KEWASKUM, WISCONSIN, SATURDAY, OCT. 8, 1927

NUMBER 51

KEWASKUM HIGH SCHOOL COLUMN

Talent entertainment given by school pupils in the near future is planned.

The basketball game on Friday with the host team has been postponed until we have more favorable weather.

The first game of Intro-Mural Basketball was played Thursday night when the Freshmen team defeated the Junior-Senior team.

The graded and the high school classes closed on Monday. The faculty will do the work of other schools.

It is taken in lieu of closing for the convention.

Intermediate Room

Miss E. Backhaus and Mrs. O. E. Holtz were visitors in the intermediate room last Thursday.

The following pupils were absent last week: Reuben Krueger, Ernest Hamthun, Doris Mae Rosenheimer.

The fourth grade finished their Annual Booklets Thursday.

The fifth grade started work in class on Wednesday.

All the pupils in our room have read Reading Circle Work.

Grammar Room

The Grammar Room base ball team defeated the Freshies to a return game and beat them with a score of 9 to 2.

The following Grammar Room members joined the school band: George Mead, Ralph Habeck and Junior Rosenheimer.

Mrs. N. W. Rosenheimer and Mrs. Holtz and son were visitors here last week.

Monday is visiting day. The rest of the week we will have six week examinations.

Editor: Ralph Habeck, Ruth Hepburn and Junior Rosenheimer.

FREE CHEST CLINIC HERE OCT. 21

According to an announcement by Miss Cecilia Geising, county health officer, the local city hall will be one of the places in which free chest clinics will be conducted in Washington county during October. The clinic will be on Oct. 21 from 8:30 a. m. to 3 p. m. Two W. A. T. A. physicians will examine the patients in the local clinic.

Free chest clinics will be held in the county during the same time. This series of three will be the last free chest clinics of the year.

They have been financed jointly by the County Board and by the W. A. T. A. organization, the W. A. T. A. has its funds through the annual sale of the penny Christmas Seals.

The opening clinic of this series will be the Slinger city hall on Oct. 19. The second clinic will be at the West Bend city hall on Oct. 20. The series of the W. A. T. A. physicians in the clinics are free to any resident of the county. Children under 16 years must be accompanied by a parent or some other adult.

WILL HOLD BIG SALE

The sale of all groceries will be at the new Kewaskum Grocery beginning Wednesday, October 12, and ending Saturday, October 15. The sale marks the opening of the store and is the first of its kind held here in many years. A list of all groceries. Circulars have been printed and are mailed to every home in this vicinity surrounding territory, read them carefully and take advantage of the big bargains offered. Due to unexpected delay, Mr. Marx and manager of the store, is to open the store this week as planned and it was therefore necessary to postpone the opening day until Wednesday, October 12.

\$1,500,000.00 CONTRACT

It is considered the largest order for motor cars ever received by the Motor Car Company last week.

The order was placed by the National Company of Boston and involves one and a half million dollars.

G. A. Kissel of the Kissel Motor Car Company spent the major portion of his time in Boston conferring with the National Company of Boston and completing negotiations with them.

That will bring hundreds of thousands of dollars into Hartford and the hands of Kissel workmen.

GIVE CAFETERIA SUPPER

Members of the local branch of the W. A. T. A. will hold a cafeteria style at the Mohrman hall on Tuesday, October 10, from five o'clock p. m. on.

It will be a delicious one and is especially invited to partake of.

Correspondence

DUNDEE

H. J. Timm of Plymouth spent Sunday with Mr. and Mrs. Irvin Kutz.

Miss Rhea Dalieque spent from Sunday till Tuesday at Milwaukee.

Dr. O. F. Guenther of Campbellsport was a professional caller here Saturday.

Thomas Gibbons is spending the week with his daughter here, Mrs. Jas. Cahill Jr.

Mrs. E. Bowen visited the past week with her daughter, Mrs. W. King near Cascade.

Miss Rhea Dalieque and brother Clarence were Fond du Lac visitors Monday.

H. W. Krueger and C. W. Baetz were business callers at Campbellsport Saturday.

William Hennings visited Wednesday afternoon with Charles Romaine at Long Lake.

Mrs. A. H. White and son Lehman and daughter Dorothy were Kewaskum callers Saturday.

Mr. and Mrs. Herman Hintz of Batavia visited Wednesday with Mr. and Mrs. Oscar Hintz and family.

Miss Margaret Welsh of Chicago spent the week-end with her parents at their cottage at Long Lake.

Little Richard Koegs of Campbellsport visited Wednesday and Thursday with Mr. and Mrs. John Krueger.

Mr. and Mrs. Wm. Calvey and Miss Ruth Calvey of Fond du Lac called on John and Rose Schenk here Sunday.

Miss Marie Mulvey, our local teacher, spent the week-end with her parents, Mr. and Mrs. J. Mulvey at Fond du Lac.

Mr. and Mrs. Fred Schwinn and friends of Milwaukee spent Saturday with the former's brother Edward Koehn and family.

Mr. and Mrs. Gerhard Schladweiler, Mr. and Mrs. John Schladweiler of St. Francis, Mr. and Mrs. Syl. Feltenz, Math. Schladweiler and Mr. and Mrs. Casper Berres visited with Edward Schladweiler and family Thursday.

CHEESE MARKET

Plymouth, Wis., Sept. 30.—On the Farmers' Call Board today 710 boxes of cheese were offered for sale and all sold as follows: 625 cases longhorns at 25 1/2 c, 10 young Americas at 25 1/2 c, and 75 square prints at 26 1/2 c.

POPULAR YOUNG LADY MARRIED

A pretty fall wedding took place at the Evangelical Luth Church of the Resurrection, Milwaukee last Saturday at 3:00 p. m., when Miss Viola Schaefer, daughter of Mr. and Mrs. Otto Schaefer, 1638-28th street, Milwaukee, formerly of Kewaskum, was married to John Brandtjen, son of Mr. and Mrs. Fred Brandtjen, 174 Buffam Str., Milwaukee. Rev. Steckel performed the ceremony. The bride wore a white flat crepe French gown and veil with cap effect, trimmed with orange blossoms and carried a shower bouquet of white tea roses, lilies of the valley and baby's breath. Mrs. Harold Pollie, sister of the bride, who was matron of honor, was dressed in a pale pink georgette dress with felt hat to match, and carried a bouquet of pink tea roses and baby's breath. Miss Clara Brandtjen, sister of the groom, bridesmaid, wore a burnt orange colored taffeta dress with felt hat to match, and carried a bouquet of pale yellow tea roses and baby's breath. Miss Mariam Schaefer, cousin of the bride, bridesmaid, wore an orchid taffeta dress with felt hat to match and carried a bouquet of yellow tea roses and baby's breath. Fred Brandtjen, Jr. brother of the groom was best man and Ray Brandtjen, also a brother of the groom and Harold Pollie were ushers. After the ceremony a wedding dinner was served at the Hotel Medford at 6 p. m. with about 24 guests in attendance this was followed by a reception at the home of the bride's parents. The newly weds left for a wedding trip in the northern part of the state. They will reside at Milwaukee.

"CLASSIFIED" AT THE MOVIES

Corrine Griffith, star; Edna Ferber, author; June Mathis, scenarist. Sounds like a pretty good combination where screen entertainment is concerned, doesn't it?

This triumvirate is responsible for the new bill to be offered at the Kewaskum Movies tomorrow, Sunday, when first National presents "Classified."

Thousands have read the story of that name as it appeared in Cosmopolitan magazine. Other thousands are familiar with June Mathis' achievements as a screen writer. And as for Corrine Griffith, it would be a daring thing to attempt to estimate the number of her admirers the world over.

"Classified" brings to the screen a new type—the girl who takes your new ad over the phone. Also, it gives Miss Griffith a new opportunity at characterization, as she has never before attempted to portray this sort of personality. Her success is reported as having been complete.

Jack Mulhall and many prominent screen artists are enrolled with Miss Griffith in placing this delightful story of life in a New York flat upon the screen.

TWO BROTHERS DROWN

Andrew and Joseph Bergowski, of Milwaukee, aged 21 and 18 years, respectively, drowned in what is known as Mud Lake, in the town of Erin, last Monday. The brothers had been hunting ducks and according to appearances, one of them had killed a bird. While going after it in a boat he lost his balance and fell into the water. In an effort to save himself he removed his rubber boots, which together with the hunter's license, were found floating in the lake. The brother who was on shore evidently saw the accident, for an old boat had been pushed off shore, no doubt in an effort to rescue the brother who had fallen into the water. This boat, however, was not in condition and, filling with water, sank with the young man in it. The body of the older of the brothers was found, but up to Wednesday morning the other body was not recovered.—West Bend Pilot.

LEGION ELECTS OFFICERS

At a special meeting held by the Kewaskum Post of the American Legion on Tuesday evening, the following officers were elected for the ensuing year: Post Commander—Theo. R. Schmidt; Vice Commander—Alex Klug; Adjutant—Adolph Rosenheimer Jr.; Treasurer—Hubert Wittman; Chaplain—Arthur Schaefer; Historian—Harry Schaefer. Final arrangements were made for the Armistice dance to be held on Friday, Nov. 11th. Shermeister's orchestra of Sheboygan has been engaged to furnish the music. Invitations for this social hop will be sent out in the near future. The matter of having a county meeting of all posts of the county to be held here was also discussed. So far the Hartford post has accepted the invitation. At this meeting the newly elected officers of the county will be installed. The meeting will be held the forepart of November.

YOUNG LADY HONORED AT PARTY

On Saturday evening, Oct. 1st, marked the 18th birthday anniversary of Miss Beulah R. Calvey which was celebrated at her home at Round Lake with about forty of her lady and gentlemen friends in attendance. The home was artistically decorated with orange and white crepe paper streamers arranged in diamond effect, 125 balloons in assorted colors hung from the streamers and the side walls were decorated with cedar and autumn leaves. Duncos was the first game to be played on the program which was played at small card tables arranged in the dining room and parlor of her home. Prizes were awarded to John Smidbauer and Ida Smidbauer, consolation going to Arthur Geiger and Alvina Michaels. Other games were played until midnight when a delicious lunch was served in the dining room. The small tables were decorated with white table clothes and tall orange colored candles while the large table was covered with a pink savor and the large white birthday cake with 18 small orange colored candles and tall candles on each end of the table. The lighted candles cast a beautiful effect on the decorations. After lunch the dining room was cleared and the guests enjoyed dancing. Miss Viola Mitzelfeldt of Fond du Lac rendered a number of selections on the piano and Mr. and Mrs. M. Calvey sang a number of old time songs. Mr. Calvey also gave a recitation which was greatly enjoyed by all. Those present were: Misses Alvina Michaels of Eden Viola Mitzelfeldt, Mabel Loucks, Lucile Orlerman, Erna Mitzelfeldt, Sadie Roemane, Helen Mittal and Estella Engel of Fond du Lac, Beth Elliot of Appleton, Caroline Miller, Plymouth; Dottie Doets of Oshkosh, Irene Jordan of Barton, Ida Smidbauer of Le Roy, Roma Seifert and Helen Cahill of here. Mrs. Geo. Buehner of Waucoosa, Messrs. Edmund Vetter of Malone, Hugh Reilly and Francis Murphy of Cascade, Clarence Rein, Wilbur Engel. A. Craft, Arthur Geiger, Walter Hass, all of Fond du Lac, John Smidbauer of Le Roy, Attorney H. J. Engel of Chicago, Wally DeCoster at West Bend, Alvin Luedtke of Milwaukee, Gene Armour of Racine, Alvis Weddig of Kewaskum and Kenneth Weld of Appleton and Lawrence Grahl of Eden. The hostess received a large number of beautiful gifts, and when the guests departed for their respective homes they wished Miss Calvey many more happy returns of the day. The hostess was complimented upon the royal manner she entertained her guests and upon the beautiful decorations.

BOY KILLED AT BARTON

Harry Haendel, 9-year-old son of Mr. and Mrs. Oscar Haendel of Barton was struck by an automobile driven by Oliver O'Deal of Barton last Wednesday evening, and died on Thursday morning. The boy suffered from a fracture at the base of his skull and other injuries to his body. The accident happened a short distance south of the boy's home on Highway 144. The boy, in company with a number of his companions were playing on the sidewalk near the Kapfer furniture store, he ran diagonally across the street and was struck by the O'Deal car which was headed north on the highway. The accident was unavoidable and the driver was absolved of all blame.

AMUSEMENT

Saturday, Oct. 8.—Grand dance at the Kewaskum Opera House. Music by Andy's Wisconsin Five. All are invited.

Oct. 9th to 11th—Big Bazaar and Fair at St. Michaels. All are invited.

Wednesday, Oct. 12.—Dance, Frank Fell's hall, Ashford. Music by Fells Moonlight Rounders. All are invited.

Saturday, Oct. 23.—Grand dance in Wietor's hall, Wayne. Music by "Shorty" Hoffmann's orchestra. All are invited.

Thursday, Nov. 3.—Bazaar, given by the Ladies Aid society of St. John's Evangelical church, Boltonville. A chicken supper will be served from 4 to 8 p. m. All are invited.

COW TESTERS ARRIVED HERE

Ten veterinarians started testing cattle for T. B. in Washington county on Monday. Two more will be added within the next ten days and by the end of this week work will be progressing in ten townships. It will require approximately six weeks to test the 40,900 cattle in the county. 150 to 200 herds will be finished this week. Reports giving the number tested and the infection will be made every week. The work is being done by experienced men who have commented on the fine quality of cattle in the county and the fine co-operation given by farmers whose herds have been inspected so far.

COUNTY LINE

Lester Butzke spent Monday evening with Lucinda and Harold Hinn.

Walter and Art. Backhaus spent Tuesday at the Al. Naumann home.

Mr. and Mrs. Rudy Koepke and Mrs. Wm. Koepke spent Thursday at Fond du Lac.

Quite a few from here attended the funeral of Herman Gatzke at Cascade Tuesday afternoon.

Mr. and Mrs. Otto Hinn and family spent Friday evening with Mr. and Mrs. Wm. Klabuhn and family.

Mr. and Mrs. Henry Butzke and daughter Evelyn, Ray Rickaby and Eddie Marquardt spent Monday evening with Mr. and Mrs. Otto Hinn and family.

GIVEN MISCELLANEOUS SHOW

About 290 relatives and friends gathered at Wietor's hall at Wayne, Tuesday evening, where they were royally entertained at a miscellaneous shower, given in honor of Miss Marietta O'Keefe of Wayne. Dancing formed the main pastime of the evening. Miss O'Keefe received many valuable and beautiful gifts.

NOTICE

I, the undersigned will not pay any debts made by my daughter Lucie. The public is warned to take heed of this and govern yourself accordingly. Carl Radtke.

ESCAPE ST. LOUIS CYCLONE

Rev. Ernst Irion, pastor of the Evangelical Peace church of this village, received a telegram from St. Louis, from his father, Rev. Jacob Irion, who resides there, stating that he had escaped injury in the terrible cyclone that swept over that city last Thursday.

Wm. Hayes Jr., Escapes Injury

Mr. and Mrs. Wm. Hayes Jr., who had been visiting several weeks with the latter's parents, Mr. and Mrs. E. Brown at Dundee and who left there on Sept. 26, Mr. Hayes going to St. Louis escaped injury in the cyclone which took such an enormous toll of life in St. Louis. In a letter sent to Mrs. Hayes, in part read as follows: "I hope that I didn't frighten you with the wire that I sent you about six o'clock this evening. I was afraid that you would get wind of the storm that we had here and that you would worry. No doubt tomorrow's Tribune will have big headlines and I wanted you to know that everything is all right."

BOY KILLED AT BARTON

Harry Haendel, 9-year-old son of Mr. and Mrs. Oscar Haendel of Barton was struck by an automobile driven by Oliver O'Deal of Barton last Wednesday evening, and died on Thursday morning. Mr. and Mrs. Fred Timm and sons Fred and Clarence of Milwaukee visited with the John Wolf family Sunday.

The condition of the weather has rendered the most fertile land worthless, due to the inundation of many acres which in former years produced the most abundant crops.

Albert Tripp of North Osceola visited his sister, Mrs. Ed. Airhardt, who is very ill at the home of her daughter, Mrs. C. W. Hughes here.

L. D. Egan and family moved from Eldorado, where the family lived for a number of years to Madison, where they will make their future home.

GOVERNOR URGES FIRE PREVENTION

NEW PROSPECT

Announcement has been given out by the state industrial commission that from Oct. 9 to 15, is Fire and Accident Prevention week for Wisconsin. The commission gave out a booklet, which is opened with the proclamation of Governor Zimmerman setting the week as one to look toward fire prevention and deprecating the large annual losses by fire. The governor earnestly counsels that in each community each civic body and organization and each individual take an active part in this movement which has for its objective the noble purpose of saving life and property from needless and wanton destruction.

NEW PROSPECT

Milton Ehrent and Willie Backhaus of New Fane were village callers Sunday.

Mr. and Mrs. Frank Bowen were Fond du Lac

INCREASE SAFETY AT RAILROAD CROSSING

A new safety device to lessen the element of danger at railroad crossings is in operation here. The device is designed to give warning to motorists approaching grade crossings. When the railroad crossing is reached by the one-armed or the fast driver, straps suspended from a bar overhead knock against the top of the car passing notifying the driver that although he can't see the railroad crossing he is near one.

ROADSIDE MARTS DO BIG BUSINESS

Estimated \$100,000,000 Paid Direct to Farmers for Produce This Season.

Roadside markets have done a roaring business during this touring season and a conservative estimate places at \$100,000,000 the produce that motorists will buy direct from the farmers in 1927.

This estimate is based on reports from road cars of the A. A. A. and from many of the individual clubs of the National Motor federation. Reports disclose that while roadside marketing has received more intensive development in some states than in others, the growth of the movement is essentially a national scale.

Business of importance. This is an aspect of the national business created by motoring that is assuming major importance. Thomas P. Henry, president of the American Automobile association, declared, "At the present rate of growth it should become a half-billion-dollar business within a few years."

Mr. Henry called attention to the fact that in order for the farmer and his cash customers, the motorists from the city, to reap the full benefit from the facilities afforded by the roadside market, certain abuses had to be eliminated. He said:

"The farmers, as far as our reports indicate, deal honestly with their clients, and it is not their fault if dishonest traders from the city corners at country crossroads and sell to unsuspecting motorists produce purchased in city markets, and at much higher prices than that produce could command in the city. This is still going on, but it can easily be eliminated if all the states follow the example of states such as New Jersey, Massachusetts, Rhode Island and others, in which roadside marketing associations have been set up. These organizations will not only increase business, but they will be able to eliminate the dishonest trader."

Modify Farmers' Feeling. The A. A. A. executive believes that roadside trading has done much in the past few years to modify the lingering antagonism of the farmers toward the city motorists. There is still, however, he says, room for improvement in their relations.

Not Difficult Finding the "Meanest Motorist"

Attention seems to be focused on finding the "meanest motorist" that one has little time to look for the most courteous driver. A recent incident produced one candidate for the latter honor. The driver in question had been circling the block for about fifteen minutes looking for a parking space. Finally, he came upon an ideal opening. Just as he was ready to enter the space, he noticed another car preparing to back into it. Temporarily, the first driver hesitated a moment, then backed out and permitted the other man to take the place.

"You're foolish. You could have beaten him into that space," said a friend who was riding with him.

"Yes, I could have beaten him all right, but he found the place first."

AUTOMOBILE ITEMS

They hunt lions in automobiles now if there's no fatal lions as they are to pedestrians, they'll bag great game. If science is so wonderful as it claims, why doesn't it make some effort to cross the rubber plant with a steel plant and grow tires with metal rims? Be sure you're right, then go ahead. You'll be able to collect damages if another car hits you in the intersection, provided you have 20 or 30 witnesses.

Testing Air Valves

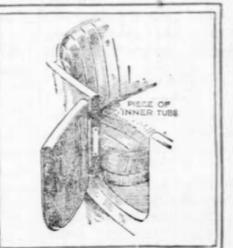

To test the auxiliary inlet valve of a carburetor first see if enough air is being drawn through it by holding the hand over the valve opening, excluding the air. If the speed of the engine dies down the valve does not admit enough air and its spring should be weaker. Then gradually open the valve and hold it in that position with a stick. If the engine slows down, the air adjustment is correct or possibly a trifle more gas is needed in the mixture.

Obsolete Car Models Had Proper Designs

Automobile body designers are looking for new thoughts, new ideas, new conceptions. They have gone so far as to borrow lines from boats. Waistlines are the latest. Concave effects are making their appearance. The race is on. Put an old-timer has a suggestion to make. Why not go back to some of the lines on models now obsolete? He thinks it would be a good idea to face the fact that the discarded models of many makes were better looking than their present editions. A little memory tour may show that he is about right.

Eliminate Door Rattle by Using Rubber Pads

It is often suggested that pieces of rubber be used to check the rattle of car doors. After watching one motorist endeavor to utilize this idea successfully the writer tacked a piece of insor tube on the hinge side of the door jamb, as shown in the drawing.

Stopping Auto-Door Rattle.

and eliminated the rattle entirely. If necessary, two or three pieces can be used, depending on the space to be filled.—E. A. Luers, Washington, D. C., in Popular Mechanics Magazine.

Very Little Time Saved by Reckless Speeding

Speeding saves only a few minutes and may result in an accident, according to the National Safety council. Tests made in various cities by motor clubs, police officials and taxicab companies have shown that if two miles drive along the same route at the same time for a dozen miles, one following every safety rule and the other driving at a maximum rate of speed, the reckless operator saves only a few minutes.

There is no doubt but what speed is unquestionably a contributing cause of many accidents. Any one is likely to have an accident driving faster than 35 to 40 miles per hour (depending on conditions) on any city street where the traffic is heavy or pedestrians are crossing, or where children are likely to run out, or at an intersection or crossing where the view is obstructed. Moderate speed will permit the careful driver to avoid an accident which would otherwise be unavoidable.

ROADLESS AUTOMOBILES

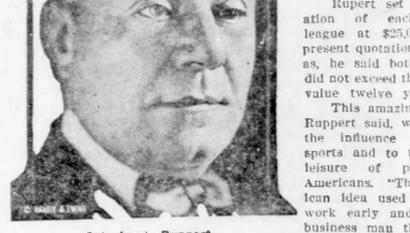

Trackless street cars having become a reality, attention now turns to the development of the roadless motor vehicle. The introduction of balloon tires is believed to be the beginning of this form of travel. Cars now can negotiate with comfort roads that formerly were impossible. New methods of spring suspension are being experimented with, so it may be possible for the body of a car to remain virtually level while the four wheels adjust themselves to all conditions.

Leagues Worth \$50,000,000

The American and National leagues each have increased in value over \$1,000,000 a year since 1915, says Jacob Ruppert, owner of the New York Yankees. Ruppert placed the present value of the sixteen teams in baseball's premier circuit at \$50,000,000.

When the Yankees' colonel, Rupert and T. L. Huston, bought the club in 1915, they paid \$200,000. It is doubtful whether \$3,000,000 would purchase the Yankees today, for Ruppert declared that Babe Ruth alone, when he has completed his present three-year contract with the team, will represent an investment of \$200,000, including salary and purchase price.

Ruppert set the valuation of each major league at \$25,000,000 at present quotations, whereas, he said both leagues did not exceed that sum in value twelve years ago. This amazing growth, Ruppert said, was due to the influence of other sports and to the added leisure of present-day Americans. "The American idea used to be to work early and late. A business man then started at eight and quit at six. Now he starts at nine and quits early in the afternoon."

Col. Jacob Ruppert.

"Golf is supposed to have taken patronage from the ball parks, but I believe golf has increased interest in baseball because of a common bond—you might call it the sporting, the athletic complex," he said.

Sport Notes

Football has been substituted for head hunting among some of the Filipino tribes.

Rog Hornsby has always discounted the theory that white shirts handicap a batter.

Renaming mountains and conducting beauty contests rate among the leading sports of 1927.

Twenty-two of the candidates for the 1927 Minnesota varsity eleven weigh 190 pounds or more.

A world record, 13 consecutive double ringers, was set by G. Garvey of Boone, Iowa, at the Iowa horseshoe tournament.

Chick Evans, veteran golfer, uses square-handled clubs so that he is more certain to take hold of the club in exactly the same way every time.

The feat of Charlie Sweeney of the old Boston Nationals in striking out 10 men in one game has stood as a major league record for over 40 years.

In capturing all four National A. C. senior fancy diving contests, Helen Menny has accomplished a feat no other has ever achieved in a single year.

Rumors are heard that Marty Krug will not be re-engaged as manager of the Los Angeles team, following the poor showing of the Angels this season.

Now in his seventeenth year, Single G, famous racehorse, still enjoys whizzing around the private track near Richmond, Ind., where his owner, William Barefoot, has retired him to the stud.

Shortstop Buddie Dear, whom Washington had an option with New Haven of the Eastern league, has been transferred to Clarksville of the Middle Atlantic.

It is a matter of record that pitchers, after leading the majors, usually follow up with a poor season. George Uhle of Cleveland is certainly living up to that precedent.

Add to the list of baseball players with jaw-breaking cognomens—Chris Kolodziejczyk, who has reported to the Waco Cubs in the Texas league for a trial as a pitcher.

"When I don't play tennis," says lovely Helen Willis, "I get thinner." Her countryman trust she will continue to play tennis. They do not want any less of Helen.

Leslie Mann, veteran outfielder now with the Giants, comes close to being the oldest player in the big leagues, yet he still appears to be among the speediest on the base paths.

Still another bespectacled player has entered the major leagues, the latest being Haskell Billings, a collegian, who bids fair to become a star hurler for the Detroit Tigers.

The rumor persists that it is not well between Owner Clark Griffith of the Houston (Mo.) club, struck out 21 batters in a game recently, but lost by a score of 6 to 3.

Al Ulbrickson, successor to Rutsy Callow as crew coach at the University of Washington, was captain and stroke of the Huskies' championship boat two years ago. During the past season he was freshmen coach.

The Quantico Marine Corps football eleven will play ten games this season. The feature event will be the contest with the Army for the President's cup to take place at the Catholic university stadium, Washington, November 19.

"Lefty" Rainer, young southpaw of the Houston (Mo.) club, struck out 21 batters in a game recently, but lost by a score of 6 to 3.

Jack Britton, forty-one, is credited with fighting over 300 battles. Judging by his age some of them must have been in the Civil war.

Purchase of three right-hand pitchers, Sylvester Johnson, Allyn Stout and Fred Frankhouse, from the Sprague club of the International league is announced by the St. Louis Cardinals.

Captain of Navy

Photo shows E. A. Hannegan, captain of the varsity team of the Annapolis Naval academy as he appeared during the first practice of the team.

Set Dates for Olympic Games at Amsterdam

The following dates have been fixed definitely for various events in the Olympic games in 1928: Hockey, May 17 to 20; football, May 27 to June 15; weight lifting, July 28 and 29; light athletics, July 29 to August 6; fencing, July 29 to August 11; wrestling, July 29 to August 5; modern pentathlon, July 31 to August 4; sailing, August 2 to 9; rowing, August 6 to 10; cycling, road racing, August 3; cycling, track racing, August 5; swimming, August 4 to 11; boxing, August 7 to 11; riding, August 8 to 10; gymnastics, August 9 to 10; basket ball and lacrosse, August 7.

Yankees Beaten by Red Sox 19 Times

No club in either league has won every game from another team in a season's play. It happened several times in the National league previous to 1900. The Boston Red Sox came the closest to taking the whole season's schedule from another club when they defeated the New York Yankees 19 out of 21 games in 1912.

Jack Sharkey's Manager Has Had a Long Career

Johnny Buckley, manager of Jack Sharkey, has been associated intimately with the boxing game nearly all his life, which has been about 38 years. His closest connection was through Johnny Lynch, former bantam star, who is a brother-in-law. Old-timers will also remember some of the other names of Buckley's first associates, such as Matty Baldwin, Dave Descher and Jimmy Walsh. At present Buckley has about 20 boxers in his stable. Sharkey is Buckley's heavyweight and the Boston manager is confident that he has in him a heavy-weight champion. And what Buckley stresses most is that Buckley will be Sharkey's manager when Sharkey is champion.

Cook's Knee Mends and He Predicts Good Year

Paul Cook, Muskegon athletic star, and a member of the University of Michigan varsity squad last year, says that his injured knee is entirely well again. Cook expects to win a regular berth at Michigan.

The leg injured kept Cook out of the game most of last year. He entered the Illinois game for a few minutes. He once attended Illinois, so Coach Yost allowed him to enter the game against his old college.

Cook went through his high school athletic career without an injury. The knee was injured while he was sliding into a base in a class baseball game a year ago.

Get Chance at Title

Dave Shade, the uncrowned king of the middleweights, is being seriously considered as one of the three fighters in a three-cornered affair to be staged in Madison Square Garden this winter. Mickey Walker, middleweight champion, and Tiger Flowers are the other two. Flowers has been after another match with Walker ever since he dropped the title. According to present plans, Shade and Flower would meet first and the winner would be sent against Walker.

Grid Rule Changes to Young Gridders

Many of the coaches have gone on record as saying that the new rules will make no great difference in the game of football.

As a general proposition this may be true. Most elevens were slow in realizing the possibilities of the forward pass. It will probably turn out that some coach will take full advantage of the changes in the rules and that his team will do considerable damage with the lateral and the backward pass.

BRITISH REVIVE ROOSTER FIGHTS

Miners of Mountain Regions Hold Frequent Mains.

Cock-fighting, an ancient blood sport, heavily suppressed by the police, is showing a marked revival in the mountain districts in Britain. Two members of the British aristocracy were recently fined \$50 for participating in the promotion of a cock-fight.

This form of sport flourished in Britain from the time of the Roman invasion, and the authorities have been trying to suppress it since 1385. Their efforts were partly successful in 1849, when cock-pits in the cities were closed down, but their efforts have been practically fruitless in the mountainous regions of Britain.

The owners of fighting cocks are usually miners who train these birds, which weigh from three to four pounds, and match them for a heavy stake.

A series of matches are carried out at a morning, where the birds fight equipped with a pair of silver or steel spurs, with which they slash and tear each other, until one drops and is unable to rise from loss of blood. In some mains, as the matches are called, the cocks fight until only one is left alive.

These matches usually take place on a Sunday morning, the promoters taking the utmost precaution to guard their plans from the police, who are always on the lookout for these meetings.

An unfrequented spot in the moors or mountains is chosen for the contests and a cordon of scouts are placed for miles around to give warning of the approach of the authorities.

Four One-Armed Stars Prove Big Sports Value

Four athletes of the Middle West are proving to the sport world that one arm is as good as two. The one-armed athletic fraternity boasts two star pitchers in Missouri, the handball champion of Minnesota and a crack Chicago golfer.

The baseball stars are Henry J. Feldcamp, pitcher for the University of Missouri, and Orville Paul of St. Louis Central High. Feldcamp won two games and lost two for the Tigers this season, and in a single game against Iowa State struck out eleven men, fielded five chances perfectly and got two hits. He is nineteen and a sophomore. Paul in a single game had five assists and slashed out a double. He fields barehanded.

The handball star, George Quam of Minneapolis, has held the city title several times and is now state Y. M. C. A. champion. And the golfer is W. O. Colvin, who started the season with an eagle 2 on a 405-yard hole of the French Lick (Ind.) course.

George Wilson Rejects Pro Football Overtures

George Wilson, former college and professional football star, is out of the game unless Eastern promoters raise their bids for his services.

"Football is no longer a sentiment with me," he said in announcing that he had turned down three proposed contracts from American league clubs. As a University of Washington player, Wilson was almost unanimously chosen All-American back after the season of 1925. Last year he led his own professional team.

The rejected contracts were submitted by Chicago, New York and Philadelphia organizations.

Indians Get Star

One year ago Mel Harder was pitching for his high school baseball team in Omaha. Now, at the age of seventeen, he has been purchased from the Omaha Western league club by the Cleveland American league team for \$18,000 in cash and two ball players to be named later.

Pair Started Right

Ty Cobb at twenty-four was leading his league in hitting. Wagner at the same age is doing the same thing. Collins at twenty-two was just beginning to show his greatness. Lazzari, also twenty-two, is doing the same. Whetter Tony and Paul have the stamina and the competitive spirit that kept Cobb and Collins traveling at record-breaking speed for 22 and 21 years, respectively, is something only time will tell. They at least are started in the right direction.

RADIO

How Power Tubes Improve Quality

Draw Twice as Much Filament Current as Others at Same Voltage.

By HERMAN BARNARD
(Associate I. R. E.)

In the final audio-frequency stage it has long been the favorite practice of radio engineers to use a power tube, and its inclusion presented no problem to them, but when the public took its cue and fostered the practice 'round the power tube, the public quickly found itself seeking information on a subject new to it.

The questions that rise in the public mind are naturally often addressed to dealers, who sum up the answer by specifying the particular power tube best suited for the installation. The tube manufacturers had to take on the sudden task of educating the dealers and their clerks to a working knowledge of power tube performance. For a short while the questions raised in the mind of the dealer, however, are not so powerful that the 112 will not handle the volume in a wholly satisfying manner, showing considerable improvement indeed over the tube likely to be replaced in the final audio stage. It is the quality that is improved, rather than the volume increased, although larger volume sometimes results as a by-product, due to the use of higher plate voltage, or, in the case of the 371, also to the low plate impedance.

If a receiver is very powerful indeed, and delivers a heavy load to the final audio-frequency tube, the 371 meets the heavy demands necessarily put upon it. In such an instance it is advisable to use high plate voltage and suitable negative bias, which is also comparatively high. The great majority of receivers, however, are not so powerful that the 112 will not handle the volume in a wholly satisfying manner, showing considerable improvement indeed over the tube likely to be replaced in the final audio stage. It is the quality that is improved, rather than the volume increased, although larger volume sometimes results as a by-product, due to the use of higher plate voltage, or, in the case of the 371, also to the low plate impedance.

The advantage of using a power tube in the final audio stage is well illustrated in the following comparative table:

	CX-301-A	CX-112
Pos. plate volts	50	135
Neg. grid volts	4.5	6
Filament current milliamperes	2	2.6
Undistorted output, watts	.015	.05

This shows no higher plate voltage than 135 volts for the 112 tube, since much higher is not advisable, and for the same reason the 301-A has the same maximum plate voltage. Note the capability of the 112 in handling strong signals at 135 plate volts. The maximum undistorted power output is 12 watt, or about two and a half times that of the 301-A at the same plate voltage and grid bias. And notice that the 112 at 135 plate volts has eight times the maximum undistorted power output of the 301-A at 90 volts! Hence most receivers, particularly of the factory-made type, do not nearly overtax the 112 with signal voltage at 135 plate volts. The opposite condition is quite possible if the last tube were of very modest power capacity and operated only at 90 plate volts. The 112 will give excellent service, and justifies the extra 45-volt "B" battery (to bring the usual 90 volts up to 135 volts), and small extra negative bias.

Thus, where a receiver is equipped with connections for a "C" battery—needed whenever a power tube is used—it is a simple matter to use two 4.5-volt "C" batteries to supply the 9 negative grid volts and add a 45-volt "B" battery to gain that fetching clarity and richness of reproduction of the 112, even on strong notes from local stations, which otherwise might cause "blasting" in the loudspeaker. Remember, however, that the prescribed negative bias must be applied, otherwise the full signal voltage, hence quality, will be lacking. Also, suitable negative bias reduces the plate current more than 50 per cent, hence makes "B" batteries last twice as long.

The higher plate voltage is very friendly toward the reproduction of low notes by the reluctant speaker.

The 112 a Versatile Tube.
The 112, while essentially a power tube, is not confined in its use to the final audio stage, for it is an excellent radio-frequency amplifier and detector. Its superior load capacity makes it a good second detector in a super-heterodyne, where the power to be handled is quite high.

The 371 is suitable only for the final audio stage of broadcast receivers, and is not to be used as radio-frequency amplifier or detector. It

Utilizing the Old Tube

One or two old tubes that will light but are useless for service are handy when testing the wiring in a newly completed receiver and will often save a good tube if there is some mistake. The old tubes are placed in the sockets of the new set, and if they do not blow out, it is perfectly safe to put in good ones.

Soldered Connections

All connections that are spliced should be soldered for the best results. Other kinds of connections give good results for a time, but sooner or later they either become noisy or else obstruct the flow of signals and when this happens the receiver is not as efficient as formerly.

Radio for Army Posts

All of the principal posts of the United States army are to be connected by radio. Communication will be carried on by wireless should conditions prevail where regular telegraph and telephone wires could not be used.

has an outstanding value in its recommended position, where there is very considerable power to handle, for at 130 plate volts, with 40.5 volts negative bias (20 milliamperes plate current drain) the maximum undistorted output of the 371 is .65 watt. The 371, therefore, is the tube that bears otherwise excessive burdens, and without straining under them, thus rendering the possibility of distortion even more remote.

The CX-112, at 135 volts, drawing 6 milliamperes, has the same maximum undistorted power output as has the CX-371 at 90 volts. But the grid biases and plate currents differ. The 9-volt bias and 6 milliamperes drain in the case of the 112 are contrasted with the 16-volt negative bias of the 371 at a plate current of 11 milliamperes. Hence, at 90 volts the 371 draws more plate current than does the CX-112 at 135 volts.

The 220 Tube Analyzed.

There are other power tubes, of course. The three principal Cunningham power tubes are the CX-112, the CX-371, and the CX-220. There are many sets employing the so-called 3-volt tubes throughout, since the filaments of these tubes can be conveniently heated at that voltage from dry cells. The 220 is the power tube for such sets, and requires a 22.5-volt negative bias at 135 plate volts. The 220, under finest conditions, draws 7 milliamperes plate current and has a maximum undistorted output of .11 watt, or about the same as the 112 at the same plate voltage, and as the 371 at 90 plate volts. This is a very respectable showing for the 220, especially as it is most often used in receivers that deliver a modern input to the grid of the final audio tube.

The power tubes draw twice as much filament current as the other tubes in the receiver that operate at the same filament voltage. For instance, the CX-112 and the CX-371 draw .5 ampere each, at 5 volts, contrasted with the .25 ampere filament drain of the CX-301-A. The CX-220 draws .12 ampere, as compared with the .06 ampere drain of the CX-200, at 3.3 volts.

The point about power tubes is that the set produces the volume and the proper power tube is chosen to handle that volume without contributing any distortion.

As plate voltages of more than 90 volts commonly are used in conjunction with power tubes, it is excellent insurance to use a filtered output, consisting either of an output transformer, usually 1-to-1 ratio, or a choke coil and condenser combination. Thus the direct current does not flow through the fine wire of the speaker windings, and these are safeguarded from burn-out. It should be noted that the DC resistance of the choke coil or transformer should be low—not in excess of 500 ohms.

Voltage Loss Avoided.

Also the voltage actually applied to the plate is much higher since the direct current resistance of the primary of the proper transformer, or choke coil, is not less than that of the speaker windings. If the resistance of the speaker windings is 1,500 ohms and the CX-371 is operated so as to draw 20 milliamperes, then the voltage drop or loss in the speaker windings would be 30 volts, nearly equivalent to throwing away an entire 45-volt "B" battery! The capacity of the condenser in the choke coil hookup should be large, preferably 4 mfd. or more. The choke coil, or primary of the output transformer, should have a low direct current resistance, e. g., not more than 500 ohms.

Lightning Arrester at Fault in Some Cases

The lightning arrester may be at fault when a set fails to operate. If there is a fuse in the arrester, make sure that it is not burnt out or open by a series of battery and telephone tests. Dirt in the arrester gap will also short the antenna directly to ground. To determine this, disconnect the antenna wire completely from the arrester for a while and connect it directly into the set, and see how active it becomes electrically. If the set goes dead again when the wire is connected back to the arrester, then this unit is imperfect. Be sure the arrester is connected properly.

Will Radio Fans Move to Death Valley Now?

Is Death Valley, far below sea level in California, the best place in the world to operate a radio set? A set was taken to the sun-baked bottom of the valley recently and attached to a temporary aerial. The operator tuned for various Pacific coast broadcast stations and got them with ease. When he attempted distance the very first long-range station he got was PWX Havana, Cuba. This astonishing feat indicated that the peculiar California depression is a sort of radio bowl. This may prove a helpful factor in future radio development.

Crystal Detectors

Galena, molybdenite, hornite, zincite and iron pyrites are the minerals used as crystal detectors. Galena is lead sulphide coming in crystalline bluish-gray cubes. Hornite is a combination metal of copper and iron sulphide. Zincite is the pure red zinc oxide. Iron pyrites is iron sulphide and comes in bright-yellow crystalline cubes.

Inactivity Ruins Battery

Never permit a storage battery to stand idle for any great length of time, for it will lose about 1 per cent of its capacity each day. After it has become completely discharged, a hard coating known as sulphide of lead forms on the surface of the plates.

Constant Voltage Best

If one is given a choice of operating the filament of a vacuum tube with constant current or with constant voltage there should be no question as to the selection because the latter is by far the most important in that it prolongs the life of a tube.

Feel Stiff and Achy? To Be Well the Kidneys Must Thoroughly Eliminate Waste Poisons from the Blood.

DOES every day find you lame, stiff and achy? Do you feel tired and drowsy—suffer nagging backache, headache and dizzy spells? Are the kidney secretions scanty and burning in passage?

Know, then, that these are often signs of improper kidney action. Sluggish kidneys allow acid poisons to remain in the blood and upset the whole system.

If your kidneys are acting sluggishly, assist them with Doan's Pills. Doan's have established a nation-wide reputation. Are recommended the country over. Ask your neighbor!

Impure Blood Brings Age

Impurities seeping into the blood fluid from bad or excess food in the digestive tract are the real cause of "old age," according to Dr. Leonard Williams, British physician. They adulterate the "plasma"—the watery yellowish fluid in which the blood's red and white corpuscles float—and hinder its waste-removing duties, he says.

Light eating, short fasts and attention to food quality will help postpone old age, Doctor Williams asserts.—Popular Science Monthly.

The White Man's Burden

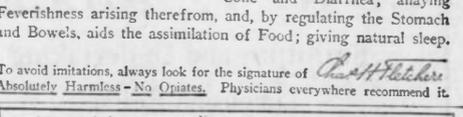

That is the title of a famous poem written by Rudyard Kipling and first published in 1899. Each stanza of the poem begins with the line: "Take up the white man's burden." The phrase now refers to the supposed responsibility of the white race for the moral and physical welfare of all the dark races of the world.—Pathfinder Magazine.

The Easiest Riding you have ever enjoyed

This new riding EASE—a notable feature of the Advanced Six 4-Door Sedan—is exclusive to Nash by reason of springs built of special secret process alloy-steel.

These springs are engineered exactly to the weight and size of each Nash model. And shock-absorbers are provided, too.

So the road comfort of this car is absolutely amazing. DRIVE it and experience it yourself!

This is the SPEEDIEST car in the whole Nash line and the FASTEST car of its field in getaway. And its great, newly-perfected 7-bearing

motor has EXTRA POWER for every emergency.

Low to the road, with small wheels, it is a picture of motor car smartness and grace.

Silver-finished fittings, vanity case, smoking set, tufted genuine mohair upholstery, walnut steering wheel, walnut-finished door panelings and window moldings; all evidence greater quality despite the LOWER price.

SPECIAL TERMS are now available on the car you own. Drive down today and examine this Advanced Six 4-Door Sedan—the leader of the whole Nash line.

**McCormick-Deering
Potato Diggers**

**A Few Reasons Why
These Diggers Make Friends
Wherever They Go**

It takes real stamina to enable a machine to stand up to the hard work of digging potatoes. The McCormick-Deering digger has a frame built of heavy angle-steel bars. The sides are made of heavy steel plates. The whole frame is solidly braced to resist excessive strain.

The beams are made of extra heavy I-beam steel. There is ample clearance under the beams for vines and trash. There is also good clearance between the tongue-truck axle and the ground.

The elevator links are made of seven-sixteenths-inch high-carbon steel, which is very hard. The links are tempered to give the best wearing qualities. They are arranged to form pockets to keep the potatoes from rolling back down the elevator.

Everything else being equal, potatoes dug with a McCormick-Deering digger should bring a higher price on the market than those dug any other way. Furthermore, there are no potatoes left in the ground. You get them all.

THE FINISHING TOUCH
Wear a Scarf Pin

The last glance in the mirror—the hasty pull on the coat collar—the tightening of the tie knot—and the finishing touch, the Scarf Pin. Mr. Day Manson, the well-known juvenile actor says: "To properly dress the part of a smartly attired gentleman of all times I consider a Scarf Pin the finishing touch." Scarf Pins of different designs and largest display shown at the Endlich Store.

WHEN BETTER AUTOMOBILES ARE BUILT . . . BUICK WILL BUILD THEM

**You Need Never Change Your Oil
if You Own a Buick**

Last year Buick said: "Change your oil only four times a year." Buick tests at that time had shown that oil changes would never be necessary, with the Oil Filter to remove impurities, and with the Crankcase Ventilator, Thermostatic Circulation Control and Automatic Heat Control to prevent oil dilution. Now, more than a year has passed, and Buick owners in every section of the world—under every climatic condition—have also proved that you never need change your oil if you own a Buick—replenishment and inspection of the Buick Oil Filter only are required.

Sedans \$1195 to \$1995 Coupes \$1195 to \$1850

NEWS OF THE BADGER STATE

Stevens Point—Organization of the Stevens Point Clinic, Inc., is being perfected.

Milwaukee—The annual Marquette university homecoming has been set for Oct. 27, 28 and 29.

Beloit—Parents of little Albert Marx are in a quandary whether to celebrate his birthday Sept. 29 or 30.

Tomah—Born in the province of Makerberg, Germany, in 1827, Hannah Kalk died at her home in Onksdale at the age of 100 years, 3 months, 6 days.

Waubesa—A county-wide bear hunt is being conducted by farmers and sportsmen of Bayfield county following the reports of unusually large numbers of the animals being seen and the depredations of several at farm homes.

Sparta—Paul Hunter of Shamrock, whose arm was hurt off at the shoulder while he was tending the separator of a threshing rig last August, was presented with \$274 by his neighbors, the proceeds of a dance given at Shamrock for his benefit.

Milwaukee—Mrs. Thomas Spence, of this city, was elected president of the American War Mothers at the windup session of their sixth national convention held here.

Ellsworth—A Catholic priest and Lutheran ministers were speakers at a farewell banquet given for the Rev. J. Phillips Garland, for five years pastor of the Presbyterian church here.

Stevens Point—Mrs. Magdalene Bronk, 103, believed to have been the oldest resident of central Wisconsin, is dead.

Appleton—Suffocating when he fell to the mud only a few blocks from his home near Oneda, Harvey Drexler, 32, was found dead.

Watertown—Watertown is making plans for its third interfraternal exposition, which will be held this year during the week of Nov. 7.

La Crosse—Badger breeders divided the laurels of victory, in the livestock department with out of state exhibitors at the Interstate fair held here.

Madison—E. G. Doudna, Madison, secretary of the Wisconsin State Teachers' association, was elected secretary of the state board of normal school regents at a meeting of the regents.

Kenosha—Fred Priddis, former superintendent of streets for this city, faces a prison term of one year on each of 121 counts in the municipal court here, following his arraignment before Municipal Judge John Slater.

Darlington—Charged with having forged a note on the First National bank of Blanchardville, Steve T. Shanley, former president of the Hollandale State bank, was arrested in Plattville and brought here for arraignment.

Mantowoc—A reduction of working hours will be asked by policemen here. At present the day patrolmen work from 6 a. m. to 6 p. m., with an hour for dinner, and the night men are on duty from 6 p. m. until about 4:30 a. m.

Madison—Three fraternities and one sorority have instituted suit against the Warner System, Inc., to recover money alleged to have been embezzled by E. B. Easton, who disappeared from here several months ago.

Ladysmith—Leaders of the Rusk county 4-H clubs are planning for an achievement day to be held here in November.

Madison—Because poultry is now an important source of income, students of the 15-weeks short course at the university will be given a course in poultry production.

Marquette—Circuit Judge Wm. Barclay Quinlan, whose past three years on the bench has been marked by his crusade to clean up Forest county, died suddenly at his home here.

Beloit—Attacked by two vicious dogs, a young helper on the Henry Severson farm was so badly injured that Severson had to shoot it. The dogs began eating the struggling animal before Severson arrived on the scene.

Racine—Social service and church extension will be major topics before the regional meeting of the House of Church Women of the Protestant Episcopal church, opening here Oct. 19.

Eau Claire—Reward of \$1,000 is being offered for apprehension of the murderer of Harold Munson, bachelor farmer found beaten to death at the rear of his home near Eleva last May.

Appleton—A charge of manslaughter against Joseph Trader, Menasha, was dismissed when Trader agreed to pay a \$300 fine imposed by Judge Berg for failure to stop and give assistance after an accident.

Portage—A tragic ending to a honeymoon was recorded near here when the submerged automobile of John J. Pirkl, was found with his 12 hour bride, plunging into a pond as fog and mist enveloped highway 33, Pirkl and his wife, formerly Miss Hazel Ferguson, of Cottage Grove, were trapped in the car and drowned twelve hours after they had been married at Marshall.

Sturgeon Bay—The Door county apple crop is the biggest and one of the best ever raised, according to H. W. Ulsperger, secretary of the Door County Fruit Growers' union.

New London—William Charles Herrman of this city, who celebrated his seventy-ninth birthday anniversary July 30, is believed to be the oldest constable in the state in point of service as well as age.

Madison—The secretary of state has added one more name to the list of Wisconsin's honest men. A letter from an upstate resident has reached the secretary, accompanied by \$14.60.

Market quotations: Butter—Creamery, fresh extras, tubs, 45¢; extra firsts, 43¢@44¢. Cheese—Twin, 20¢@21¢; daisies, 20¢@21¢; longhorns, 20¢@21¢; brick, 25¢@26¢; limburger, 24¢@25¢. Madison—More people were employed by Wisconsin industries during August, 1927, than during any month since September, 1923, according to the Industrial Commission.

Richland Center—As a result of a hearing here before Maj. Berry of the interstate commerce commission, the Milwaukee road will provide a through stock train each week to Chicago. The stock will be loaded each Tuesday and will be in Chicago for the Wednesday morning market.

Madison—Registration of students at the University of Wisconsin reached a total of 9,000 for the first time in the history of the institution.

Green Bay—In the longest session ever held in the Wisconsin state reformatory here, the state board of control in two days granted 42 paroles. One hundred twenty-three inmates applied for paroles. Among those granted were two members of the institution's five-piece orchestra.

COOLIDGE PLEDGES FLOOD CONTROL AID

Tells Red Cross Repetition of Mississippi Disaster Will Be Impossible.

Washington—President Coolidge in an address before the national membership of the American Red Cross, pledged his best efforts to the solution of the flood control problem in such a manner that another great Mississippi flood disaster would be made impossible.

High tribute to the response of the nation to the call for funds to care for the victims of the Mississippi flood was accorded by the Chief Executive in his remarks on the work of the Red Cross in disaster relief work during last year. He also "extended the highest commendation and the thanks of the country to the members of the cabinet, to all government officials, to the officers and staff of the Red Cross and to all other persons and agencies who aided in disaster relief work."

The story of the country's response to the call for funds was described by the President as "one of the fine chapters in American history."

"It is a record," he said, "of generous response to a call of the high devotion to duty of those engaged in saving life and relieving distress, and of endurance and courage shown by the people in the stricken area. Much glory has been added to the Red Cross emblem. More and more and more it is coming to be recognized universally as the emblem of love, sympathy and charity for all those in suffering and distress. Its benign influence reaches out to touch and soften our daily lives, dispelling envy and malice, so that we think less of self and more of others, bring more of peace on earth and good will toward men."

While he touched mainly on the enormity of the flood, and the relief measure taken, the President found time to comment on the benefits that the flood had brought to the nation and to the Mississippi valley.

"This affliction may have proved a blessing in disguise," the President said. "The North and South have been brought closer together in the bonds of sympathy and understanding. The heart of an entire nation has been quickened. A recent medical survey of the district affected shows that generally speaking, disease is less prevalent now than in previous years."

"Undoubtedly the people have learned lessons of sanitation and health which will not be forgotten. The lands have been enriched by deposits of river mud, and many of the farmers supplied with a better quality of seeds than used before have been astonished at the size of the crops they have been able to grow since the water subsided."

"New buildings will be better than the old. These advantages will remain. And, finally, we propose to solve the problem of flood control so such a situation may never again have to be met. In the solution we shall advance our system of waterways."

The President revealed that the Red Cross Mississippi flood relief fund has now reached a total of over \$17,000,000, a sum sufficient to carry the relief still required and the reconstruction plans well beyond January 1.

"When the floods receded the refugees were returned to their homes," continued the President. "Then began the no less important work of rehabilitation and reconstruction, with specially constituted state commissions to work in co-operation with the Red Cross. This included furnishing shelter and household goods when necessary, repairs to buildings, live stock, agricultural implements, and seeds."

"Out of a crop acreage of about 4,500,000 which was flooded 1,622,000 acres have been replanted through the assistance of the Red Cross. Over 100,000 people have been rehabilitated."

At the annual meeting of the Red Cross organization, held before the President spoke, a drive for 5,000,000 members for 1928 was announced. Congressman Frank R. Reid (Rep.) of Aurora, Ill., announced that he will call together the house committee on flood control, of which he is chairman, early in November.

\$300,000,000 Tax Cut

Washington—A tax slice of \$300,000,000 and reduction of the corporation tax from 15 to 12 1/2 per cent, without effecting a treasury deficit, was declared possible by Congressman Madden, chairman of the house appropriations committee.

Seeks Pennsylvania Recount

Washington—"The good name of Pennsylvania demands a recount of the ballots in the 1926 senatorial election," Senator Reed of Pennsylvania said, in starting a movement to that end.

Yankees Are Favorites

New York—The Yankees have been made favorites at odds of 7 to 10 to win the world's series. The terrific hitting powers of the American league champions, plus their strong pitching staff, have served to give them the edge.

Buyers Toun for \$7,500

Eureka, Calif.—C. W. Morgan set a new low price for California towns when he took over the village of Oak Bar, in Siskiyou county, for \$7,500.

Noted Insurance Man Dead

Madison, Wis.—Dr. W. A. Fricke, seventy, connected with the state insurance department for several years and considered a national authority on life insurance, died suddenly at his home here.

Eyes Nicaraguan Presidency

Managua, Nicaragua.—Gen. Jose Larie Moncada, prominent as leader of the Liberals in the recent revolution, has announced his candidacy for the Presidency in 1928.

HIS EIGHTIETH BIRTHDAY

President Von Hindenburg.

Berlin—Under the watchword "Our Hindenburg," Berlin and all Germany a few days ago celebrated the President's eightieth birthday in a manner unprecedented in the present generation. Never since the constitution of the empire 56 years ago has there been such an outburst of spontaneous enthusiasm and veneration for a single individual.

FOUR BIG 10 TEAMS PLUNGING FOR TOP

Gophers, Purple, Michigan and Ohio Show Fine Caliber.

Chicago—With the first conference games of the season over, four Big Ten teams demonstrated clearly that they will have to be considered dangerous contenders for the conference championship.

Smooth-working football machines were reflected in high scores rolled up by Minnesota, Northwestern, Ohio State and Michigan at the expense of smaller and weaker.

Doe Spears' Minnesota aggregation trampled roughly over the North Dakota eleven, 57 to 0, while Northwestern, weak in tackling and kicking, yet flashed blocking and interference good enough to hold South Dakota to a safety and roll up a score of 47 to 2. Michigan, under Coach Welman's application of Fielding Yost's great system, overcame Ohio Wesleyan with 33 points while not permitting their opponents to come anywhere near the Michigan goal, Ohio State, appearing against the strong Wittenberg college eleven, likewise ably defended its goal, 31 to 0.

The only upset in the conference was Chicago's defeat at the hands of Oklahoma, 13 to 7, which, while not affecting the conference race, indicates that the Maroon has a troublesome season ahead with Pennsylvania, Purdue, Michigan, Illinois, Ohio State and Wisconsin on the midway schedule. The first conference game is next Saturday with Indiana, at which Stagg expects to be able to show much improvement.

Wisconsin won from Cornell college 19 to 0 and Illinois subdued Bradley 13 to 0, while Iowa overcame Monmouth 32 to 0 and Purdue beat its neighbor, DePauw, 15 to 0. Indiana administered a 21 to 0 defeat to Kentucky at Lexington.

The biggest upset of the week-end in football was the defeat of Stanford, on the Pacific coast, last year's conference champions, by St. Mary's of Oakland, 16 to 0.

In the east the Army's 6 to 0 victory over Detroit was the outstanding feature, the westerners displaying a remarkable defensive game against the strong West Point team.

Harvard beat Vermont, 21 to 3; Yale beat Bowdoin, 41 to 0; Princeton downed Amherst 14 to 0, and Pennsylvania improved its showing of the previous Saturday by beating Swarthmore, 35 to 0.

Notre Dame had a stiff contest with Coe, but won, 28 to 7. Marquette, of Milwaukee, which plays the Army at West Point Saturday, was hard put to it to beat the strong Lawrence College team of Appleton, Wis., 9 to 0.

Ask \$1,775,000 Damages for Submarine Deaths

New York.—Damage suits totaling \$1,775,000 were filed against the government in United States District court in Brooklyn by widows and dependents of 28 of the officers and crew of the submarine S-51, which was rammed and sunk by the steamer City of Rome, off Block Island, on September 25, 1925.

Tennessee Governor Dies

Nashville, Tenn.—Gov. Austen C. Ray, fifty-one, of Tennessee, is dead after a cerebral hemorrhage. He was the first governor of Tennessee in 100 years to attain the office three times in succession. Henry Horton of Marshall, Tenn., state senator and speaker of the upper house, automatically becomes governor.

World War Platter Dead

Skopje, Yugo-Slavia.—The death here of Milan Ciganovic took away the last of the conspirators involved in the assassination of Francis Ferdinand at Sarajevo in 1914, which precipitated the World war.

Mexico Pays \$603,281 on Debt

Mexico City.—It is officially announced the Bank of Mexico has deposited \$603,281.50, as the September assessment on the service of the Mexican foreign debt.

Warsaw Seeks Big U. S. Loan

Warsaw.—Negotiations for a \$10,000,000 loan by the Warsaw municipal government from an American group was authorized by the ministry of finance. The loan will be used for the housing program.

William E. Hermance Dead

Norfolk, Va.—William E. Hermance, sixty-five, author, who in 1882 made a 4,500-mile canoe journey from Yellowstone park to the Gulf of Mexico, is dead here.

COAL MINE STRIKE ENDS IN ILLINOIS

72,000 Workmen Return; Agree to Arbitration; Old Scale Is to Prevail.

Chicago.—Illinois coal mines, closed since April 1 by a strike of 72,000 coal diggers, have been reopened through an agreement reached between representatives of the miners' union and operators in a meeting held here.

Work in the Illinois mines will be resumed at the Jacksonville pay scale of \$7.50 a day. Before and after the walkout operators maintained they couldn't pay the Jacksonville rate and compete with nonunion production in Kentucky and West Virginia and other unorganized fields mined at a wage rate of about \$4.90 per day. The strike lasted exactly six months and during that time two joint conferences of miners and operators made unsuccessful efforts to settle the wage controversy.

It was estimated that operations have been resumed at the majority of the 226 mines that were closed by the strike last April, and that about 70,000 miners have returned.

Announcement of the settlement was the signal for jubilant scenes in towns throughout the Illinois coal fields. Impromptu parades were formed and business men joined the marching miners and their women and children, who cheered the end of their six months of hardship. Many retailers and other business houses had been on the verge of closing, because of trade stagnation and the extension of heavy credits to strikers.

John L. Lewis, president of the United Mine Workers of America, announced that the Illinois settlement sends 72,000 Illinois miners back to work, together with approximately 30,000 other coal diggers in scattered fields.

Lewis said the truce reached in Chicago is bound to have a moral effect on settlements of miners' strikes in Indiana, Ohio, Iowa, Missouri, Oklahoma, and in the bituminous fields of the Southwest. He estimated that 500,000 bituminous miners responded to the strike call on April 1, when the coal operators, acting collectively, refused to sign a new wage contract on the Jacksonville terms.

To insure further amicable relations in the Illinois coal industry, the agreement negotiated provides for establishment of a joint commission of two operators and two union representatives.

Rice Miller and H. C. Perry, president and vice president of the Illinois Coal Operators' association, represent the operators on the commission. Harry Fishwick and State Senator William Snow, president and vice president of the Illinois miners' union.

This commission is empowered to launch an immediate investigation into all demands, claims and contentions of the operators and mine workers. A report of this investigation will be made, with recommendations, to a joint wage scale committee which will meet in Chicago on February 7, 1928.

This report, it is specified in the agreement, shall be the groundwork of the ensuing wage agreement which will become effective on April 1, 1928.

The last paragraph of the truce urges that prompt attention be given by the commission to seeking an early understanding covering the operation of machinery and devices for automatically loading coal. It is pointed out that several clashes have occurred between Illinois miners and operators when the latter attempted to install labor-saving devices.

The joint commission is authorized to formulate a temporary basis for the operation of such machines to be in effect from November 1, 1927, to March 31, 1928. To facilitate agreement on disputed points the commission is authorized to increase its number to five, in which case a majority vote shall be binding.

Farm Flock Is the Most Important

Poultry Still Is Backbone of Industry on Specialized Farms.

(Prepared by the United States Department of Agriculture.)

In spite of the growing importance of the specialized poultry farm and the commercial farm flock the general farm flock is still the backbone of the poultry and egg industry from the standpoint of volume of production, according to Roy C. Potts, chief poultry marketing specialist, United States Department of Agriculture.

Small Farm Flocks.

The farm flock is rather small in size and is only a small part of the activity on the general farm, often not being considered a very important part. But in the aggregate, more than 80 per cent of the total production of poultry and eggs comes from just such flocks. Because of its minor importance the general farm flock is likely to be subjected to some neglect at times, to be less cared for at all times, and to consist of stock that has not been highly improved.

Specialized poultry farming, however, has been on the increase during the last six or seven years and continues to become more and more important. Specialization is mainly along the lines of egg production. On specialized farms poultry is the sole or main business and the owner is dependent upon it almost exclusively for his living. Generally the most up-to-date methods are employed and the most improved stock used.

Commercial Flocks.

The commercial farm flock, on the other hand, is not an exclusive enterprise on the farm but is one that is given more than usual attention in management and breeding. The poultry and egg crop of the country is produced by these three primarily different types of flocks or farms, the most important of which is still the general farm flock.

Substantial Floor for Machine Shed Essential

Any implement house is better than none—even the simplest, most inexpensive type pays for itself in a season or two. But from the standpoint of convenience it pays to build machine sheds, and a floor of some kind is a good feature.

If of wood, the floor should be of two-inch planks, laid on joists or beams, which in turn should be kept off the ground by flat stones or concrete blocks. Such floors last quite long, especially if there be ventilation beneath them to keep the wood dry.

Concrete makes the ideal floor for a machine shed, of course. It can be laid right on the ground, if it is well drained.

Alsike Clover Thrives on Sour or Wet Soils

On wet, undrained fields where the production of ordinary crops is difficult or impossible alsike clover can be made to produce large quantities of valuable feed, says F. L. Davis of the soils department of the Missouri College of Agriculture. Alsike clover will grow and produce well on sour land where the common red clover wouldn't make a stand. It is the one

TEMPERATURES OF ONIONS STUDIED BY SPECIALISTS

Considerable variation among individual onion plants in their ability to withstand low temperatures to which they are subjected before frost sets in, has been determined by specialists.

One of the experiments was to determine the length of time that the onion plants could stand in the field after frost had set in, and to determine the effect of low temperatures without frost.

Details concerning the experiments and their results are given in Circular No. 415, "Onion Culture," published by the department. A copy of the circular may be obtained on application to the Department of Agriculture, Washington, D. C.

Bulb Is Subject to Freezing Injury in Transit.

(Prepared by the United States Department of Agriculture.)

Onions, one of the leading vegetable crops commonly held in storage, may under certain conditions undergo a limited period below their freezing points without freezing, says the United States Department of Agriculture. Experiments conducted by the department at its cold storage laboratory at the Arlington Experimental Farm, Rosslyn, Va., show that the average freezing point of onions of the globe type is about 30 degrees F. When known to be at a temperature below their freezing point onions should not be moved or handled roughly as they are likely to freeze immediately. The freezing points and other temperature records were determined by the thermoelectric method.

The study was confined to northern-grown onions of the globe type, since the larger proportion of this crop is held in common storage in the northern states and therefore is frequently subject to freezing injury while in storage and in transit to market.

Blanching Celery While Growing Is Best Method

If celery is not blanched while growing the green stalks can never be fully blanched. The common method of blanching and perhaps the best way is to hill up the growing celery as it grows, with earth. It will blanch slightly when stored in a cellar or if grown in pots and placed in the cellar, but when stored for winter most of the white stalks are new growth made by moving materials from the older stalks and leaves to form the newer stalks and leaves.

Sweet Clover Is Not

The man who has gray red clover all his life, especially so if he is getting fairly good results, is not inclined to change to sweet clover. There are many farms, however, on which a crop of sweet clover could be grown on a portion of the land each year for plowing under or for pasture without interfering with the regular rotation.

variety of clover that is better suited to the soil. The most important reason for growing alsike clover is that it grows on sour or wet soils where other crops are poorly adapted. The most important benefit of growing it on these soils is that it does not feed the land with an extent that it lowers the production of the following crop, and (2) it is one of the best green manure legumes.

Greater yields of crops are following alsike clover than are following alfalfa. An extended experiment during the past season, comparing buckwheat, manure, straw, oats, onions, red clover, spinnaker, rye, alsike, and red top showed that alsike was almost unsurpassed in respect. Alsike clover produces as well as red clover and better crimson or white.

Rake Up and Burn All Rubbish in Onion Beds

Raking up and burning all the onion stalks or garden refuse in the time of year is more important than insect control than any other thing that may be taken next winter. In the summer, says F. E. White, entomologist of the Idaho agricultural extension service.

"If weather conditions permit," Whitehead says, "this should be done at once. Rake up and burn all the onion stalks and garden refuse, and leave no plant matter overwintering. It is very important to success of this method, the necessity of other methods of control, depends upon thoroughness of wintering campaign should be as thorough as possible."

This practice is particularly important this year, because of the damage that has been done to Idaho crops for several years past. It has become steadily more important.

Most Effective Means to Control Corn

One of the most effective means thus far discovered of controlling the spread of the European corn borer to destroy the crop and to control of other plants in which the borer hibernates before emerging in the spring as moths. It is very important, however, to cut the stalks as soon as the ground is possible, to be determined that it is not safe to set in the houses and burn the stalks. It is necessary to cut the stalks as early as possible to capture most of the borer, to cut stalks and then burn them, shredding the stalks or burning the stalks.

YOU ARE INVITED to WITNESS

A Special Sale And Display Of The

MONARCH

America's Most Popular Range

OCTOBER 10th to 18th

Whether you need a range now or five years from now we urge you to visit our store and see the wonderful display and equipment designed and shipped to us by the manufacturers of the renowned MONARCH Line of Ranges. We want you to see the New Design Monarch Range—built in accordance with the most modern, practical ideas—Beautiful and COMPACT—taking less room than the clumsy, oversized types of other makes and without losing a fraction of an inch of useful space.

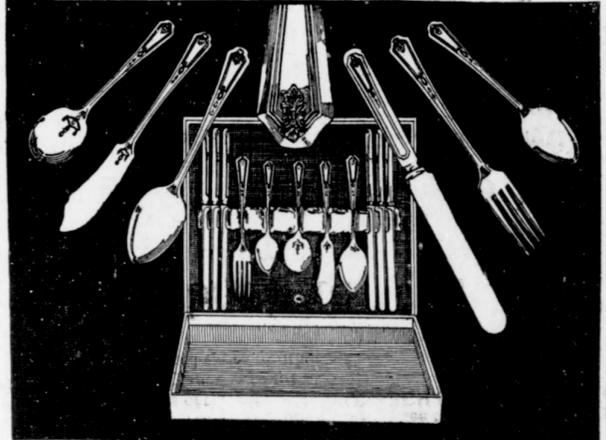

Absolutely FREE!!!

During This Special Sale Only
October 10th to 18th

To Every Purchaser of a MONARCH Malleable Range During this Special Display and Demonstration Week—A Thirty-Five Piece Set of Limoges China Ware or a Twenty-Six Piece Set of Onida Community Silverware.

Without high powered salesmen to trouble any one, you will readily see why the MONARCH, with its many Marks of Merit, is the best range buy on the market today—and it costs less than the others. Be sure to come—if you need a range we want you to take advantage of this remarkable Special Offer given during this Sale only. The MONARCH Practical Payment Plan enables us to sell you the MONARCH of your choice on convenient monthly or single time payments during this Sale—if you haven't the cash now

Let Us Tell You
About It.

Remember the Dates --- October 10 to 18

West Bend and Plymouth

Sworn Statement
of the Ownership, Management, etc., required by the Act of Congress of August 24, 1912, of the Statesman published weekly at Kewaskum, Wisconsin, for October, 1927.
I, D. J. Harbeck, Editor, personally appeared D. J. Harbeck, who, having been duly sworn according to law, deposes and says that he is the Editor of the Statesman and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management, etc. of the Statesman, published on the 3rd day of October, 1927.
1. That the names and addresses of the publishers, editor, managing editor, and business managers are:
Publishers—Harbeck & Schaefer, Kewaskum, Wisconsin.
Editor—D. J. Harbeck, Kewaskum, Wisconsin.
Managing Editor—Arthur Schaefer, Kewaskum, Wisconsin.
2. That the owners are: D. J. Harbeck and Arthur Schaefer.
3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.
D. J. Harbeck, Editor.
Subscribed and sworn to before me this 11th day of Oct., 1927.
L. P. Rosenheimer, Notary Public (Seal)
My commission expires July 28, 1928.

First for Finer Flavor —No Throat Irritation —No Cough

11,105* doctors give written opinion

"Roxy," a favorite in Radio-land, writes:

WHAT is the quality that Giuseppe Danise, Adam Didur, Queena Mario, Antonio Cortis, Lenore Ulric, Nanette Guilford, Wilton Lackaye, "Roxy," and other famous singers, actors, broadcasters and public speakers have found that makes LUCKY STRIKES delightful and of no possible injury to their voices?

For the answer we turned to medical men and asked them this question:

Do you think from your experience with LUCKY STRIKE cigarettes that they are less irritating to sensitive or tender throats than other cigarettes, whatever the reason?

11,105* doctors answered this question "YES."

These figures represent the opinion and experience of doctors, those whose business it is to know.

"It's toasted"
No Throat Irritation—No Cough.

*We have carefully analyzed the above statement and the above statement is true. L. P. ROSENHEIMER, Notary Public, Kewaskum, Wisconsin, Accountant and Auditor. New York, July 22, 1927.
