americans, has taken a step that may become a rule in the major leagues. Quinn refuses to sign any college student until after he has graduated.

New Orleans has a professor on its pitching staff and Owner Heinemann hopes he knows his subject. The new man is Mac King, who comes from Tulane university, where he teaches biology.

Henry Fanning, former Texas league umpire, who is now calling 'em in the Pacific Coast league, is believed to be the only one-armed official in baseball, having lost his left arm in a boyhood accident.

According to records of a large insurance company, baseball is the most dangerous sport, with accidents under the classification "in country or woods" following. Golf is third in hazards of sports.

Stanley Coveleskie, pitching veteran of many big league seasons, has been given his unconditional release by Washington.

Eddie Phillips, a catcher for the Yankees, has been sent to Arthur Shean's Springfield (Mags.) club, under an optional agreement.

Glenn O'Brien of Salem, has been elected captain of the 1923 baseball team at Boston university. He already was captain-elect of the football team.

Roettger Brothers Placed in Big Show

Brothers have been conspicuous in the major leagues for a number of years. The most prominent of the kinsmen recently have been Bob and Irish Meusel, Joe and Luke Sewell and Jess and Virgil Barnes.

Two new sets of brothers are today clamoring for recognition in the calcium. They are Oscar Roettger of the Robins and Walter Roettger of the Cardinals, and Paul and Lloyd Warner. Paul came up last season and made good with a bang. Lloyd came up this season, and, like his brother did the previous year, promises to develop into the biggest find of 1927.

GOLF MAY LOSE JESS SWEETSER

Former Amateur Champion Drops Tournament Play.

Authentic report has it that Jess Sweetser of the Siwanoy Country club, former British and American amateur champion, is practically through with tournament golf. For this season alone, but for all time.

From friends of the Siwanoy "ace" it was learned that Jess has decided to follow in the footsteps of Miss Joyce Wethered, former champion of Great Britain. Miss Wethered announced more than a year ago that tournament golf would see her no more. Sweetser is understood to have assured J. Sufferin Toller of Newport that he will tie up in the annual golf mangle invitation at the latter's private links on August 5. He also told friends that he intends to compete in the United States amateur championship, which gets under way at the Midkhalda Golf club, Minneapolis, on August 22.

But Sweetser also has told friends that the strain of competitive golf of the big league variety is not worth the candle. It will be recalled that the Siwanoy "ace" contracted a serious illness while competing in England last year and only recently did he recover sufficiently to return to his desk.

"You cannot begin to imagine the strain of championship golf," began Sweetser. "If you have a new club you try it out during the match. If it falls to bring the desired shot, you have done little to injure your reputation as a golfer. It is just another shot gone wrong."

"If you have a new club you try it out during the match. If it falls to bring the desired shot, you have done little to injure your reputation as a golfer. It is just another shot gone wrong."

"When a champion or one who has been a champion plays over a links for the first time he is expected to lower the course record. Every shot has to be studied carefully, no mistakes must be made, for every eye is on the champion. If he fails to shoot brilliant golf there is much to do about it."

Pruett Comes Back

A young medical student who fired a few ringing baseball shots five years ago, chiefly at the expense of Babe Ruth, then passed out of the big leagues, is back. He is Herb Pruett, left-hander, whose comeback so far with the rejuvenated Phillies holds promise of providing one of the year's most dramatic baseball episodes.

Coach Explains Greater Interest in All Sports

College athletes are not overemphasized, but the present nation-wide interest in sports is largely due to the economic growth of the country during the past 25 years, says Capt. L. M. Jones, football coach at the United States Military academy.

"During the past 25 years," he said, "the student and alumnus bodies of the various colleges and universities of the country have grown enormously and the logical result is that interest in the affairs of these institutions has also grown."

Better roads and the abundance of money, also the increase in the number of automobiles, have a bearing on the attention given to athletics, in his opinion.

Dumovich to Blues

Nick Dumovich, left-handed pitcher of the Mission baseball club, has been sent back to Kansas City, the club from which he was obtained on option early this season. President William McCarthy was greatly disappointed in the showing of Dumovich, whom he had counted on to replace Bert Cole, who went to the Chicago White Sox. Dumovich had a record there of seven victories and three defeats, but he was responsible for 51 runs.

SHE WENT FROM BAD TO WORSE

Down to 98 Pounds—Finally Restored to Health by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—"After having my first baby, I lost weight, no matter what I did. Then a doctor told me I would be better if I had another baby, which I did. But I got worse, was always sickly and went down to 98 pounds. My neighbor told me about Lydia E. Pinkham's Vegetable Compound, as it helped her very much, so I tried it. After taking four bottles, I weigh 116 pounds. It has just done wonders for me and I can do my housework now without one bit of trouble."

—Mrs. M. RUSSELL, 1004 Nelson Ave., Cleveland, Ohio.

If some good fairy should appear, and offer to grant your heart's desire, what would you choose? Health? Happiness?

Health! That's the best gift. Health is riches that gold cannot buy and surely health is cause enough for happiness.

Lydia E. Pinkham's Vegetable Compound may be the good fairy who offers you better health.

THICK, SWOLLEN GLANDS

which make a horse wheeze, roar, have thick wind or choke-down can be reduced with Absorbine. Also other bronchitis or swelling. No blister, no hair gone and horse kept at work. Its economical. At drug stores, or 25¢ postpaid.

Horse book 35¢ free.

A thankful user says: "Completely removed flesh growth on gland about 7 inches diameter. Sincerely thank you for good advice and Absorbine."

The fight for business leadership is no monkey business in this day and age, as is evidenced by the latest report from commercial centers—and which has to do directly with the future of towns exactly the size of KEWASKUM

It has been learned that the big mail-order houses now maintain a department, the duty of whose staff is to read weekly newspapers from all over the country and continually make a survey of the different districts to learn of mail-order selling possibilities.

And, it is a fact—that immediately that department finds a town or country wherein the local merchants

are not using the local paper to advertise their merchandise to the trade—that district is immediately flooded with catalogues—because it is virgin territory and the mail-order houses have learned that they can do GOOD business there.

We pass this information on to the leaders of KEWASKUM and assure them that all of our support is of course with them. We maintain a local advertising service which can be used to advantage—and for such service we make no extra charge. Come in or phone and we will call. Business goes to those who go after it.

CEDAR LAWN

George J. Kleiber of Campbellsport was here on business Monday. John Driefuss and son Sylvester made a business trip to Marblehead Monday. Miss Eva Allen of East Town Line transacted business at Campbellsport Tuesday. Lawrence Strobel and sons of Elmore were business callers here last Saturday. The Indian Medicine company and John L. Gudex explored plateau park last Sunday. Hubert Casper of St. Cloud is with the John Driefuss family for a prolonged visit. Samuel Gudex of East Town Line had after business at Campbellsport Tuesday. Mr. and Mrs. D. F. Smith of South Eden were business callers at Campbellsport Tuesday. Mr. and Mrs. Fritz Kraenig and son of West Bend called at the John L. Gudex home Wednesday. Mr. and Mrs. John A. Gudex of Elmore visited at the home of the former's father Wednesday. Mrs. Anna Schabau of Berkeley, Calif. was a pleasant visitor at the John L. Gudex home last Sunday. Mr. and Mrs. Henry Knapp and daughter Lucille, Mr. and Mrs. Henry Wolf and Mr. and Mrs. Ernst Wolf, all of Milwaukee spent Sunday at the John L. Gudex home. Mr. and Mrs. A. C. Backus and family of Milwaukee spent Sunday with the Hausman families here.

NEW PROSPECT

Fred Bilgo of Sheboygan called on relatives here Tuesday. Mrs. W. M. Bartelt and daughter Cordell were Fond du Lac visitors on Tuesday. Mr. and Mrs. Rich Trapp visited with relatives at Fond du Lac one day last week. Mr. and Mrs. G. H. Meyer and family were Kewaskum business callers Saturday evening. Miss Deloris Bowen spent a few days with her grand mother, Mrs. P. Uelmen at Campbellsport. Rev. C. Gutekunst of New Fane visited with Mrs. A. Krueger and other friends here Friday evening. Mr. and Mrs. Henry Ketter and son of Four Corners spent Friday evening with Mr. and Mrs. A. C. Bartelt and family. Mr. and Mrs. Adolph Glass and family of Beechwood spent Sunday as guests of Mr. and Mrs. Christ Schmidt and family. Mr. and Mrs. W. J. Romaine were entertained at dinner at the summer home of Dr. and Mrs. Stober at Forest Lake Sunday. Mr. and Mrs. W. F. Schultz have returned home after spending a few weeks with Mr. and Mrs. Arnold Butzke at Round Lake. Mrs. J. P. Uelmen and guests, Miss Florence Krueger and Armin Bell of Milwaukee visited Tuesday with Mr. and Mrs. Emery Wegner at Fond du Lac. Mr. and Mrs. A. C. Bartelt, daughter Iris and son David, Mrs. A. Krueger, Miss Delores Bowen and Mr. and Mrs. J. P. Uelmen attended the fish picnic at the summer home of Mr. and Mrs. Noah Netzing at Forest Lake Sunday afternoon. Mrs. N. E. Uelmen, Mrs. G. De Gunther of Milwaukee and Mrs. P. Uelmen of Campbellsport called on Mr. and Mrs. J. P. Uelmen Friday while on their way to Batavia where they spent the day with Mr. and Mrs. John Bowser and family.

FOUR CORNERS

Peter Ketter spent Sunday at the Joe Ketter home. Mr. and Mrs. Peter Jaeger spent Sunday at the Joe Ketter home. Ed. Marquardt, Mr. and Mrs. Roy Rickaby were Plymouth callers Sunday. Wm. Schmidt of Menomonee Falls was a caller at the Peter Berres home Sunday. Miss Elizabeth Weasler is spending a week at Milwaukee with relatives and friends. Mrs. James Furlong Sr. returned home Saturday from a week's stay at Fond du Lac. Olive and Alvin Berres, Willie Schmidt and Miss Marie Schmidt were Oshkosh callers Sunday. Miss Marie Schmidt returned to her home in Milwaukee after spending a week at the Peter Berres home. Mr. and Mrs. Wm. Klabuhn and Mr. and Mrs. John Gatzke and two daughters were Adell callers Sunday. Mr. and Mrs. Henry Butzke and family spent Friday evening at the John Dickliver home near Beechwood. Frances Adams, Miss Nellie White, Mrs. Mary Furlong and daughter spent Sunday at the camp grounds at Byron. Mr. and Mrs. Mat Dornacker, Mr. and Mrs. Fred Moll and daughter Margie of West Bend were week-end callers at the Peter Berres home. Mr. and Mrs. Robert Buettner, Mr. and Mrs. Charles Schultz and son Elton and little grand daughter and Ed. Marquardt spent Friday evening with Mr. and Mrs. M. Weasler and family. Nick Wusler and son Raymond of Fredonia and Nick Block of Milwaukee, Mr. and Mrs. Peter Berres and daughter Helen and Adler Kahne, Valentine Miller and son Paulie and Mrs. Annie Ertz and Mich. Schick spent Sunday with Mr. and Mrs. M. Weasler and family.

NEW FANE

Quite a few from here attended the fish fry at Forest Lake Sunday afternoon. Mr. and Mrs. Herman Meilahn of Kewaskum spent Sunday with relatives here. Mr. and Mrs. Walter Heberer and daughter spent Sunday afternoon with Mr. and Mrs. Aug. Jandre and family. Mrs. Wm. Hess and daughter and Mrs. Harvey Rosendale spent Monday evening with Mr. and Mrs. Geo. Backhaus. Mr. and Mrs. Gregory Fellenz and Mrs. Henry Fellenz of Milwaukee spent Sunday with Mr. and Mrs. Jake Fellenz and family. Mr. and Mrs. Milton Ehner and daughter Audrey and Glenway Ehner, Miss Sylvia Ehner and Loran Keller spent Saturday and Sunday with Mr. and Mrs. Harry Ehner and son at Milwaukee. August Steger's 49th birthday was celebrated Sunday. Those present were: Mr. and Mrs. Frank Ehner and family, West Bend, Mr. and Mrs. Herman Staeger and family, Mr. and Mrs. Julius Staeger and family of Round Lake, Mr. and Mrs. Arnold Wagner and family of Milwaukee, Mr. and Mrs. Wm. Meyer and daughter Corine family, Mrs. Arnold Kleinbans and Norman, Miss Leona Heberer, Walter Perona, Mr. and Mrs. Louis Sass and family, all of Plymouth. A delicious dinner and supper was served on the lawn. At five o'clock they all departed, wishing Mr. Staeger many more happy birthdays.

REPORT OF KEWASKUM FARMINGTON C. T. ASS'N.

(Omitted last week by an oversight) Those heading the list of 40 pound cows were Ed, Gerner, Frank Simon each 2 and Herman Simon, Christ Schoofs, Irvin Bonlender and Andrew Straub each 1. Carl Aurig has high herd for June. His 14 Gr. Holsteins averaged 1141 pounds of milk. 43.8 Perona, Mr. and Mrs. own 2nd high herd 45 Gr. Holsteins averaged 1199 pounds of milk and 40.7 pounds of fat. Mike Weis had 3rd high herd, 9 Gr. Holsteins and Gr. Guernsey average 957 pounds of milk and 40.6 pounds of fat. The high cow owned by Felix Bros., produced 1755 pounds fat. Felix Bros. also had 2nd and 3rd high.

HEALTH -- STRENGTH -- VIGOR

The task of delivering to our customers, and they to the public, a quart of health, strength and life giving qualities, in every quart of milk marketed is a "he-man's" job, and one that keeps one upon his toes. Milk to be pure, sweet and untainted must have the very best of care, as there is nothing where microbes and off-flavors will find a home any more quickly than in milk. If this fact is always kept in mind, and lived up to, most religiously, our problems would be greatly simplified. If there ever was a place where the spirit of true co-operation should always be kept in mind, it is in the production and marketing of milk for human consumption. This is where the Board of Health inspectors prove themselves to be the greatest friends and benefactors of the milk producers, by pointing out the ways, means and methods, by which quality milk is assured. Let us profit by their advice, and strive for quality.
