## COMMUNITY PICNIC AUGUST 21

A community picnic promising a fine time for all of Washington County will take place at Schoenbeck's on Sunday, August 21. Such a picnic has not been held here since the picnic held on July 28. The picnic committee chosen at that time consisted of: Chairman, Elmer Ebling; Chas. Courtney, Elmer Ebling; Carl Schmeiss, J. B. Bast, Carl Schmeiss, C. L. Nelson and E. D. Byrnes. The committee appointed the following members: PRIZE & BUDGET COMMITTEE: Chairman, Carl Schmeiss; West Bend: Math Regner, Conrad Bier, Kewaskum: Leven, Hartford; Royal Mayer, Andrew Heindl, Newburg; Wickert, Slinger; Oliver Gehl, Germantown; A. A. Wiedmeyer, John J. Meyer, Allenton. GROUND COMMITTEE: Chairman, Dan Schloemer, West Bend; Bauer, West Bend; Andrew West Bend; Al Weyer, Kewaskum; Clarence Sanders, West Bend; Hamman, Kewaskum. ENTERTAINMENT AND PROGRAM COMMITTEE: Chairman, Elmer Ebling; West Bend: H. W. Geiffuss, John Flynn, Hartford; Mayer, Slinger; Ed. Heid, The-

## CHAUTAQUA MAKES DECIDED HIT

The five-day chautauqua held here by the United Chautauquas Company of Des Moines, Iowa, this week, finished their program on Thursday evening, proving to be a huge success. The programs rendered were most interesting and went far beyond expectations. Each number was an exceptional educational and pleasing entertainment. The opening program was held on Monday evening with Pamahasika's Society Circus. This number consisted of one of the finest companies of trained birds and animals ever seen in this village. Their performances were perfect and plainly demonstrated that birds and animals are possessed with more knowledge than they are given credit, it included troops of educated dogs, canaries, macaws, cockatoos, monkeys and ponies. On Tuesday afternoon the program consisted of songs by the Harmony Trio, three rollicking boys with good clear and blending voices, which was followed by a lecture by Mrs. Taylor Marshall of Texas, who gave a very interesting talk on America's great financial, moral, intellectual and political drama now being played by our nation. In the evening the sparkling comedy play "The Whole Town's Talking" was presented by a well balanced professional cast. This clever, witty, jocund and interesting play kept the audience in a continual uproar of laughter and applause. On Wednesday afternoon and evening, "Smiling Bob" Briggs, the nationally famous comedian, musician, cartoonist, singer and story teller, entertained the audience in a most delightful manner. He was assisted by the Gerhard Sisters, a group of dainty and beautifully gowned girls of extraordinary personality and musical ability. This program was a riot of fun. This was followed by a lecture by Homer Hulbert, whose topic was "A Yankee in the Far East" and "Where East Meets West." Mr. Hulbert, at one time was a personal advisor and envoy of the Emperor of Korea, having had twenty-three years of diplomatic service in the Far East, thus enabling him to give a very interesting and educational talk of the Orient. On Thursday afternoon, an entertainment was given by an impersonator, Frank Coak. His manner of impersonating each character was done very clearly, in his play recitation, "Laddie." On Thursday evening the three act comedy drama "Daddy Long Legs" was presented, by another well balanced and efficient cast. This play was a delightful, charming, sweet, beautiful and entertaining one which brought loud applause from a large and appreciative audience. That the chautauqua was a success, was clearly demonstrated that each performance was greeted by a larger crowd, who spoke in words of praise in the royal manner they were entertained.

## 'Twa't Be Their Fault

## BOY KILLING TRIAL TAKEN TO JUNEAU

Judge C. M. Davison has made announcement of a change of venue in the case of George Becher and Marvin Hubbard of Green Bay, charged with the murder of Russell, 9-year-old son of Mr. and Mrs. John Dean of West Bend, who was killed by a speeding car in West Bend on the night of May 9. The judge ruled that because of prejudice in Washington county the trial will open at Juneau August 31 instead of at West Bend. The defendants have been in jail at West Bend since their arrest in Milwaukee May 10. Questioned in Milwaukee at the time of their arrest they admitted passing through West Bend at the time of the accident but denied that they were the speeding car which struck the boy and carried him a mile and a half.

## Church Notices

### PEACE EVANGELICAL CHURCH

9 a. m., Sunday School.  
10 a. m., German church service.  
Monday evening, August 8th, the Young People's League will meet for the regular monthly meeting. The members of the choir are kindly requested to meet at the church Tuesday evening at 7:30.

Next Sunday, August 14, the annual mission festival will be held. We have arranged for two services. In the morning at the usual time a German service will be held. Speakers: Rev. A. Bettin of Bidefela, Germany, and Rev. Paul Irion of Michigan City, Ind. In the afternoon service at 2:30 which will be in the English language, Rev. Paul Irion will speak again. Rev. P. Kehlo of Ripon has consented to address us. We hope to have the church filled for both occasions. Everybody is welcome. The offering will self evidently be for benevolences.

### EV. LUTH. ST. LUCAS CHURCH

The Ev. Luth. St. Lucas congregation will celebrate their 50th jubilee on Sunday, Aug. 14. Services will be held at 9:30 a. m. and 7:30 p. m. Luncheon in cafeteria style will be served at the congregation's school. Everybody is cordially invited.

### SALEM REFORMED CHURCH

Wayne Center  
English and German services next Sunday. Student Paul Lever will deliver the English message.  
Ladies' Aid society will meet with Mrs. F. Spoerl at 2 o'clock.—E. Lehrer, Pastor.

### CATC. LARGE NORTHERN PIKE AT FOREST LAKE

While fishing on Forest Lake Tuesday, July 26th, 1927 Robert Ohnesorge of Chicago, Ill., caught a fourteen pound northern pike, measuring 49 inches on a bamboo pole, which was the largest fish caught this season. After 15 minutes struggle the fish was subdued. He was a guest at the Adolph Nehring cottage.

## LOCAL BOYS BUY AEROPLANE

Harry Schaefer, Junior member of the Schaefer Bros. Garage, dealers in Ford automobiles and Fordson Trucks, in company with Ernie Gessert, mechanic employed by the Schaefer Bros. purchased a bi-plane last week Wednesday, while visiting at Minneapolis. The plane is of the Curtis JN4D make, with an eighty horse power engine. It is a new machine and can carry two passengers at a time. The plane is expected to arrive here today, Saturday accompanied by a pilot, who will remain here for an indefinite time to teach the owners the work of flying and manipulate the same. If the machine and pilot arrive here today, the latter will not only make exhibition flights alone over the village, but will also take up passengers. Anyone desiring a ride can have the liberty of taking one as the pilot is an expert and licensed aviator. A landing field has been leased from the L. Rosenheimer firm, located just west of the Schaefer Bros. Garage. It is the intention of Messrs. Schaefer and Gessert to first of all become expert aviators by taking lessons from expert pilots who understand the business from beginning to end, with the view of getting government license as efficient aviators. After this has been accomplished, they will take up passengers here and in neighboring cities and villages. It is also their intention of making commercial use out of the plane.

The purchasing of the biplane by these two well known young men, helps to bring Kewaskum, in the front ranks with the new methods of transportation, one which in years to come, probably not so far distant, will be the coming thing. It is the first plane to be purchased in this community and has aroused considerable interest. With the purchase of the plane, it may lead to still further developments than taking up passengers and making commercial use of the same by the local men, it will mean that Kewaskum will rank among the few cities and villages who have a landing place for aeroplanes a scarcity of which has greatly hampered traveling in the air and also checked the progress in the aeroplane industry all over the world.

We wish Messrs Schaefer and Gessert an abundance of success and luck in their new venture.

## "GHOST" CASE AWARD IS REDUCED BY JUDGE

The "Hustisford ghost," which "haunted" the premises of Robert Uecker, near Hustisford, about a year ago, had its last inning in circuit court at West Bend, Saturday, when Judge C. M. Davison reduced damages awarded by a jury in Dodge county, in the case of Henry Kulke against Uecker, from \$3,500 to \$1,000. The suit was based on alleged statements by Uecker that grain that disappeared from his farm about the time and other mysterious happenings at the place drew state-wide attention would be found on Kulke's farm. Uecker caused a search warrant to be issued but the grain could not be found. A jury in Juneau awarded Kulke \$1,000 actual damages and \$2,500 punitive damages, which was reduced Saturday to \$250 actual and \$750 punitive damages.—Hartford Times.

## WESCOTT TAKES \$2,500 PRIZE

RIPON—Glenway Wescott, son of Mr. and Mrs. B. P. Wescott of Ripon, whose novel, "The Apple of the Eye," placed him in the front rank of the promising young American writers, has been awarded the first honors in Harper's prize novel competition which carries with it a prize of \$2,500 according to an announcement just made.

Mr. Wescott's new story, "The Grandmothers," winner in the Harper contest is to be published on Aug. 25, and is built up around the traditions of Middle Western folk.

Mr. Wescott was born at Kewaskum in 1901 and received his early education in the public schools of West Bend and Waukesha. Later he attended the University of Chicago, where he identified himself with the school's literary circles and became a frequent contributor to "Poetry," the magazine of verse edited by Harriet Monroe. Illness forced him to leave school. At present Mr. Wescott is living at Villeneuve on the shore of the Mediterranean near Nice, France.

## FARM HOME DESTROYED BY FIRE

The home of Mr. and Mrs. Frank Schwartz, located four miles east of Theresa, was destroyed by fire last Sunday afternoon, while the family visited relatives at Allenton. The fire is thought to have started from a stove. The loss is estimated at \$6,000. Mr. and Mrs. Schwartz and family had left the house about 1 p. m. When they returned at 5:30 p. m., after being called by neighbors found the residence in ashes. The fire departments at Theresa and Lomira responded but were unable to check the flames. The house and contents were completely destroyed. The fire was first noticed by neighbors at about 2 p. m.

## STEALS RIDE ON TRAIN, KILLED UNDER WHEELS

JUNEAU—When he fell under the wheels of a passenger train on which he was stealing a ride from Portage, William Walsh, 42, of Minneapolis, was killed near Reedsville, Tuesday evening. With three companions, he was riding the blind baggage. The other men are being held here until the coroner's inquest. They said that they had boarded the train at Portage and were in search of work. Walsh is said to be a married man with a family. He was upon his return home. It is thought that in falling he landed upon his head as his skull was crushed.

## BARLEY YIELDS 47 BUSHELS TO ACRE

Threshing of early grain crops such as barley is already under way. Wednesday of this week, Aug. Otto of the town of Rubicon run through a 4-acre field of barley that averaged 47 bushels to the acre. The barley was of excellent stand which accounts for the high yield.—Hartford Times.

## AUTO ACCIDENTS OF THE WEEK

Mrs. Christ Jahne, 29 Elliott circle, Milwaukee was severely injured and three other persons were hurt when a large sedan driven by her husband left Highway 55 near its junction with Highway 67 about 4 p. m. Sunday. The car skidded up a steep embankment and then toppled back into the ditch upside down. According to Mr. Jahne, a front tire blow-out caused the accident. When the tire exploded the car jumped from the highway, leaped across the ditch and slid up the high embankment on the other side. It hung suspended on the bank for a moment and then dropped back into the ditch tipping over as it fell. Mrs. Jahne was taken to St. Agnes hospital. Her right shoulder was dislocated and she was badly cut and bruised. Mr. Jahne received several fractured ribs and bruises about the body. Mr. and Mrs. Ernest Detroit, of Milwaukee, other occupants of the car were also injured Mrs. Detroit's left arm and side were cut and bruised while Mr. Detroit suffered several cracked ribs and was badly shaken up.

Mrs. Andrew Seefeldt of the town of Ashford was badly cut on the face in a motor accident last Friday on Highway V at Treleven's corners between Marblehead and Fond du Lac. The accident happened on a curve when the Seefeldt car and another machine, driven, it is said, by Edward Murray of Fond du Lac, collided. The Seefeldt car tipped over in a ditch and was badly damaged. Mrs. Seefeldt was taken to St. Agnes hospital, Fond du Lac, where it was necessary for a physician to take 32 stitches to close the cuts. Other occupants of the car including Andrew Seefeldt were their two children, who sustained minor cuts and bruises.

In an attempt to dodge a touring car while crossing the road, Theodore, 12-year-old son of John Jansen, residing a mile and a half from Theresa, suffered a fractured skull, broken leg and other injuries, when he was struck by a truck and knocked to the ground last Friday. The boy was on his way home from a nearby pea viner. He was removed to the St. Agnes hospital, Fond du Lac for medical treatment.

## BAT BLAMED FOR STRANGE BLAZE

A bat Saturday night was the cause of a fire which James B. Day of Hartford, well known real estate man of Hartford, unknowingly started in a spare bedroom at his home in Hartford. Mr. Day heard a noise in the bedroom when he was about to retire, investigating he discovered a bat in the closet. He struck a match in the room, the flare of which caused the bat to fly out into the room and then out of the window. Mr. Day then shut the windows and closed the bedroom door as he went out. Arising the next morning after sleeping in another bedroom, Mr. Day smelled smoke and traced it to the spare bedroom. He found the room filled with smoke and discovered the bed clothing badly burned and the curtains and hangings of the room charred. It is believed that a spark from the match struck the night before had ignited the bed clothing. With the doors and windows tightly shut, it is believed, the flames were suffocated as soon as the oxygen in the room had been consumed by the fire.

## LEGION PICNIC AND DANCE AT BOLTONVILLE

Triangle "B" Post No. 193, American Legion of Boltonville, Beechwood and Batavia, have completed plans for a monster picnic and carnival with dance in the evening to be held at the M. W. A. park and hall on August 14. The address of welcome will be delivered at 1 o'clock by the State Commander of the American Legion, D. J. Kenny of West Bend. During the afternoon games and amusements will be on hand for young and old accompanied by concert music. At 4:45 p. m. a tug-of-war contest will take place. Don't fail to see it. The day will wind up with a dance in the evening. Music furnished by Fred Wentland's orchestra of Plymouth.

## TO HOLD LARGE PICNIC AND PARTY

The members of the Married Ladies Sodality of St. Kilian's congregation, St. Kilian will hold a picnic and parcel sale Sunday afternoon, August 14, and a card party in the evening at Wm. Koch's place at St. Kilian. Music in the afternoon will be furnished by Fell's Moonlight Rounders, as well as other games of entertainment and amusements will be on hand. A delicious lunch will be served by the ladies. The proceeds of this picnic and card party will go towards the building of the new school.

## TRAFFIC OFFICER RIDICULED

Earl Cary, formerly traffic officer on Highway 55, Washington county, but now acting in a similar capacity on Highway 141 in Ozaukee county, is being severely ridiculed by motorists for what they state unfairness in his arrests. He is charged with invoking each and every "trick" provision of the state speed law to make arrests. In consequence the Wisconsin State Motorists association has opened a campaign against unwarranted arrests. "We are going to open a campaign through legislation if necessary to halt this hold-up of visitors to Wisconsin," said Victor F. Petric, state secretary of the Wisconsin association which includes twenty-two automobile clubs throughout the state, who is also a director of the American Automobile association.

"We are not attempting to protect the reckless driver or speed demon—I think they should be sent to jail—but we want a fair deal for the average motorist both from here and elsewhere who is trying to obey the law and who drives cautiously.

"There are several 'trick' provisions in the state law which says cars may be driven at forty miles an hour.

"One of these is the clause which states that machines must slow down to fifteen miles an hour when crossing county trunk highways which intersect state highways. There frequently is no marking at these corners and they are a favorite hiding place for patrolmen who desire only to make arrests regardless of cause.

"There is a clause which states that machines must slow down to fifteen miles an hour when rounding curves where the view is obstructed. Very few motorists know of this provision. "Arrests for violations of such vague provisions, without warning, naturally makes the motorist certain he is not getting a fair deal."

Mr. Petric said he has just completed a 3,000 mile tour of Eastern states, and during that time did not encounter a single "speed cop."

"Eastern states have come to realize that motor traffic must be speeded up, and as long as a motorist drives carefully he is not molested," he said. "Wisconsin must wake up to modern conditions of the state will lose thousands of tourists."

## CHANGES MADE IN ROAD RULES

Madison, Aug. 3.—Important changes in laws of the road governing operation of motor vehicles and trailers are contained in a bill signed by Gov. Fred Zimmerman.

The bill, sponsored by C. N. Maurer, traffic engineer of the state highway commission, is based upon recommendations contained in a code drawn up at a conference called in Washington last year by Herbert Hoover, secretary of commerce. Among the numerous changes which it provides are the following:

Not more than three persons may ride in the driver's seat of an automobile or truck.

The maximum speed limit of trucks is increased approximately 10 miles an hour.

Stickers on windshields are prohibited unless permitted by law.

Muffler cutouts and spark plug whistles are banned.

Trucks of greater width than eight feet are required to carry clearance lights.

Trucks on open highways must not travel closer than 100 feet apart.

Railroad crossing signs are required to conform with the federal type sign, which has a yellow instead of a white background.

## OPEN AIR CONCERT AT NEW FANE

Thursday, August 11 at 8 p. m. the Euterpe Quartet of Concordia College, Milwaukee will give an open air concert on the lawn of the St. John's parsonage at New Fane, under the auspices of St. John's choir. The members of this quartet are Markus Grimm, tenor and cornet, Ira Grimm, tenor and saxophone, Alvin Berg, baritone and piano and Rudolph Lenz, bass. The program consists of popular and college songs, piano, cornet and saxophone selections. The boys have delighted every audience before which they have appeared and an enjoyable evening may be looked for.

## LARGE CROWD ATTENDED FIRE-MAN DANCE

The dance held at the M. W. A. hall at Boltonville last Sunday evening, under auspices of the Boltonville Fire department was attended by the largest crowd seen at any dance in years. 470 tickets were sold. Due to the fact that the hall was crowded to its capacity, a large number who had come there to join the merry makers had to be turned away. The committee in charge desires to thank all present in helping make the dance a success.

# SICK WOMAN SOON RECOVERS

By Taking Lydia E. Pinkham's Vegetable Compound

"A neighbor advised me to try Lydia E. Pinkham's Vegetable Compound, which she said had helped her so much. So I bought a few bottles and tried it out. It sure helped me wonderfully. I felt much better. My work was no longer a dread to me. If I hear of any one who is troubled the way I was, I will gladly recommend the Vegetable Compound to them and I will answer any letters in regard to the same."

Mrs. Ezzra M. Mearns, 1124 N. Penn. Ave., Lansing, Mich.

"I had been sickly ever since I was fifteen years old. After taking Lydia E. Pinkham's Vegetable Compound I got so I could do all my housework and I am in good health."—Mrs. Marie K. Williams, Ketchikan, Alaska.

From Michigan to Alaska, from Maine to Oregon and from Connecticut to California letters are continually being written by grateful women recommending Lydia E. Pinkham's Vegetable Compound.

The Compound is made from roots and herbs and for more than fifty years has been helping to restore run-down, over-worked women to health.

Are you on the Sunlit Road to Better Health?

## Post Erects Street Signs

The hundred vacationists who go to Grand Haven, Mich., each summer will have no trouble finding their way about the city in the future. They will find the streets marked by signs erected by the local post of the American Legion. About two hundred signs will be erected by the Legionnaires in co-operation with city officials.

## Wanted to Know

"And what will you have, sir?" asked the waiter. "Bring me a boiled owl," commanded the overly cheerful diner. "Feshir," he boomed out. "That guy at the next table says I'm a bigger fool than a boiled owl, an' I'm gonna 'investigate.'"—American Legion Monthly.

## Great Expectation

Onyx—Dat nigger's wotness. Florian—"Nottin' else? Why, I'd he'd give you an apple core, dat black boy would expect to be paid back de core ob a watermelon.

## The Salutation

Solitor—I should advise you to write this man a nice polite note and see what happens. Client—All right, I'll do it. How do you spell blackguard?—Boston Post.

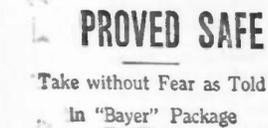

## Correct

First Knut—What would a nation be without women? Second Ditto—A stagnation, I guess.

Badger holes and, to a lesser extent, prairie dog holes are harder on very young lambs than are copotes. In the opinion of a number of forest rangers.

## "BAYER ASPIRIN" PROVED SAFE

Take without Fear as Told in "Bayer" Package

Does not affect the Heart

Unless you see the "Bayer Cross" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians over twenty-five years for

Colds Headache Neuritis Lumbago Toothache Rheumatism Neuralgia Pain, Pain

Each unbroken "Bayer" package contains proven directions. Handy boxes of twelve tablets cost few cents. Drugists also sell bottles of 24 and 100.

## SKIN BLEACH

BEAUTY'S SECRET and more. The complete box of KREMOLA will convince the most skeptical. Also come Creams, Face, Hair, Agents wanted. BEAUTY BOOKLET FREE. Dr. C. H. Berry Co., Dept. B, 205 Michigan Ave., Chicago.

## Ma Buzz went to the country. Hooray!

FLIT spray clears your home of flies and mosquitoes. It also kills bed bugs, roaches, ants, and their eggs. Fatal to insects but harmless to mankind. Will not stain. Get Flit today.

FLIT DESTROYS Flies Mosquitoes Moths Ants Bed Bugs Roaches

The yellow can with the black band

## Reduce Sow's Grain

When pigs are to be weaned the amount of grain fed to the sow should be reduced. It is also a good plan to take the sow off pasture for a few days at that time until her milk flow ceases. During the summer, sows should run on good pasture and be fed enough grain to bring them along in good condition to farrow in the fall. Three or four pounds of grain per sow per day should be sufficient. The young sow should be fed enough grain to provide for normal growth.

## Take Care of Foal

Special attention is required by the young foal. Keep him in a box stall, darkened for protection from flies. The stall should be clean and well-bedded. A handful of oats, a bucket of fresh water, and some good legume on the mare. Milk the mare a little when she comes in from work and let her cool off some before the foal gets his meal. Turn both out on pasture at night.

## Team Work

Jokesmith—I showed it to a playwright and he wrote a musical comedy around it.

All Set! "How are you coming along with your courting of the banker's daughter? Pretty tough going, eh?" "Not so bad! I'm getting some encouragement."

"She's beginning to smile on you, is she?" "Not yet, but last night she said she had told me no for the last time."

No Hope for Him She—I tell you our son will never get married. He's too stupid. He—But that's the very reason why he will marry.—Der Goetz, Vienna.

## She Changed It!

Lawyer—But why did you throw acid on your husband? Fair Client—I—oh, how bad I grew so tired of seeing the same face across the breakfast table every morning.

## Team Work

Artist—Did you sell that joke about the college student and the waitress?

Artist—No, but last night she said she had told me no for the last time."

## Team Work

Sleep can be pastured on sweet clover alone as the only pasture or the only feed, though there will be some likelihood of sheep bloat when pastured in this way.

In feeding trials at South Dakota State college the feeding of ground barley was found to be the most efficient method of utilizing this grain as a fattening feed for pigs.

## A New Way to Make Jellies

Without Staining Fingers—Without Long Hours of Boiling—Without Depending Upon Berries or Fruit Being in Season.

One of the most interesting and yet one of the simplest new products in the food field is called minute jelly. It is pure fruit or berry juice already boiled down and concentrated. To this concentrated juice, fruit pectin in the right amount has been added. The pectin is that part of fruit which makes jelly "jell." It is as pure and wholesome as the fruit juice.

To make the jelly take the little bottle of concentrated juice, pour in a sauce pan, add water and sugar according to directions on the bottle and boil a few minutes. Then pour into jelly glasses and when it has become cold you have the most delicious pure fruit jelly you ever tasted.

A few bottles kept on hand, selected according to your taste for jellies, and you can make up a few glasses just as you want it. One small bottle makes two glasses of jelly. If you wish to try two bottles send us twenty-five cents and we will give you your choice of grape, mint, pineapple, orange, raspberry, strawberry or blackberry. Or four bottles—all different—for fifty cents. Address Department WU, General Packing Corp., Cranford, New Jersey.—Adv.

## Work on "Movie" That Audience Doesn't See

The movie-going public, unfamiliar with the making of a moving picture, has no idea of the time and labor required to produce a film that runs an hour or two in a theater, according to Lillian Gish, famous American screen star, who says, in an article in Liberty, "You buy a ticket at the box office, find a seat, and watch a picture for a while. Then you get your hat and walk out. In two hours you have witnessed something which may have taken us eight months and a million dollars to make.

"You have seen a woman walk across the screen," continues the actress, "pause at a window, and turn to stare at a man coming through a door. It takes 40 seconds to show you that scene—and it may have taken us 40 hours to get it right. We may have done that one bit of acting a hundred times in rehearsal, and a dozen times before the camera; and that is only one of a thousand episodes in the play."

## BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrup. Contains no narcotics. Proven directions are on each package. Physicians everywhere recommend it.

The genuine bears signature of

## Epidemic's Big Toll

An estimate of the deaths caused by the influenza epidemic, 1918 and 1919, was made by Lamont in the Gazette des Hopitaux, September 30 and October 2, 1919. He says that for the total of eleven months, allowing for analogous mortalities in Central Asia and the Far East, the world mortality could easily have exceeded 25,000,000.

## Claims Quilt Record

Mrs. Amanda Conrad, seventy-five, Prairie Hill, Mo., believes she established a world record in quilt-making when she completed a serap quilt containing 16,400 pieces. Nine spools of thread were used and four months of spare time occupied.

## The Likeness

She—You remind me of the sea. He—Wild, romantic, relentless— "No—you just make me sick."

## Hideos Mirth

Howell—"The loud laugh bespeaks the vacant mind." Jones—"Why, who's been laughing at you?"

Prodigals always exceed the supply of fatted calves.

One owes some deference to public opinion, merely because so many people hold that view.

How sweet and sacred idleness is.—Lander.

# Prices for Beef Cattle Highest

All Classes and Grades Have Participated in Advance Since 1920.

(Prepared by the United States Department of Agriculture)

Beef cattle this season have 1920 the highest for the season since 1920 when prices were on a high level because of war inflation, according to a review of the spring cattle market issued by the bureau of agricultural economics, United States Department of Agriculture. All classes and grades of cattle have participated in the advance, the general price increase over last year and the five-year average ranging from 12 to 27 per cent.

The present comparatively high price level for the better grades of fed steers is unusual for this season of the year, says the bureau, and is attributed partly to the fact that receipts of all cattle at the principal corn-belt and eastern markets were 4 per cent smaller during the first four months of this year than during the same period last year. There was a considerably larger decrease at some of the markets, particularly those receiving a high proportion of fed calves. The premium for weight also has been a factor in raising the average price for the better grades of fed steers.

## Slaughtering Was Less

During each of the past five years production for the first four months exceeded that for the same period a year previous, but this year proved to be an exception. Beef produced from cattle slaughtered under federal inspection during the first four months of this year was 3 per cent less than was produced in the same period of 1920. Most of the decrease occurred in March and April. The live cost of these cattle to slaughterers for the first four months averaged \$8.08 against \$7.49 in 1920, an advance of 8 per cent over last year, or 14 per cent over the five-year average. The long-time trend in cattle slaughter has been upward, especially the number of head slaughtered under federal inspection and the quantity of beef which moves into commercial channels.

The generally higher average prices for slaughter cattle during the past few years have been accompanied by increased total and per capita consumption of beef, indicating an increasing consumptive demand for this product. With total beef consumption increasing in population, with consumers adjusted to the heavy beef consumption of the last few years, and with the present trend of potential supplies downward, the outlook for the industry appears very favorable.

The strong demand for stocker cattle the past spring was reflected in

an increased movement of such cattle out of southern areas. During the first four months of this year, cattle receipts at southern markets increased 40,000 head or 28 per cent over the same period last year. Also the higher price for the lower grades of cattle has increased the receipts of such cattle at the small corn-belt markets. The decrease, while small as to total numbers, amounted to 17 per cent.

Period of Overproduction. The cattle industry for a number of years has been passing through a period of overproduction which has resulted in curtailment, liquidation, heavy market receipts, and consequently a high slaughtering ratio to numbers remaining on farms and ranges. This has temporarily increased the tendency to market cattle at younger ages, resulting in a more rapid turnover. With the present trend away from the production of aged grass steers our beef supply depends more on the feeder.

The higher price level for cattle may possibly be accompanied by some further culling and liquidation of range herds this fall, but we are approaching the end of the period of overmarketing and, except for forced marketings because of drought conditions, the number of cattle forced on the slaughter market will be limited. Prices in western areas have increased more proportionately than have prices at the central markets. Breeding animals and growing stock are in "strong hands," and with available pasture or range, excessive market supplies of range cattle for several years seem doubtful.

The total number of all cattle and calves in the 17 western states has declined about 1 per cent since 1920, and the total for the United States has declined 10 1/2 per cent. While it is impossible to make any definite segregation between dairy and beef cattle, beef cattle in the West seem to have decreased fully 25 per cent during the past seven years.

## Good Pasture Grass to Help Milk Production

Good pasture grass holds a place in the list of delicacies for dairy cows which no other feed can quite fill. It does have a wonderfully stimulating effect on milk production after a cow has gone through the winter on dry feed alone. However, the ability of grass to produce milk is generally overestimated, and a cow cannot maintain a heavy flow of milk on grass alone. Grass, and especially early grass, contains a high per cent of water and it is a physical impossibility for a cow to eat enough to supply nutrients for more than 25 to 30 pounds of milk a day. Cows giving more than this should receive grain in proportion to their production.

## NEW STANDARDS FOR HONEY ARE ATTRACTING WIDER ATTENTION

Will Aid the Beekeepers in Grading Their Product.

(Prepared by the United States Department of Agriculture)

All exhibits of honey at the Ohio state fair this year will be judged according to the United States standards for honey as given in the United States Department of Agriculture Circular 419-C, "U. S. Standards for Honey."

Such demonstrations of the use of the United States standards for honey, says James I. Hambleton of the division of bee culture investigations, will not only aid beekeepers in the work of grading their honey but will also give the public an opportunity to learn something of the work that is being done in standardizing food products. Only through grading to uniform standards is it possible for the consumer to know, when he buys honey or any other food product supposed to be of a certain quality, that he is getting that quality.

In addition to the grading rules, the circular contains much other information on grading and packing honey. The circular will be sent free on request to the Department of Agriculture, Washington, D. C.

Members of the Pan-American Conference on Standardization, which met at Washington during the Third Pan-American Commercial conference early in May, visited the exhibit and demonstration of the United States standard grades for honey prepared by the division of bee culture investigations. In collaboration with the bureau of agricultural economics, of the United States Department of Agriculture.

## Skim Milk Helps

The butter and cream farmer has a further advantage, for he has skim milk for his calves, pigs and chickens. With present feed prices, the amount of home-produced feed makes a big difference in the cost of feeding the farm animals. Skim milk takes the place of the most expensive part of the ration—the high protein concentrate. The farmer who has plenty of skim milk has at hand the best and cheapest method of raising his calves.

## Agricultural Items

You can prevent hog cholera by vaccination; you can't cure it.

The outlook for dairying is better than it has been for some years.

Where live stock is kept and manure is available, ten tons per acre as a top dressing to wheat will often double the yield.

The more farmers recognize the importance of "We" rather than "I" the more agriculture will prosper.

By rotating, the garden insect pests do not trouble as much as when they are allowed to harbor from one year to another in old garden rubbish.

It's penny wise and pound foolish not to spend money in preventing losses from poor seed, insects, and diseases, unsystematic marketing, etc.

To add strength to concrete, mix six and three-fourths gallons of water with a sack of cement, then add stone and gravel.

Sleep can be pastured on sweet clover alone as the only pasture or the only feed, though there will be some likelihood of sheep bloat when pastured in this way.

In feeding trials at South Dakota State college the feeding of ground barley was found to be the most efficient method of utilizing this grain as a fattening feed for pigs.

## Team Work

Jokesmith—I showed it to a playwright and he wrote a musical comedy around it.

All Set! "How are you coming along with your courting of the banker's daughter? Pretty tough going, eh?" "Not so bad! I'm getting some encouragement."

"She's beginning to smile on you, is she?" "Not yet, but last night she said she had told me no for the last time."

No Hope for Him She—I tell you our son will never get married. He's too stupid. He—But that's the very reason why he will marry.—Der Goetz, Vienna.

# RADIO

## New Antenna Is Aid to Reception

### Cleaning Connections and Attention to Ground Wire Improves Set.

By DON C. WALLACE

The tendency nowadays is to add tubes to the radio set. Sets are now made with five, six or eight tubes with resistors. The average fan, however, is not able to add tubes to his set by merely going to the nearest radio store, purchasing the necessary equipment and then putting them together. His pocketbook would not stand for this sort of a process. Nevertheless, he would like to improve his set. The question then changes its nature and becomes: How can I improve my set with the least expenditure?

Tubes are expensive, but not so expensive as they were a year ago. The main expense in connection with the addition of tubes is not actually the tubes themselves but the other materials necessary to make them fit in with the rest of the set. The addition of tubes will improve the operation of the set provided this addition is done in the proper manner.

Improvement Difficult. It is rather difficult to improve a set. Generally speaking, the set is made well and as efficiently as possible at the start. This is especially true of a manufactured set, so it would be difficult to improve the set itself. The accessories can well be improved, however. Under this head we can classify the batteries, both A battery and B battery. If the set uses a C battery it will be well to test out this of regular intervals. The C battery should be tested with a voltmeter in the same manner as is the B battery.

When a dry cell type of set has been purchased, this does not mean that dry cells must of necessity be used with the set. Storage batteries, which give the same voltage, have been developed and in addition they are almost the same size. The cost of batteries such as these is not great and it would be well for each set owner to look into the matter of storage batteries of a good B-power supply when purchasing a new set of batteries. This would be in the nature of an "accessory" improvement.

Clean Connections. Another form of improvement, which lessens the likelihood of stray noises and racket, is the thorough cleaning of all the contacts and connecting wires. Each connecting wire should be disconnected (preferably one at a time), thoroughly sandpapered or scraped where contact is to be made, then replaced and the binding post cleaned as tightly as possible. Incidentally, it is well to remove the tubes from the set before doing any sort of connecting or changing. This is in the nature of a "caution" as many a tube has been unwittingly burned out while connecting or disconnecting batteries. The merest sort of a flick or momentary connection will cause the burn-out.

The ground connection should be thoroughly cleaned and tightened. Now this has been done no one should be able to move the ground clamp, even if it is roughly jerked. The antenna connection should also be tightened. Little details such as these may not even be noticeable, but they are theoretically correct, and if attention is given to them the resistance of all the circuits involved is automatically lowered. There is then the opportunity for scraping noises and satisfaction is bound to be more constant.

New Aerial Best Change. All of the foregoing is general. The real improvement will come when the antenna is improved. Dollar for dollar, there is nothing which will improve the volume, the clearness, and consistency of radio reception quite so much as a good antenna. Almost any antenna is as good as it can be made. Suggested improvements are as follows: Make it higher. If it comes near the building, make that distance greater. In other words, just because the antenna misses a building four feet, or even fifteen feet, there is no reason for supposing that the antenna is as good as it can be made.

Use an otherwise good antenna is improved because the insulators have been in use for a year or more. A clean coating of soot and dirt has been formed. The texture of the insulators is often really changed as a result of dirt, heat and cold. It is advisable to change the insulators for new ones every year.

Lead of all, the antenna wire itself should be changed. New insulators, new wire, a better support, can be purchased for less than \$2 in all. The complete renewal of these items will increase the volume of the received program, add to the consistency of the range of the set and decrease the quantity of extraneous noises heard.

Radio Beacons for Ocean Flights Seen Possible. This summer's onrush of nonstop flights over the Atlantic has revived the idea of establishing radio beacons across the ocean to make such air travel safe. So great a radio authority as Dr. J. H. Dellinger, head of the radio laboratory of the United States bureau of standards, foresees this possibility. "Such a proposal," says Dellinger, "is entirely feasible, and while these beacon stations will not be established in midocean this year or next, it is not unlikely that they will be constructed within ten years."

Cost of putting these up, however, would be high. They would have to be anchored 500 to 1,000 miles apart, to radiate double-beam signals for passing aircraft, or a powerful station, radiating 100,000 watts of energy, would have to be built on either side of the Atlantic.

## Transatlantic Airplanes Taking Advantage of These Directive Radio Beacons

Transatlantic airplanes taking advantage of these directive radio beacons would have to be equipped with a radio receiving set operated by one dial, a visual indicating device for denoting when the aviator is traveling in a zone of safety as outlined by the double-beam radio waves, and a means of shielding the airplane engine ignition system so as to prevent interference with radio reception. At present most of the experimental work of the radio laboratory of the bureau of standards centers about the receiving apparatus for use on airplanes. Experimentally, there has been developed at College Park, Md., a simple one-dial receiving outfit which is practically automatic in operation, and vari-colored lights flashed on the instrument board of the flying craft indicate to the pilot when he is on or off the signal zone or path of safety.

Esthonia's Radios Must Not Cause Interference. If the radio laws of Esthonia, that small country in the heart of Europe located between the Gulfs of Finland and Riga and bordered by Russia and Latvia, were enforced in the United States, a large number of the radio receivers now in use would be antiquated. In that country the radio regulations make it illegal to operate a receiver that interferes with reception. In Esthonia it is the bureau of posts and telegraphs which has control over radio and this department of the government rules that all radio receivers must be maintained below the point of oscillation at all times. Sets employing radio-frequency amplification which use two or more tubes must be balanced before they are approved and super-heterodyne receivers must be operated with a loop antenna. All owners of radio receivers are required to take out a license, and a violation of the radio law results in a revocation of the permit to own or operate any type of radio apparatus.

Radio an Aid to Those Who Are Hard of Hearing. Radio dealers have found that deaf persons are often purchasers of radio sets. This can be more easily understood by the recent surveys made by experts. Specialists in diseases of the ear have said that they not only know of many deaf persons who heard the radio perfectly but that the condition of deafness has actually been improved by treatment with the radio.

A four or a five-tube set has been prescribed by many ear specialists as the best suitable for a deaf person. A single tube will amplify the vibration 25 times; the second increases it about 625 times, the third about 15,000 times, and proportionately more with each additional tube.

Burnt Out Transformer May Still Be Utilized. In many radio junk boxes will be found burnt-out audio-frequency transformers. As it is almost always the primaries of these transformers which burn out, the instruments can be utilized very satisfactorily by connecting a 100,000-ohm fixed resistor across the primary terminals and a .006 to .01-mf. condenser between the "grid" and "plate" terminals of the transformer. This connection effects resistance-capacity coupling with an impedance leak, and will be found to give unexcelled tone quality, from even cheap and inefficient transformers, says Radio News Magazine. It is a relatively simple matter to make clips of spring brass for the resistors.

Most women powder their noses and arrange their hair before facing the microphone for broadcasting. Never add "potent electrolyte" or "quick charge" solutions into a storage battery. These solutions will ruin the battery in a short time. Locate Emergency Fuse Close to the Terminal. When installing fuses in a receiving set, especially in the "A" battery circuits, place them as close to the terminal as possible, so that the current will have to flow through them, whether the battery is on charge or operating the set. The fuse should be not greater than 10 amperes capacity, and either automobile or electric-light type of mountings and fuses may be used. The porcelain socket may be fastened to the wooden case with ordinary wood screws, as there are holes provided in it for this purpose. Be very careful, however, that the screws are not long enough to go completely through the wood to damage the rubber cells of the battery.

When a dry cell type of set has been purchased, this does not mean that dry cells must of necessity be used with the set. Storage batteries, which give the same voltage, have been developed and in addition they are almost the same size. The cost of batteries such as these is not great and it would be well for each set owner to look into the matter of storage batteries of a good B-power supply when purchasing a new set of batteries. This would be in the nature of an "accessory" improvement.

Another form of improvement, which lessens the likelihood of stray noises and racket, is the thorough cleaning of all the contacts and connecting wires. Each connecting wire should be disconnected (preferably one at a time), thoroughly sandpapered or scraped where contact is to be made, then replaced and the binding post cleaned as tightly as possible. Incidentally, it is well to remove the tubes from the set before doing any sort of connecting or changing. This is in the nature of a "caution" as many a tube has been unwittingly burned out while connecting or disconnecting batteries. The merest sort of a flick or momentary connection will cause the burn-out.

The ground connection should be thoroughly cleaned and tightened. Now this has been done no one should be able to move the ground clamp, even if it is roughly jerked. The antenna connection should also be tightened. Little details such as these may not even be noticeable, but they are theoretically correct, and if attention is given to them the resistance of all the circuits involved is automatically lowered. There is then the opportunity for scraping noises and satisfaction is bound to be more constant.

New Aerial Best Change. All of the foregoing is general. The real improvement will come when the antenna is improved. Dollar for dollar, there is nothing which will improve the volume, the clearness, and consistency of radio reception quite so much as a good antenna. Almost any antenna is as good as it can be made. Suggested improvements are as follows: Make it higher. If it comes near the building, make that distance greater. In other words, just because the antenna misses a building four feet, or even fifteen feet, there is no reason for supposing that the antenna is as good as it can be made.

Use an otherwise good antenna is improved because the insulators have been in use for a year or more. A clean coating of soot and dirt has been formed. The texture of the insulators is often really changed as a result of dirt, heat and cold. It is advisable to change the insulators for new ones every year. Lead of all, the antenna wire itself should be changed. New insulators, new wire, a better support, can be purchased for less than \$2 in all. The complete renewal of these items will increase the volume of the received program, add to the consistency of the range of the set and decrease the quantity of extraneous noises heard.

## Ty Cobb Writes for Newspaper

The photograph shows, left to right, Kid Gleason, assistant manager of the Philadelphia Athletics, and Ty Cobb, outfielder of the Athletics, as they appeared in the office of a New York newspaper. Gleason seems astonished to find his teammate on the staff of the paper.

## Babe's Career Was Joe's Inspiration

Babe Ruth's career was the inspiration that set Joe Judge on his way to the welterweight championship of the world. Like the Big Bambino, Dundee calls St. Mary's Industrial school at Baltimore his alma mater. He spent six months there. The feats of Babe Ruth, as discussed by other boys there, were the spark needed to fire the young Italian. He loved to fight. So with Babe as his inspiration he set forth to realize a dream which came true when he defeated Pete Luzzo for the welter crown.

## Hornsby Would Race

Piqued by newspaper comment that he was not as fast a man as Frankie Frisch, his second base successor with the Cardinals, Rogers Hornsby issued a challenge to the Fordham Flash to run him a race around the bases. Hornsby said he would be willing to back up his feetness with a side bet.

Piqued by newspaper comment that he was not as fast a man as Frankie Frisch, his second base successor with the Cardinals, Rogers Hornsby issued a challenge to the Fordham Flash to run him a race around the bases. Hornsby said he would be willing to back up his feetness with a side bet.

## Sport Notes

The race is not always to the Swift. Armour won the golf open.

What happens when a golfer who wishes to become exclamatory finds himself tongue-tied?

Only three Americans are members of the Buenos Ayres Jockey club, the richest in the world.

We anxiously await news of the first red-headed woman with six children who swims the channel this year.

If some of the women look funny in short skirts some of the masculine golfers look quite as funny in short pants.

Golf must make the whole world kin. Even John D. Rockefeller blames his high score on the condition of the course.

Frank M. Lewis, president of the San Antonio (Texas) Country club, who has been playing golf regularly since 1900, recently scored his first hole in one.

Ivyn State college will add a winter sports field and skating pond to its athletic equipment. A ski jump, toboggan slide and other winter sports are contemplated.

The highest price ever paid at auction for a yearling saddle-bred colt was paid recently by M. S. Fuqua of St. Louis, when he bought Elizabeth Highland at the Blue stock farm in Mexico, Mo., for \$2,650.

Before McDonald Smith, the professional golfer, makes a shot he examines contours, feels the sod, sights his ball fore and aft and then makes a final tour of inspection to eliminate any stray obstacle.

When an English judge ordered a woman golfer to pay \$750 damages for breaking another woman's jaw with a club swing, he remarked, "The vast majority of those who play golf are not players." Alas, your honor, many of them so admit.

## Most Brilliant Bit of Golfing for 1927

The most brilliant bit of golfing of 1927 was coupled with one of the most startling reversals of fortune on record when Leo Diegel recently shot the in-bounds nine of the Columbia club course in 23, exactly six under par. Diegel's audacity is revealed in a description of the feat in the American Golfer for June. The pro star had bet that he could negotiate the course in 68, only to find himself with a 30 at the end of the first nine. Nonchalantly he accepted a second bet of \$100 to \$1 that he'd never come in within the limit, then clipped off the next nine holes in four pars, four birdies and an eagle.

## WANER AND HARRIS ADD HARD PUNCH

### Have Been Big Guns of the Pirate Attack for Weeks.

There may be more and bigger headlines about the brace of Yankee batters, Buster Gehrig and Babe Ruth, or the clouting combination of the Athletics, Ty Cobb and Al Simmons, but no Pittsburgh fan would consent to take either pair just now for the two Buccaneer bombers, Paul Waner, the bridegroom, and Joe (Moon) Harris.

Waner, a youth of twenty-four, but already a star of the first magnitude, and Harris, the battle-scarred veteran of thirty-five, have been the big guns of the Pirate attack for weeks. Their consistent and timely wallpopping has been as vital a factor as any in the club's ability to keep its pace around the top, where had "breaks" such as the temporary loss of Kremer and the injury to Cuyler threatened to be disastrous.

Paul Waner has replaced Glenn Wright as the team's foremost exponent of the timely art of driving in runs. Harris has been zooming along the top of the league's batting ever since Muncie Donis Bush shifted his lineup and put the Moon on first base, a move that netted immediate results and snapped the Pirates out of their earlier slump.

Harris and Dutch Ruether, both cast off by Washington last season, have become vital factors in two penning races. Ruether has been twirling brilliantly for the American league champions, the Yankees, now well out in front in a dash for a second straight title. If present prospects are fulfilled Dutch may be tossing 'em up for his old teammate, Moon, when the world's series rolls around in October.

Of the new pitching stars unearthed during the last year, Willis Hudlin of the Cleveland club is regarded as one of the most promising. He is, however, very slow.

Rawlings, former New York Giant and second-baseman of the Columbus club of the American association, has been sold to the Minneapolis club of the same league.

Heinie Groh, veteran infielder, who purchased his own release from the Rochester International league club is now playing regularly with the Pittsburgh Pirates.

Carroll Yerkes, now playing for the Portland club in the Pacific Coast league, is a cousin of Steve Yerkes, who was a member of the Boston Red Sox from 1909 to 1914.

Web Dickie Kerr, veteran southpaw, was given his unconditional release by the Fort Worth Texas league club. He has been unable to play for some time because of an injured hand.

Harry Heitman, formerly with the Brooklyn Nationals, and Joseph McEntree, captain of the Holy Cross baseball team, have been signed for the Haverhill New England league club.

Vance manages to have one particularly easy inning in every game. He retired the Giants on four pitched balls in the sixth, and was back in his place on the bench before it had time to cool off.

Charles E. ("Punch") Knoll, who managed the Danville club of the Three-I league last year, has taken charge of the Quincy Three-I club. Knoll succeeds Mack Allison as manager of the Reds.

The Self-Starters' attitude of vast distinterest in the 1928 selections, reminds us of the pitcher warming up in left field, who never looks around while some collegue is being hammered out of the box.

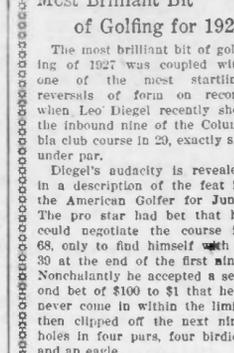

Bob O'Farrell, manager of the Cardinals, has not been doing much catching this season. He had a lame shoulder earlier in the year. In 1925 he was voted the most valuable player in the National league.

Eddie Graboski, star captain of the Lane Tech high school (Chicago) championship baseball team, who recently signed a contract with the Cardinals, has been farmed out to the Danville club of the Three-I league.

The resignation of Le Fohl as manager of the Toronto International league club is announced. William O'Hara, business manager and coach of the Leafs for the past two years, has been appointed his successor.

Carl Mays, Cincinnati pitcher, underwent an operation for hernia in Cincinnati on June 29. The operation was pronounced a success, but it was indicated that he would have to give up pitching for the remainder of the season. Merely some more of Jack Hendricks' tough luck.

## Another Helen Willis

England, it turns out, has a budding Helen Willis in Betty Nuthall, who defeated Mrs. Molla Mallory at Wimbledon after losing the first set. The sixteen-year-old school girl was not affected by stage fright, and according to the cable reports, not only outplayed but outgeneraled her experienced opponent, who seven times has been national champion of this country—is now, for that matter, it was high praise indeed for Mrs. Mallory to say to her in shaking hands after the match: "You are a great player." England is hoping Mrs. Mallory is right.

## Kistler Is Retired

After 31 years as swimming coach at the University of Pennsylvania, George W. Kistler has been relieved of his duties. He will be succeeded by William S. Merriam of Detroit. Kistler is to remain in the physical education department at the university, but Merriam will have charge of the varsity swimming and water polo teams. Merriam, who is also an attorney, has coached at University of Indiana in Indianapolis, A. C. and developed many noted swimmers. The new coach will assume his duties October 1.

## Yale Elects Coxswain

Pete Stewart, varsity coxswain for the past two years, has been elected captain of the Yale crew by his shipmates. Stewart, who will be a senior next year, lives in New Orleans. He has three years of service at the helm of Yale crews behind him, as he coached his freshman eight before breaking into the varsity in his sophomore year. Stewart, one of the few coxswains to be given the honor in college rowing history, succeeds Capt. F. F. Robinson of New York.

MONARCH Quality for 70 Years. Are you coming to my party, Frank? We'll have Monarch Cocoa and Teenie Weenie Peanut Butter sandwiches. Reid, Murdoch & Co. Established 1853. Chicago Pittsburgh Boston New York Jacksonville Tampa Los Angeles

## Home of John Wesley Bought by Wesleyans

Epworth vicarage, home of John Wesley, founder of Methodism, is about to pass into the hands of the Wesleyan church. It has been an Anglican rectory all these years, as it was in the days when the Wesley brothers, their father, but above all the noble figure of their mother, Suzanne, lived there. It had fallen into dilapidation and the rector appealed for help. Naturally the Methodists came forward and even proposed to buy the historic place. The broad sympathy that has marked Inter-Protestant relations since the Lambeth conference in England was also in evidence at the conferences that led to the purchase. There was a time, not so far distant, when harsh words might have fallen. It will no doubt become a place of grateful pilgrimage to tens of thousands of Wesley's fellow men. But the old ghost that haunted it in John Wesley's youth, that shuffling ghost, jocularly called "old Jeffries," is no longer there.—Pierre Van Paassen, in the Atlanta Constitution.

## They Stick You

Alexander Kerensky, one time Russian President, said at a dinner in Philadelphia: "The bolsheviks conspire in every country, they plot against every government, and if you utter a word of disapproval—dear me, how their feelings are hurt! As sure as death they'll bomb you if they get a chance." "Nevertheless," declared a rich red head or pink, "the bolsheviks, you must remember, have their good points." "Yes," said M. Kerensky savagely, "the same as a porcupine has his."

## Pavia Is Oldest College

The oldest university in the world is that at Pavia in Italy, founded in 825 A. D. by Lothair, grandson of Charlemagne, according to Liberty.

## Farm Co-operation

The farmers of western Canada in less than four years have established the largest co-operative wheat organization of its kind in the world.

## Fast Air-Mail Schedule

Airplanes will soon leave New York or San Francisco at night and deposit mail at the opposite coast for early delivery on the second morning.

## Popularity

"A good chief gets more than a college professor." "Why shouldn't he? A lot more people take his courses."

Ivory is properly the material of the elephant's tusks, but some rhinoceros horns and hippopotamus teeth find their way into the ivory market.

Most of us don't want to be so good that we're uncomfortable. For this reason "uplifts" are hated.

Petrified remains of a prehistoric forest found in Texas show fallen tree trunks as tall as 500 feet.

One of the great moral fights that some nations have is to keep from setting too much.

Character is something the whole community will lean on—without being grateful enough for it, either.

As men lose in self-conceit they gain in uplift.

Rolling stones gather no moss, but they are nobody's stepping stone.

The Last Survivor. Flyosan has killed all his millions of friends and relatives. Flyosan is the original liquid insect spray (non-poisonous). Use Flyosan itself, not one of its imitations. Flyosan not only kills all the flies and mosquitoes in your home but also rids it of the millions of deadly, disease-bearing germs which each one carries.

Peterman's. Swatting only scatters these germs into the air which you and your family breathe. Here is the right insecticide for each insect. Flyosan, Liquid Spray—kills flies and mosquitoes. Peterman's Ant Food—exterminates ants. Peterman's Discovery, Liquid—exterminates bed-bugs. Peterman's Roach Food—exterminates roaches. Peterman's Moth Food—protects against moths. You must have a specific insecticide for each insect. No single insecticide will exterminate them all. We have had nearly 50 years' experience. We know that is true.

CORNS Ends pain at once! In one minute pain from corns is ended. Dr. Scholl's Zino-pads do this safely by removing the cause—pressing and rubbing of shoes. They are thin, medicated, antiseptic, healing. At all drug and shoe stores. Cost but a trifle. Dr. Scholl's Zino-pads Put one on—the pain is gone!

Pioneer Minister. Rev. Samuel Shelton was the first minister of the colony of Salem, Mass. He was born in the parish of Coningsby, Lincolnshire, England, February 26, 1592 or 1593.

There are people who clamor for laws simply out of spite.

Kind words oil the wheels of life.

"A God-sent Blessing" is what one mother writes of Mrs. Winslow's Syrup. Thousands of other mothers have found this safe, pleasant, effective remedy a boon when baby's little stomach is upset. For constipation, flatulency, colic and diarrhoea, there is nothing like MRS. WINSLOW'S SYRUP. The Infants' and Children's Regulator. It is especially good at teething time. Complete formula on every label. Guaranteed free from narcotics, opiates, alcohol and all harmful ingredients. At all Druggists. Write for free booklet of letters from grateful mothers. ANGLO-AMERICAN DRUG CO. 215-217 Fulton St. New York

Hanford's Balsam of Myrrh Since 1846 Has Healed Wounds and Sores on Man and Beast. Money back for first bottle if not suited. All dealers.

W. N. U., MILWAUKEE, NO. 32-1927.

One worthless man in a village serves as a bad example to the entire youth of the community.

Women refuse to be sullen, no matter what they think. Here is where men could learn.

Peterman's. Swatting only scatters these germs into the air which you and your family breathe. Here is the right insecticide for each insect. Flyosan, Liquid Spray—kills flies and mosquitoes. ### BOLTONVILLE

Carl Gruendeman was a business caller at Fond du Lac Tuesday.  
Miss Lavern Eisenbraut spent a few days at the O. Marshman home.  
Dolores, Merlin and Vernon Dettman spent a few days at Batavia.

The firemen's dance held here Sunday evening was largely attended.  
A bright baby boy arrived at the home of Mr. and Mrs. Paul Schultz.  
Mrs. Aug. Ahrens and son Alfred are visiting with relatives at Marshfield.

Leo Weiss and sister Regina of Milwaukee called at the J. Weyker home Sunday.  
Miss Elaine Frauenheim is spending a week with her grand mother at Random Lake.

Mrs. Carl Grandeman and children spent Wednesday with her parents at Random Lake.

Mr. and Mrs. Paul Schultz are rejoicing over the arrival of a baby boy, born July 29th.

Mrs. Geo. Meilinger and family spent Wednesday evening at the Chas. Eisenbraut home.

Mrs. Geo. Meilinger and children spent Tuesday evening with Mr. and Mrs. O. Marshman.

Mr. and Mrs. Clifford Stautz and family of Batavia spent Sunday with the C. Stautz family.

Mrs. Theo. Kaul of Ladysmith is spending a few days at the Frank Oettinger home here.

Mrs. A. Schimmel of Batavia is staying at the home of Mr. and Mrs. Paul Schultz for some time.

Oscar Marshman arrived home Saturday after spending two weeks with relatives at Plainview, Minn.

Mr. and Mrs. Frank Krueger and daughter of Milwaukee spent a few days at the Henry Laatsch home.

Mr. and Mrs. Arnold Stautz and Mr. and Mrs. J. Rosendahl of West Bend spent Saturday evening with the Chas. Stautz family.

Mr. and Mrs. O. Koth and son and Mr. and Mrs. Walter Frauenheim spent Thursday evening with Mr. and Mrs. Paul Belger.

Ben Woog spent Sunday at Kaukauna and was accompanied home by his daughter Iva, who spent the past week there with relatives.

Mr. and Mrs. Otto Liepert and sons Walter and Edward arrived at Milwaukee Saturday evening and on Sunday spent the day at Zion City.

Mr. and Mrs. Harvey Dettman and family and Miss Thelema Dettman spent from Saturday until Monday with relatives at Bonduel.

Mr. and Mrs. Walter Frauenheim and daughter Elaine accompanied by Mrs. Hattie Frauenheim of Random Lake spent Sunday at Port Washington.

The following enjoyed a fish fry at Smeis at Lake Michigan last Friday: Mr. and Mrs. W. Dettman and family, Mr. and Mrs. R. Dettman and family, Mr. and Mrs. O. Schultz and family, Mr. and Mrs. W. Volk and family, Mr. and Mrs. W. Henry Fickler, Mr. and Mrs. Wilmer Wendel, Mr. and Mrs. E. Dettman and family, Mr. and Mrs. W. Frauenheim and family from here and Mr. and Mrs. R. Zinkgraf, Mr. and Mrs. E. Hintz and family, Mr. and Mrs. W. Pfeifer and Mr. and Mrs. J. Hammon of Batavia.

—Henry Kirchner of the town of Wayne had a narrow escape from serious injury last Saturday afternoon when cranking his Dodge touring car. The car was in gear, not to his knowledge and the first turn-over of the crank and the car started. He dodged the car, climbed into it and brought it to a stop before it crashed into any buildings. It had climbed over the curb onto the newly laid cement and the cracking of all edges over which the car passed.—West Bend News.

## Be Ready for Any Condition at Harvest

McCormick and Deering grain binders have long enjoyed a world-wide reputation for substantial construction and ability to stand up and do accurate work year after year. Now you can buy in one machine the best features of both the McCormick and Deering, with the addition of many new improvements.

The McCormick-Deering grain binder is the most substantially built and lightest running grain binder on the market. The improvements which enable it to cut grain so successfully and tie bundles with such consistent accuracy, also include features which facilitate adjustments when they are necessary.

Instead of wasting time in trying to make an old binder work another year, instead of risking the loss of grain, better see us now and place your order for a new improved McCormick-Deering binder, so that you will be fully prepared to meet every emergency when harvest time comes.

ALMOST everyone ordering printed matter feels that they want "something different." They sense that to obtain such printing they must have either one or two things—special cuts or type. To outline or specify "just what they want" is a task beyond one inexperienced in the craftsmanship of printing.

When you let us do your printing you get all of this service free of extra charge. We know just which type faces to use to carry your message in the most effective way. In addition to this we have a complete line of cuts to illustrate your message—pictures which will attract readers and make them read.

No matter what kind of printing you want we can do it—deliver the job promptly—and at a price far below what you may pay elsewhere. Try us.

The winning of first place by Wesley Perschbacher entitled him to enter the finals, which were held Wednesday—West Bend Pilot.

—Over 150 people from here attended the picnic staged by the Fricjens Evangelical Brotherhood at Lake De Neve last Sunday. These in attendance came from all sections of the Fond du Lac pastorate district. Delegations were present from Oshkosh, Ripon, Berlin, Brandon, Neenah, Appleton, Calumetville, Kewaskum and Marblehead. Outdoor religious services were conducted at 11 a. m. by Rev. Ernst Irlon from here. During the afternoon games and contests were staged. A 10-piece orchestra furnished the music from 2 to 4 p. m.

**ASKED PROPOSAL FOR BUILDING 2 STEEL BRIDGES**

The county highway committee of Fond du Lac county will open proposals Wednesday, Aug. 10, for the construction of two bridges and the grading and culverting of two short pieces of county trunk highway. The bridges are both to be through steel plate girder structures with 24-foot roadway. One is to be built at Eldorado, requiring a 45-foot span and an estimated quantity of 302.6 cubic yards of Class A concrete. The other bridge, a 50-foot span, will be placed on Highway 67, three miles west of Campbellsport. The road is to be straightened somewhat at the site of the highway 67 bridge, and one of the grading jobs calls for heavy grading, an estimated quantity of more than 5,000 yards on 2 1/2 miles of roadway. The other grading job is on highway Y southern of Campbellsport, requiring over 100,000 cubic yards of excavation and 42 miles of roadway.

Doings at Our State Capital

Madison—The senate confirmed unanimously Gov. Zimmerman's appointees to the new state conservation commission.

Dist. Atty. Eugene Wengert of Milwaukee and O. C. Lemke of Wausau were confirmed for terms of six years.

Frank L. Gilbert of Madison and E. M. Dahlberg of Ladysmith were confirmed for two-year terms.

Wengert is district attorney of Milwaukee county. Lemke is a lumberman, interested in reforestation, and with a national reputation as a timber expert.

An increased appropriation amounting to more than a million and a half dollars over the last biennium for maintenance, operation, and new buildings at the University of Wisconsin, provided in a bill containing the major budget requests of President Glenn Frank, was passed by the senate.

The sum of \$1,005,000 is appropriated for the university for fiscal years 1927 and 1928, as compared to \$942,420 appropriated by the 1925 session.

After submitting to Gov. Zimmerman appropriation bills carrying huge increases over the last biennium, members of the 56th regular session of the Wisconsin legislature returned to their homes, both houses adjourning until August 2. A few members will continue to meet from time to time until sine die adjournment, which is expected about August 12.

Final adjournment of the session cannot come until after the governor has received and acted upon all bills. He is allowed six days following receipt of a bill in which to approve or veto it. If he does neither in that period, it automatically becomes a law without his signature.

The senate and assembly were deadlocked for a time on an amendment to the \$11,000,000 appropriation bill for the university and appointment of a conference committee which recommended that the senate recede from its position was necessary to bring harmony.

The amendment from which the senate receded provided that \$550,000 already appropriated for a library be administered by the state historical society instead of by the university regents. The society controls the present library building on the campus, allowing its use by the university.

News of Badger State

Whitewater—Diplomas were presented to 24 students at the close of the summer session at the Whitewater Normal school.

Baraboo—A church war in Leland, near here, led to the arrest of Gottlieb Slotti on a charge of interrupting a meeting in the church.

Minocqua—Three persons were killed and seriously injured when an automobile crashed into a bridge at Lac du Flambeau, according to reports received here.

Antigo—Perry A. Tipler, former science instructor in the Antigo high school, has been elected president to succeed Vernon Klontz, who resigned to become principal at Janesville.

Antigo—Angered by a reprimand, Raymond Krause, 16, shot himself through the head and is not expected to recover. After regaining consciousness for a short time he expressed regret for his act.

Sparta—An injunction restraining the city from removing trees on the boulevard fronting his property on Franklin street was granted Senator Howard Teasdale by Judge R. A. Richards in county court here. The injunction was served upon Charles Millard, street commissioner. The city had planned to set back the curb and widen the street.

Rhineland—Onida county farmers are making a vigorous protest against the recent action of the county board in abolishing the office of county agricultural agent. Several resolutions signed by Grange members and others will be presented at the next meeting of the board, demanding that the office be retained. Onida was the first county in the United States to engage the services of an agent.

Stevens Point—Eight creameries in Portage, Waushara and Waupaca counties have signed an agreement to form an association and employ a field man. Efforts are being made to have five other creameries in the tri-county district join, so that a permanent unit may be formed and the services of the field man obtained in the near future. The 13 creameries represent a production of 3,750,000 pounds of butter.

Waukesha—A five year campaign to raise \$1,000,000 among the Presbyterian churches of Wisconsin for Christian education was voted by the Wisconsin synod of the Presbyterian church in session at Carroll college. Half the money is to go for a library building and a chapel at Carroll college and to raise the endowment fund to \$1,000,000, the other half to the student center at Madison and an endowment to support the project.

Madison—Seventeen years have passed since the United States forest products laboratory was established here, and today the forces of research are still working toward the goal of maintaining an adequate timber supply. Studies of logging in the three lake states, Wisconsin, Minnesota and Michigan, have been carried on by scientists from the laboratory and forest lands from Maine to California have been surveyed. Millions of dollars have been saved to industry through application of principles advocated by the laboratory.

Madison—Tons of Wisconsin milk will soon be shipped to eastern cities, Edward Nordman, state commissioner of markets, believes. An inspection system drawn up by dairymen and to be put into effect by the state department of markets, is receiving favorable response from eastern cities that heretofore have refused to allow Wisconsin milk to cross their borders. While it has long been possible to ship milk great distances, eastern cities have discriminated against western milk because of the additional inspection they regarded as necessary.

Milwaukee—Market quotations: Butter—Creamery, fresh extras, tubs, 40c; extra firsts 38@39c. Cheese—Twins, 23@24c; daisies, 23 1/2@24c; longhorns, 24@24 1/2c; brick, 22 1/2@23c; limburger, 21@21 1/2c. Eggs—Fresh gathered firsts, 24 1/2@25 1/2c. Poultry—Fowls, 16@21c; springers, 24@27c; broilers, 20c; roosters, 16c; turkeys, 18@22c; geese, 14@18c. Potatoes—Wisconsin, 100-lb. sacks, new, \$1.25@1.60. Barley—Choice to fancy, \$1.80@2.00; fair to good, 75@80c. Corn—No. 3 yellow, 1.03@1.04; No. 3 white, 1.03@1.04. Oats—No. 3 white, 43 1/2@44 1/2. Rye—No. 2, 92 1/2@93 1/2. Hogs—Fair to good butchers, \$9.50@10.00; fair to good lights, \$9.00@9.50; pigs, \$8.00@9.50. Cattle—Steers, fair to choice, \$8.00@13.00; heifers, \$8.00@9.50; cows, \$5.75@13.00; calves, \$13.00@14.00. Sheep—Spring lambs, good to choice, \$13.00@13.75; fair to good, \$11.00@13.00; ewes, \$3.50@6.50.

Rhineland—John Hayes, 22, and Lloyd Burmeister, 20, who were arrested here on charge of stealing nearly \$4,000 worth of cigarettes from a warehouse 10 weeks ago, have admitted their guilt.

Lancaster—The labor of cultivating crops has been increased as much as 50 per cent in some parts of Wisconsin because weeds, particularly Canadian thistles, have been allowed to grow to seed, according to J. B. Keenan, Grant county agricultural agent.

Madison—The state department of agriculture reports that 21,824 head of horses were shipped into the state from July 1, 1926, to the same date this year. During the period 69,502 head of cattle were shipped out of the state.

Madison—Wisconsin's pea acreage has been cut down 33 per cent over last year, according to W. E. Nicholson of the State Cannery's association. Wisconsin produces about half of the nation's total and 124 factories are now working on the sweet varieties.

CAPPER CONFERS ON FARM RELIEF PLAN

Kansas Senator and President Discuss New Aid Program; for Haugen Act.

Rapid City, S. D.—The so-called administration farm relief measure is not acceptable to the first farm belt member of congress to visit the summer White House since it was made public.

United States Senator Arthur Capper of Kansas, a member of the senate committee on agriculture, put his finger on what he considered a glaring defect, almost the moment the measure was described to him.

The bill drawn up in an effort to offset the McNary-Haugen bill contains no such feature. Ofhand, the senator thought that its omission from the new bill was the only vital difference between the two proposals.

Rapid City, S. D.—A comprehensive farm relief program, avoiding the price-fixing and equalization fee features of the McNary-Haugen bill and yet involving a \$300,000,000 federal appropriation, has been prepared by prominent administration men of the West.

While it has been conceived as a possible administration measure for introduction in the next session of congress, it cannot be learned whether President Coolidge has yet seen it, much less put his stamp of approval on it.

The fundamental idea is to help the farmer help himself. The proposed \$300,000,000 appropriation is for a revolving fund. All but \$50,000,000 of it would be loaned to commodity stabilization corporations; \$25,000,000 would be used for operating expenses and a like amount loaned to co-operative associations for warehouses, creameries and other factors of physical plant.

Encouragement of co-operative marketing and pooling; control of production and encouragement of diversification, both by distribution of detailed statistical information concerning food production throughout the world, and establishment of a federal farm board, community advisory councils and commodity stabilization corporations are essential features of the plan.

The farm board would be composed of marketing experts acting in an advisory capacity. Their function would be chiefly to assist in stabilizing farm product markets, such as the federal reserve board influences interest rates. The surplus problem would be met, according to sponsors of the plan, by enabling farmers to warehouse their surplus and finance them to 100 per cent of their products' value instead of 60 per cent, as at present. The diversification campaign would be counted on to modify the risk of financing a surplus. Co-operatives and pools would be used to keep the individual farmers supplied with statistical information necessary to get away from the one crop considered to be responsible for much of the farmers' trouble.

By conferences and correspondence the plan has been developed through the spring and summer and is expected to be used by administration leaders to head off the movement of McNary-Haugen bitter-enders to re-pass without compromise the bill the President vetoed in the last session of congress. Secretary of Agriculture Jardine and Secretary of Commerce Hoover are said to have approved the plan.

The aloofness of some farmers from co-operatives is proposed to be met by provision for liberal advances to farmers upon delivery of their products and giving them the benefits of the marketing machinery.

Seven Aviators Killed in Chicago in 9 Days

Chicago.—Two aviators, one of them a student-pilot who had become part owner of an unlicensed eleven-year-old airplane, were killed here when the ancient ship plunged down, out of control. The accident occurred within a mile of where two flyers were killed a few days ago when forced to jump from a flaming plane 800 feet above the ground.

The most recent tragedy gave Chicago an aerial death toll of seven within nine days.

Ohio Coal Mines to Open

Columbus, Ohio.—The long expected reopening of coal mines in several Ohio fields with union men is predicted for this week. Authorities have announced that they are watching the situation closely and no trouble is expected.

Dam Crib Collapses; 5 Dead

Menominee, Mich.—The swollen Menominee river claimed the lives of five Michigan and Minnesota workmen on the gigantic dam being built at White Rapids when a coffer dam crib, whose foundation was undermined, collapsed.

Originator of Camouflage Dies

London.—Joseph Solomon, British artist, who developed camouflage in the World War, is dead here, aged sixty-seven years.

MUSSOLINI ONLY 44

Premier Mussolini.

Rome.—Thousands of telegrams, letters and other messages of congratulation poured in upon the home of Premier Mussolini at his birthplace, Forlì, on the occasion of his forty-fourth birthday. The press unanimously voices a prayer that the premier be spared to the nation for many years.

JARDINE MAKES PLEA TO END FARM EXODUS

Agriculture Secretary Urges Advantages of City.

East Lansing, Mich.—Efforts to stem the exodus of farm residents to the cities must include giving farmers the benefits offered by city life, William M. Jardine, secretary of agriculture, told members of the Country Life association at a banquet here.

"We must assist the rural communities to achieve the highest possible standard of living on their income," he said.

"Many of those who leave the farms, and not a few of them are highly competent, are moving to town to give their children and themselves the benefits of the city's standards of living. 'What happens when a fairly well-to-do farmer moves to the city? He either sells his farm or places a tenant in charge. If the latter occurs, the farm then supports two families. The new man, as a general rule, has his fortune to make out of the soil. The prosperous farmer takes to the city with him years of experience and education in businesslike farming and his wealth, which was produced on the land."

"The rural school, club, church, and local government lose a substantial supporter. Even if he retains ownership of the farm, his income from the land is usually spent in the city."

"I want to emphasize that included among the people who are moving from the farms are many who could readily remain, and would make a real contribution to rural life, and who would be genuinely happy in a good rural environment. These people are leaving the country partly because we are not emphasizing in a big enough way the real advantages of rural life, partly because we have not made the country what we ought to make it."

Capper Plans to Press Universal Draft Bill

Fort Riley, Kan.—The universal draft bill sponsored by Senator Arthur Capper of Kansas will be reintroduced at the next session of congress and "pressed for early passage," the senator told the Kansas department of the American Legion in convention here. He predicted the measure would "eventually be enacted."

Hops Off Vessel Deck, Flies 80 Miles to Land

New York.—Clarence Chamberlin, New York-to-Germany flyer, demonstrated the possibility of landing passengers and mail from ocean liners when he flew an airplane from the deck of the Leviathan, 80 miles off the harbor, and landed at Curtiss Flying field an hour and 16 minutes later. It was the first time a plane had been launched from a ship's deck without the aid of a catapult.

O. K. Big Fight for Chicago

Chicago.—Subject to the consent of the Illinois boxing commission, the Jack Dempsey-Gene Tunney heavyweight championship bout will be staged at Soldiers field in Grant park, September 15 or 22. The bout will be of 10 rounds duration, the limit permitted under the state's boxing statute.

Noted Scenario Writer Dead

New York.—June Mathis, noted scenario writer and the highest paid woman executive in motion pictures, is dead, the victim of a heart attack while attending a theatrical performance in a Broadway theater.

Peer, 64, Weds Girl 23

London.—Lord Trevor, in his sixty-fourth year, was married in London to twenty-three-year-old Miss Phyllis May Sims, daughter of the village plumber of Kirton, Lincolnshire.

To Halt Paralysis Epidemic

Martins Ferry, Ohio.—The board of health closed all city playgrounds, theaters and Sunday schools to children under fifteen in an effort to prevent spread of an infantile paralysis epidemic.

Boy, 13, Killed by Tractor

Duluth, Minn.—Alfred McKinter, thirteen years old, of Kelsey, Minn., 30 miles north of Duluth, was killed when he fell beneath a wheel of a tractor he was driving.

27 DROWNED AS BOAT GOES DOWN IN LAKE

Victims Women and Children on Holiday Outing at Chicago Park.

Chicago.—Twenty-seven persons—sixteen children, ten women and one man—comprise the list of dead, among the 71 or more passengers of the crew on the excursion boat Favorite, which capsized in a storm a short distance off Lincoln park. The survivors were saved by other vessels, the crews and passengers of which were the only witnesses to the disaster.

Investigations as to the condition of the boat, including the report that the life preservers carried by the Favorite were rotten—being seventeen years old—are being conducted by the city as well as the government.

The Favorite was plying between Lincoln park and the Municipal pier when a sudden torrential rain sent the passengers rushing to one side of the boat for shelter. Then came the roar of a fierce squall. The boat listed and sank amid the screams of those trapped on its deck and calls for help from those struggling in the water.

Attended by thrilling rescues by William A. Hofbauer, owner of the yacht Doris, who with the aid of three companions managed to rescue dozens of women and children, the tragedy revived memories of the Eastland disaster, which resulted in the deaths of more than 500 persons when that vessel overturned in the Chicago river July 24, 1915.

According to the best checkup obtainable, there were 71 passengers, Capt. Arthur Olson and a crew of four aboard the little vessel when it foundered.

When the rain began to fall there was good-natured scurrying to the other side of the boat by mothers who were anxious to keep themselves and their children from getting wet. Their combined weight caused the vessel to list. The wind, which came then in almost hurricane proportions, caused it to capsize and sink.

The air was filled with screams as the Favorite rolled over, lay on its side for a moment and then slowly sank, throwing men, women and children into the water. Its keel rested on the bottom of the lake, with only a foot or two of its superstructure showing above the water line.

Fearing that his boat was going down, Captain Olson climbed out of the window of the pilot house and loosened the lifeboats and managed to throw about thirty life preservers overboard before he was forced to take to the water himself.

The skipper and a deckhand, who loosened some of the life rafts, rescued several women and children, whom they either helped aboard the Doris or into the lifeboats from the Favorite.

Some of the adults rescued had managed to clutch the top of the Favorite, life preservers or rafts. Most of the children, youngsters under ten years of age, who knew nothing at all of swimming, disappeared from sight after a few seconds of futile splashing.

Pulmotor squads from the fire department arrived on the scene early and succeeded in reviving many persons. Many were worked over to no avail.

Thousands of people lined the water front, watching from afar the work of raising the Favorite, which was done with a twin boom derrick aboard a barge.

Two Girls Married, Were Living as Man and Wife

Taylorville, Ill.—A marriage license was issued here November 5 to Margaret Bruce, posing as a man, and giving her name as James E. Lewis, twenty-three, and Miss Ella Dudek, who gave her age as eighteen. They were united in marriage by Justice of the Peace H. M. Monroe of this city and have been living together in Springfield, Ill.

The matter was discovered a few days ago when they were halted into juvenile court in Springfield, where it was learned Miss Dudek was about sixteen years of age.

\$7,000,000 Indiana Bank Closed by Examiners

Indianapolis.—State bank examiners closed the doors of the J. F. Wild company, said to be the largest state bank in Indiana. The institution's capitalization was \$7,000,000. In a formal statement by President Wild, it was said that the theft of \$275,000 in Liberty bonds from the bank last November, had brought on the closing.

\$500,000,000 to Care for Vets

Rapid City, S. D.—General Frank D. Hines, director of the Veterans' Bureau, told President Coolidge that approximately half a billion dollars would be required to care for American veterans of the World War during the next fiscal year.

\$250,000 Grain Elevator Fire

Minneapolis, Minn.—Damage estimated at \$250,000 was caused by fire which destroyed the Crown Elevator company building here. More than 25,000 bushels of flax, wheat, rye, other grains and machinery were consumed by the fire.

AUTO CAMPING IS QUITE POPULAR

Becoming More and More Important Factor in Car Industry.

Fifteen million automobile campers will fill the long, long trails from the Atlantic to the Pacific coast this summer, according to estimates compiled for the Women's Home Companion, from cities bordering the best known transcontinental routes.

Anticipating this peak in the form of summer outings, which has grown like a speeding avalanche in the past few years, automobile and sporting goods manufacturers have met the demands of the tourists with ingenious devices providing the nearest approach to home comforts and towns and cities have so improved the rest camps in their outskirts that the 15,000,000 wanderers will be able to realize only by the intervening scenery that they have left their own domiciles.

Under Roof for Night

Those who do not like the hardships of sleeping in tents will be able to travel over the northern trail from the Atlantic to the Pacific northwest, down the coast to the southwest and back again, without being deprived of the shelter of a roof for the night. This is due to the cottage camp system, which has been developed to such an extent that auto camping does not necessarily have to be camping.

The cottage camp affords a screened and furnished lodging, lacking only cooking utensils, gasoline stove and blankets. Moreover, many of the camps provide playgrounds, laundries, cafeterias, barber shops, and even beauty parlors and soda fountains.

Prefers Real Camping

There are still many, however, who prefer real camping as they go, but even for them there are improved tents with sewed-in floors, compact cooking outfits which even permit of freshly-baked pies and roast fowls, luxurious air mattresses and auto connection lighting systems to smooth out all the little irritations that used to go with the shortest outing.

The tremendous growth in popularity of motor camping is becoming a more and more important factor in the automobile industry.

Cure Rattle of Fenders With Leather or Rubber

Substantial fender irons, in some light cars particularly, when these are made of half round or flat iron fitted in such manner that they overhang considerably from the point of support, are not rigid enough to prevent springing, under the strain of constant road shocks. The result is the valance and the iron slap together with a sound like that of beating a tin can, yet, when the car is stationary, the fenders to find this slackness which causes the noise, they usually appear to be perfectly rigid.

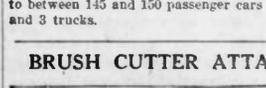

A good plan is to force the valance back with a screwdriver and insert a small piece of leather or rubber, such as a slice from an old inner tube. Felt may also be used. Though the fender and valance appear to fit snugly against the supporting iron when the car is stationary, vibration set up when the car is in operation causes the noise and the pad will insulate the noise so that it is not transmitted to other parts.

Use of Automobile Has Spread to Persian Gulf

For years the use of the automobile has been spreading to those outlying districts where progress moves with heavy feet. The latest country to adopt the automobile for general use is Bahrein, an independent sheikdom on a group of islands in the Persian gulf.

Bahrein has several miles of improved roads, as well as many miles of desert roads which are passable for automobile traffic. In February, 1926, there were 120 cars and two trucks registered with the authorities and this number increased during the year to between 145 and 150 passenger cars and 3 trucks.

BRUSH CUTTER ATTACHED TO A TRACTOR

The photograph shows a device designed by the highway department of Multnomah county, Oregon, to cut weeds and underbrush from the side of the highway. The progress is about equal to the speed of a fast horse.

Sit Properly

An important factor in safe driving is to take the proper position at the wheel. This is attained by getting squarely behind the wheel and sitting in an erect way. Put the right foot on or close to the accelerator, the left on the floor in convenient position for working the clutch. Both feet thus are in a position for use on the clutch and brake. The time element in the use of these is a powerful factor in preventing accidents.

Forbes Out \$40,000 in Taxes

Boston.—W. Cameron Forbes, former governor general of the Philippines, lost an equity suit to recover \$40,000 paid under protest to the government as income taxes.

Safety Suggestions for Driving an Auto

Drive over to the right as far as possible at all times. If the car's steering mechanism is functioning properly, stop it within 50 feet from the curb. If the street is wet, do not permit your car to skid ahead, except at slow speed. Never pass a car going in the same direction with your intention. When driving fast, keep your grip on the steering wheel. A puncture or blowout, wise, may cause the car to swerve off the road. Remember that the back of the curve belongs to the car coming from the other direction.

Stripping Rubber Tires From Tire Is Made Easier

Most vulcanizing shops have to strip the rubber from an old tire, either to reuse the casing for a retreading or to repair it. To facilitate this task, a repairman devised the device shown in the drawing. It is a 3/4-inch steel shaft, 1/2-inch in diameter, with a crank and a handle, through it to accommodate the spurs. The crank was attached to the underside of the tire. In use, the tire is first cut with a knife. The tire is first cut with a knife. The tire is first cut with a knife. The tire is first cut with a knife.

Peeling Tread From Old Auto Tire With a Crank.

spurs. With the standing spur, turn the crank to secure the tread. If the tread is hard, the tool is stopped after several turns so that the rubber casing can be removed from the shaft and the tread is removed. Regular Mechanics Magazine.

Oil Costs More

Motorists in the vicinity of Oil City, situated in the midst of an oil area, have to pay twice as much for their fuel as motorists far from oil fields in the States. Here, for instance, gasoline fuel has gone as high as 15 cents a gallon. The reason is the United States refining and then back to the sale. This incurs heavy freight charges both ways.

AUTOMOBILE NOISE

India now has 80,000 automobiles. Concrete and brick roads are best on tires. The driver who is a real motorist, the country is usually a pleasure in the city. Eighty-nine per cent of the line-tire roadways are used for roads and highways. Even the motorist who is a real motorist, the country is usually a pleasure in the city.

Atlantic City Motor Club claimed by many automobile owners to be the fastest track in the world.

Brush Cutter Attached to a Tractor

The photograph shows a device designed by the highway department of Multnomah county, Oregon, to cut weeds and underbrush from the side of the highway. The progress is about equal to the speed of a fast horse.

Important Modification

been made in the driving position of motorists on the French roads. The car following a main road, give way to another entering from the right. 'Gazogene' vehicles or those generate their own motive power for charcoal, wood or other fuel for gasoline, were successfully stratified during a recent tour of France by 30 automobiles.
