

Place for 1932 Olympic Events

The Olympic auditorium at Los Angeles, the building in which the wrestling and boxing events will be staged.

Sport Notes

Bobby Jones won't try again for the British golf titles. There's sportsmanship for you.

Charles Edward Muldaur of Elizabeth, N. J., has been elected captain of the Princeton baseball team for 1931.

Richard (Curly) Harris, coxswain for the last two years, was elected captain of the Washington varsity crew for 1931.

Louis Oberdeck of Edgerton, Wis., was elected captain of the University of Wisconsin crew after the intercollegiate regatta.

A six-day motorcycle race will be held in the Alps from July 29 to August 3. France, Italy and Switzerland will be represented.

Both having won on founts, the next logical match would be between Schmeling and Carnera for the barnyard championship.

Every foot of turf on the old Carter field at Notre Dame university

Ruth Ahead of Record

Babe Ruth is away ahead of his record-breaking schedule of 1927, and is going like a house afire. He is confident he will smash all records this season.

has been ordered transplanted to the new football stadium by Coach Knute Rockne.

Leo Diegel, professional golf champion of the United States, estimates that he has experimented with at least 500 different clubs and rejected all of them.

Ma J. A. M. Wheeler of Raleigh, N. C., who was a catcher for the Buffalo Niagaras during the Civil war era, recently celebrated his eighty-ninth birthday.

The annual intercollegiate rowing race between the McGill university varsity eight and Toronto university will be held October 4 in the Cote St. Paul canal, Montreal.

Donald W. Hankins, a right-handed pitcher, recently made a free agent by the Reading club of the International league, was signed by St. Paul of the American association.

Douglas McWeeney, veteran pitcher of the Cincinnati Reds, who was obtained from the Brooklyn Robins in exchange for Adolph Lague, has been made a free agent by the Reds.

Lew Fosse, Cleveland first baseman who last year led the American league in batting, was sent to California to recuperate after he sustained a broken leg this season.

A year ago Yale and Princeton played a baseball game before a scant few hundred spectators, but this spring a contest between them drew a reported attendance of 10,000.

According to a ruling of the Illinois Supreme court, dog racing is illegal, although the state law permits horse racing. There are five dog tracks in Chicago.

It is estimated that since 1887, when golf was introduced in America, a new convert had been won to the game every 13 minutes and a new golf club organized on an average of every three days.

Pete Bostwick, twenty years old, has been invited to try for a place on the American "Big Four" polo team which will play England in September. Pete started playing at the age of eleven.

Grover Cleveland Alexander, recently released from the big leagues, in 1926 stopped the slugging New York Yankees cold in the final innings of the last game of the 1926 world series to win for the St. Louis Cardinals.

"Old College Try" Not Pleasing to Ivan Olson

Ivan Olson, former shortstop and present coach of the Brooklyn Robins, is one ball player who doesn't think much of "the old college try," although these Dodgers certainly could not be called anything but a hustling ball club these days.

When Ivy, a slender, wiry Swede with a leathery, fighting face, was in there playing the fans used to yell at him, "Take off your corsets, Ivy," whenever he would dash toward a difficult chance and then pull up as soon as he saw that he had no chance to make the play.

Olson would laugh it off. "A sharp ground ball hit over second or to the shortstop's right is a single," he says. "But when he does not try to make an impossible play and leaves it for the outfielder to handle, the fans usually yell at him as though he had set fire to an orphanage."

"There is another way of making the play. The shortstop might run at top speed and throw himself frantically at the ball. Then if the grounder bounces off his head and rolls between the outfielders and a couple of runs score, the fans will lean back and applaud vigorously. 'What a wonderful play,' they'll say, 'He almost got it!'"

Ivy, like most of the other real players of the game, was never a grandstander like that, and that is why he abhors the old college try, which is held in such high repute in some circles.

Penn State's Mark for Sports Year Is .643

Scoring more than five victories in every eight starts, Penn State sports teams wound up a successful year in athletics with the baseball team's defeat of Syracuse in the commencement game. The eleven varsity teams engaged in 85 contests, winning 54 and losing 30. Only one event resulted in a tie, a soccer game with Cornell.

The percentage of victories in total contests, .643, is a decided jump upward from the record made in the preceding year, when only 46 victories were turned in for about the same number of defeats.

Cross country and golf turned in clean slates for the year, the soccer team was undefeated but played a tie game.

The boxing team also won an intercollegiate title after a season in which only one dual meet was lost.

Nine Inning Hurler

Change of scene seems to make a change in many a pitching arm. For example, Charley Ruffing, who lost 22 games for the Red Sox last year, is pitching like a world beater for the Yankees and is one of the few nine-inning pitchers in either league today.

Steffen Calls Football Consistent Foe of Crime

Football was extolled as a preventative of crime by Criminal Court Judge Walter P. Steffen in an address before the Advertising Men's Post of the American Legion at Chicago. The judge is football coach at Carnegie Institute of Technology.

"Young men who come before me in the Criminal court seldom, if ever, played football," said the judge. "They exerted their energy in a different way."

"Playing football requires all your surplus energy and at the same time gives you a clear mind. The cause of crime today is that too many young men have too much energy which they do not know how to exert in the right way."

Can't See at Night

Veterans of baseball who have played in daylight for ten years or more, are finding it rather difficult to adjust themselves to night baseball.

Beans Miner, veteran catcher, quit his job with the Peoria Tractors when it became evident that most of the Three-Eye games were to be played at night. He says he can't see 'em in back of the plate. Miner was returned to the Nashville club. He hit 372 in 22 games here.

NIGHT GAME WAS IDEA OF TRUBY

Independence Millionaire Put Up Money to Back Plan.

Though the claim may be disputed in some quarters, the real father of night baseball is M. L. Truby, millionaire all man, jeweler and president of the Independence club of the Western association.

It was Truby who first put up the money to back the project of installing equipment for floodlights, and thus proved to a doubtful baseball world that the game could be played satisfactorily under the illumination of electric bulbs. The experiment proved to be the stimulant needed to rouse the languishing Independence club from its financial lethargy. In past years the club has been supported by a monthly subscription plan. This year receipts from night baseball have been large enough to support the team and no subscriptions have been necessary, after the first two were paid.

So far this season, and there have been many bad weather breaks, the attendance has far surpassed other seasons and Mr. Truby expects 1930 to be a banner year. He believes that night baseball is no longer an experiment or a novelty, but is a reality, and that another season will see many other clubs, both of A and AA class, following Independence's example.

Although Des Moines of the Western league was really given credit for putting over night baseball, it was in Independence that the first organized game was played.

When they get around to miniature football, in the general craze for that sort of thing, we suppose the Notre Dame eleven can play out the schedule right in their pullman car.

One might not think so to review the comparatively recent epidemic of fouls and foul charges. In a few months the public has paid \$1,318,000 to see the last four big heavyweight fights, all of which involved fouls or foul charges.

Phil Scott won on a foul from Otto von Porat. Gate \$90,000. There was \$200,000 paid at Miami to see Scott claim a foul on the part of Sharkey, and almost get away with it.

More than \$750,000 was paid by fans to see Sharkey lose the title on a foul to Max Schmeling at New York. And about \$180,000 was paid to see Godfrey take the easiest way out against Carnera.

About twice a month we get the idea in our head that a new star named Moody has risen in the tennis firmament, only to read along into the story and discover it is Helen Wills.

The chap who gets up the condensed box scores is in a quandary over young Mr. DesAutels, the Tiger catcher, not knowing whether to try D'T's or D'u'e's.

Goose Goslin, outfielder recently traded by Washington to the St. Louis Browns, had a bonus contract with Washington, calling for a stipulated salary and a certain lump sum at the close of the season, provided his performance was up to a certain standard. St. Louis probably assumed the contract.

Thomas J. Hickey, president of the American association, enthusiastic over night baseball, predicted it soon would be adopted by major and minor leagues alike.

"It looks like a lifesaver for the game in many cities," Hickey said. "I saw my second night game at Indianapolis recently and became more impressed than ever by its possibilities. I regard baseball under lights as an unusual success."

A horse that its owner bought for \$70 has won the Autumn handicap at Auckland, New Zealand, with a purse of \$5,000. An Auckland business man bought the horse, called Nassock, as a back for his young son. As a prank the boy entered the horse in a picnic race and to the surprise of everybody won the event.

Branch Rickey, chief mogul of the St. Louis Cardinal chain, has his eyes on an infielder with Rochester. He says:

"Eddie Delker is the best looking prospect in all our chain clubs. We were offered \$40,000 for him the other day and had we been fixed well at third base would have taken the money, but where could we get a man like him for twice that sum?"

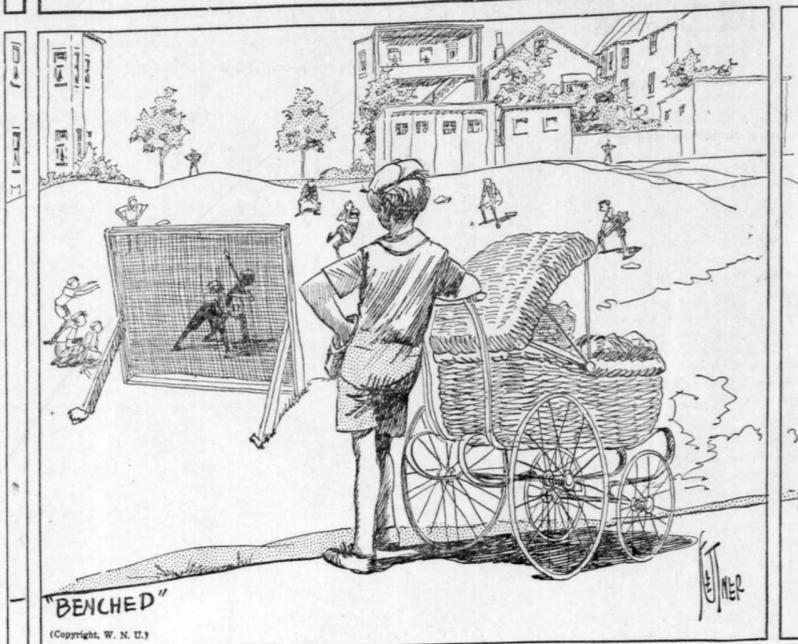

Chuck Klein sees no mystery in his ability to hit the ball over the National league fences. He says: "While in the steel mills in Indianapolis I had to lift and carry large beams. I could hardly make it at first, but I grew stronger, and by the time I was quitting there I could carry one around like a ball bat. That's all there is to it. It stands to reason that a big fellow with the physical power is going to drive a ball farther than a little man."

The Wilmette university football eleven, winners of the 1929 Northwest Conference championship, will meet the Pacific eleven in a night game in the Multnomah stadium, Portland, Ore., November 15. Seven games between various scholastic and collegiate rivals will be played in the stadium. The electric equipment will cost \$10,000 and will be started September 1.

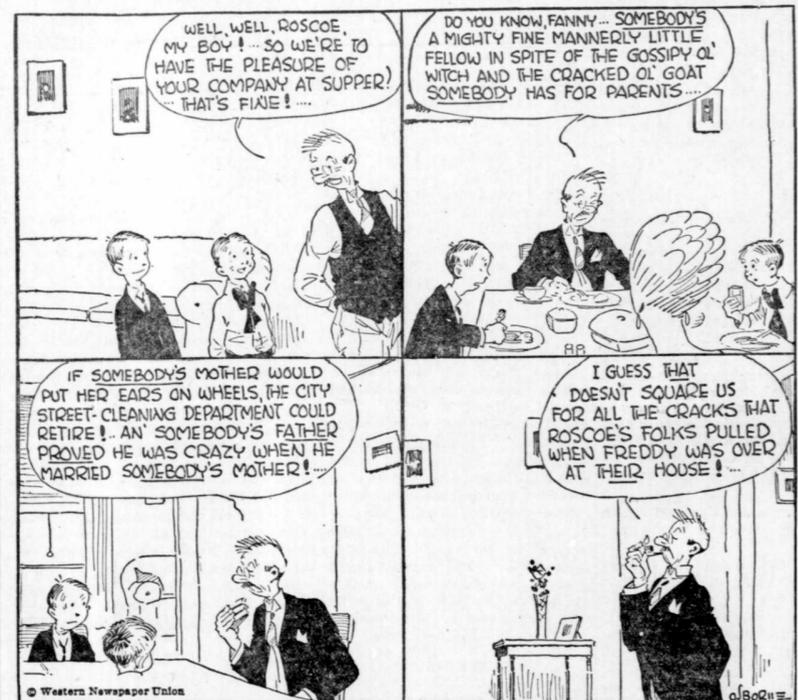

Ladies' days have been so popular in Chicago that President Bill Veck decided to issue tickets several days in advance of each weekly event, in order to avoid the rush made by the fanettes. Then he found he had two weekly rushes—one on the day when the tickets were distributed and the other on the day of the free game. Now he has decided to dispense with the advance tickets and put up with one ladies' day a week in spite of the storm of the fair sex.

Looks Younger Feels Finer

"Eight years ago before my last baby was born, I was taking Lydia E. Pinkham's Vegetable Compound, and such good results that I have her Catherine Lydia. I am six older children and my grandchildren, too. I look but people tell me I look younger. I am now taking Vegetable Compound, and because of my age, I sleep better and I do my housework, and my work will do my best to please."—Mrs. H. D. ...

Lydia E. Pinkham's Vegetable Compound

Closer Culling Low Producers

Three Things to Do to Make All Dairy Herds More Profitable.

(By O. E. Reed, Chief of the Bureau of Dairy Industry, U. S. Department of Agriculture, Washington, D. C.)

There are three things we can do to make our dairy herds more profitable. Call the low producers; feed the others according to what they can produce when well fed; then breed intelligently. Let's consider what we can accomplish by culling the low producing cows from our dairy herds.

Studies, by the bureau of dairy industry, United States Department of Agriculture, of the production, feed cost, and income records of cows on test in dairy herd improvement associations, have shown that the elimination of the lowest producers from the dairy herd not only increases the average production per cow, but always results in increasing the cash income over cost of feed per cow. Therefore, if any dairyman is dissatisfied with the income which he makes over cost of feed, he can always increase that income per cow by culling a little closer.

Surplus of Dairy Products.

At present, when the surplus of dairy products in this country is abnormally high, and when prices are correspondingly low, closer culling is one of the ways of getting better results immediately. Our figures indicate that culling the lowest producing 1 per cent of the dairy cows in this country would not lower the milk and butter fat production as much as 1 per cent; and that culling the lowest producing 10 per cent of our cows would not lower the milk and butter fat production 10 per cent, but only 5 per cent.

Some people say that it is not good logic to blame the low producers when there is a surplus of dairy products in this country. I am not interested in whether it is the low producers or whether it is the high producers that cause the surplus, but I am mightily interested in the fine effect which the culling of the low producers, cows from our dairy herds has upon the pocket-book of the dairy industry.

Family Cow Profitable.

However, not every low producing dairy cow in the United States represents a loss. There are farms where the family cow lives principally on feed that would otherwise be wasted, and she may be cared for by labor that could not earn as much in any other way. We are talking now about the commercial dairy.

In the commercial dairy there seems to be little danger that the culling will be too severe. If all our commercial dairy herds were culled as they should be culled, the production of milk could be so controlled that it could be kept constantly in balance with consumption. That, of course, would be the ideal situation.

However, to bring about such an

ideal state of affairs, the dairyman must have production, feed cost, and income records of his cows. How is he going to get such figures? As far as I know, the most practical way to get such information, at a cost he can afford, is through the work of the Dairy Herd Improvement associations, or similar organizations of dairymen.

Simple Plan to Kill Pests of Squash Vine

If a squash vine withins a few hours, a vine borer has reamed on the stem near the ground. This borer always works near the roots. The best way to control it is to cover about every second joint of each stem as it grows so roots will form at the joints. The vine will live even though the borer does get at the main stem near the first root. This covering should be done now so the vine will have many roots a little later in the season when the borers are the worst.

Sweet Clover Does Not Thrive on Sour Soils

Sweet clover does not grow satisfactorily on sour soils. However, where the soil is sweet, it is possible to get sweet clover to grow by giving it enough lime to get a start. L. W. Kephart, agronomist of the United States Department of Agriculture, has simplified the application of limestone in small quantities with the development of a plan whereby 400 to 500 pounds of hydrated lime is mixed with the inoculated seed for each acre. The mixture is then sown through the fertilizer attachment of a grain drill.

In this way the lime in its finest state is brought into close contact with the seed and becomes immediately available to the seedlings. When the plant is once established its roots go down to the deeper soil where lime is available.

Essential Factors in Production of Alfalfa

Summing up the essential factors in the successful production of alfalfa and sweet clover the following rules are advised by Frank Blecha, extension district leader, Kansas State Agricultural college: Firm seed bed preparation; adapted seed, preferably Kansas common, if this is not available, then a northern seed; sweet soil and sufficient phosphorus content; inoculation of seed; proper seeding date. The best time is between August 15 and 25.

BLACK LOCUST IS PROFITABLE CROP FOR STAKES AND POSTS

Has High Rank as Durable Wood for Use in Ground.

(Prepared by the United States Department of Agriculture.)
Black locust, because of its high rank as a durable wood for use in the ground, is in demand for fence posts, stakes and poles. Says the forest service, United States Department of Agriculture.

Black locust makes rapid growth on good soils and will grow on poor and dry soils. It is easily propagated. In good soils or on regions naturally favorable to the tree, plantings of black locusts have returned substantial net profits in periods of ten to twenty years.

Its strong spreading root system makes black locust a valuable tree for checking soil erosion in gullies and on steep hillsides.

Black locust, however, has a serious enemy known as the locust borer and the menace of this insect should be carefully considered before choosing black locust as a tree to plant, the forest service says. Since the borer is a sun-loving insect, on good soils or in locations of more vigorous growth, where weeds, underbrush, or other trees produce sufficient shade on the trunks of the trees the borer causes little or no injury. No practical control measure for treating infested forest plantations is known.

The increasing scarcity of chestnut for posts, poles, and stakes has done

much to stimulate interest in the possibilities of growing and in the planting of black locust, according to the forest service.

Farmers' Bulletin No. 1628-F, "Growing Black Locust Trees," just issued by the United States Department of Agriculture, contains data on the profitable culture of this species. Single copies may be obtained free from the Office of Information, United States Department of Agriculture, Washington, D. C.

Nitrogen Not Favored for Buckwheat Plant

Buckwheat should be sown on land that is not very rich in available nitrates. This means that the land should not contain much humus or be land where the humus is not in a form to give much available nitrogen, such as a newly plowed sod. On rich land it makes too much growth of tops with a small amount of grain, and also it will keep up a growth too late in the fall to give a good quality of grain.

The buckwheat plant is inclined to bloom for grain while it continues to make growth of tops, or vegetative growth. The seed may be drilled in or broadcasted and harrowed, but drilling is the most satisfactory. It is sown at the rate of about a bushel to five pecks per acre. Buckwheat has no soil building qualities when grown for a grain crop.

Farm Hints

Cover crops planted in the fall can be used for grazing.

It is unwise to sow weeds with one hand and fight them with the other.

Overfeeding not only wastes feed but it may lower production as well.

There were 5,751,000 cases of eggs in storage May compared with 3,952,000 cases a year ago.

Top dressing pastures is especially desirable with a new seeding. When the soil is acid and lime cannot be applied, top dressing may be necessary to insure a stand, especially if clover is included in the seed mixture.

Cutting trees from the farm woodlot that measure 12 inches in diameter at five feet from the ground does not yield a profit, while trees that are 24 inches in diameter yield a profit of about \$10 a tree.

Twist of the Tongue

Mr. Crowe was a devout churchgoer. The young minister of his church was also devout, but easily embarrassed.

Imagine the consternation of Mr. Crowe and the delight of the congregation when the young divine solemnly said at a prayer meeting: "And now, will Brother Pray please crow for us?"

Tractor Cotton Picker Clears Field Quickly

The 1930 season may prove as epochal in the cotton industry as did the invention of the cotton gin by Eli Whitney, according to Wheeler McMillen, agricultural expert, writing in Country Home.

The new development, says McMillen, is the tractor cotton picker, which threatens to do away with negro labor in the fields, which has not been improved upon since the earliest days of cotton in America.

In a test in Kentucky the fastest colored cotton picker known started down a long row and in 2 hours 21 minutes he had picked 45 pounds of cotton, a record in itself. Then the machine started and in two minutes it pulled out of the row to unload 54 pounds of cotton. The machine had gathered more cotton, 70 times as fast as hand labor.

Fifteen such machines will be used in experiments with this year's crop, and, if equal to the test, the whole cotton market may be revolutionized.

Old-Timer Takes Fling at Feminine Reasoning

With the announcement of a woman senator nominated in Illinois, a worried look spread over the countenance of Senator Moses of New Hampshire. "I guess the Old Guard is about licked," he grinned, "because in debate, either domestic or political, you can't beat a woman."

"A constituent of mine has a wife who would make a great congresswoman. She had tackled her husband for a new fur coat."

"But, my gracious," he cried, "I just bought you an elegant, brand-new fox coat last year!"

"New!" shrieked his wife, John Jones, how dare you say it was new? You know very well that the fox had been wearing it for at least six years!"—Los Angeles Times.

English Birth Rate Low

England is still suffering from a dearth of babies. The actual number of births in England and Wales last year was as small as in the year 1800, when the population was only half its present magnitude, according to statistics recently issued by the registrar-general for the year 1929. The rate of 17.8 births a thousand is the lowest reached so far except during the years of the World war. This reduction in births is compensated only to a small extent by the low general death rate of 11.7 a thousand, and the low infant mortality rate of 70 a thousand.

Franklin Wealthy

Benjamin Franklin left an estate of \$150,000, which in those days was a considerable fortune.

Farming is the last occupation that ought to be followed by an irritable man.

In pretending one is not sophisticated, one can overdo that, too.

Constalks as Fuel

Experiments in making fuel gas from constalks indicate that 20 pounds of constalks would yield enough fuel for cooking and heating water to supply the average family each day.

Not Worth the Price

If the diet isn't well planned, it just means spending money for the fun of getting sick.

What is bred in the bone will not come out of the flesh.—DeFoe.

PAINS

No matter how severe, you can always have immediate relief.

Bayer Aspirin stops pain quickly. It does it without any ill effects. Harmless to the heart; harmless to anybody. But it always brings relief. Why suffer?

BAYER ASPIRIN

KWAKDETH!

Astonishing chemical discovery! Absolutely kills quack grass (witch grass). Simply sprinkle on leaves. Not poisonous to soil. Sample gallon one dollar with order. Order today. GUARDIAN CHEMICAL WORKS Lockport, N. Y.

Down, But Not Out

Ruin was a significant word in the old days, but today ruin merely means another start.—Harry Hansen.

How One Woman Lost 20 Pounds of Fat

Lost Her Double Chin Lost Her Prominent Lips Lost Her Sluggishness Gained Physical Vigor Gained in Vivaciousness Gained a Shapely Figure

If you're fat—FIRST remove the cause! KRUSCHEN SALT contains the 6 mineral salts your body organs, glands and nerves must have to function properly.

When your vital organs fail to perform their work correctly—your bowels and kidneys can't throw off that waste material—before you realize it—you're growing hideously fat! Try one half teaspoonful of KRUSCHEN SALT in a glass of hot water every morning—in 3 weeks get on the scales and note how many pounds of fat have vanished.

Notice also that you have gained in energy—your skin is clearer—your eyes sparkle with glorious health—you feel younger in body—keener in mind. KRUSCHEN will give any fat person a joyous surprise.

Get an 85c bottle of KRUSCHEN SALT from any leading druggist anywhere in America, (lasts 4 weeks). If this first bottle doesn't convince you this is the easiest, safest and surest way to lose fat—if you don't feel a superb improvement in health—so gloriously energetic—vigorously alive—your money gladly returned.

Not Worth the Price

If the diet isn't well planned, it just means spending money for the fun of getting sick.

What is bred in the bone will not come out of the flesh.—DeFoe.

Restless Children

Children will fret, often for no apparent reason. But there's always one sure way to comfort a restless, fretful child. Castoria! Harmless as the recipe on the wrapper; mild and bland as its tastes. But its gentle action soothes a youngster more surely than some powerful medicine that is meant for the stronger systems of adults.

That's the beauty of this special children's remedy! It may be given the finest infant—as often as there is any need. In cases of colic, diarrhea, or similar disturbance, it is invaluable. But it has everyday uses all mothers should understand. A coated tongue calls for a few drops to ward off constipation; so does any suggestion of bad breath. Whenever children don't eat well, don't rest well, or have any little upset—this pure vegetable preparation is usually all that's needed to set everything to rights. Genuine Castoria has Chas. H. Fletcher's signature on the wrapper. Doctors prescribe it.

mother secret of easy washdays and whiter clothes

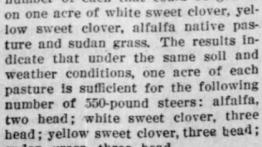

Rinsol was the easiest washday I've had since I've been married. How Rinsol's thick suds soaked out the dirt I didn't need to do a bit of scrubbing or boiling. And just see how white the clothes are!

"No more washboards for me. I'm changing to Rinsol for good."

A real thrift-soap

Rinsol is all you need—even in hardest water. No bar soaps, chips, powders, shampoos. Rinsol gives twice as much suds, cup for cup, as lightweight, sudsed-up soaps. Rich, lasting suds.

And Rinsol is safe for your finest fabrics. Clothes last longer, for they don't need to be scrubbed threadbare.

MILLIONS USE RINSOL

ter Emma and Clarence Vetsch, Mr.
and Mrs. C. W. Hughes attended ser-
vices at Byron Campgrounds Sunday.

Difficult Mountain Pass
The Khyber pass, the most impor-
tant of the passes which lead into In-
dia from Afghanistan, is a narrow
defile winding between cliffs 600 to 1,
000 feet high. At the narrowest part
of the pass it is about 15 feet wide.

What's Next?
"Listen, doc," said the skeptical pa-
tient. "I've had my teeth out and I've
had my tonsils out, so that leaves
you one guess."—Detroit News.

A New McCormick-Deering Binder Cut Your Grain

Instead of losing time trying to make an old binder work another year—instead of risking the life of grain—put a new, improved McCormick-Deering Binder into your fields this season.

The McCormick-Deering— with nearly 100 years experience back of it—has many new features that make it cut grain and tie bundles more efficiently and more accurately than ever before.

It will pay in time, labor, and profits to see one of these binders and put it in your grain fields. Available in 6, 7, and 8-ft. sizes. Let us show it to you.

A. G. KOCH, Inc.
Kewaskum, Wis.

—Judge William Ferber of Campbellsport was a pleasant caller here Wednesday.

—Dr. and Mrs. Leo Brauchle and family spent Saturday and Sunday with relatives at Columbus. They were accompanied there by the Doctor's mother, Mrs. Agnes Brauchle who visited here for a week.

—Mr. and Mrs. William F. Schultz motored to Watertown Monday afternoon, where they visited Mrs. Louis Schaefer at St. Mary's hospital last week Tuesday. Mrs. Schaefer is getting along as well as can be expected.

—Mrs. William F. Schulz daughters Meta and Ada, Mr. and Mrs. Ed. Bruessel and family, Mr. and Mrs. Henry Mueller of Milwaukee and Miss Ida Liebenstein of West Bend attended camp meeting at Camp B, on Sunday.

—Exactly 51 players attended the July session of the Dodge County Skat league held at Mayville Sunday afternoon. At this meeting, Lomira was awarded the next tournament which will be held the first Sunday in August.

Can you afford not to paint now— with these Red Tag Sale prices on Gamble's Guaranteed Paints July 12th thru 26th. House Paint \$2.09 gal., 5 gal. lots. 1/2 inch rope 1 1/2 c ft.—Garden Hoe and Rake 89c each—Header Fork 98c.

—Miss Esther Backus spent Saturday and Sunday with Mrs. R. A. Backus and family in the town of Auburn. On Sunday evening she left for New York, where she will spend several weeks with Mr. and Mrs. B. M. Seymour and family.

—William Windorf and Fred Schaefer of West Bend, spent Saturday and Sunday with Mr. and Mrs. Herman Windorf at Shawano. Mr. Windorf is ill at his home there following a stroke of paralysis which he suffered about a month ago.

—Mrs. Mary Jacobitz, Mrs. William Enderle, Mrs. Amanda Hoff of Lomira, Albert Enderle and wife of Mayville, George Enderle and wife of Theresa left for Winona, Minn., Thursday to attend the funeral of Mrs. Anna Hook, a sister of Mrs. Jacobitz and George Enderle.

—Last Sunday was the coldest July day experienced in Wisconsin in the past 35 years, when the temperature dropped from 98 degrees in the shade on Saturday to 57 on Sunday, or in other words the difference in temperature from Saturday was enough for anyone to wear winter clothes on Sunday to feel comfortable and to keep from becoming chilled.

—Mr. and Mrs. Ed. E. Miller were at Chicago from Sunday until Tuesday. While there Mr. Miller attended a furniture market at which he had an opportunity of buying a large amount of stock for the Miller furniture business at a reduced price, which is now being shipped here daily.

—Mr. and Mrs. Emil Frisch of Los Angeles, Calif., and Mrs. Carl Polzer and children of Milwaukee, visited Mr. and Mrs. William F. Schultz Tuesday.

BROTHER PASTORS SURPRISE REV. VOEKS ON ANNIVERSARY

The Rev. J. C. Voeks, pastor of St. Paul's church of Palatine, Ill., was ordained as a minister 25 years ago, and his congregation arranged a surprise July 9 at which his church was well filled. Sixteen brother pastors and college professors were present and greetings were sent by eight others. The first intimation he had of the gathering was when strains by the school band were heard in the church. The services were in charge of Rev. Ellerbrake of Arlington Heights, and visiting pastors as well as spokesmen for the different organizations of his church paid him tribute. The musical program included two solos by Theophil Voeks, son of the pastor. Rev. Voeks was presented with a purse of gold, the gift of his congregation. Following a short talk by Rev. Voeks, in which he paid tribute to his mother, and after singing the final song the company gathered in the church parlor for refreshments. Dr. Bauer of Elmhurst college was master of ceremonies. Rev. John C. Voeks, son of the late Mr. and Mrs. Fred Voeks, was born at Fredonia, Ozaukee county, and grew to young manhood there. Two of his brothers, Robert and Fred Voeks are residents of Fredonia, and his sister-in-law, Mrs. William Voeks, lives on the old homestead. His wife is Bertha, a daughter of Mr. and Mrs. John Klessig of Kewaskum. He was ordained in 1825 in St. Paul's church Fredonia. After that his first charge was at Perham, Minn., followed by Appleton, Marinette, Wisconsin, Glen Ellyn, and Blue Island, Ill. He has been at Palatine since 1921.—West Bend News.

—Mrs. Mary Jacobitz, Mrs. William Enderle, Mrs. Amanda Hoff of Lomira, Albert Enderle and wife of Mayville, George Enderle and wife of Theresa left for Winona, Minn., Thursday to attend the funeral of Mrs. Anna Hook, a sister of Mrs. Jacobitz and George Enderle.

—Last Sunday was the coldest July day experienced in Wisconsin in the past 35 years, when the temperature dropped from 98 degrees in the shade on Saturday to 57 on Sunday, or in other words the difference in temperature from Saturday was enough for anyone to wear winter clothes on Sunday to feel comfortable and to keep from becoming chilled.

—Mr. and Mrs. Ed. E. Miller were at Chicago from Sunday until Tuesday. While there Mr. Miller attended a furniture market at which he had an opportunity of buying a large amount of stock for the Miller furniture business at a reduced price, which is now being shipped here daily.

—Mr. and Mrs. Emil Frisch of Los Angeles, Calif., and Mrs. Carl Polzer and children of Milwaukee, visited Mr. and Mrs. William F. Schultz Tuesday.

—Ray Perschbacher in company with his brother Dr. Chester Perschbacher of Appleton visited from Friday until Tuesday at Escanaba, Mich.

—Mrs. Charles Pfeifer and daughter Shirley May and Anne Lee are spending the week with Mr. and Mrs. John Andrae and other relatives here.

—Mr. and Mrs. Fred Witzig Sr. of Wauwatosa and Mr. and Mrs. Fred Witzig Jr., of Milwaukee, spent Sunday as guests of Mrs. S. E. Witzig and family.

—Mrs. Fred Backhaus, daughter Delores and son Harvey and wife visited last week Friday with Mr. and Mrs. Elroy Backhaus and family at Oconto.

—Frank Reed of Stevens Point, a former student of the Kewaskum High School, called on old time friends here Monday, while enroute to Milwaukee.

—Mr. and Mrs. Florian Furcht of Chicago arrived here Wednesday for an extended visit with the Roman Smith family and other relatives and friends here.

—Mr. and Mrs. William Guth, Mr. and Mrs. Charles Prost and son Edward, Miss Loretta Pflum and Mr. and Mrs. Chas. Backhaus spent Sunday at Sturgeon Bay.

—The opening day of the Dreher-Honeck Garage and Service Station, Saturday, was most satisfactory to the owners. The dance in the evening was well attended.

—John Hetzel of West Bend, Republican candidate for sheriff of Washington county was a pleasant caller here Monday renewing acquaintance with the voters here.

—Judge Hayden of West Bend, Republican candidate for clerk of circuit court of Washington county, was a caller here Tuesday getting acquainted with the voters here.

—Mr. and Mrs. A. W. Guenther and children, Mrs. Louisa Guenther and Mrs. Ida Doepke of Campbellsport visited Sunday with Mr. and Mrs. Ferd. Raether and other relatives here.

—FREE—Even at our reduced prices—one pair pliers with each Tiger Battery. Red Tag Sale July 12th to 26th. Official Kapok Diamond Ball 69c. Gamble Stores, West Bend, Wis.

—Mr. and Mrs. Harry Ehnert and son Lloyd Ehnert of Milwaukee and Mr. and Mrs. Milton Ehnert made a ten day fishing and sight seeing trip in the western part of Minnesota.

—Mr. and Mrs. William Klabuhn Sr. of West Bend, moved their household furniture into the Adolph Rosenheimer Sr. residence on Second street on Tuesday where they will reside.

—Major Bond, a colored man of Stamford, Conn., claiming to be 115 years old, is the oldest person discovered by the census enumerators.

Wisconsin News Briefly Told

Wausau—Fifty-eight head of cattle were sold by Marathon county farmers last week to Ray Buchanan, Warwick, N. Y. The cattle brought an average of \$115 each.

Wausau—Contracts were awarded here by the Marathon county committee on roads and bridges for the reconstruction of 10 bridges destroyed a month ago by heavy rains. The contracts call for an expenditure of nearly \$25,000. The bridges are on town and county highways.

Fond du Lac—Release by Gov. Kohler of \$139,400 of state emergency funds for the construction of a women's prison unit at the industrial home for women at Taycheedah, near here, will permit the culmination of a plan long urged by prison officials and the state board of control.

Janesville—Cattle from the school for the blind herd captured a number of prizes at the Minot (N. D.) fair last week. A bull calf won the championship award, and another bull calf second prize. The senior yearling bull from the school placed first and the junior yearling placed second.

Sturgeon Bay—Notice of a hearing in the projected removal of farm lands from the city of Sturgeon Bay, to be held in the September session of circuit court, was filed by Judge Henry Graess. A petition bearing 21 signatures representing 489 acres of land within the city limits was presented to the judge asking for separation according to the provisions of the 1929 law.

Park Falls—A tentative tract of 225,000 to 275,000 acres in Price, Sawyer and Ashland counties will be offered to the United States government soon for a federal forest. Supervisors of the three counties at a joint meeting here instructed a committee to select the land and submit it to the government in time for action by the respective boards at the November meetings.

Rhineland—Mrs. Gust Nagel won a jury award of \$9,565.90 against the Oneida county agricultural committee as damages for a fatal shooting of her husband while attending the county fair last summer. Nagel was standing back of a shooting gallery and a bullet went between sheets of iron used as a backdrop and struck him. The court held the committee negligent in not providing adequate safety for fair patrons.

Madison—Cabbage acreage in Wisconsin will be considerably larger this year than a year ago, according to early reports obtained by the crop reporting service of the Wisconsin department of agriculture and markets and the federal department of agriculture. The indications are that the commercial cabbage acreage in Wisconsin will be between 17,000 and 18,000 acres this year as compared with 16,300 acres last year.

Madison—Pasture lands in Wisconsin occupy 8,671,000 acres and farm lands occupy approximately 62 per cent of all the land in the state, according to the Wisconsin and United States departments of agriculture. Of the 35,640,000 acres in the state, 22,000,000 were in farms. Of the 8,671,000 acres of pasture land found by the last census, 1,703,000 or 20 per cent was classed as woodland and about 51 per cent or 4,431,000 acres was classed as woodland pasture. The remaining 29 per cent, or 2,537,000 acres, was classed as other pasture.

Winneconne—Through the co-operation of farmers of this vicinity the Wisconsin Canning Co. this year is conducting an extensive experiment to determine the effect of commercial fertilizer on the yield and quality of canning peas. The project is the largest ever attempted, according to O. P. Cuff, Winneconne county agent, and when completed will give farmers first hand information on the productivity of their soils. About 100 farmers are enlisted in the experiment, which involves the use of 1,300 acres of land and seven carloads of six different kinds of fertilizers.

Madison—Many rare books on bees and beekeeping have arrived at the Wisconsin college of agriculture to become a part of what is already a world famous collection of bee publications. The new library is the collection of 1,467 books formerly owned by Alfred Neighbour of London, England. The library passed into the hands of Col. H. O. Walker, Devon, England, from whom it was purchased, and added to the present Miller memorial library by H. F. Wilson, entomologist at the Wisconsin college of agriculture. Contained in the library are books written in 13 different languages and the publication dates range from 1581 to the present time.

Spooner—Methodists of Spooner and Shell Lake will be hosts Aug. 26 to 31 to the West Wisconsin conference of the Methodist Episcopal church. The visiting ministers and their wives will be given lodgings without charge by householders of the two places and meetings will be held in the Spooner Methodist church.

Shawano—The North Wisconsin district of the Walther league, Lutheran organization, will hold its eleventh annual convention Aug. 2 and 3 in Shawano.

Madison—Release of \$204,408 by the state emergency board for erection, improvement, and equipment of state buildings and for care of inmates in state institutions has been announced by Gov. Walter J. Kohler. The largest item in the funds released was \$332,500 for construction of a heating plant and a new gymnasium at the Milwaukee state teachers' college.

Milwaukee—The Wisconsin athletic commission netted the state \$10,500 during the fiscal year ending June 30, according to announcement here.

New London—A safe containing \$800 in cash and 50 coupon books was stolen from the Wadhams oil station here. The door window was broken and the door was unlocked from the inside.

Madison—Completion of its distribution of more than a million trout to rearing ponds maintained by sportsmen's groups throughout the state was announced by the Wisconsin conservation commission. Brook trout were supplied to northern counties and brown trout in the south.

Oconto—A move was made before the Oconto county board of supervisors in session here to sell about \$240,000 worth of delinquent tax certificates at face value without interest. The gesture was turned down on the argument it was an inducement for property owners to let their taxes become delinquent.

Janesville—Margaret Roehl, 10, unable to swim a stroke, saved Mrs. Edward Splinter, her aunt, from drowning. While fishing from a boat in Lake Koshkonong, Mrs. Splinter caught a fish hook in her hand, fainted, and toppled into the water. Margaret jumped into the lake, grasped her aunt's clothes and clung to the boat with her free arm. Fishermen heard the girl's screams for help and went to the rescue.

Madison—Four women are in the race for seats in the next session of the Wisconsin legislature. One of them, Mrs. Mary Kryszak, Milwaukee, served in the 1929 session and is a candidate for re-election. Another, Miss Helen F. Thompson, Park Falls, was a member of the 1925 and 1927 sessions. The new candidates are Mrs. E. Charbonneau, Superior, and Mrs. M. Sanborn, Eagle River. All are candidates for the assembly.

Ashland—Guilty of game law violation on four counts was the verdict of a municipal court jury here in the case against L. E. Stabrow, commissioned state predatory animal trapper, and A. A. P. Hubing, licensed fur farm operator near Mellen. The four charges include possession of a beaver carcass out of season, setting traps within 500 feet of a beaver house, trapping beaver during the closed season and transporting the carcass of a beaver illegally.

Madison—Great increase in the number of federal court criminal cases coupled with a proportionate increase in cases involving prohibition law violations was reported for the western Wisconsin district at the office of Clerk of Court H. C. Hale. During the year ending June 30 some 617 criminal cases were commenced, 608 of them involving the prohibition law. For the preceding 12-month period 333 criminal cases were started, 311 of them involving prohibition violations.

Appleton—Traffic on the Fox river and Lake Winnebago is on the increase, according to the monthly report of A. F. Everett, government engineer. There was a marked increase in navigation on the river during the last month compared to June, 1929. The locks between De Pere on the lower river and Portage on the upper river were opened 2,551 times, allowing 27,244 tons of freight and 724 passengers to pass through. The most freight was hauled on boats operating between De Pere and the mills at Kimberly. Most of the freight was coal and mill supplies.

Madison—More than \$500,000 has been expended since Jan. 1, 1930, for the construction of school buildings in 28 Wisconsin counties, according to H. W. Schmidt, supervisor of buildings, department of public instruction. Forty-three new buildings have been constructed and two additions have been built. The largest single expenditure, \$95,000, went to the construction of a school at Phelps in Vilas county. Marathon county thus far has benefited most in the number of buildings constructed. One addition has been constructed to the Wausau school and three buildings have gone up at Frankfort, Wausau and Harrison. The total was \$50,500. According to the department of public instruction, the building program will continue throughout the summer and into the fall.

Milwaukee—Market quotations: Butter—Creamery fresh extras, 34c; standard, 34c. Cheese—Twins, 16c; daisies, 16 1/2c; longhorns, 16 1/2c; brick, 16 1/2c; limburger, 19 1/2c. Eggs—Fresh gathered firsts, 17 1/2c. Poultry—Live hens, 17 1/2c; old roosters, 15c; broilers, 18 1/2c; ducks, 14 1/2c; geese, 12c; turkeys, 18 1/2c. Potatoes—New, cwt., \$1.00 to 1.15. Barley—Choice to fancy, 57 1/2c; fair to good, 51 1/2c. Corn—No. 2 yellow, 78 1/2c; No. 3 white, 81 1/2c; No. 2 oats, 31 1/2c. Hogs—Fair to good butchers, \$8.75 to \$9.50; fair to good lights, \$9.00 to \$9.75; pigs, \$8.00 to \$9.00. Cattle—Steers, fair to choice, \$9.00 to \$12.00; heifers, \$8.00 to \$11.00; cows, \$5.00 to \$7.50; calves, \$12.50 to \$13.50. Sheep—Spring lambs, good to choice, \$10.50 to \$11.00; fair to good, \$9.50 to \$10.25; ewes, \$2.00 to \$3.00.

Madison—Theft of 2,041 automobiles in Wisconsin has been reported to the state license bureau since Jan. 1, 1927, and 1,500 of these machines have been recovered by their owners. These records do not include cars stolen and recovered within a month's time.

Camp Douglas—Five members of the Wisconsin National guard camped here for the annual field camp of instruction were stunned when lightning hit near where they were seeking shelter from rain during the usual morning drill.

Madison—Planting of a carload of adult bluegills in Dane county lakes the last week and plans for planting in the lakes of Racine, Waukesha and other southern counties were announced by the state conservation commission. The bluegills came from the Woodruff state fish hatchery on Bass lake.

Stevens Point—Unusually favorable bids received in the job of paving highway 68 northeast of Stevens Point will result in construction of about eight miles instead of 6.5 as specified.

DEMAND FARM BOARD HALT WHEAT CRISIS

President Urged to Direct Pool to Buy Grain.

Washington.—The wheat market crisis was carried directly to President Hoover in the form of a request by Senator Henry J. Allen, Republican, Kansas, that the federal farm board be directed to buy 100,000,000 bushels of grain and hold it off the market to force prices up.

President Hoover took the request under consideration, but little hope was entertained that he would act as Mr. Allen urged. He is expected to take the position that the administration of farm relief is in the hands of the federal farm board and that he will stand by decisions of the board.

In view of the fact that Alexander Legge, chairman of the board, already has refused to authorize the Grain Stabilization corporation to purchase over 25,000,000 bushels, there was scant hope that the President would be disposed to consider a request that the government buy four times that amount.

Senator Arthur Capper, Republican, also of Kansas, addressed a similar request to the President despite the fact that Senator Allen received slight encouragement. Senator Allen discussed the situation with the President on the three-hour motor trip with Mr. Hoover from his Virginia fishing camp to the Capital.

President Hoover is expected to make an announcement on the situation within a few days. In well-informed quarters, however, it is expected that he will support the policy of Mr. Legge and Arthur M. Hyde, secretary of agriculture. Mr. Legge and Mr. Hyde recently completed a speaking tour of the grain-growing states, in which they urged reduction of acreage as the solution for the over-production problem and the price declines it entails.

In addition to Senators Allen and Capper, other Republican leaders from the farm belt are understood to be urging the President to authorize the farm board to spend \$100,000,000 to force wheat prices back to a figure which will give the farmer a profit for the present crop.

The present price, about 69 cents a bushel in the field, is declared to be less than the cost of production. Failure of the farm board to act to prevent such a situation has brought protests from some of the strongest Republican states of the wheat belt.

The farm board already is holding in storage about 60,000,000 bushels of last year's crop for which it paid approximately \$1.15 a bushel in an effort to halt the first drop. The Grain Stabilization corporation sold a few days ago 2,264,000 bushels of this wheat at 78 cents a bushel, taking a loss of approximately 37 cents a bushel.

Kansas farmers, who are in the midst of marketing their 1930 crops, are particularly vehement in their protests, charging that the sale of the farm board wheat contributed materially to the sudden drop in prices. Wheat was recently selling at the lowest level it reached in 17 years.

Bobby Jones, Golf Star, Wins His Twelfth Crown

Minneapolis, Minn.—Bobby Jones won the National Open golf championship for the fourth time by coming from behind with an amazing 68 and following up with a 75 for a 72 hole total of 287.

A wild roar rose from 12,000 spectators who were swarming over the lawns and fairways of the Interlachen Country club as he sank a 35-foot putt for a birdie on the last green.

Pressing close behind him came forty-two-year-old MacDonald Smith, who got home with a 70 for a total of 280. Then followed Horton Smith, 292; Harry Cooper, 293, and Johnny Golden, 294.

Bobby now has won twelve major golf titles. He has taken the United States Open and amateur four times each, the British open three times, and the British amateur once.

Only once before in the history of the National open has any one made a lower score than Bobby made. Chick Evans did this in 1916 at Minikabha, where he shot a 286.

Says Canadian '30 Grain Carryover Will Be Less

Winnipeg, Man.—Carryover of grain in Canada should be less in 1930 than for previous years, in opinion of George Melvor, general manager of the Canadian wheat pool at Winnipeg. He would make no estimate of the probable decrease, but mentioned that what is moving steadily with 7,000,000 bushels weekly leaving North America, of which the bulk is Canadian wheat. The western Canada crop is spotty, he believes, although conditions in Manitoba are encouraging.

Sir A. Conan Doyle Dead

London.—As the result of heart disease with which he was stricken seriously ill about two months ago, Sir Arthur Conan Doyle, seventy-one, creator of Sherlock Holmes and widely known spiritualist, died at his home here.

Coed Leaps to Death From Plane

Lincoln, Neb.—Miss Alberta Brinkhoff, twenty-one, University of Nebraska senior, jumped to her death from an airplane near here.

Rewards Prison Firefighters

Frankfort, Ky.—Gov. Flem D. Sampson commuted sentences of 121 prisoners who aided in fighting fire in the reformatory July 2 and recommended for parole all whose prison records justified.

Pleasure Boat Sinks; 4 Drowned

Green Bay, Wis.—Four lives were lost when a motorboat carrying 12 children and adults, celebrating a birthday party, foundered and sank off Point Comfort.

JARDINE ENVOY TO EGYPT

William M. Jardine.

Washington.—William M. Jardine of Manhattan, Kan., President Coolidge's secretary of agriculture, will be made the American minister to Egypt, it was learned at the White House.

An expert agronomist, Mr. Jardine was a lecturer and author on agriculture, and from 1918 to 1925 was president of the Kansas State Agricultural college. President Coolidge appointed him to his cabinet March 4, 1925. Born in Utah 51 years ago, Mr. Jardine was connected with the agricultural colleges of the state and Michigan before he became president of the Kansas institution.

DRY LAW COST FOUR MILLION MORE IN '29

Association Against Prohibition Filed Report.

Washington.—Prohibition cost Uncle Sam's taxpayers \$4,000,000 more for enforcement last year than in 1928, the Association Against Prohibition Amendment announced a few days ago.

The report said: "Prohibition costs terminated in the federal courts have risen in this year from 40,748 to 56,455, thereby considerably increasing the prohibition expenses of the Department of Justice, which are estimated at \$13,000,000 for the last year.

"Recorded expenditures of the prohibition unit amounting to \$12,720,140, and \$15,110,530 spent by the coast guard in this one year, with approximately \$5,000,000 representing the part played by the customs service, are included in the 1929 prohibition enforcement costs, from which \$5,474,467 collected in fines is deducted. The increase in last year's bill for prohibition enforcement is \$4,002,725 over this cost in the previous year.

"Due to increase in population, the carefully estimated loss of federal revenue in 1929 is now placed at \$869,507,697, some \$20,000,000 over the sum arrived at for 1928. No estimate of increase in the loss of state, city and county revenues has been made.

"Last year's total loss due to prohibition to everybody in this country is \$699,872,878, after adding to enforcement costs the lost revenue to federal, state and local treasuries.

"The research department of the Association Against Prohibition Amendment is preparing to compute the people's bill for prohibition during the present year, as official figures are made available."

Gallant Fox and Sande Win Classic by Neck

Chicago.—Gallant Fox and Earl Sande raced on toward the three-year-old championship before a crowd of 50,000 over the Arlington race course here.

This unbeaten combination got a neck decision over Gallant Knight after a desperate head and head battle down the stretch. Ned O. was third, six lengths back of the two leaders.

Thus the finish of the Kentucky Derby of last May was repeated and Gallant Fox's record is unblemished. He was making the sixth start of his three-year-old campaign, and it was the sixth victory. His share of the Classic pot of gold was \$64,750.

In the betting Gallant Fox was one of the shortest priced favorites of the season. He paid \$2.64 to win, \$2.38 to place, and \$2.20 to show. Gallant Knight to place was \$2.84, and to show \$2.38. Ned O. had been backed stoutly and paid \$2.44 to show.

Want Highway Man in Cabinet

Oklahoma City.—The United States Good Roads association adopted a resolution recommending that congress create the cabinet post of secretary of highways.

Denies Mooney Pardon

Los Angeles.—Gov. C. C. Young refused to grant a pardon to Thomas Mooney, radical who was convicted of complicity in the Preparedness day bomb explosion in San Francisco in 1916.

Morrow Campaign Cost \$49,571

Trenton, N. J.—Dwight W. Morrow, Republican senate nominee, spent \$49,571.54 in his primary campaign, a statement filed with the secretary of state showed.

Yanks Lose in Lottery Swindle

Havana, Cuba.—The Diario de la Marina, Spanish language newspaper, reports that its investigators have uncovered a huge lottery ticket swindle in which thousands of Americans have been duped.

State to Pay \$12,000,000 for Aged

New York.—Under the old age pension law, New York state will, beginning January 1, pay about \$12,000,000 a year for destitute aged persons. The law provides for pensions up to \$400.

GERMAN MINE BLAST KILLS 162 WORKMEN

Worst Gas Disaster in History of the Country.

Neurode, Germany.—A death list of 162 miners is reported in Wenceslas coal mine, where the worst gas disaster in the history of German mining occurred.

With 92 dead recovered, those in charge of the rescue crews held out but scant hope for the 70 men imprisoned in the gas-filled shafts. Rescuers found the dead miners still with tools in their hands and wagon men beside their wagons.

The work of recovering the bodies was made extremely difficult because many were covered by a layer of coal dust six feet deep. Most of them were at a spot almost a mile from the shaft's entrance. To aid in finding the bodies, one of the rescued miners was taken down into the pit in order to give the exact location where several parties had worked. When he reached the scene of the explosion he suffered a nervous collapse and had to be carried out.

Swiftly spreading lethal gas, the ever-lurking enemy of this Silesian mining district, also hampered the rescuing work.

The death-dealing gas was not only swift but incredibly silent in its rushing conquest of the mine. The only man who was near enough to hear and see what happened at first could not make anybody believe that anything was wrong, for the mine sounded normal and the machinery in the gassed portions was running as usual.

The periodical gas survey had been completed only a few days before. The engineers thought they had solved the problem of guarding against gas fumes. The last accident of note in this mine dated back to 1928, when eight miners perished.

The recent explosion occurred when a large gas pocket was tapped during blasting. The fumes spread so rapidly that only 49 of the 211 miners in the shafts were rescued alive.

Berlin.—President von Hindenburg telegraphed the governor of Silesia his deep regrets for the Wenceslas mine disaster, expressing profound sympathy to relatives of the victims. He also sent \$2,500 as the first contribution to a relief fund. The Prussian government contributed \$25,000.

Freight Rates Revised; Increase Ry. Earnings

Washington.—Plans for a general revision of classified freight rate schedules in the northeastern quarter of the United States and in western trunk line territory reaching from Lake Michigan to the Rocky mountains and from Kansas to the Canadian border, were announced by the Interstate Commerce commission.

Several months will be allowed for preparation of the new rate systems prescribed.

In the West the commission said the probable effect of the new schedules would be to increase earnings of the railroads concerned by about \$12,000,000 per year, though farm products were excluded from the rate increases permitted.

One of the prime objects of the double revision is to equalize classified freight charges over all the territory treated. The chief method of accomplishing this is the promulgation of mileage scales applying generally between all points.

68,186 Arrested, 24,373 Stills Taken in Year

Washington.—Prohibition enforcement during the last fiscal year of its operation under the treasury resulted in the arrest of 68,186 persons and seizure of 24,373 stills.

The arrests showed an increase of approximately 2,000 over the 1929 fiscal year and of approximately 7,000 in the number of stills seized. The 1930 figures included the number of arrests and seizures for 11 months of the year and estimated arrests and seizures for June.

These statistics were prepared by the old prohibition bureau which operated under Prohibition Commissioner Doran until the Department of Justice took over prohibition enforcement on July 1 and showed that about 1,320,000 gallons of spirits and 8,000,000 gallons of malt liquor had been seized. In addition agents of the bureau seized 8,778 automobiles.

Put Drought Damage at Million

Charleston, W. Va.—John W. Smith, state commissioner of agriculture, estimated that crop damage from prolonged drought in West Virginia would approximate \$1,000,000.

Kohler Signs Road Contracts

Madison, Wis.—Gov. Walter J. Kohler has announced the signing of Wisconsin highway contracts involving a total of \$303,944.

Couple Elopes in Plane

Minneapolis, Minn.—An airplane elopement with the marriage ceremony performed 5,000 feet in the air over Sioux Falls, S. D., was revealed here by Fred Vikengstad, Minneapolis, and Mrs. Marjorie Henderson, the bride.

Plan Memorial to Diaz

Naples, Italy.—This city has decided to erect a monument to Marshal Armando Diaz, Italy's commander in chief during her successful period in the World war.

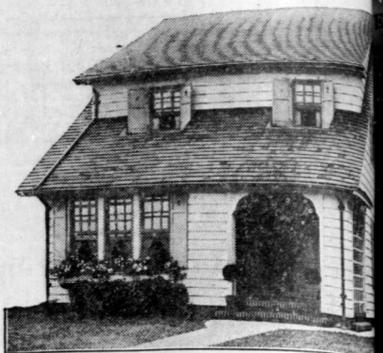

Order Schmeling to Rest

Berlin.—Max Schmeling, who won the world's heavyweight championship from Jack Sharkey on a foul last month, was ordered by physicians to rest for two or three months before again going into training.

Gives \$1,000,000 for Employees

Philadelphia.—The Drueding Brothers company announced that \$1,000,000 had been set aside to provide a home and a hospital for aged andiling employees of its leather factory here.

Attractive Small Cottage That Typifies the Real Spirit

Here is a little cottage which seems to typify the story-and-a-half construction has been designed to produce a ward appearance and the interior will be found equally satisfactory.

By W. A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF COST on all subjects pertaining to practical home building, for the readers of this paper. On account of his wide experience as editor, author and manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 407 South Dearborn Street, Chicago, Ill., and only inclose two-cent stamp for reply.

Where your house is to be built is almost as important as building it. The particular size of lot, with the particular frontage or natural advantages which you want may not be available to you for several reasons. The kind of neighborhood, the distance from transportation, the conditions as regards paving, sewer, gas and electricity, etc., are some of the things that will govern your selection of a home site. So we say pick out the place you want to build before you attempt to choose a house plan.

Having done that and with the lot in mind, try to find a house that will

Termites

The wise homeowner today will endeavor to make his home really what he really wants a home. He may avoid the danger of a pest which enters away inside the walls and eats away insidiously in billions of the tiny insects.

wracking, disturbed her mood. She glanced rather helplessly around the lighted car, and her eyes encountered those of the good looking young man across the aisle, who at that moment chanced to be looking toward her. Across the tall backs of sections all through the coach other inquiring faces peered, most of them stupid and anxious. The possibility of an accident had aroused every one from the languor of dullness that belonged to such a day.

"What is it?" Linda asked, speaking quite naturally to the young man, who seemed to have absorbed all the intelligence of all the passengers. "Have we run into a wall or a ditch?"

He smiled, appreciating her coolness when the other women were already beginning to flutter.

"One or both," he answered easily. "I'm afraid we've met the Waterloo of trains passing through Nebraska in January. A snowdrift can be a wall and a ditch as well." He had the pleasantest smile. It crinkled his eyes at the corners and they smiled, too. Nice brown eyes that had a remarkably straight look about them. "I'll go and see," he said, and swung off down the aisle after the other men who were pushing one another in the passage.

Linda leaned back and waited. She was a seasoned traveler and knew that fretting got no one anywhere. So be-

hose entrancing three-piece bouclé tuit! Of course the woman who is assembling a wardrobe of swanky clothes will never think of passing up as fascinating a proposition as these knitted fantasies. Assuming that you have grown wise as to the importance of white for this summer, we suggest that one of the number of sports costumes which you hope to acquire be a three-piece all-white bouclé. You will fall in love with the blouse (worn over or as a tuck-in) which is included in these knitted tris—sheer and lacy as can be. To wear with this you are perfectly justified in choosing white hat, white footwear, gloves, a boutonniere of white violets, and a pocketbook also all white. It's a white season!

Of course if you yearn for color, then decide upon one of the adorable

So About Knowing How It Came About Anstey Found Himself Sitting Beside the Beautiful Young Woman

cause the delay was hateful and menacing she let a pleasant thought of her neighbor ripple across her mind.

A boy—a charming boy. Men had their place in her life—a large place—as they must have in the life of any beautiful woman, but she had formed curious little fancies about them. She saw all men as seekers of prey—sleek animals, well fed and beautiful; shaggy, and horrible—reptilian! She and her kind were always prey, of course. She thought of these things as natural and unavoidable.

But the boy was different. He had made no gesture of joining her, even after she had spoken first. He had seemed almost afraid to look at her. She was thrilled and a little sorry for him, knowing what must happen when he did look.

He returned almost at once. "It is a drift," he said, pausing beside her. "A whooper. It's bad news, but I'm afraid we are stuck here for a few hours."

Linda lifted her brows slowly. No young man could be expected to guess what this meant to her. His casual tone treated the whole occurrence as a light adventure. But if she was a day late, if she missed the Gregsons and their nice invitation to Miami—if they went on without her. Her manner gave no hint of this perturbation. She merely sank deeper into the comfort of her fur coat, as if she already sensed coming discomfort from chilly cars and insufficient food.

Linda Roth had learned to look at men. She knew already that this one was the right sort. She could spend a bored half hour talking to him and save herself at least from tiresome thoughts. So without knowing how it came about Brian Anstey found himself sitting beside the beautiful young woman, who smelled faintly of spring flowers, in spite of the snow.

Keeping Up With the Neighbors

It's the modern wear and tear and strain that is causing so many sudden deaths from heart ailments, physicians have discovered, and usually it's nothing more than the strain of keeping up with the neighbors.—Charlotte News.

held Sacred by Hopi Tribe of Indians

answered when very often in the progress of the dance showers come up. Many times the spectators get a good drenching before they can get down off the mesa or even descend from the roofs of the houses from which they have witnessed the ceremony.—L. C. R. Marshall in Dumb Animals.

Liberty Cap

In early Roman times, only freemen were permitted to wear caps. When a slave was manumitted, a small cap, usually of red felt, was placed on his head, and his name was registered in the city books. Several Roman commanders hoisted such caps on spears to indicate that all slaves who joined them should be free; and when Caesar was murdered, the conspirators marched forth in a body, with a cap elevated on a spear, in token of liberty.

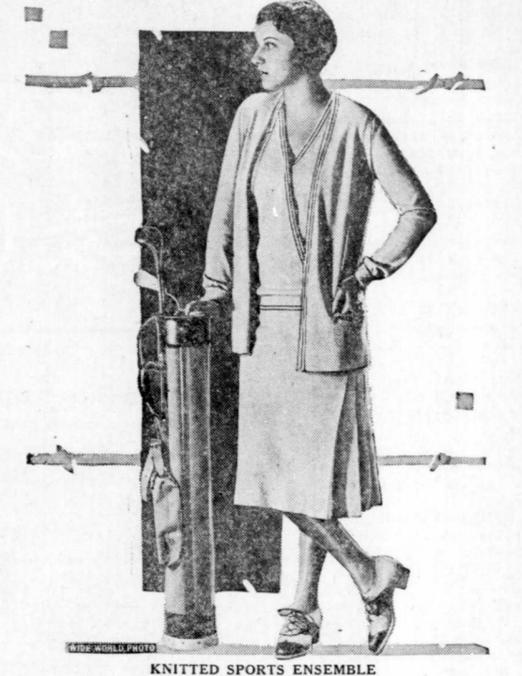

In the French revolution, the liberty cap was adopted by the revolutionists as a badge of their freedom.

KNITTED ENSEMBLES FOR SPORTS; AFTERNOON FROCK IS IMPORTANT

SPORTSWOMEN who know fashion turn to the knitted ensemble as the costume ideal to wear when "playing the game." Incomparable, for four and travel wear is the general verdict in regard to knitted apparel.

As to accounting for the increasing favor expressed for knitted fashions, knitted wear is itself its own best "reason why." The record of achievement during the past several years in the knitted industry reads like a fairy tale. Perfectly amazing things have been accomplished in the way of daintiness, lightweightness, colorfulness and "style."

Those lacy frocks, for instance, filmy as a cobweb, which are being featured this year in the sports collections are actually knitted. And

KNITTED SPORTS ENSEMBLE

uniformed? We believe the answer is unanimously in the affirmative, or rather the negative—we were not!

To improve the point that all this is changed the illustration below shows a charmingly informal afternoon frock of embroidered tulle cotton. It looks, as it should, according to the present call of the mode, decidedly afternoonish. One would never play tennis in such feminine attire, but it or drink at a summer luncheon in it; or drink iced tea at five o'clock. One would sit on the country club porch playing bridge of a warm afternoon, but one would never play golf in it.

All of which goes to show that the clothes question is anything but a "happy-go-lucky" proposition this season. It requires intelligent study as to the appropriateness of things. The new rules are really quite arbitrary—

AN AFTERNOON FROCK

pastel shades for the knitted three-piece, pale blue if you have been reading up on French preferences, or delicate pink if it's more becoming. However, see to it that all the accessories are white, for again let us remind you—it's a white season!

However all's not white and pastel tinted that's knitted. Just the thing for the day on the links is a rich green or radiant brown three-piece fashioned after the manner of the model in upper picture. The sleeveless jumper, with its surplice fastenings, is the very essence of chic. If you are fond of circular skirts, many of the latest models are indicating the higher waistline and the tapering silhouette.

Notwithstanding some few objections voiced at the outset of this new regime, women are completely won over to this order of things which calls for "perfectly darling" summer frocks made picturesquely instead of "sportsy" of loveless materials, chief among which are handsome all-over embroidered effects.

JULIA BOTTOMLEY,
(©, 1930, Western Newspaper Union.)

Give Slimness and Height

It is the ambition of the fashionable London women to be very tall and slim and she achieves this by an even-minded frock which trails the floor all round and a cape trailing from her shoulders in back. These lines give her slimness and height.

Black Straw Hat

No combination of colors is smarter and it is most attractive when it appears in printed frocks of chiffon or crepe, with black backgrounds and pale pink designs.

The Kitchen Cabinet

(©, 1930, Western Newspaper Union.)

"Now is the time, ah friend, to scatter loving smiles and words of cheer To those around whose lives are now so dear They may not meet you in the coming year Now is the time."

THIS AND THAT

The warmer the day the more delightful and refreshing does a cold dish taste—be it punch, salad fruit or ice cream.

Cucumber Salad Relish.—Dissolve one package of lemon gelatin in one cupful of boiling water, add one-half cupful each of cold water and vinegar, one-half teaspoonful of salt, one-fourth teaspoonful of pepper, a bit of green coloring if desired; chill. When cool and slightly thickened, add two cupfuls of finely chopped cucumber and one onion also chopped, drain well to remove the excess of moisture, mix well and turn into molds. Chill until firm. Serve as a salad with mayonnaise or as a relish with fish.

Pineapple Orange Sponge.—Take one package of orange gelatin, one cupful each of boiling water and pineapple juice. Add the boiling water, and when the gelatin is dissolved add the pineapple juice. Chill, and when slightly thickened beat with a rotary beater until like whipped cream. Fold in one cupful of shredded pineapple well drained. Turn into molds and chill until firm.

Iced coffee has much to recommend it. It is easy to make, is always ready; it is commonly used, costs little and is almost universally well liked. Serve it with cream and sugar as if it were hot, or with neither, when so desired.

Orange Cream Sherbet.—Soak a teaspoonful of gelatin in one-half cupful of cold water five minutes. Dissolve in one and one-half cupfuls of boiling water. Add one and one-half cupfuls of sugar, the grated rind of two oranges, one and one-half cupfuls of orange juice and one cupful of lemon juice. Cool and freeze to a mush. Beat one pint of cream, add one-half cupful of sugar, one-fourth teaspoonful of salt. Beat two egg yolks and two whites until stiff, add the yolks to the cream, fold in the whites. Turn into the orange mixture and continue freezing.

Pineapple Julep.—Chop a bunch of fresh mint leaves to make one-half cupful add one-half cupful of powdered sugar and rub well together. Add one-fourth cupful of lime juice and three cupfuls of ice water. Let stand for an hour in the ice chest. Add ice cubes and serve with a sprig of fresh mint. Sweeten with the strained juice from a can of crushed pineapple.

Grape Juice Punch.—Take a pint of grape juice, the juice of an orange and lemon, and enough sugar syrup to sweeten. Chill and serve with ice cubes.

Palatable Puddings

During the warm months more delicate puddings of fruit and eggs in the form of soufflés are much enjoyed.

Lemon Soufflé.—Beat the yolks of four eggs until thick and lemon colored; add one cupful of sugar very slowly and continue beating, then add the grated rind and juice of a lemon. Cut and fold in the whites of four eggs beaten stiff and turn into a buttered baking dish; set in a pan of hot water. Bake 35 minutes. Serve without sauce.

Spanish Soufflé.—Melt one-fourth of a cupful of butter, add one-half cupful of stale bread crumbs, cook until slightly browned, stirring often; add one cupful of milk, two tablespoonsful of sugar, cook 20 minutes in a double boiler; remove from the fire, add the unbeaten yolks of three eggs and cut and fold in the stiffly-beaten whites. Add flavor and bake as any soufflé.

Steamed Blueberry Pudding.—Mix and sift together two cupfuls of flour, four teaspoonfuls of baking powder, and one-half teaspoonful of salt. Add one cupful each of milk and blueberries rolled in flour, turn into a buttered mold and steam one and one-half hours. Serve with a creamy sauce or sugar and cream.

Graham Pudding.—Melt one-fourth of a cupful of butter, add one-half cupful of molasses, one-half cupful of milk and a well-beaten egg. Mix together one and one-half cupfuls of graham flour, one-half teaspoonful of soda, one teaspoonful of salt, and one cupful of seeded raisins cut fine. Turn into a buttered mold, cover and steam two and one-half hours. Serve with any fruit sauce. Dates or figs may be used in place of the raisins for variety.

A sauce to serve on angel food makes a most tasty pudding prepared thus: Cream one-third of a cupful of butter, add one cupful of powdered sugar very slowly, one egg white beaten stiff and two-thirds of a cupful of mashed strawberries. Beat until well blended then add with whipped cream for a garnish.

Simple Insurance Method

In Germany there is a slot machine for selling insurance. A traveler may insure himself for one or two days for from 2 1/2 to 12 cents. When he receives his accident policy, in the form of a card, the apparatus receives an imprint of his thumb.

Shark By-Products

After a shark has been skinned, something like twenty by-products are obtained from the carcass, including glue, pigments, polishing materials, animal fodder and fertilizers.

PROVISIONS FOR WEEK-END TRIP

Everybody Enjoys Outings Which Are Inexpensive.

(Prepared by the United States Department of Agriculture.)

There is now one motor vehicle for every five persons in the United States, according to the United States bureau of public roads, or one for every family. There is no doubt but that a great number of families of moderate means who would not have dreamed of taking frequent week-end outings a few years ago are now able to enjoy the possession of a car and the opportunity to use it for recreation in the open air.

Considerable distance may be covered in a Saturday-noon to Sunday-night trip, or more leisurely driving to favorite nearby picnic or camping grounds may be preferred. From the mother's point of view such outings are a blessed release from the former drudgery of Sunday spent cooking and clearing up the biggest dinner of the whole week. Everybody enjoys them, and with a little planning they may be both easy and inexpensive.

Keeping Quality Important.

In planning what food must be carried, as three or four meals will probably be eaten on the road, the prime consideration is the keeping quality. Unless some sort of traveling refrigerator is taken along, it is best to select for the second day's meals foods that do not require icing to be palatable or safe to eat. A small camp

An electric icebox hooked up to the back of a car to preserve foods while on outing trips.

cooking kit is a very satisfactory part of the week-end equipment. It should include a frying pan and a saucepan, a coffee or tea pot, and some plates and cups suitable for serving hot foods and beverages.

For the first picnic supper one may choose among the entire range of fresh cooked meats or chicken, or if the weather is cool, bring hamburger patties or chops to broil over the camp fire. Salad ingredients like tomatoes, lettuce, celery and cucumber may be carried, to be put together when wanted, or potato salad made at home and brought in a glass jar or cardboard carton. Except for tomatoes and cucumbers, which keep well because of their skins, none of these foods should be planned for the second day. The more perishable fruits, such as berries, cherries, fresh pineapple cut up and put in a glass jar, or fresh apple sauce, are best the first day. Hot coffee and ice cold milk may be brought from home in thermos bottles. If lemon juice is squeezed and sweetened ready for mixing into lemonade it will be a refreshing beverage to serve. If sandwiches are wanted, have them the first day. Loaf cake, cup cakes and cookies all travel well, especially if put in a tight tin box.

Camp Fire Dinner.

For a camp fire dinner the second day, the bureau of home economics suggests frizzled dried beef and scrambled eggs. Both the "makers" for this dish can be safely transported without ice. Let the boys of the family help to cook this dish. With it have tomatoes or cucumbers, and buns, either plain or toasted, as they will not dry out as much as loaf

Exhaust Fights Fog

Discovery has been made to combat the heavy fog of London, England, with hot air produced by the exhaust of motor vehicles. It is sprayed in front of the machine instead of behind, to create a rising current of warm air just ahead of the front wheels. According to the inventor of the device, this rising current lifts the fog for about 10 feet ahead quickly enough to permit a safe forward speed of about 15 miles per hour.

Slow-moving elephants traveling the highways in India have caused many accidents at night. This has been remedied by an edict which forces all elephants to carry tall lights.

bread. Fruit for dessert on the second day may be oranges or whole pineapple, cut up in sections when wanted. Some of the cake from the day before may be left.

A good hot dish for supper the second day will appeal to everybody. A vegetable chowder may be made of potatoes, bacon, or salt pork, canned or dried milk, onion, and celery if possible. Or one of the excellent canned chowders, reheated on the spot, may be depended on, with crackers as the breadstuff. Cheese may be served at this meal, with the crackers, and marmalade or jam. Bottled grape juice will be good for a fruit drink the second day.

In the picnic kit, in addition to whatever cooking utensils are liked, one might keep permanently a bottle opener, can opener, bread knife, table knives, forks, spoons; plates and cups of metal, or paper; paper napkins and waxed lunch paper; salt, pepper, loaf sugar, a small can of evaporated milk—and a box of matches for the camp fire.

THE MOTOR QUIZ

How Many Can You Answer?

Q. Why is it customary in the Philippines to hire chauffeurs?

A. The operator of a motor vehicle which injures a pedestrian is subject to arrest and imprisonment until he can prove that he is blameless. For this reason most of the car owners employ a chauffeur.

Q. What is the motor vehicle registration of the Philippines?

A. Approximately 29,000.

Q. How many cars are registered in Canada?

A. 1,076,819 or one car to every nine persons.

Q. What effect is produced by "choking" the carburetor?

A. Pulling out the "choke" causes a raw mixture of gasoline to be drawn into the engine, which fires readily in cold engines. Excessive use of the "choke" causes fuel waste, sooting, oil dilution, fouled spark plugs and irregular running of the engine. When the "choke" is used properly, according to the instruction book, and the spark plugs are in good condition, starting should not be difficult even in the coldest weather.

Belgium to Start Eight Production This Year

Production of new eight-cylinder cars in Belgium is expected to start, in quantity, during the current year, according to a report received and issued by the automotive division of the Department of Commerce. This shows that production in Belgium during the past year was 6,000 passenger cars and 1,000 trucks. There was a considerable increase in the number of six-cylinder cars at the expense of four-cylinder cars. The new models of Minerva eight-cylinder cars are expected to reach quantity production during the current year.

AUTOMOBILE NOTES

A young hitch-hiker in the neighborhood reported a lame shoulder, after the week-end, from swinging a thumb over it.

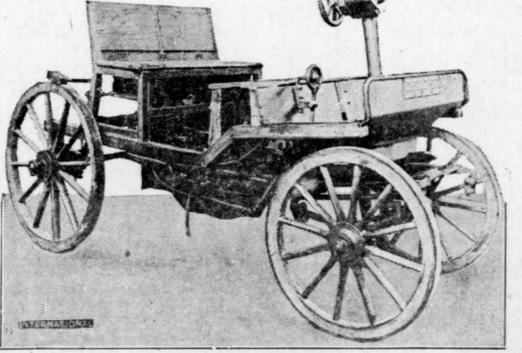

"Let me see something that's gone 187,000 miles," said a college boy to the man on a used car lot. "I haven't the time to break one in."

With these automobiles that get up to 240 miles an hour, we assume you jog along at a nominal 100-mile gait, the first 500, to get them properly broken in.

A Wisconsin lad completed a high school course in a year by doing everything four times as fast as usual. This would require driving the coupe 280 miles an hour.

Another rather jolly impasse is when a local driver, accustomed to making inside left turns, meets a visiting motorist who is equally accustomed to the outside type.

ONE OF FIRST BUILT AUTOMOBILE MODELS

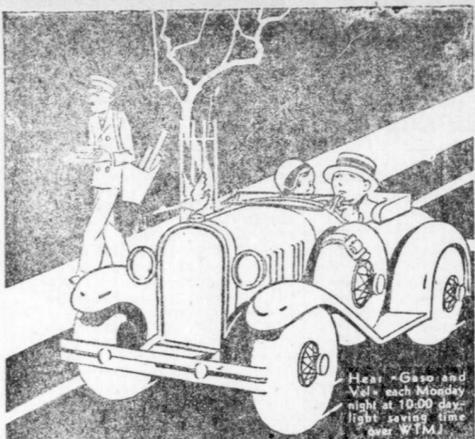

This truck-like vehicle, now carefully preserved in the Vienna Technical museum, was one of the earliest models built by Siegfried Marcus, first to use a gasoline-driven motor in an automobile. It was constructed in 1857. Note the rear wheel brakes and the de luxe shock absorbers.

Exhaust Fights Fog

Discovery has been made to combat the heavy fog of London, England, with hot air produced by the exhaust of motor vehicles. It is sprayed in front of the machine instead of behind, to create a rising current of warm air just ahead of the front wheels. According to the inventor of the device, this rising current lifts the fog for about 10 feet ahead quickly enough to permit a safe forward speed of about 15 miles per hour.

Slow-moving elephants traveling the highways in India have caused many accidents at night. This has been remedied by an edict which forces all elephants to carry tall lights.

An Ode to the Mailman

According to Gaso's latest report, Val claims there are a whole lot of people who think what the country really needs is a **POST NO BILLS** sign on every mail box. There's one way to keep out the repair bills anyway, and that is to use **Gasoneil and Val's Oils**. Wise motorists have already discovered this idea.

WAUCOUSTA

Louis Buslaff made a business trip to Kewaskum Saturday.
Miss Marcella Wachs spent Wednesday at Fond du Lac.
Miss Bertha Fisk of Chicago is visiting relatives here this week.
Edmond Buslaff of Kewaskum visited Saturday evening at his home here.
Mr. and Mrs. F. S. Burnett and son Howard spent Sunday with friends at Plymouth.
Mrs. Henry Wachs and son Lawrence of Fond du Lac spent Friday with relatives here.
Mrs. Mary Krenzer of Milwaukee is visiting at the home of Mr. and Mrs. H. Ringhand this week.
William Wachs and daughter Marcella, Mr. and Mrs. Ernst Hezler and daughters Clara and Margaret spent Monday at Milwaukee.
Mr. and Mrs. E. Ford and daughter Vera and Mrs. F. Buslaff and son Walter attended the funeral of John Polzean which was held at Campbellsport Tuesday.
Mr. and Mrs. Adolph Pipper of Brownsville, Mr. and Mrs. August Wachs of here and Miss Bertha Fisk of Chicago spent Sunday at the John Roehu home at Forest.

COUNTY LINE

Jac Berres is spending a few weeks with Mr. and Mrs. Steve Ketter and family.
Lawrence Stange of Milwaukee visited with his parents, Mr. and Mrs. August Stange.
Buick Builds an "8" that's a radio wave on wheels. On display July 26, Rex Garage, Kewaskum.
Mr. and Mrs. Herman Gessner and family spent Saturday with Mr. and Mrs. Julius Gessner and son.
Mrs. John Gatzke, who is ill, is staying a few weeks with her sister, Mrs. Henry Schultz and family.
Mr. and Mrs. Otto Hinn and family spent Sunday with Mr. and Mrs. Otto Lohse and family at Manitowoc.
Mr. and Mrs. Steve Klein and family spent Sunday with Mr. and Mrs. Art. Janz and family near West Bend.
Mr. and Mrs. Arno Stahl and son, Mr. and Mrs. Steve Ketter and family spent Sunday with Mr. and Mrs. Hy. Ketter and family near Four Corners.
The following surprised Theresa Klein on her birthday, Sunday, July 6th: Mr. and Mrs. Bill Smiths and daughter Jeanette, Mr. and Mrs. Geo. Normand and son Jerome, Mr. and Mrs. Simon Perreling and daughters Margaret Maria and Junite and sons Simon and Charley and lady friend Helen Fener, Mrs. Nick Mueller and Adeline, Verona, Jake and Reinhard Mueller, Norbert Esselman, all of Port Washington, Alice Klein of Sheboygan, Mr. and Mrs. Art. Janz and family and Verona Klein of West Bend. On their departure they wished her many more happy birthdays.

FOUR CORNERS

Tony Blake spent Saturday at the William Strupp home.
Mrs. M. Weessler and son Anthony were Milwaukee callers Friday.
John Opperman was a caller at the William Klubahn Jr., home Friday.
Mrs. Mary Ketter spent Saturday afternoon with relatives at Campbellsport.
Mrs. M. Weessler and son Anthony spent Saturday afternoon with Mr. and Mrs. Alvin Seefeldt.
Buick Builds an "8" that's a radio wave on wheels. On display July 26, Rex Garage, Kewaskum.
Mr. and Mrs. Louis Butzke and family spent Monday with Mr. and Mrs. Albert Butzke and family.
Mr. and Mrs. Nelson of Kenosha are spending the week with Mr. and Mrs. Roy Ours and family.
Mr. and Mrs. Henry Butzke and family spent Friday afternoon with Mr. and Mrs. Eddie Flitter at West Bend.
Mr. and Mrs. William Klubahn Jr., attended the wedding of Mr. Klubahn's cousin, Esther Spranger at Sheboygan Saturday.
Mr. and Mrs. M. Weessler and daughter Elizabeth and Mrs. Julia Miller spent Sunday with Mrs. Bettendorf and son Jake near Decada.
Mr. and Mrs. Ed. Schultz of Van Dyne, Mr. and Mrs. William Schultz and family of Cascade, Mr. and Mrs. Arnold Miske and family of Beechwood and Mr. and Mrs. William Hiptz and family spent Sunday evening with Mr. and Mrs. Charles Schultz.

Heads the B.P.O.E.

RELIABILITY ECONOMY GOOD PERFORMANCE

THE NEW FORD TUDOR SEDAN

YOU are buying proved performance when you buy a Ford. You know it has been built for many thousands of miles of satisfactory, economical service.

Letters from users in every part of the world show the value of the sound design of the car, good materials and accuracy in manufacturing. You sense a feeling of sincere pride in the oft-repeated phrase—"Let me tell you what my new Ford did."

Further tribute to the sturdiness, reliability and general all-round performance of the new Ford is shown in the repeated and growing purchases by government bureaus, by police departments, and by large industrial companies which keep careful day-by-day cost records. In most cases, the new Ford has been chosen only after exhaustive tests covering speed and power, safety, comfort, ease of control, oil and gas

consumption, low yearly depreciation, and low cost of up-keep.

They have found, as you will find, that the Ford embodies every feature you want or need in a motor car at an unusually low price.
