

Scraps of Humor

SUBTLETY

An Oxford undergraduate, a son of the vicarage, discovered he was uncomfortably short of money, so he spent some time concocting a letter that would have the right effect upon a somewhat severe parent.

When finally completed, the letter read as follows: "My dear father, I wonder if you will oblige me very greatly by sending me a copy of this month's parish magazine, and a five-pound note? P. S.—Don't forget the parish magazine."

WHAT FLAVOR?

"I shor got in a jam yestiddy, Jimmy."

"What kinda jam, Bill?" "Think it was strawberry."

Not Responsible

Hubbanc (anxiously)—My wife seems not to have the slightest interest in life.

Doctor—What makes you think that?

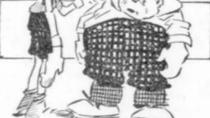

"Well, I've tried her with golf, billiards, football and racing, and it's just like talking to a stone!"

Wonderful

"You know Boothby—great fellow for detail."

"He is, that! He's the sort of chap who would go and get married and be able afterward to tell you whether it was Mendelssohn, Lohengrin or Tannhauser they played during the ceremony."

THE BEST

Slim Kid—What d'you like best about school?

Fat Kid—Goin' home from it.

Business View

"You seem to have a good deal of faith in doctors," said Barratt to his invalid friend.

"I have," was the reply. "A doctor would be foolish to let a good customer like me die."

Toleration

Housewife—I should think you would be ashamed to beg in this neighborhood.

Tramp—Don't apologize for it, ma'am; I've seen worse.—Montreal Star.

Easily Named

Very Friendly Visitor—Did you have any difficulty in choosing a name for baby?

Fond Mother—Not the slightest. You see, dear, we've only one rich relative.

What Does It Matter?

"Did you really understand the learned lecture you heard last night?"

"No, but that didn't matter, I had a free ticket."—Gemütliche Sachse (Leipzig).

All Did It

Magistrate—It seems strange to me that you could keep on robbing that enormous corporation for so long without being caught.

The Prisoner (brightly)—Well, the corporation was pretty busy itself.

Making Them Work

"Score one for the husbands."

"What now?" "Some of them are finding their hitherto frivolous wives make very fair chauffeurs."

One Last Request

Doctor—About nine patients out of ten don't live through this operation. Is there anything I can do for you before we begin?

Dusky Patient—Yessah. Kindly hand me mah hat.—"Selected" by the Congregationalist.

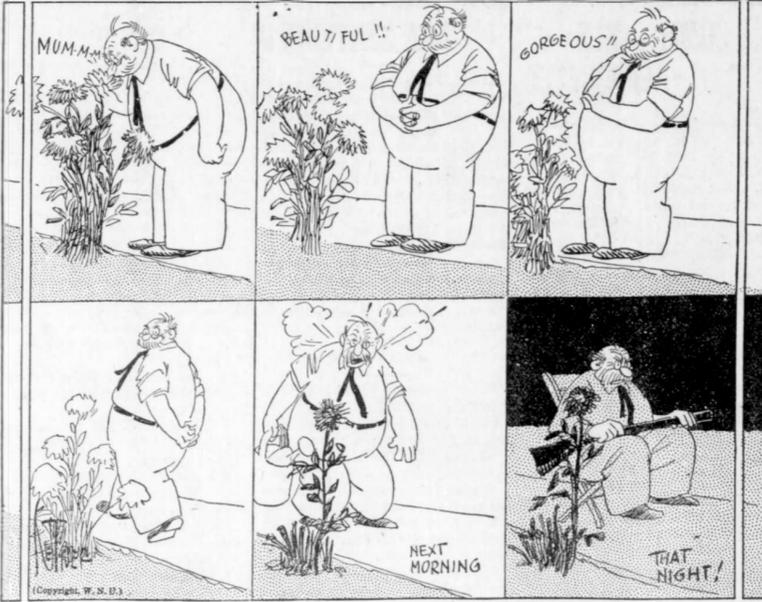

Thorough

Mr. Snapp—My motto is: What is worth doing is worth doing well.

Mrs. Snapp—I notice that whenever you make a fool of yourself.

COLLARED AND CUFFED

and took him to the house?" Johnson

Professor—Microscopical investigations lead us to believe there are colors too delicate to be discerned by the human eye—invisible colors, we may call them.

Student—I know the name of one of them, sir.

"Indeed! What is it?" "Blind man's buff."

"What do you wear that glass in your eye for?"

Man With the Monocle—That eye is very weak.

"Then why don't you get a glass hat?"—Exchange.

"Men should be gentle and kind to women."

"Yes," answered Mr. Meekton. "But oughtn't there to be a little reciprocity?"—Washington Star.

Grazed Woodlot Doomed to Death

Furnishes Poor Pasture and Forest Is Headed for Childless Old Age.

"If grazing is permitted continuously in a woodlot, it is doomed to a childless old age and death," declared Prof. Samuel N. Spring of the forestry department at Cornell university, speaking at Farm and Home week at Ithaca, N. Y., on the dangers and losses from grazing done by farm stock in woodlots.

"In the long run, grazing is more destructive to hardwood forests on New York state farms than is any form of commercial logging. Forests may indeed deteriorate under careless cutting, but if fire and grazing are kept out, a new growth of trees is possible and a new era of grazing is possible.

"Little seedlings that spring up naturally in the forest are the next generation of timber trees. Grazing animals browse broad-leaved trees back to the ground and, in the case of conifers, they browse off shoots and needles as well and trample and deform the little evergreens. Of course, a few may escape but not enough grow up to prevent woodlot 'race suicide'."

Hopeless Woodlot.

"A heavily grazed woodlot was given an 'sp' name by an investigator in Ohio some years ago, who classed it as 'the hopeless woodlot' in which mature trees, defective culs and weed trees formed the stand and grass was on the ground beneath. He struck a keynote when he stated that if the owner tries to combine pasture and woodlot neither will be first-class, but if the owner divides them he will have both a good pasture and an excellent woodlot."

"Grazing slowly but surely changes conditions more rapidly if many animals occupy the woodlot. The soil is trampled and packed, roots of shallow-rooted trees become exposed, and as mature and overmature trees come down or are cut with none to replace them the litter disappears and grass replaces it. These grasses growing in the partial shade lack nutritive value and steal food and moisture from the trees. As the forest grows more open the wind may uproot trees and there are no younger ones to fill the gap, and so the process goes on. The ground loses fertility being robbed of its litter that releases plant food in decaying."

Losses Are Larger.

"Grazing of woodlots is beneficial from the owner's standpoint in furnishing shade to the animals and some food, but he loses the possibility of good returns from the woodlots, in exchange for relatively small benefits. A common-sense procedure would be to fence off the woodlot excepting such a portion as will afford the shelter required. The owner should decide what proportion he needs for

wood production and manage it as intensively as he would any other crop. The question naturally arises whether a woodlot will come back after being grazed. There are plenty of examples. At Cornell in the management of the university woodlots an experiment in shutting out grazing from a part of a woodlot and permitting grazing in adjoining parts has been in progress for a little more than ten years. Conditions have steadily improved in the protected portion and skillful cuttings have given rise to a growth of useful young trees which will form the basis for a new crop as mature trees are removed in the future. The grazed part has steadily deteriorated in marked contrast to the part protected."

Manure Supply on Some Farms Now Inadequate

The supply of manure on some farms is wholly inadequate to the plant-food needs. Anything that can be done to increase the value and efficiency of this manure means increased profits, or at least a lower fertilizer bill, which means the same thing.

A ton of manure is equal in fertilizing value to about 100 pounds of a 12-5-10 fertilizer; in other words, each ton of manure will contain 12 pounds of ammonia, 5 pounds of phosphoric acid and 10 of potash.

This situation can be corrected by the addition of 50 pounds of 10 per cent superphosphate or about 40 pounds of 20 per cent superphosphate to each ton of manure.

This addition of phosphoric acid will give an analysis of 12-13-10 to the treated manure, making each ton equal to about 100 pounds of a 12-13-10 fertilizer in value. The practical application of this treatment is that the available supply of manure on the farm, increased in fertilizing efficiency, can be applied less heavily with equal or better results than the untreated, and can thus be made to cover an increased acreage of the farm each year.

First Year Alfalfa Is Preferred for Pasture

Results reported from experiment stations where sweet clover and alfalfa were used for hog pasture have been compared indicate that the alfalfa is to be preferred. Sweet clover makes a fairly good substitute for the alfalfa during the first year of grazing if it is kept grazed rather closely. During the second year the crop is apt to become too woody and stemmy to make satisfactory hog pasture. Experiments indicate that alfalfa, rape, red or alsike clover are all to be preferred to sweet clover as a hog pasture.

SWINE-SANITATION SYSTEM TURNS LOSSES INTO PROFITS

Owing to Improved Conditions Cholera Wanes.

The continued success of the swine-sanitation system, developed by the United States Department of Agriculture in Illinois and now widely used throughout the Central West, is discussed in a recent report to the department by Dr. J. E. Gibson, federal inspector in charge of hog-cholera control work conducted by Purdue university. In bringing the system to the attention of Indiana hog raisers, federal veterinarians have conducted post-mortem demonstrations, showing the damage done by roundworms which the system, when used, prevents.

A leading swine breeder in Rush county, Ind., stated that the benefits he had derived from such a demonstration and lecture delivered four years ago had "turned a losing proposition into one that is now showing a splendid profit."

"Up to that time," he continued, "the average number of pigs per sow had been about 3 1/2, and the few pigs that grew to maturity, when marketed at 10 1/2 months of age, weighed about 200 pounds. Now the average number of pigs per sow is a fraction above 7 and they weigh 200 pounds when about 7 months old."

Approximately 6,000 farmers in Indiana have attended lectures and post-mortem demonstrations similar to the one cited which resulted in such striking success.

Decrease Meat Scrap if Milk Is Fed Regularly

Where milk is being fed, before the hens at all times, the meat scrap in the mash may be reduced, decreasing the meat scrap content from 20 to 10 per cent, giving the hens all the milk they want to drink in its place. In a few cases where the pullets are late and not growing as rapidly as they should, it may be advisable to feed these flocks wet mash, using the same mash that is fed dry, but moistened with warm water or milk, feeding it once a day at noon at the rate of about five pounds of mash, weighed dry, to each one hundred birds.

Flies Carry Germs

Remember that flies carry tapeworm eggs. The only place they can get the eggs is from the droppings of infested birds. It will pay to clean the dropping boards frequently this summer. Keep the houses for the young stock as clean as possible so flies will not be attracted. Do not let the young stock range after the old hens.

Agricultural Hints

Skim milk is much better than water for growing chicks.

Any fire in the woods, no matter how small, represents a loss.

Because of high prices of dairy cows, many more heifer calves are being raised than normally.

A number of insects, such as the white grubs, wireworms, and cutworms, are always present in sod. They frequently destroy corn and other row crops.

The biggest factor in controlling diseases and parasites among young chicks is cleanliness. Chicks must be free from disease at the start, and the house and grounds must be clean.

This is a good time to purchase a team of young horses. They are cheaper now than they will be soon.

Legume hay is a better cash crop for many New York farmers than ordinary grass hay, since there is a better market for it.

Fine oyster shell should be fed to young chicks in separate dish or hopper. Grit and charcoal are not necessary, but may be fed in the same way as oyster shell.

The most important factor in the successful castration of pigs is to perform the operation while the pigs are quite young. The best time is when the pigs are six to eight weeks old and before they are weaned. Most veterinarians or farmers in castrating pigs prefer to use a mild disinfectant solution on the wounds after the operation has been completed. A weak solution of any of the common stock dips is usually suitable for this purpose.

Treat Young Pigs

Remember that flies carry tapeworm eggs. The only place they can get the eggs is from the droppings of infested birds. It will pay to clean the dropping boards frequently this summer. Keep the houses for the young stock as clean as possible so flies will not be attracted. Do not let the young stock range after the old hens.

Flies Carry Germs

Type House Affords Maximum Economy of Space and Building Cost

and is still more by the beautiful treatment of plants and shrubbery. The front entrance of this house opens directly into the living room, at opposite ends of which are a fireplace and a sun room. The stairway also ascends directly from the living

Second Floor Plan.

room to the second floor. There is an arched doorway between the living room and dining room, and from the latter one passes on to a kitchen of the compact modern type. The service entrance is at the side and is reached from the kitchen through an entry and down three steps. From the service entrance a stair descends to the basement.

Above stairs there are three rooms and bathroom. On the plans, two of these rooms are indicated as bedrooms, while the third is marked playroom. This is done with the idea of providing for a family which requires but two bedrooms, but finds convenience in a room where the children may play as they please without disturbing the rest of the family by their noise. The room could just as well be used as a third bedroom, as a sewing room or for any other purpose for which it might be most useful. All of the upstairs rooms have good-sized closets and there is also a linen closet in the hall at the head of the stairs.

Home Wiring Urged as Economy

As a modern home, a certain amount of wiring is necessary. It is measured by the number of outlets, switches, and other electrical fixtures. The wiring system should be installed in a convenient and economical manner. The following are some of the things to be considered: 1. The wiring should be installed in a convenient and economical manner. 2. The wiring should be installed in a convenient and economical manner.

For example, they are beginning to install automatic elevators in four and five-story apartment houses in the suburbs that, under previous calculations, were priced as "walkups," on the ground that these buildings will keep fully rented easier than the "stair-climbers."

Cubic-foot prices of today show, perhaps better than any other way, the cost position of building construction in general because they are computed by the highest rated and most experienced builders, as well as by those of recent entry into the low-priced speculative housing field competition.

The more experience we have in the building business the greater seem to be the surprises as to costs of building from present-day architects' plans and specifications.

Roof Leaks Often Baffle Best Workmen A leak once started will often baffle the best of repair men. It keeps getting worse. By and by a large area has to be stripped and reshelting to prevent the leakage that in itself may not cover one square foot. Stopping one leak counts for little, as new ones start operations without warning. Cheap shingles are expensive.

Paint the shelves in the same color as the rest of the room, depending on the bindings to give variety in color.

Stairs Squeak? Some Ways to Stop Noises Sneaking stairs—and is there anything harder to endure—can be avoided by using well-seasoned wood, by making sure that the underpinning is secure and that the walls adjacent to the stairs are substantially constructed, and by wedging the treads and risers.

Faulty staircase construction does not usually show up until a stairway has been in use, and then it is too late to do anything in the way of stiffening the stair members unless one tears away plaster, lath and finish.

Leaded Glass Leaded glass is one of the many features by which the modern residential designer evokes an atmosphere of the period or age from which is derived the architectural spirit of his plan.

ADOPT NOVEL SCARF NECKLINES; GAY PRINTS ARE NOW POPULAR

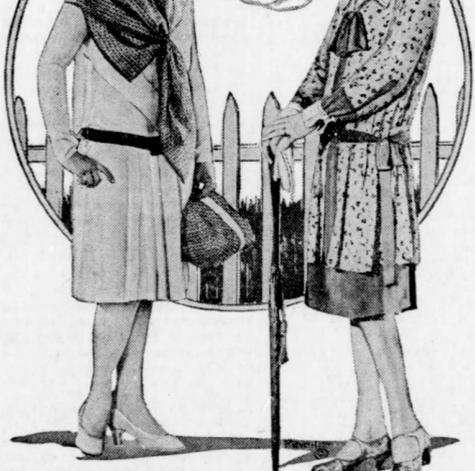

Showing the New Scarf-Cape Effect.

It's just one fluttering scarf effect after another, so far as fashionable necklines are concerned. Most of the sheer frocks which are so numerous this season are styled with either a capelet or a scarf. Often they amount to one and the same thing, for the latest is to design and manipulate the scarf that it really gives the appearance of a cape. One sees this clever camouflage especially in connection with unfurled cloth coats. The scarf of self-material widens at each end, each being cut slightly circular. When these fan-shaped ends are thrown back over the shoulders together they suggest a cape silhouette.

The frock in the picture which is of beige georgette subscribes, somewhat, to this new scarf-cape effect, in that the scarf begins at the front, the ends falling toward the back. The skirt has two tiers of fine knife plaiting, these flounce effects being much highlighted throughout the season's stylings. The narrow belt also reflects the trend of fashion.

Too much emphasis cannot be placed upon the style importance of frocks of this character, that is to say, upon frocks which are of sheer materials in solid colors and which are self-trimmed. Business women and college girls are choosing these this frocks of all sorts tailored simplicity, especially those of wool or silk georgette, in preference to the usual cloth one-piece tailleur. It stands to reason that they insure summer comfort, and if in dark shades they are thoroughly practical. That is the "reason why" there is such a persistent call for navy georgette gowns this season. There is nothing more satisfactory for smart informal daytime wear.

It adds greatly to the wearableness and the charm of these thin tailored frocks if a long coat to match accompanies them. The scarf collar is particularly good on these coats. Some

Two Modish Costumes.

trimmings and accessories give a sophisticated air of up-to-dateness for more than one costume this season. Soft all-over stitched hats with tiny brims, made of figured silk, time and time again accompany scarfs or kerchief neck squares of the same material. Sometimes a neat design is selected as that which smartens the white silk sports frock worn by the young girl standing to the left in the illustration. The beauty of this trim outfit is that the hat, scarf and dress launder perfectly, being made of wash silk.

JULIA BOTTOMLEY. (© 1928, Western Newspaper Union.)

BROWN AND WHITE New sports shoes favor the brown-and-white combination. One pair of white baby doe-skin have tips, saddles and heels of fancily stitched brown kid.

Doubly Plaited A string colored satin afternoon frock had two belts, the wide one at the waistline of medium brown and a narrow one two inches lower of dark brown.

Embroidered Chiffons It would be hard to imagine anything lovelier for an evening frock than one of the new chiffons delicately embroidered in gold or silver thread.

The KITCHEN CABINET

The sculptor cuts away here, smoothes there, he makes this lighter, this other purer, until a living face has grown upon his work. So do you also, straighten all that is crooked, bring light to all that is overcast, make all one glow of beauty, and never cease glowing your status until the god-like splendor shines.—Pottinus.

THE ODORIFEROUS BULB

What would the cook do without some member of the onion family for food and flavor? As a food it takes a large place in the weekly menus; as a flavor it is in daily use. When onions are used in stuffing or in scalloped dishes which are not long baked, the onion should be chopped and sauted in a little butter to insure its being well cooked.

Where a bit of onion in salad will be noticed by a fussy member of the family, scrape it or extract a little juice for flavor by twisting the cut side of an onion on a grater near the groove, when the juice will run down into the dish.

Another very appetizing dish is cabbage prepared as follows: Boil a whole firm head, removing the tough center. Boil tied in a cloth if it seems not compact. When tender, drain and cut down into ple-shaped pieces and pour over a rich white sauce to which a cupful of grated cheese has been added. Served on a large chop plate. This makes a most attractive main dish.

Baked Onions With Cabbage.—Parboil until partly cooked, enough cabbage to serve the family. Place in layers in a buttered baking dish with a layer of cheese between, top with another layer and pour over plenty of white sauce well seasoned, to moisten. Bake until thoroughly cooked.

Add an onion to a dish of baked beans when ready to put into the oven. A bit of shredded onion or chives adds much to a dish of cottage cheese. When using onions for salads if the juice is used it is not apt to leave an odor on the breath. Small bits of onion are not always easily digested and thus scent the breath unpleasantly.

Stuffed Onions.—Take even-sized mild onions and remove the centers carefully, leaving enough wall to hold the filling. Parboil the onions and fill with any desired filling—sausage, bread crumbs and seasoning make a very tasty filling. Put into a hot oven and baste with stock or water and butter. At the last place a spoonful of buttered crumbs on top of each and brown.

Onions are valuable in pulmonary troubles; used as poultices they have saved many a serious illness. Chop the onion and mix with a little rye flour (this because it is sticky and perhaps holds its moisture longer), add a bit of vinegar to moisten and apply to the chest of any patient suffering with bronchial or lung trouble. Put the onion on a thin cloth and cover.

Cakes for Summer Fetes Many of the cakes which are so ornamental, that are served at weddings, receptions, parties and other functions may be made in the home kitchen at much less cost. The small cakes to serve with a cup of tea or cocoa are no more than a good bite (bonne bouche) but are so attractive that their popularity never wanes.

For any such cakes, all materials should be of the best and measurements carefully made. All flour should be sifted before measuring and level measurements of all ingredients should be made. After baking, the cakes should be carefully cooled then packed away. Cakes may be made a week in advance of the time needed.

Sweethearts.—Cream two-thirds of a cupful of butter and one-half cupful of powdered sugar together, add a teaspoonful of boiling water, one teaspoonful of vanilla, beat well, then add two eggs, one at a time and beat one minute after each addition. Now stir in three cupfuls of pastry flour gradually and when the dough leaves the sides of the bowl turn it out on a pastry table with one cupful of flour. Knead lightly; the dough must be smooth but not sticky to the hands. Place it back in the bowl and cover with a towel and let stand two hours. When ready to roll take out part of the dough and roll one-fourth inch thick. Cut with a heart-shaped cutter, place on baking sheets and bake slowly. Lay aside the trimmings for later use. Now roll and bake the remainder of the dough, reserving the trimmings. When the cakes are cold ice them, decorate with bits of fruit, or candied violets; any number of flower-like decorations make them most festive.

Baked Bananas With Currant Jelly.—Loosen a section from the skin of each banana. Put bananas in granite-ware pan, bake until soft. Remove the skins and roll in powdered macaron crumbs. Surround with currant jelly which has been beaten in boiling water. Thicken the sauce with a teaspoonful of butter and one teaspoonful of lemon juice.

Nellie Maxwell

Firms and Families A firm is like a family—it is bound together by mutual interests. Just as families quarrel and ruin their homes, so the members of a firm may quarrel and ruin their wages and profits. But, a normal family does not quarrel. It develops a family feeling, and all combine to protect each other.

Old Saying Verified Of course the fittest survive, as Darwin said. We're all here, aren't we? —Altona Tribune.

Going Strong

Dad—"How did you come out with your exams?" Son—"Passed 'em just like they were cars ahead."

Proof Enough Hortense—And do you think he was in earnest when he proposed to you? Marjorie—Yes—his cigarette went out and he didn't notice it.

No Competition Emily—I am the happiest woman in the world, because I am marrying the man I want. Winnie—Oh, that's nothing. True happiness comes to a girl by marrying the man somebody else wants.—Tit-Bits.

Horrible! "Do you see that young man over there?" He is the black sheep of his family.

"What's wrong with him?" "Well, it's this way: his father is the man who names the Pullman cars and his mother is a famous subtitle writer."

"Is that so?" "Yes, but the boy has disgraced himself. He names all the new nickel candy bars."

Cute in a Baby-Awful at Three—and it's Dangerous

Thumb sucking does look sweet in a baby, but it is disgusting in the three-year-old and sometimes it hangs on until fifteen or sixteen! The habit may cause an ill-formed mouth or induce adenoids; and it always interferes with digestion. Pinning the sleeve over the hand; attaching mittens, or putting on cardboard cuffs, which prevent bending the arms at the elbows, are some of the ways to stop the habit.

Another bad habit—irregularity in bowel action—is responsible for weak bowels and constipation in babies. Give the tiny bowels an opportunity to act at regular periods each day. If they don't act at first, a little Fletcher's Castoria will soon regulate them. Every mother should keep a bottle of it handy to use in case of colic, cholera, diarrhea, gas on stomach and bowels, constipation, loss of sleep, or when baby is cross and feverish. Its gentle influence over baby's system enables him to get full nourishment from his food, helps him gain, strengthens his bowels.

Castoria is purely vegetable and harmless—the recipe is on the wrapper. Physicians have prescribed it for over 30 years. With each package, you get a valuable book on Motherhood. Look for Chas. H. Fletcher's signature on the wrapper so you'll get the genuine.

Not the First Time Wife—I think I hear burglars. Are you awake? Husband—No.

Appropriate June Bride—What was that our friends stuck on our suitcases? Groom—Union labels.

Knowledge gives one pleasure and doing something with it gives him more.

There never was a good war or a bad peace.—Franklin.

Don't fail to study yourself, if you would know others.

Splendid Results in Good Health Campaign

No diphtheria deaths in 1927 puts Cambridge, Mass., at the head of the list in diphtheria prevention, of all the cities with populations more than 100,000 in the United States. Only one in the last five years, according to the American Medical association, has any city gone a year without a single death from diphtheria. The previous diphtheria record breaker was Duluth, Minn., in 1925. Seven cities with more than 100,000 inhabitants had no typhoid deaths last year, the medical association's statistics show.

Fire Ball Caused Panic When a fire ball fell as a field at Murlie, near Aberdeen, Scotland, where a picnic was being held, many children and adults were thrown temporarily, and panic ensued. One boy was temporarily blinded. Another bore the imprint of a fern on his thigh. On a woman's arm was a mark resembling twisted wire. Some of the children were so terrified that they injured themselves by rushing heedlessly against barbed-wire fences.

Yankee Lingo Tourist—Speak English? Foreign Restaurant Owner—A lecture.

Tourist—That's Jake. Gimme a plate of Boston and a mug of Java.—Detroit News.

Adding a Word "Never worry" is a good motto and becomes better if you add "others" to it.

Some men never have any respect for gray hairs until they acquire some of their own.

People educate themselves to go without breakfast. Coffee and a roll is the vanishing point.

No price tag can be depended upon unless it carries an honest man's name.

In the good old days there was always something horrid, if you remember.

Dare to be true; nothing can need a lie.—Herbert.

## AMERICAN KITCHEN KOOK

SAFETY - SPEED - CONVENIENCE - SAFETY

### Kitchenkooking is a Real Pleasure

WHAT a pleasure it is to prepare dainty appetizing foods with Kitchenkook! Its clear blue flame is always under full control; a turn of the valve regulates it just as you want it, from a low simmering fire to the fastest cooking fire known. Uniformly satisfying cooking and baking results are always sure because the heat cannot vary. Kitchenkook is not only like gas—it is a gas stove. As it burns it produces its own gas from gasoline. A match lights it, all burners ready in one minute. And it is all so simple, so handy, so clean you will wonder how you ever got along without Kitchenkook. Sixteen models; come in at your first opportunity and see them.

# Your Binder Ready for Harvest?

McCormick-Deering grain binders have long enjoyed a reputation for substantial construction and ability to do accurate work year after year. Now you can have the best features of both the McCormick-Deering, with the addition of many new improvements.

The McCormick-Deering grain binder is the most substantially built and highest running grain binder on the market. The adjustments which enable it to cut grain so successfully and with such consistent accuracy, also include features which make adjustments when they are necessary.

Instead of wasting time in trying to make an old binder work, instead of risking the loss of grain, better see us today. Order for a new improved McCormick-Deering, so that you will be fully prepared to meet the emergency when harvest time comes.

Exempted From Warfare

The selective service law in regard to the World War provided exemption to a member of a well-recognized religious sect or organization organized and existing on May 18, 1917, whose then existing creed or principles forbid its members to participate in war in any form, and whose religious convictions are against war or participation therein.

New Fish Found

A new kind of fish has been discovered off the coast of Rio de Janeiro. It is known as the ink stand fish because of the bone on the back which looks like a pen. When the pen is pulled up, the blood is black, and good enough to write. The bone pen tanks are as well as the best steel pen.

# THE JOHN-DEERE 10-20 Tractor at \$850

will soon be here for your inspection. This is an ALL PURPOSE TRACTOR, built to last and give service at the least possible expense. Pulls two bottoms with two wheels in the furrow. The JOHN-DEERE TRACTOR has great power to do all work on the average sized farm, including planting, cultivating, without any of the disadvantages generally found in the so-called all purpose tractors.

NEWS OF THE BADGER STATE

New London—Four men were burned, two of them seriously, when a cigarette was lighted near a tank of gasoline in which they were washing grease from their hands.

Rhineland—Three young Chicagoans, who pleaded guilty to shooting Henry Venn, Russian restaurant owner here, in a robbery attempt, received prison terms ranging from one to 30 years.

Racine—In an endeavor to learn whether a tire had been punctured, Mrs. Adolph Larson leaned too far out of her husband's automobile. She fell, fractured her skull and died three hours later in a hospital here.

Berlin—The ashes of Dudley E. Swinchart, soldier of fortune, military advisor to the late Chung Tso Lin, and ranking general in Manchuria's army, will be brought from Japan to this city for burial. It is planned by relatives here.

Madison—Neither local boards of vocational education nor cities have power to pledge vocational school property for loans with which to build additions to the school, the attorney general has informed the state board of vocational education.

Mineral Point—John Tucker's herd of Jerseys completed the year in the Dodgeville-Mineral Point Dairy Herd Improvement association with a production of 7,598 pounds of milk and 983.2 pounds of butter fat. The herd is fed a balanced ration all year with alfalfa hay and silage.

Madison—Inspection of the 600 or more nurseries registered in the state has been started by a crew headed by State Entomologist E. L. Chambers of the state department of agriculture. The law requires inspection for dangerous insects and possible disease on plants to be transported.

Madison—In the 11 congressional districts of Wisconsin, chairman have been appointed by the campaign committee of the Wisconsin Women's Christian Temperance union to ascertain the stand of congressional candidates on the eighteenth amendment and to co-operate with local clubs in determining the position of state and county office aspirants.

Dodgeville—Beef breeders in Iowa county may now receive an indemnity on home raised steers which react to the tuberculin test, W. I. Wright, state veterinarian, has announced. This ruling, along with the feeder permit privilege, which allows feeders to be brought into the county without test, provided they are pastured separately, will make possible completion of the area test.

Madison—Factory employment in Wisconsin during the last month showed less than 1 per cent gain. In the state industrial commission has reported, but building, highway construction and other outdoor lines showed large increases. Employment as a whole is about 1.7 per cent below the level of a year ago. Average weekly earnings in factory industries stood at \$26.07 in May as compared with \$25.49 in April.

Ripon—Fields of velvet barley, the new smooth awned variety from Minnesota, show considerable promise and long heads that have just formed indicate a good yield of high quality grain. Berds on the velvet strain show none of the rough and disagreeable features of the Oederbrucker and other well known varieties. It yields of the velvet are satisfactory the new variety probably will supplant barbed awn barley now grown here.

Eau Claire—After hearing extended arguments, Judge James Wickham took under advisement the application of the city of Bloomer for an injunction restraining the state highway commission from proceeding with the relocation of highway 53 within the city limits of Bloomer, work on which has been already started. The relocation would eliminate two grade crossings. Attorneys for the city charged automatic methods by the commission.

Milwaukee—A. G. Schmedeman, mayor of Madison and former minister to Norway, was nominated for governor by the democratic state conference here. A fundamental change in the eighteenth amendment is demanded by the platform adopted at the conference. Along with this is a pledge to enforce all laws so long as they are on the statute books, but emphatically reserving to the people the right to amend or repeal laws.

Madison—Wisconsin's 10 public employment offices placed 9,772 persons in jobs during four weeks in May. The number of applicants for each 200 places open declined from 131 in April to 110 in May, the state industrial commission reported.

Kenosha—Arlene Whitefoot, 7, died here after a sudden illness. The cause of her death was explained by the discovery that she had handled fireworks and some of the powder had evidently gone into her mouth and stomach.

Grantsburg—The second area test for eradication of bovine tuberculosis in Burnett county was started last week. All herds will be tested regardless of whether or not application has been made. The cost is born by the state.

Racine—Two citations for bravery in two years is the record of James G. Petersen, Racine, who was mentioned in recent navy dispatches for saving a companion in the Canal Zone from drowning.

Dodgeville—Six candidates are in the race for sheriff of Iowa county, seeking nomination on the republican ticket.

Superior—Walking in her sleep, Mrs. H. O. Fields, 87, stepped out of a second story window and fell off a porch, suffering fractures of both forearms, a broken leg and internal injuries. Her recovery was said to be very doubtful.

Appleton—A thief dug up by the roots six valuable blue spruce trees from the lawn of John Ryan's residence near here. The trees, valued at \$100, were from six to ten years old and were of the type used in landscape decorating.

Eau Claire—Fire caused by the explosion of gasoline used in starting a fire in the kitchen stove resulted in the death of Miss Myrtle Bovee, 27, of Fairchild, near here, and serious injuries to a 14-year-old boy who tried to rescue her.

Ladysmith—Spanish war veterans of Rusks county met here July 4 and organized William H. Sauer camp No. 14, United Spanish War Veterans. Sixteen names were placed on the roll. C. L. Dunn of Glen Flora was chosen commander.

Madison—James E. Harris, 49, for three years United States marshal for the western district of Wisconsin, died at a hospital here. Previous to coming to Madison, Mr. Harris had been division chief of the internal revenue office in La Crosse.

Ladysmith—The Servants of Mary are building a mother house here for the training of young Catholic women for religious work. The excavation was begun last week. The building will cost about \$80,000. It will be of brick and tile construction.

Madison—Enrollment of 140 athletic instructors from all parts of the country has established a new record for the University of Wisconsin summer coaching school, according to announcement here. Sixteen physical education courses are offered.

Whitewater—Daniel S. Ewing, 91, the oldest Civil war veteran in Wisconsin, died while planning his Fourth of July celebration. His family has lived here for five generations. Ewing enlisted in 1862 and served during the war with Company A, First Wisconsin artillery.

Menasha—Menasha merchants, after giving a trial to the program of keeping their stores open Friday night instead of Saturday night, have voted in favor of returning to the Saturday opening. Menasha merchants are still divided, with about half the stores open each night.

Madison—More persons were arrested for violation of the Wisconsin fishing, hunting and trapping laws during the fiscal year 1927-28 than in any previous year. The conservation commission made this report, showing that 1,513 were arrested as compared to 1,178 for 1926-1927. From confiscated goods, sold at public auction, \$14,150.82 was realized.

Eau Claire—The city of Eau Claire and the two national banks here have reached an agreement on a refund of taxes paid in 1923, 1924 and 1925 under the law taxing capital stock of banks, which was declared unconstitutional by the supreme court in the Hartford bank case. The city will pay back 62 per cent of the taxes paid under protest and will retain the balance.

Mount Horeb—A state-wide movement for the making of garden spots at highway junctions was marked by the dedication of an American Legion triangle here. The idea of clothing the triangles with lawn, low shrubs, flowers and trees which do not obstruct the motorist's vision, originated in Mount Horeb about four years ago. Last winter it was indorsed at the road school of the Wisconsin highway commission in Madison.

Milwaukee—Market quotations: Butter—Creamery, fresh extras, tubs, 43c; extra firsts, 41 1/2 @ 42c. Cheese—Twins, 24 @ 24 1/2 c; daisies, 24 @ 24 1/2 c; young Americas, 24 1/2 @ 25c; brick, 23 1/2 @ 24c; limburger, 22 1/2 @ 25c. Eggs—Fresh gathered firsts, 28 @ 29 1/2 c. Poultry—Fowls, 19 @ 24c; springers, 27 @ 38c; old roosters, 17c; turkeys, 22c; ducks, 17 @ 20c; geese, 14 @ 22c. Potatoes—New, bbl., \$1.75 @ 2.25. Barley—Choice to fancy, \$1.08 @ 1.08 1/2; fair to good, \$1.02 @ 1.08. Corn—No. 3 yellow, \$1.05 1/2 @ 1.06; No. 3 white, \$1.06 @ 1.06 1/2. Oats—No. 3 white, 62 @ 70. Rye—No. 2, \$1.24 1/2 @ 1.25. Hogs—Fair to best butchers, \$10.75 @ 11.50; fair to good lights, \$10.50 @ 11.40; pigs, \$9.00 @ 9.00. Cattle—Steers, fair to choice, \$8.50 @ 14.00; heifers, \$7.00 @ 12.00; cows, \$7.50 @ 10.50; calves, \$15.00 @ 16.00. Sheep—Lamb, good to choice, \$15.50 @ 16.50; fair to good, \$13.00 @ 15.00; ewes, \$4.00 @ 7.00.

Cameron—The old creamery building here, in disuse since the new plant was built, has been leased to a St. Paul firm which will operate a poultry and egg shipping business. The produce will be gathered by truck daily and graded at the plant.

Madison—The annual meeting of the Wisconsin tobacco pool will be held in Madison Aug. 14. Precinct meetings will be held Aug. 7 and district gatherings for election of delegates to the Madison session Aug. 11.

Beaver Dam—Max Maier, town of Calumus, was fined \$50 here by Judge John Lyons on charges of violating the game laws by unlawful possession of raccoons out of season. The animals in question were about 6 weeks old and had been on display at a feed store here.

Birchwood—Despite a heavy drop in the price of potatoes this spring, farmers in this region are raising potatoes extensively. Potatoes are the chief cash crop.

SAY MILK CAUSE OF 14 DEATHS; 600 ILL

Entire Massachusetts Town Is Quarantined to Battle Virulent Throat Disease.

Lee, Mass.—With twelve persons dead from a strange, virulent throat disease believed to have originated in infected milk, and more than 600 seriously ill, this town was placed under strict quarantine, and state and local health forces combined their resources in an effort to check the epidemic.

State Health Commissioner Bigelow, acting under the authority of Gov. Alvan Fuller, ordered that public gatherings of every sort be discontinued until further notice; that restaurants close at eight every night, and that funerals of epidemic victims be strictly private. All convalescent cases were ordered to keep off the streets.

Meanwhile, a force of bacteriologists and veterinarians began testing the milk supplies and the dairy cattle in this district in an effort to trace the source of the infection, which is described as a toxic sore throat of a particularly deadly variety. All fresh supplies of milk were ordered pasteurized before being released for sale. To care for the rapidly growing list of victims, the state health department brought eleven physicians from Boston to aid the town's three resident practitioners, and 26 nurses were hurried here to assist the town's one visiting nurse.

La Salle, Ill.—Two sons of Nicholas Conway, a farmer, are dead and four other members of the family are in St. Mary's hospital from drinking milk containing streptococcus infection. Cultures taken from the throats of all the other members of the family of twelve showed that all were affected. The farm was placed under quarantine.

Dr. S. S. Winner of Chicago, state health superintendent for this district, following an investigation, said the bacteria in the milk were transmitted from one or several of the seven cows on the Conway farm. He said the disease caused was similar to diphtheria.

Robert, sixteen-year-old son of Conway, was taken ill on July 30. He died July 5. The next day Boniface, twenty, a student at Notre Dame university, and a candidate for the football squad, was seized and died within 24 hours. Stella, thirty-five, Corinne, twenty-five; Bill, twenty, and Edward, fourteen years old, are the members of the family in the hospital.

Three Rivers, Mich.—Nine Girl Scouts from Oak Park and La Grange are recovering in a hospital here from what physicians called food poisoning. Nineteen were stricken at Lone Tree camp on Long lake, where the Girl Scouts were spending their vacation. None, it was reported, is in a critical condition.

The nine girls in the hospital, their ages ranging from fifteen to seventeen years, are: Katherine List, Dorothy Downs, Jean Duckan and Rose La Bond of Oak Park, and Isabel Kennedy, Laura Smith, Grace Simons, Mary Jane Parks and Kathryn Hoffman of La Grange.

Two Noble Chiefs Die on Ice; Others Near End

Paris.—A dispatch to Le Matin from Virgo Bay, Spitzbergen, says that Natale Ceccione, motor chief of the Italia, has died from injuries received when the dirigible crashed on the ice north of Spitzbergen May 25.

London.—Captain Veglir, left in command of the group of five Italians when Commander Noble was rescued by a Swedish plane several weeks ago, has succumbed to disease and exposure, an Oslo dispatch said.

There is much concern for Captain Sora, who commanded the party of Alpinists making a search on foot over Northeast land for the three members of the Noble expedition who tried to reach North Cape after the dirigible crashed. He got separated from his men and has been missing more than a week.

Efforts to land planes on the floe have been made extremely difficult by the softness of the ice, making it necessary to land only at night when the covering of slush freezes hard.

Commons Is Defied by Archbishop of Canterbury

London.—The archbishop of Canterbury, the Most Rev. Randall Thomas Davidson, who is soon to retire, authorized the use of disputed parts of the new prayer book which parliament refused to accept. The archbishop deplored the rejection of the book by parliament.

Curtis to Hold Senate Seat

Providence, R. I.—Senator Curtis of Kansas, Republican vice presidential nominee, denied that he was preparing to resign from the senate.

Byng to Head London Police

London.—Viscount Byng, the general of Vimy Ridge fame and former governor general of Canada, will be appointed commissioner of the London police next fall to succeed Sir William Horwood, the Home office announced.

Hughes Visits von Hindenburg

Berlin.—President von Hindenburg recently received Charles Evans Hughes, who is now visiting in Berlin.

Keck Wins Salem Auto Race

Salem, N. H.—The 185-mile auto race at Rockingham speedway was won by Ray Keck in 1 hour 21 1/2 minutes. Louis Meyer, winner at Indianapolis on Memorial day, finished fourth.

Argentina May Nationalize Oil

Buenos Aires.—Argentina may nationalize the oil fields after inauguration in October of President Irgoyen, according to political reports here.

GIVES COLLEGE \$1,000,000

Tarrytown, N. Y.—John D. Rockefeller, Jr., has purchased for \$5,000,000 the Pocantico Hills property of St. Joseph's Normal college, conducted by the Christian Brothers, and has given the college \$1,000,000 toward the cost of its removal program. The \$1,000,000 gift to the college was said to be the largest single gift Mr. Rockefeller ever made to Catholicism.

CLAIM OVERTAX IN 101 MILLION SUIT

U. S. Steel and 92 Affiliated Companies Bring Action.

New York.—Asserting they were heavily overassessed in 1917, the United States Steel corporation and 92 affiliated companies have brought suit in the Washington Court of Claims for \$101,589,180 tax refund on their 1917 returns.

In a statement issued here the steel corporation said its federal income and profit taxes for 1917 and 1918 were approximately \$468,000,000, or 8.8 per cent of all corporate income and profits taxes paid in those years.

The refund claim is based almost entirely on alleged errors in figuring the consolidated invested capital of the combined organizations controlled by United States Steel. The parent corporation claims \$1,250,000 and the other corporations claim varying amounts.

"The claims of the corporation and its affiliated corporations for refunds have been pending for some time," the statement issued here said, "and they have been under the consideration of the department of internal revenue."

"Due to the magnitude of the task of auditing the returns, sufficient time to conclude the same has not been available before the expiration of the time limit fixed by the statute of limitations."

"Hence, in order to protect its rights fully, the corporation and its affiliated corporations filed suits in the United States Court of Claims for the refunds they deem lawfully due."

The time limit within which suit might be filed for refunds of overpayments in 1917, the statement said, expired on July 8.

Queen of Dirigibles Is Christened by Germany

Friedrichshafen.—"In memory of my father shall this great airship, that transforms his thought into the deed, bear his name. Good luck to you, Count Zeppelin."

With these words, Countess Brandenstein, daughter of Count Zeppelin, christened the new superdirigible which will carry Germany's blue pennant into the air as the world's largest and fastest airship.

At the same time, two strips of canvas fell from each side of the cigar-shaped hull and revealed the German name "Graf Zeppelin," in large red letters, against the beautiful silver gray of the ship.

Three Big-Ten Stars Sail With U. S. Olympic Team

New York.—Three Big-Ten stars were aboard when the American Olympic team sailed for Amsterdam. They are Frank Cubel, last year captain of the Iowa track and field team, a hurdler and quarter-mile; Bill Drogemuller, who captained Northwestern track and field team last year, pole vaulter, and Charles McGinnis, former Wisconsin star, now of the Chicago Athletic association, pole vaulter and high jumper.

Gypsy King, Wealthy, Dead

Morrisstown, N. J.—Naylor Harrison, king of the Romany gypsies, and reputed millionaire, died of old age in his tent here. He was eighty-five years old.

Guards Save Drifting Ship

Norfolk, Va.—The American steamer Governor John Lind, drifting at sea with her rudder broken, was rescued off Cape Hatteras by the coast guard, which responded to wireless calls for help.

British Labor Joins Capital

London.—British capital and labor conferred and adopted proposals looking toward permanent industrial peace through the creation of a joint national industrial council.

Runs From Snake; Drowns

Millington, Ill.—Alarmed by what appeared to be a water snake, Charles E. Hagen, twenty-three, of Aurora started to run and fell into a water filled sand pit near Millington and was drowned.

Inaugurates Port of Havre

Havre.—President Doumergue inaugurated the vastly enlarged port of Havre which promises to make this city France's most important transatlantic shipping point.

300 LIVES LOST AS TRANSPORT CRASHES

Total Number Dead in Wreck on Chilean Coast in Doubt; Commander Shoots Self.

Santiago, Chile.—Upwards of 300 lives were lost when the army transport Angamos crashed on the rock at Punta Chimpel, near the south Chilean coast town of Lebu, according to the recent checks. The exact number may never be known, as the vessel had made several stops en route and its passenger list had been changed. A large number of political dignitaries, who embarked at Punta Arenas are reported among the dead.

Only four survivors have been found and they tell a terrible tale of a three-hour struggle for life preservers, places in the boats, or even hand holds on bits of floating wreckage which followed the crash.

The ship lost her rudder in a storm. When the commander, Ismael Suarez, found himself unable to prevent the catastrophe, he committed suicide on the bridge by shooting.

Chilean naval vessels and tug summoned by wireless rushed to the scene, but by the time they arrived there was nothing for them to save. Eighty bodies were found on the beach near Coronel.

The transport left Punta Arenas, southernmost city in the world in the straits of Magellan, with 291 persons on board. Of these 215 were crew and 76 passengers. The latter included a number of women and children.

The ship was loaded with coal for Chilean naval vessels in the northern waters and many of the passengers were laborers and their families en route to the nitrate fields in northern Chile. They were traveling at government expense.

Several stops were made en route and while a few of the original passenger list may have departed, it is thought here that additions to the passenger quota brought the total number aboard to more than 300.

For several hours during the storm the Angamos struggled to make headway against wind and wave, but she was badly battered. Then her rudder was smashed and she started to drift toward the breakers and a little later she struck.

With no rescue in sight, attempts were made to launch life boats, but they capsized in the tremendous seas almost as rapidly as they struck the water, and their human freight was tossed on the rocks by the breakers or drawn back into the angry sea.

The vessel filled rapidly and three hours after she struck was virtually buried under the waves. Then she broke in two and the few who remained aboard were thrown into the sea.

The Angamos was built in Scotland in 1890 for the Italian navy and originally was named Clitta di Venezia. During the Chilean revolution in 1891 she was acquired by the revolutionists.

The naval authorities ordered the steamers Lebu and Tome to proceed to the scene of the disaster with doctors, nurses and equipment to resuscitate or otherwise aid survivors if any should be found. Naval and judicial authorities were aboard these vessels.

The Angamos, it was learned, had been loading material for the navy in the Gulf of Arauco and when the storm broke left the bay to ride out the tempest on the open sea. Lieut. Alberto Perez Canto, first officer of the Angamos, who remained ashore when the ship set forth on its ill-omened trip, said the place where the ship was wrecked is the most dangerous spot on the Chilean coast.

\$250,000 Road Pioneer's Gift to Boyhood Home

Fort Madison, Iowa.—An old man's memorial to his boyhood home officially was turned over to the public, when ten miles of paved road, built at a cost of more than \$250,000 by Alexander Coleman, eighty-nine, was officially opened.

The road extends from Hillsboro, Iowa, past the farm where Coleman spent his boyhood, and later will connect with federal highway 181.

Coleman's father settled on the farm in 1836. Alexander helped to hew the original road out of the virgin forest. Coleman is a bachelor.

Dowling, Veteran Actor, Dead

Hollywood, Calif.—Joseph J. Dowling, eighty, veteran stage and screen actor, died at his home here. He was reputed to have been the original "miracle man" in the film production of that name.

Mgr. Schalk Quits White Sox

Chicago.—Ray Schalk resigned as manager of the Chicago White Sox, and was succeeded by R. "Lena" Blackburn, Schalk, star catcher of the Sox, came to the club from Milwaukee in 1912.

Austro-American Pact Signed

Vienna.—Chancellor Seipel and American Ambassador Washburn signed the new Austro-American trade and consular treaty. The last trade pact between the two nations was signed in 1829, and the consular treaty in 1870.

Princeton Gridmen in Camps

Princeton, N. J.—A number of Princeton's "varsity" grid stars this season are keeping fit in athletic, military and industrial camps.

Polish Bride Champ Kisser

Cracow, Poland.—A bride in the Polish hamlet of Tescoo claims the world's kissing championship after kissing 7,001 guests in a period of four hours. She is the daughter of a rabbi.

Heads Delta Gammas

San Diego, Calif.—Mrs. Joseph Halstead, Evanston, Ill., was elected grand president of Delta Gamma society at the national convention in Coronado.

ROADSIDE DRIVER LATEST IN MAINE

Licenses Are to Be Distributed to All School Children in State.

With the front seat and the back seat drivers sending up the auto casualty list in the state of Maine, something had to be done, so now we have the "roadside driver" as a safety measure.

And the roadside drivers of Maine are the children. Before a large group of school children gathered at the office of the secretary of state, Charles and Owen Brewster, young sons of Gov. and Mrs. Ralph O. Brewster, received the first of the many roadside driver's licenses which are to be distributed to all the school children of Maine.

Children's Safety Campaign. With the presentation of these licenses was instituted a children's safety campaign for which the Automobile Legal association has appropriated \$5,000.

The aim is to teach the child self-protection by authorizing him to be responsible for the safety of all automobiles on Maine roads so far as his personal acts shall affect them.

The license bears the state seal and the signature of the secretary of state, and is in the same form as the regular automobile driving licenses, and in addition has the sponsoring seal of the A. L. A.

Child's Pledge.

Below the signature of the secretary of state is the child's pledge, which reads: "I, \_\_\_\_\_, promise to take care of those in my charge, and take care of myself so that pedestrians and automobile riders on the roads of the State of Maine shall not be in any danger because of anything which I do."

The license is to be revoked or suspended by the class teacher of the pupil who is careless or does not keep his pledge.

Dealer Refuses to Sell New Auto to Clemenceau

Georges Clemenceau, the grand old man of Gaul, who uses an automobile instead of the train for traveling about France, tried to buy a new car the other day and couldn't. The company insisted on giving it to him.

For several years the Tiger had traveled about in a big, but old, car. He decided it was about time to get a new model, and went to the sales office to see how much he would be allowed on the old machine.

"Monsieur la President," the sales manager said, "France owes you too much. Let me pay my part of the debt." And he refused to accept a sou from the Tiger.

Clemenceau, on returning to his apartment, sent a check for 10,000 francs—\$400—to the automobile plant to be distributed among workmen whose circumstances were the most needy.

ROCKETS USED TO PROPEL GERMAN

The upper photograph shows the rocket car streaking along the way, Berlin, and the lower one gives a good idea of the car where the rockets are placed.

Vast volumes of smoke and fire shoot out behind the latest experiment in motorless racing automobiles in Germany, called the "rocket" car. Acting Commercial Attache Douglas Miller, Berlin, advises the Detroit office of the Department of Commerce, O. M. Butter, manager of the Detroit district office of the department, calls this latest European experiment in vehicle propulsion to the attention of Michigan automobile manufacturers, says the Detroit News.

The new racing car, which gets its power from a series of 12 smoke-spouting metal tubes in its rear, reached the speed of almost a mile a minute. It is claimed, within 200 feet from a dead start on its first test.

The 12 tubes in the rear of the new car contain rockets which go off one after another and drive it forward, accompanied in the first test, it was said, by tremendous volumes of smoke and fire. First experiments with the new

AUTOMOBILE ITEMS

Hartford automobile dealers plan a city twilight baseball league.

A traffic authority says that accidents occur between 7 and 9 o'clock in the afternoon. It was just after the dusk that

Women motorists of New York city must give exact age when applying for drivers' licenses.

To clean out the carburetor mixture turn the needle-valve clockwise. To enrich it, the auxiliary air valve should be turned similarly.

# Colfax Bookplate

W.K.U. SERVICE.

ER XII—Continued  
Peter, however, with the theory that...

He tossed the paper away, it flew up the aisle, because the elevator came down just then and made a draft.

"And where was Professor Harrington all this time? Come and show us."

Tucker emerged from the history alcove, and walked a few feet up the aisle, on the side of the tables toward the law-book alcove, where he halted, facing toward the front door.

"Was the professor in that position?" demanded Mr. Almy.

"Yes, sir."

"With his back to the law-book alcove?"

"Yes, sir; he was glancing over books on this table."

"How did you see him from that place where you were standing, inside that history alcove?"

"I didn't stay right there all the time," said Tucker.

"Come forward, eh, and looked around the shelves?"

"Looked through 'em; across the tops of those little books," answered Tucker, pointing toward one of the shelves in the history alcove.

"Some one would have seen me if I'd come out far enough to look around the shelves."

"Now, tell me: did the professor do anything, while you were watching, except look at those books?"

"Positively not," answered Tucker.

"He was wrapped up in 'em; he didn't turn his head when the young lady brought the books and the yellow paper; he didn't even seem to notice the clerk. He just stood there reading, until he turned to go down the aisle behind that last shelf."

"Very well," said Mr. Almy. "Go back now, will you, Tucker, to the position you were in in the history alcove. Burton?"

"Yes, sir," said Peter's voice.

## Cobb Greatest of All Time

BILL CARRIGAN, the iron gray haired, keen-eyed, efficient of the Boston Red Sox, doesn't live on a baseball plot, even though he might be accorded some privileges in that respect as the manager of world's championship teams in 1915 and 1916.

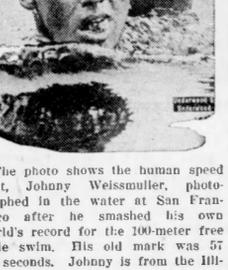

Bill Carrigan.

Bill Carrigan, the iron gray haired, keen-eyed, efficient of the Boston Red Sox, doesn't live on a baseball plot, even though he might be accorded some privileges in that respect as the manager of world's championship teams in 1915 and 1916.

George Hoffman remains as fighter in Olympic boxing championship and America's representative in the heavyweight class for the coming Olympic games, has decided after a talk with Tex Rickard not to turn professional at least until after the Olympics, it was announced by Jacob W. Stumpf, chairman of the Olympic boxing committee and manager of the team.

Human Speed Boat  
The photo shows the human speed boat, Johnny Weissmuller, photographed in the water at San Francisco after he smashed his own world's record for the 100-meter free style swim.

Johnny Weissmuller.

Sport Notes  
Erich Hagenlacher, former holder of the world's 18-2 bailline championship, is now an instructor at one of the billiard academies in New York city.

Russell "Puss" Ralph, forward of Phillips university basketball team for three seasons, will captain the Haymakers during next season's campaign.

Phillips Finley, freshman at Harvard university, is the latest entrant in the ranks of long-hitting golfers. Experts believe he can outdrive any amateur or professional in the country.

Classes in golf instruction are to be a part of the regular physical training work for girls in the University of Texas. Instruction will be given in driving, putting and general tactics of playing.

## LEFTHANDERS CAN TOUCH SOUTHPAWS

Stars of Olden Days Could Hit All Pitching.

This recently introduced baseball practice of switching lineups to put in as many right-hand batters as possible against left-hand pitchers is sheer bunk, if you will believe the old-timers.

The big leaguers of the day of Keeler, Jajoie and Wagner were never switched around, no matter who was pitching, and they hit just as hard and as often as the pampered athletes of today, they'll point out.

Take, for instance, Mike Donlin, who is quoted by Bozeman Bulger in the Farm Journal, Mike, who was about as good as they come when he was a Giant fifteen years ago, thinks the modern ballplayers are suffering from a "southpaw complex."

"You see," says Mike. "We didn't know in the old days that we were supposed to be weak against these cockeys. Most any of these fellows today, I think, could hit left-handed pitching if they hadn't been influenced by foot talk."

Bulger, himself, who has followed the big leagues as a sports writer for more than a generation, declares that "twenty or thirty years ago such a procedure would have been hooted at."

"Most of the managers," he says, "will agree that the belief that a left-hand batter cannot hit a southpaw is largely psychological, but it has become so fixed in the minds of some batters that most all of the clubs are now put to the expense of carrying what are technically known as 'switch hitters.'"

There may be a point of logic, Bulger admits, in the fact that right-hand batters are more effective against southpaws because they do most of their hitting against right-hand pitching. That being the hardest pitching for them to hit, they are consequently more effective against left-handers.

But to offset that argument, his Farm Journal article points out that great players of the Speaker, Cobb, Ruth or Collins caliber, whose presence is necessary to the team on the defensive as well as the offensive, have refused to admit any such weakness and, consequently, have gone ahead hitting left-handers with all the effectiveness that they apply to the right-handed brethren.

Connie Mack's Aids  
One of the best reasons why the Philadelphia Athletics stand in second place in the American league, I said to be because Mr. Connie Mack, one of the oldest managers in the game has three players wearing the ancient regalia and represent ninety-three years of professional baseball.

Dutch Claim Golf  
There are in existence old prints which show that "kolven," as golf was originally called in Holland, was a popular pastime 500 years ago, and the Dutch claim it was they who introduced the "royal and ancient game" into Scotland, where Mary, Queen of Scots, became an adept.

## Remedies Recommended to Cure Noise in Sets

Disturbances in radio sets caused by electrical appliances, and other noises that reflect back into the electric light lines, are attracting the attention of the committee on inductive coordination of the National Electric Light association and the Radio Manufacturers' association.

The committee has brought out two important points that should be given very careful consideration by engineers working on sets to be operated direct from the light socket without intermediate batteries. These problems are fading due to voltage fluctuations, and noise.

The electric light companies are naturally interested in keeping the voltage of their lines as uniform as possible. There is, however, an economic point beyond which it is impractical to go. While the voltage fluctuations often are kept within 3 per cent, they frequently fluctuate 5 per cent. Five per cent is scarcely noticeable at a light socket and accordingly has been taken to represent a good practice.

A radio set operating directly from the light lines must be adapted to a 5 per cent voltage fluctuation from normal. This means that there will be a total swing of 10 per cent. The lighting companies have experienced considerable difficulty in the way of complaints, due to the volume of the set swinging in and out with these minor voltage fluctuations.

With a battery-operated set, disturbances on electric lines get into a radio set only through radiation. When, however, sets are connected directly to the light socket, minor disturbances that will not cause enough radiation to be noticeable may get into the set and cause a bothersome background of noise. This can be taken care of very readily by suitable filter arrangements.

FOR THE NOTEBOOK  
Excessive voltage or defective insulation will cause condensers to break down.

The average radio receiver is used three hours a day, or about 1,000 hours a year.

Light machine oil will remove finger marks from the panel of a receiver and control knobs.

Motorboating is caused by residual ripple in the plate voltage supply.

CHAPTER XIII  
Daylight.

He tossed the paper away, it flew up the aisle, because the elevator came down just then and made a draft.

"And where was Professor Harrington all this time? Come and show us."

Tucker emerged from the history alcove, and walked a few feet up the aisle, on the side of the tables toward the law-book alcove, where he halted, facing toward the front door.

"Was the professor in that position?" demanded Mr. Almy.

"Yes, sir."

"With his back to the law-book alcove?"

"Yes, sir; he was glancing over books on this table."

"How did you see him from that place where you were standing, inside that history alcove?"

"I didn't stay right there all the time," said Tucker.

"Come forward, eh, and looked around the shelves?"

"Looked through 'em; across the tops of those little books," answered Tucker, pointing toward one of the shelves in the history alcove.

"Some one would have seen me if I'd come out far enough to look around the shelves."

"Now, tell me: did the professor do anything, while you were watching, except look at those books?"

"Positively not," answered Tucker.

"He was wrapped up in 'em; he didn't turn his head when the young lady brought the books and the yellow paper; he didn't even seem to notice the clerk. He just stood there reading, until he turned to go down the aisle behind that last shelf."

"Very well," said Mr. Almy. "Go back now, will you, Tucker, to the position you were in in the history alcove. Burton?"

"Yes, sir," said Peter's voice.

## BASEBALL NOTES

Being an umpire must be a soft job. All you have to have is a head harder than a pop bottle.

Frank Crossett, rising young star, playing in the San Francisco Seal's outfit, is only seventeen years old.

Rogers Hornsby, giant outfielder, still carries with him a card of membership in the St. Louis Knottolers' gang. It is dated 1915.

Herman Conrady of Hartsburg, Mo., has been elected captain of the Illinois college baseball team. He is a pitcher and first baseman.

Buck Greene, trainer for the Giants last year, has been signed to play second base for the Eastern (Md.) club of the Eastern Shore league.

Only two pitchers—Urban Shocker and Herman S. Bell—have been able to win two complete nine-inning major league games in one day.

Harvey Pursell, of Phillipsburg, N. J., was elected captain of the Lafayette college baseball team, succeeding Paul Koch of Schuylkill Haven.

Disturbances in radio sets caused by electrical appliances, and other noises that reflect back into the electric light lines, are attracting the attention of the committee on inductive coordination of the National Electric Light association and the Radio Manufacturers' association.

The committee has brought out two important points that should be given very careful consideration by engineers working on sets to be operated direct from the light socket without intermediate batteries.

The electric light companies are naturally interested in keeping the voltage of their lines as uniform as possible. There is, however, an economic point beyond which it is impractical to go.

With a battery-operated set, disturbances on electric lines get into a radio set only through radiation. When, however, sets are connected directly to the light socket, minor disturbances that will not cause enough radiation to be noticeable may get into the set and cause a bothersome background of noise.

FOR THE NOTEBOOK  
Excessive voltage or defective insulation will cause condensers to break down.

The average radio receiver is used three hours a day, or about 1,000 hours a year.

Light machine oil will remove finger marks from the panel of a receiver and control knobs.

Motorboating is caused by residual ripple in the plate voltage supply.

The simplest remedy for fading is to have a variable volume control at the receiving end.

CHAPTER XIII  
Daylight.

He tossed the paper away, it flew up the aisle, because the elevator came down just then and made a draft.

"And where was Professor Harrington all this time? Come and show us."

Tucker emerged from the history alcove, and walked a few feet up the aisle, on the side of the tables toward the law-book alcove, where he halted, facing toward the front door.

"Was the professor in that position?" demanded Mr. Almy.

"Yes, sir."

"With his back to the law-book alcove?"

"Yes, sir; he was glancing over books on this table."

"How did you see him from that place where you were standing, inside that history alcove?"

"I didn't stay right there all the time," said Tucker.

"Come forward, eh, and looked around the shelves?"

"Looked through 'em; across the tops of those little books," answered Tucker, pointing toward one of the shelves in the history alcove.

"Some one would have seen me if I'd come out far enough to look around the shelves."

"Now, tell me: did the professor do anything, while you were watching, except look at those books?"

"Positively not," answered Tucker.

"He was wrapped up in 'em; he didn't turn his head when the young lady brought the books and the yellow paper; he didn't even seem to notice the clerk. He just stood there reading, until he turned to go down the aisle behind that last shelf."

"Very well," said Mr. Almy. "Go back now, will you, Tucker, to the position you were in in the history alcove. Burton?"

"Yes, sir," said Peter's voice.

## Thought for Today

Great culture is often betokened by great simplicity.—Deluz.

He tossed the paper away, it flew up the aisle, because the elevator came down just then and made a draft.

"And where was Professor Harrington all this time? Come and show us."

Tucker emerged from the history alcove, and walked a few feet up the aisle, on the side of the tables toward the law-book alcove, where he halted, facing toward the front door.

"Was the professor in that position?" demanded Mr. Almy.

"Yes, sir."

"With his back to the law-book alcove?"

## Letter Heads!

Did you ever consider your letter-head as your most used card of introduction, Mr. Businessman? The first glance at your firm's stationery establishes the personality of your business in the mind of the recipient. The price of your letter-heads should be the last consideration.

Good paper—well selected type—artistic arrangement—and good printing may be expected when you let us print your letter-heads and other office stationery.

The most of well-printed stationery from our Print Shop is consistently low with the high-class workmanship maintained.

No matter what your printing job may be, we are equipped to give you the best work and prompt service.

### TO HOLDERS OF Third Liberty Loan Bonds

The Treasury offers a new 3 1/2 per cent, 12-15 year Treasury bond in exchange for Third Liberty Loan Bonds. The new bonds will bear interest from July 16, 1928. Interest on Third Liberty Loan Bonds surrendered for exchange will be paid in full to September 15, 1928. Holders should consult their banks at once for further details of this offering.

### Third Liberty Loan Bonds mature on September 15, 1928, and will cease to bear interest on that date.

A. W. MELLON, Secretary of the Treasury.

Washington, July 5, 1928.

### NOTICE TO CREDITORS

WASHINGTON COUNTY COURT—In Probate. In the matter of the Estate of Moritz Rosenheimer, late of the Village of Kewaskum, in said county, deceased. Letters testamentary on said estate having been granted to Lehman F. Rosenheimer, and an order allowing and limiting the time for creditors to present their claims against said estate, and fixing the time and place for examining and adjusting the same having been entered. Notice is hereby given, that creditors are allowed until the first Tuesday in November, 1928, to present their claims against said deceased to this court for examination and allowance, and that said court will on the third Tuesday of November, A. D. 1928, at the probate office in the city of West Bend, in said county, examine and adjust all claims so presented against the said Moritz Rosenheimer, deceased. Dated June 2, nd. A. D. 1928. By the Court, F. W. BUCKLIN, County Judge (First publication June 30, 1928). 3w

## FIRST SHOWING OF FOUR LINES OF NEW CARS

Irresistible feminine appeal has been added to masculine power in The President, The Commander, The Dictator and The Erskine.

**Beauty**—Here are delightful new colors from which to choose—Deskhita, Desurville Sand, Sable, Fawn, Antelope Tan and Dolphin Red—with just a dash of antique cunning in the finish of interior door panels and exterior body belt. Smartest of upholstery fabrics—broadcloth, mohair, whipcord and plush—in harmonizing shades.

**Charm**—Here are alluring new features to increase your pride of possession—handsome winged headlamps—flat radiator cap with the same wing motif—slender, graceful radiator design—all in glistening tarnish-proof chromium—jaunty "polo cap" visor—gleaming

silvered hardware—colorful enyx top for gear lever and horn button.

**Comfort**—Seats of new design—full cushioned, form fitting lounges—steering wheel (adjustable to offset particular needs) responds to your will rather than your muscles—ball-bearing spring shackles give riding ease hitherto unapproached in the most expensive cars—hydraulic shock absorbers—super-brakes which stop the car smoothly, gently in half the distance prescribed as standard.

These are the cars women have been hoping for—spirited, beautiful, safe, comfortable. Worthy to hold every official stamina and speed record for fully equipped stock cars. Luxury and good taste at One-Price prices.

## New President Eight—\$1685 -109 horsepower-80 miles per hour

The President Eight . . . \$1685 to \$2485 The Dictator . . . . . \$1185 to \$1395 The Commander . . . 1435 to 1665 The Erskine . . . . . 835 to 1045

All prices f. o. b. factory

Mr. and Mrs. J. P. Schmitt of Milwaukee, Mr. and Mrs. Maulda Mr. and Mrs. Paul Hagen of Milwaukee, Mr. and Mrs. C. Katzenberger, Mrs. Mike Schmitt of Allenton visited Sunday at the Jos. P. Schmitt home.

## Use Plenty of Boiling Water

Plenty of hot water as near the boiling point as possible should be used in rinsing all milk utensils after they have been thoroughly washed. This is of prime importance and neglect of this more trouble in the handling of milk than any other factor. No matter how sanitary conditions are otherwise, if the milk utensils are not properly sterilized, the bacteria count is certain to be large. The milk off in flavor. Simply pouring the rinse water from one to another should be avoided. Use scalding water in every case. After washing place them where the sun can shine directly into them as sunshine is a cheap and most efficient sterilizer.

## THE KEWASKUM CREAMERY

Wm. B. Wells, Proprietor

### WAUCOUSTA
