

Oscar M. Stern Is Found Dead

The body of Oscar M. Stern, 42, of route 2, Campbellsport, near New Prospect, was found in a cedar swamp near Moon lake at noon last Thursday, Sept. 23. He had been missing for two days. The body was discovered by Alex Geier, who is employed in that community. Mr. Stern died on Tuesday, Sept. 21.

Deceased was born on June 17, 1895, in the town of Wayne. He was married to Miss Esther Marquardt on Sept. 4, 1918, at Dundee, who predeceased him on April 1, 1921. No children were born to the couple.

Survivors include his parents, Mr. and Mrs. August Stern of New Prospect, five sisters, Mrs. Fred Marquardt, Mrs. Arnold Butzke, Mrs. Ed. Koepke, Mrs. William Schulz and Mrs. John Schulz, and four brothers, Clarence, George, Louis and Otto Stern.

Burial services were held at 2 p. m. on Saturday, Sept. 25, at the home of Mr. Stern's parents. Interment took place in the New Prospect cemetery.

NEWLYWEDS AT HOME

Mr. and Mrs. John Coulter are now at home on the former's farm at St. Killian after returning from their wedding trip through northern Wisconsin and Canada. The bride is the former Miss Dorothy Funk, daughter of John Funk of Fond du Lac, and the bridegroom is a son of Mrs. Henry Foerster of St. Killian. The couple was married on Sept. 10 at the home of the bride's father in Fond du Lac.

CARD OF THANKS

We wish to express our sincere thanks to our relatives and friends for their kindness in our bereavement, the sad loss of our beloved son and brother, Oscar Stern, the palbearers, for the beautiful floral offerings received, the funeral directors, E. Miller and sons, and to all that assisted in any way.

Mr. and Mrs. August Stern and family.

FIRE AT DUNDEE DOES LITTLE DAMAGE

The kitchen of the John Waranus residence and tavern at Dundee caught fire from an oil stove at about 3 p. m. last Thursday afternoon and the Campbellsport Volunteer Fire department was called to the scene. The blaze was extinguished with very little damage being done to the building.

DINNER AND FALL FESTIVAL

The Married Ladies' sodality of St. Killian's congregation is sponsoring a chicken dinner and fall festival to be held in the auditorium on Sunday, October 3. Bingo and other amusements. There will be a card party in the evening. Don't forget to set this day aside and go to St. Killian.

DANCE AT ST. MICHAELS

A grand harvest dance will be held in St. Michael's hall, St. Michaels, on Friday evening, Oct. 1. Music furnished by Jack Thell and his WIDU favorites. Admission 25c per person.—A. Theusch.

Former Resident of Village Dies at Waupun

John Mathieu, 77, a former resident of this village and vicinity, died in Waupun at 3:45 p. m. Wednesday, Sept. 27.

Mr. Mathieu was born at South Elmore on Feb. 12, 1860. At that time the place was known as French Corners. He was married to Miss Elizabeth Weller of Milwaukee in 1894. She predeceased him on Feb. 24, 1899.

Mr. Mathieu was a painter by trade when he resided in the home now owned by Mrs. Heise on East Main street in this village many years ago. He was a music lover and was very capable with a violin which he played since childhood. He is very well known by the older residents of Kewaskum and vicinity.

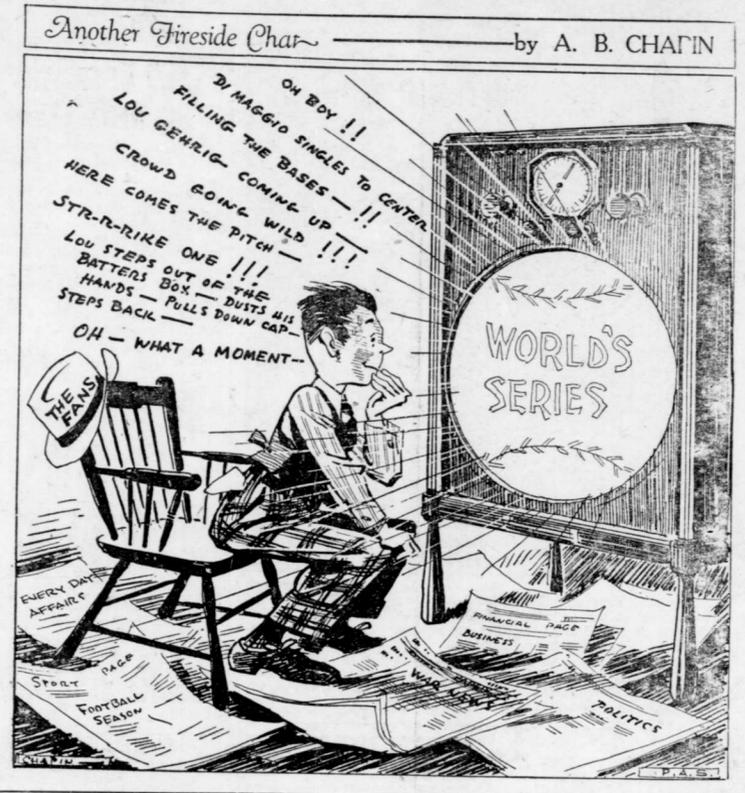

APPROACHING MARRIAGE

The approaching marriage of Miss Beatrice Susan Dworschak, daughter of Mr. and Mrs. Theodore Dworschak of New Fane, to George P. Hennes of Chicago was announced for the second time last Sunday in Holy Trinity church. The wedding will take place on Tuesday, Oct. 5.

NOTICE TO HUNTERS

We are now in a position to issue hunting licenses. We also have a complete line of ammunition, shells and guns for the hunters.

H. W. Ramthun & Son

Anchor Rope Drags Man To Death In Lake Bernice

A Milwaukee man was drowned in Lake Bernice (formerly Schrauth's pond), several miles northwest of Kewaskum on Tuesday of this week when dragged from a boat by the anchor rope.

Alvin Sacker, 26, Port Washington rd., the dead man, had come to fish in Lake Bernice. With his father-in-law, William Joglover, 3322 N. Buffum street, Sacker towed 30 feet from shore. When they tossed out the anchor the rope caught Sacker's leg, pulling him overboard. Neither man could swim. Mr. Joglover, however, was able to reach shore and call help.

The body has been recovered.

Mrs. Katherine Rimmel Dies at Campbellsport

The venerable Mrs. Katherine Rimmel, 79, widow of the late John Rimmel, and relative of several local residents, died at 10:15 a. m. last Friday, September 24, at the home of her sister, Mrs. Martha Campbell, in Campbellsport. She had been ill for five months.

Born March 6, 1858, in Dungannon, Ohio, she moved to this vicinity with her parents, Jacob and Katherine Schiek, when a child. She was married June 24, 1907, to John Rimmel, who died January 7, 1933.

Surviving are two sisters, Mrs. Campbell of Campbellsport and Mrs. Elizabeth McGilligan of Appleton and several nieces and nephews.

The body lay in state at the Berge funeral home in Campbellsport, where funeral services were held at 8:30 a. m. Monday and at 9 a. m. from St. Matthew's church in Campbellsport. Rev. A. Biver officiated and burial took place in the church cemetery.

Among those attending the funeral were the following from this village: Mr. and Mrs. Louis Bath, the Misses Helen and Mary Rimmel and Mrs. Don Harbeck.

CLERK ATTENDS HEARING

Carl F. Schaefer, village clerk, attended a hearing at Madison Thursday in which the Greyhound Line appealed to the Interstate Commerce commission for permission to sell tickets at local stops on its lines in the state to points outside the state. With one or two exceptions, such permission is not now granted them. Otto B. Graf, local agent, is not now allowed to sell tickets for interstate travel.

ENROLLS AT INSTITUTE

Joe Miller, who has enrolled at the Wisconsin Institute of Mortuary Science, Milwaukee, left Monday to start his studies. Joe already has had four years of experience in funeral service work under his brother, Edw. E. Miller, and when he completes his course of studies next summer and writes for his license, he will be a full-fledged embalmer and will continue in this work with Miller's funeral home. We wish Joe success.

SEEKS CITIZENSHIP

Among four applicants from Washington county for United States citizenship papers who will enter into circuit court on Oct. 18 for the hearing of their final petition is Herman Vollmer, Kewaskum.

KOHLER WINS BADGER STATE LEAGUE TITLE

Kohler defeated Fond du Lac in the latter city last Sunday before 5,000 fans by a score of 6 to 4 in the Badger State league playoff to win the championship.

Hill, started on the mound for Kohler, lasted three innings and was then replaced by Ninneman, who held the Fond du Lac team to three hits in the last six innings while his mates were pasting the offerings of Spangie for nine to win the game.

Spangie, Fond du Lac righthander, was effective throughout most of the game, but three hits bunched in the fourth, sixth and ninth, innings won the game for the model city team.

Richter, Kohler's right fielder, was the hero for his team when he made a spectacular catch of Malson's drive into deep center field with two on base.

Pfister, Kohler's second sacker, was the star at the plate for the winners, getting three hits in four trips, while Kronforst got two hits in as many trips for the Fond du Lac team.

Final standings in the Badger circuit show Kohler winning first place, Fond du Lac second, and Kewaskum third. Without the split season and playoffs Kewaskum would have won the championship, as the local team won the most games for the entire season with 14 victories and 6 defeats. Kohler won 13 and lost 7 while Fond du Lac had 12 and 8. Kewaskum was tied with Kohler and Grafton in the first half and with Fond du Lac in the second half. Then Fond du Lac beat Kewaskum in the first playoff game, 8 to 7, Sunday before last to put the locals out of the running. The split season robbed Kewaskum of the championship. Let's hope it will be abolished next year as it is unfair to the strongest team with the championship being decided by one playoff game.

HOME AGENT NEWS NOTES

A very successful 4-H fair was held at the Golden Oak school, town of Barton, Sunday, September 26th. The fair was sponsored by the Good Luck 4-H club of which Paul Cypher is leader. Members of the club are: Charlotte Averill, Charlotte Hausmann, Eugene Hausmann, Vincent Hausmann, Aaron Kluever, Cecil Kluever, Alexander Reinders, Celia Reinders, Joseph Reinders, Paul Reinders, Joy Schneider, James Hausmann, Robert Hausmann, Arline Joost.

Exhibits of fine quality in clothing, gardening, and forestry were shown by the members of the club. These were judged by Mr. C. L. Kuehner, University Extension Fruit Specialist, and Helena Muehlmeier, Washington County Home Agent. Detailed explanations of placings were given by the judges.

A demonstration "How to Make a Scarf" was given by Charlotte Averill and Charlotte Hausmann.

Contests and games were enjoyed by the club members and a pot-luck supper was served.

ALUMINUM CO. HIRES

Due to a seasonal rush the Kewaskum Aluminum company has found it necessary to hire additional employees. On Monday of this week twelve people began their new jobs in the factory. Six more were to start work on Wednesday.

EXPERT PIANO TUNING

Prof. Arthur Erickson will again be in Kewaskum October 7-8. Tuning \$2.00. Leave your names for tuning at the Statesman office.

Patronize Statesman advertisers.

Supervising Teacher of County Passes Away

Harry H. Snyder, who has served Washington county as its supervising teacher for the past nine years, died Monday night, Sept. 27, in Mercy hospital, Milwaukee. Death was caused by an abscess to the brain.

Mr. Snyder was born in Hartford on April 18, 1862. He received his education in the Hartford schools and the Oshkosh Normal school. He became a teacher at the age of 17.

He is survived by his widow and three children. The funeral was held Thursday afternoon at Hartford.

Frona A. Garbisch Weds Ray Justman

The Immanuel Ev. Lutheran church in the town of Scott was the scene of the wedding of Miss Frona Garbisch, daughter of Mr. and Mrs. Charles Garbisch of the town of Scott, and Raymond Justman of West Bend, son of Mr. and Mrs. Albert Justman of Theresa, at 2:30 p. m. Saturday, Sept. 18. Rev. Gustave Kanies performed the ceremony.

The bride was attended by Miss Grace Rimmel as maid of honor. The bridesmaids were Mrs. Rufus Justman, Mrs. Marvin Garbisch and Mrs. Martin Budahn. The flower girls were Jacqueline Kanies and Janet Garbisch. Roland Justman attended the bridegroom as best man, while Rufus Justman, Marvin Garbisch and Martin Budahn served as ushers.

A wedding dinner was served 80 guests after the ceremony, followed by a wedding dance at Goring's resort, Big Cedar lake. The newlyweds then left on a honeymoon and upon their return will reside in West Bend.

TRAIN SCHEDULE CHANGES THROUGH THIS VILLAGE

Three changes have been made in the schedule of trains on the Chicago & North Western Railway through Kewaskum. The new schedule, now in effect, includes the following changes:

Train No. 216, southbound, formerly due at 5:47 p. m., now arrives at 5:35 p. m.

Train No. 151, northbound, formerly due at 11:40 a. m., now arrives at 12:03 p. m.

Train No. 161, formerly a flag stop, will now stop only for passengers getting off from Milwaukee or beyond and not when passengers get off from West Bend, as formerly.

TWO OPERATIONS AT HOSPITAL

Mrs. Frank Quandt of this village underwent a goitre operation last Thursday, Sept. 23, at St. Joseph's Community hospital, West Bend, where she is convalescing at present.

Loran Keller, 32, of route 1, Kewaskum, underwent a major operation to the heel of his left foot at St. Joseph's Community hospital on Wednesday morning, Sept. 29. Loran severely mangled his heel when he fell to the ground while shingling the roof on his home in New Fane recently.

BEAGLE SHOW AND FIELD TRIALS HERE DRAW LARGE ENTRY

The annual beagle show and field trials held here last Saturday, Sunday and Monday, by the Wisconsin Beagle club, was by far the largest in attendance and the greatest number of entries, ever held by the club. There were 58 dogs entered in the trials and show. Five states were represented at the show: Wisconsin, Minnesota, Michigan, Illinois and Indiana.

The field trials commenced on Saturday and continued on through Tuesday. Although the cotton-tails were not as numerous at this season of the year, as in other years, nevertheless some very fine trials were accomplished. Everyone present marveled at the ideal location here for affairs of this kind. All expressed the desire to come again next year, as the treatment and hospitality of the citizens of Kewaskum was of the best. Joe Eberle, our fellow townsman, and president of the Wisconsin Beagle club, acted as host to the dog fanciers and how well he performed his duties toward the visitors is evidenced by the praises heard on every side, regarding the use of his kennels and the excellent treatment accorded the visitors on this occasion.

The beagle puppy, given away by Mr. Eberle, for the benefit of the club, was won by Knute Ambros of Minneapolis, Minn.

Following are the results of the field trials:

SATURDAY

13 INCH ALL AGE FEMALES

First—Eberle's Beauty—Joe Eberle, Kewaskum.

Second—Fox Moor Firefly—Russell Humm, Aurora, Ill.

Third—Baird's Ann—Payton Baird, Mt. Vernon, Ill.

Fourth—Eberle's Skip—Joe Eberle, Kewaskum.

Reserve winner—Buckeye Beautiful—Frank Bacon, West Allis, Wis.

SUNDAY

13 INCH ALL AGE DOGS

First—Pocahontas Jim—Humm and Crandall, Kimmerly, Ill.

Second—Broad Oaks Black Jack—Glen Thompson, Aurora, Ill.

Third—Mastery Rip—S. K. Richards, Milwaukee.

Fourth—Hunthaven Max—M. E. Dale, Durand, Wis.

Reserve winner—Broadoaks Bomber—Glen Thompson, Aurora, Ill.

13 INCH DERBY

First—Eberle's Fly—Joe Eberle.

Second—Master Joe Jiggs—Dennis R. Jones, Palmyra, Wis.

Third—Hunthaven Hannah—M. E. Dale, Durand.

Fourth—Copper Country Mitzi—J. Eloff Smith, Laurium, Mich.

Reserve winner—Taggart's Penelope—S. P. Taggart, Lake Geneva, Wis.

15 INCH DERBY

First—Chippewa Valley Rip—J. Eloff Smith, Laurium, Mich.

Second—Hoch's Rhapsody—Herb. Hoch, Wilmac, Ind.

Third—Mastery Rambler—Frank T. Bacon, West Allis, Wis.

MONDAY

15 INCH FEMALES

First—Mastery Hot Lips—E. A. Kopp, Johnson Creek, Wis.

Second—Hoch's Rhapsody—Herb. Hoch, Wilmac.

Third—Mastery Matchless—E. A. Kopp, Johnson Creek.

Fourth—Puchyan Bill—E. A. Kopp, Johnson Creek.

Reserve winner—Haig's Tops—Martin H. Herman, Laurium, Mich.

15 INCH ALL AGE DOGS

First—Hoch's Blitzzen—Herb. Hoch.

Second—Hunthaven Hector—M. E. Dale, Durand.

Third—Taggart's Reno—S. P. Taggart.

Fourth—Mastery Scooter II—E. A. Kopp.

Reserve winner—Kishwaukee Ringwood—R. B. Cole, Waupaca.

SHOW SUNDAY EVENING

First—13 in dogs—De Kara Ringmann—Matt. R. Wipperfurth, Portage.

Reserve winner—Eberle's Zero.

First—13 in females—Eberle's Little Lady.

Reserve winner—Eberle's Beauty.

First—15 in dogs—Interlaken Immigrant—S. D. Fell, Oshkosh.

Reserve winner—Gundrum's Black King—Jos. Gundrum, Slinger, Wis.

First—15 in females—Eberle's Dream.

Reserve winner—Interlaken Ideal—S. D. Fell, Oshkosh.

Best beagle in show—Eberle's Dream.

PEACE EVANGELICAL CHURCH

Sunday school at 8:45 a. m. English service at 9:30 a. m. Welcome! Sunday is Recognition Day for S. S. workers.

Young Peoples' League meeting Monday at 7:30 p. m.

Ladies' Aid meeting Thursday at 2:30 p. m.

Reserve Sunday, October 10th. On that Sunday we shall celebrate our mission festival.

Richard M. A. Gadow, Pastor

DANCE AT LIGHTHOUSE

Dance, Sunday, October 2, at the Lighthouse ballroom, 2 miles north of West Bend on Highway 55. Music by Ethel "Saxie" Seidel and her Northerners. Admission 25c.

Henry Sness, Proprietor

Cuts Foot Off in Husker While Working on Farm

Emil Wilke of the town of Scott was painfully injured last Saturday, Sept. 25, late in the afternoon, when one of his feet was cut off in a corn husker while filling silo on his farm.

Mr. Wilke was filling the last load of corn into the silo and while he was pitching the bundles the husker became clogged. He used his foot to push the bundles in and as he did so his foot was sucked along in Mr. Wilke was pulled from the wagon and onto the machine. His son, who was assisting, immediately hurried and turned off the power from the tractor but too late, the mechanism had severed the foot above the ankle so that it hung by a thread.

The injured man was rushed to St. Agnes hospital, Fond du Lac, where the foot was amputated. Mr. Wilke is confined there at present and, although suffering much pain, his condition is satisfactory.

Dr. R. H. Quade Goes to Mayo Clinic for Training

Dr. R. H. Quade, son of Mr. and Mrs. Henry Quade, is returning to the Mayo clinic, Rochester, Minn., today, October 1st, where he has accepted an opportunity to receive further training in neuro surgery, (surgery of the brain, spinal cord and nerves.) Dr. Quade completed a three year Fellowship at the Mayo clinic in April, 1934. During this period a considerable part of his work was done in the department of neuro surgery. Since April, 1934, he has been associated with the Industrial clinic at Milwaukee in the practice of general and industrial surgery.

NEW ARRIVAL

Born, at the West Bend clinic Sunday, Sept. 26, a baby daughter to Mr. and Mrs. Harold Petri of that city. Mr. and Mrs. Petri are former residents of this village, the mother being remembered here as Miss Esther Raether before her marriage. The little newcomer will receive the name of Fay Ann.

RURAL REHABILITATION TO BE CONTINUED UNDER FARM SECURITY PLAN

It is anticipated that the rural rehabilitation supervised loan program will continue without major change under the newly established Farm Security Administration of the United States Department of Agriculture which, September 1, supplanted the Resettlement Administration, Mr. W. C. Carter, rural rehabilitation supervisor for Calumet, Dodge, Fond du Lac, Manitowish, Ozaukee, Sheboygan and Washington counties announced recently, following assurances received from Arlie Mucks, state director of the Farm Security Administration in Madison.

Mr. Carter, whose office is in the court house at West Bend, Wisconsin, stated that the rural rehabilitation and farm debt adjustment work which he represents in seven counties is provided for in the Farm Tenant Act which the Farm Security Administration will administer and that his duties under the FSA will be substantially the same as in the past.

Rehabilitation loans—supported by farm and home management plans and advice from county supervisors—will be made to low-income farm families who desire to become re-established on a self-supporting basis but who are unable to secure the proper credit from other sources with which to purchase livestock, equipment, seed or feed.

In addition to the rural rehabilitation program which will be continued as an important part of the new agency, the Farm Security Administration will conduct a limited tenant loan program, as provided in the Farm Tenant Act, for selected tenant farmers.

The method of handling applications for the new tenant loans will be announced later, when information is received on the details Mr. Carter said.

Land use planning and submarginal land purchasing, further provided for in the Farm Tenant Act, have been assigned by the Secretary of Agriculture to the Bureau of Agricultural Economics. This means that former land utilization work and that to be carried out under the new act will be continued through a land utilization division of the Bureau of Agricultural Economics, while the Farm Security Administration will conduct the tenant and rural rehabilitation programs and complete farmstead projects now under development. Thus, remaining functions of the former resettlement administration and those added by the Farm Tenant Act have been divided between the Farm Security Administration and the land use program of the Bureau of Agricultural Economics, according to the statement received by Mr. Carter from the state office.

The disease, leucosis, which causes paralysis of the legs or wings or grayish discoloration of the eyes with blindness, is now considered one of the main causes of this high death rate among chickens.

ANCHOR ROPE DRAGS MAN TO DEATH IN LAKE BERNICE

A Milwaukee man was drowned in Lake Bernice (formerly Schrauth's pond), several miles northwest of Kewaskum on Tuesday of this week when dragged from a boat by the anchor rope.

Alvin Sacker, 26, Port Washington rd., the dead man, had come to fish in Lake Bernice. With his father-in-law, William Joglover, 3322 N. Buffum street, Sacker towed 30 feet from shore. When they tossed out the anchor the rope caught Sacker's leg, pulling him overboard. Neither man could swim. Mr. Joglover, however, was able to reach shore and call help.

The body has been recovered.

Mrs. Katherine Rimmel Dies at Campbellsport

The venerable Mrs. Katherine Rimmel, 79, widow of the late John Rimmel, and relative of several local residents, died at 10:15 a. m. last Friday, September 24, at the home of her sister, Mrs. Martha Campbell, in Campbellsport. She had been ill for five months.

Born March 6, 1858, in Dungannon, Ohio, she moved to this vicinity with her parents, Jacob and Katherine Schiek, when a child. She was married June 24, 1907, to John Rimmel, who died January 7, 1933.

Surviving are two sisters, Mrs. Campbell of Campbellsport and Mrs. Elizabeth McGilligan of Appleton and several nieces and nephews.

The body lay in state at the Berge funeral home in Campbellsport, where funeral services were held at 8:30 a. m. Monday and at 9 a. m. from St. Matthew's church in Campbellsport. Rev. A. Biver officiated and burial took place in the church cemetery.

Among those attending the funeral were the following from this village: Mr. and Mrs. Louis Bath, the Misses Helen and Mary Rimmel and Mrs. Don Harbeck.

CLERK ATTENDS HEARING

Carl F. Schaefer, village clerk, attended a hearing at Madison Thursday in which the Greyhound Line appealed to the Interstate Commerce commission for permission to sell tickets at local stops on its lines in the state to points outside the state. With one or two exceptions, such permission is not now granted them. Otto B. Graf, local agent, is not now allowed to sell tickets for interstate travel.

BEAVER STORY

by Thornton W. Burgess

PETER HAS HARD WORK TO BELIEVE HIS EYES

THE very morning that Jimmy Skunk had decided to go see for himself the stranger of whom Sammy Jay and Blacky the Crow and Uncle Billy Possum told such strange stories Peter Rabbit had made up his mind that he just had to see for himself what was going on. He had not been into the deepest part of the Green Forest since the time when he had found the strange tracks in the snow. The truth is Peter had been afraid to go. But now his curiosity had been aroused so by what Sammy Jay and Blacky the Crow had said that he couldn't keep away any longer. First he looked for his cousin, Jumper the Hare. Jumper had not been afraid

So Peter Had Started Off by Himself

when Peter had told him about those strange tracks, and he felt sure that Jumper would not be afraid now. But Jumper was nowhere to be found. In fact, Peter had not seen him for some time, not since Sammy Jay had first come screaming out of the Green Forest with his story of the big stranger with the terrible claws.

So Peter had started off by himself. His heart went pit-a-pat, pit-a-pat and he sat up to look and listen so often that it took him longer than ever to reach the pond of Paddy the Beaver deep in the Green Forest. Not once had Peter seen or heard anything to make him afraid, and by the time he reached Paddy's pond he had begun to feel very brave and bold. In fact he had almost begun to doubt if there was any such stranger as Sammy had described.

Then all of a sudden, right on the shore of Paddy's pond, Peter saw a sight that made him quite gasp for breath. Yes, sir, it quite took Peter's breath away. What was it? Why, it was the meeting between Jimmy Skunk and the big stranger Sammy Jay had told about. He was very big, quite as big as Farmer Brown's boy, was the stranger and he wore a black fur coat just as Sammy had said. And there were the great big claws, the terrible claws, the most awful claws that Peter had ever dreamed of. As soon as he saw them Peter knew for sure that this stranger was the one who had made the big, strange tracks he had found in the snow in the deepest part of the Green Forest at the very last of winter. And now here was the great stranger with the terrible claws walking straight toward Jimmy Skunk and Jimmy didn't seem to know it. In fact Jimmy was resting and he looked very much as if he were going to take a nap. Peter wanted

to shout and warn Jimmy. Then he thought of thumping. But he didn't do either. The fact is Peter didn't quite dare to.

But there was no need, for just then the stranger stepped on a stick and it broke with a snap. Jimmy Skunk turned about. Of course Peter expected to see Jimmy run as fast as ever he could. "Jimmy seldom hurries, but he will this time," thought Peter.

But Peter was wrong. Jimmy did nothing of the kind. For a minute he just stared and stared. The big black stranger kept right on coming. Then, instead of running, Jimmy went forward to meet him. Yes, sir, Jimmy Skunk just marched straight toward the stranger with his head and tail held high. The big black stranger stopped and eyed Jimmy a bit doubtfully. Then he stood up on his hind legs and he was as tall as Farmer Brown's boy. This made Jimmy stop for a minute. Never had he seen any one but Farmer Brown's boy himself who could stand like that. But it wouldn't do to let this stranger think that just because he was big and had cruel looking claws he could scare everybody, and so Jimmy once more marched forward. You know he really has a great deal of confidence in that little bag of scent he always carries with him. The stranger growled. Jimmy kept right on. Then what do you think happened? Why that great, big stranger began to back away! Peter Rabbit could hardly believe his own eyes.

FIRST AID TO THE AILING HOUSE

By Roger B. Whitman

RELATIVE HUMIDITY

WITH the coming in of air conditioning, and the use of humidifiers, the term "relative humidity" is used to indicate the percentage moisture in the air. This term is explained as showing the quantity of moisture in the air compared to the limit that the air can hold. For a comparison, a sponge picks up moisture and continues to pick it up until it is saturated; beyond that, any more water causes a drip.

A sponge holds water in liquid form, whereas air holds it in the form of an invisible vapor. Air absorbs this vapor, and can continue

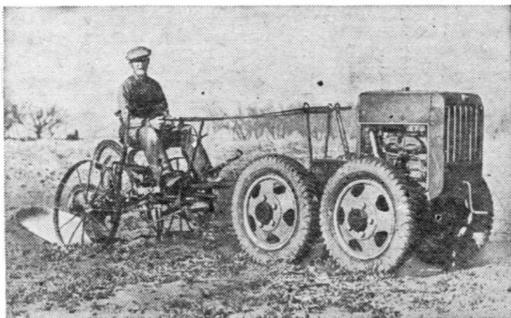

ANIMAL CRACKERS

"Stick 'em up!" WNU Service.

He Drives His Tractor Like a Horse

Bert Bonham is here seen demonstrating for Latter Day Saint officials at Salt Lake City, Utah, the gasoline farm steed he has invented and which is driven as one would drive a horse. "It's all in that little iron box behind the motor," says Bert's brother and co-inventor, Bond. When Bonham pulled on the reins the machine halted. When he released them it moved forward. A hard pull set the rig moving backward and a jerk on one rein turned the machine. The brothers experimented eight years on the device.

Seattle's Russian Orthodox Church

Towering over several buildings and housetops are the awe-inspiring seven spirals of the new Russian Orthodox church which is being built in Seattle. It is said to be the only one of its architectural design on the Coast. When the church is completed there is expected to be a continuous flow of visiting artists to paint and draw the artistic building. This church is being erected by the pastor himself along with several other members of the church. The pastor is the Rev. M. Danilchik, who came from southern Russia.

to absorb it until it can take up no more. Outdoors, excess water vapor becomes visible as a mist or a fog, both of which are no more than very minute drops of water.

The amount of water vapor that air can take up depends on temperature. The warmer the air, the more vapor it can hold; the greater will be the quantity of water vapor needed to saturate it.

Relative humidity is the amount of water vapor actually in the air, compared to the amount of water vapor that would be needed for saturation. Air that is fully saturated, and that can take up no more vapor without forming a drip or a mist, is said to be 100 per cent humidified. Air that contains one-half as much vapor as would saturate it is 50 per cent humidified, or in other words, has a relative humidity of 50 per cent.

The relative humidity of a body of air depends on the temperature of the air. Consider a room in which the air is at a temperature of 40 degrees contains a certain quantity of water vapor. If the temperature of the air is then raised to, say, 60 or 70 degrees, with no more water vapor added, the relative humidity will be less, for at the higher temperature, the air has a greater capacity for absorbing water.

Now suppose that the air in a room is at 70 degrees, and contains a quantity of water vapor, but not enough for saturation. Coming into contact with cold window glass, the air will be chilled and will lose its capacity to hold water vapor. The excess above the relative humidity of 100 per cent, which is saturation, will be squeezed out, so to speak, and will appear as drops on the glass. The effect is condensation, or what is commonly known as "sweating."

Ringling a Peal of Bells

Ringling a peal of bells is not just a matter of pulling a number of ropes one after the other until the ringers get tired. Proper peals are all arranged carefully beforehand, with "music" of their own, so that the same combination of bells never occurs more than once, though the peal may go on for as many as four hours or more. This doesn't sound quite so impossible, says London Answers Magazine, when you remember that with a peal of eight bells, no fewer than 40,320 changes can be rung. Bell-ringing is a skilled job, and those who can do it are very proud of their achievements. It is computed that something like 15,000 people in this country have mastered the art.

MANNERS OF THE MOMENT

By JEAN

WE HAVE a dreadful time, every once in a while, trying to remember all the first names of all the children in families where we visit only about once a year. It infuriates the parents when we call little Dicky, Bill or little Marjorie, Helen. They seem to think we aren't impressed with the offspring, which is far from the case. We are usually terribly impressed and somewhat terrified.

For a while we wrote down all the names of these children—once removed in a note book. But then we lost the note book. So now we have discovered a new system. When confronted with the child we smile pleasantly and start right in with our conversation. "So you're in school now, aren't you?" we say. And then, "I bet you haven't learned to spell your own name,

You Are Supposed to Remember All the Names of All Your Friends' and Cousins' Children.

have you?" And nine times out of ten we get the answer that saves us.

Ask Me? Another

A Quiz With Answers Offering Information on Various Subjects

1. How much wood will a giant Sequoia tree yield?
2. How many persons out of a million will live to be one hundred years old?
3. Who was the first American to receive the Nobel prize for peace?
4. How fast can currency be counted?
5. Where is the oldest painting of the Virgin and Child in existence?
6. Does it cost more to educate a child in a city school than in a rural school?
7. When gold is hammered into the thinnest gold leaf possible, what color is it?
8. What is the definition of a split infinitive?
9. What profit do the Federal Reserve banks make?

Answers

1. A giant California Sequoia tree yielded 3,000 posts, 650,000 shingles and 100 cords of firewood. The upper one-third and the branches of the huge tree were not used.
2. It is estimated about thirty in a million will live to this advanced age.
3. Theodore Roosevelt, for his efforts in bringing about the treaty of peace between Japan and Russia in 1905. It was awarded him in 1906.
4. The expert counters of the Department of the Treasury have counted approximately as many as 40,000 new notes a day, and 25,000 old ones.
5. The oldest painting of the Virgin and Child in existence, done about 150 A. D., is on a wall in the famous Priscilla catacombs in Rome.
6. The average cost to educate a child in a rural school in the United States is \$53.1 a year, and the average in a city school is about \$96.18.
7. In this condition it appears green by transmitted light.
8. A split infinitive is one in which an adverb is introduced between the word "to," and the verb form, such as "to largely decrease." The word "to" as used with the infinitive is not to be classed as a preposition; it is an integral part of the infinitive and hence should not be separated from the verb form.
9. Federal Reserve banks are not operated for profit. After all necessary expenses have been provided for, the stockholding member banks are entitled to receive a cumulative annual dividend of 6 per cent on the paid-in capital stock. After dividend claims have been fully met, the net earnings are paid into the surplus fund of the Federal Reserve bank.

Trans-Siberian R. R.

The Trans-Siberian railroad covers a distance of 5,550 miles across both European and Asiatic Russia. The work of building it was begun at Moscow and was rapidly extended. Orenburg was reached in 1877. In 1880 the bridge over the Volga was built and the section connecting the Volga and Obi river basins was begun. In May, 1891, the first work on the real Trans-Siberian railroad was begun. As a single-track line it was completed in 1902. The cost was \$175,000,000.

Achievement of Peace

YOU may either win peace or buy it; you may resist to evil; you may compromise with evil; you may buy your peace with lacerated consciences; you may buy it with broken vows; you may buy it with the blood of the slain, and the cry of the captives and the groans of the earth, while you sit smiling at your hearths, muttering contentedly to yourselves, "Peace, peace, when there is no peace; only captivity and death to you."

Just a Myth

It appears that "water runs uphill" is just another myth according to computations by the United States Geological Survey. They've figured out that at about 13 miles farther away from the center of the earth, the sea-level point at either of earth's poles. Their calculations show that the mouth of the Mississippi river is four miles higher than the earth's center of gravity.

Fount of Happiness

The only fountain in the world of happiness is the fountain of life, where man drinks water totally unmineralized and pure, in the calm and steady stream of domestic life.—William Felt.

DON'T RISK YOUR LIFE ON SMOOTH WORN TIRES!

DO YOU KNOW

THAT last year highway accidents cost the lives of more than 38,000 men, women and children?

That a million more were injured?

THAT more than 40,000 of these deaths and injuries were caused directly by punctures, blowouts and skidding due to smooth, worn, unsafe tires?

At right is a section cut from a smooth, worn tire, with no skid protection worn off. Tires in this condition are liable to punctures, blowouts and skidding.

At left is section cut from a new Firestone Tire. Note the thick non-skid protection against skidding, blowouts and punctures. Come in and see a demonstration.

TRAFFIC VIOLATIONS—Traffic violations caused 420 accidents in May, 1937, reports to the Wisconsin highway commission show.

Politicians' Promises—“Some folks look for new promises from different politicians,” said Uncle Eben, “purty much de same as dey changes off from one fortune teller to another.”

TO BE SLAPPED DOWN—Horn-tooting motorists and a mosquito on the sleeping porch deserve the same fate: To be slapped down.

ARMSTRONG

Daniel Shea visited in Milwaukee Thursday.

Miss Katherine Havey of Springvale spent the week end at her home. John and Leo Twobig attended the Marquette-Ripon football game in Milwaukee Saturday.

George J. Twobig has resumed his studies in the Marquette School of Medicine, Milwaukee.

John Shea and son, Robert, have returned to their home in Los Angeles, Calif., after spending a week with relatives here.

The banns of marriage for Miss Veronica Herbert and Alton Gannon of Glenbeulah were announced Sunday at Our Lady of Angels church.

John O'Connor of Gary, Ind., spent the week end with his mother, Mrs. Mae O'Connor, and attended the wedding of his sister, Miss Eileen O'Connor and John W. Shea.

Arrangements are about completed for the fall festival and chicken dinner which is to be given at Armstrong on Sunday, October 5, by the Altar society of Our Lady of Angels church.

Misses Veronica Herbert and Letitia Anderson were in Milwaukee Sunday, where Miss Martha Cahill entertained at a pre-nuptial party for Miss Herbert, whose approaching marriage to Alton Gannon of Glenbeulah has been announced.

The Misses Eileen O'Connor and Veronica Herbert were honored at a pre-nuptial party Tuesday night at the home of William and Letitia Anderson by the Social Dramatic club of Our Lady of Angels church. Five hundred was played, honors going to the Misses Mary Foy and Veronica Herbert, John Twobig, David Twobig and John O'Brien. Lunch was served. A gift was given to each of the honored guests.

MISS EILEEN O'CONNOR MARRIED TO JOHN W. SHEA

Given in marriage by her maternal grandfather, Joseph Boswer of Cascade, Miss Eileen O'Connor, daughter of Mrs. Michael J. O'Connor of Armstrong, became the bride of John William Shea of Armstrong, son of Michael Shea, at a nuptial high mass read at 9 a. m. Saturday in Our Lady of Angels church in Armstrong.

The Rev. Joseph J. Michels officiated at the ceremony witnessed by a large assembly of relatives and friends. Autumn flowers and ferns decorated the church. The mass was sung by Joseph Pilon, soloist, accompanied at the organ by Miss Ruth Hauer, who also played the traditional wedding march.

Antique white moire styled with a plain basque and a flowing skirt with an uneven hemline comprised the gown worn by the bride. The neckline was finished with a roll collar of the same material in peach, petal shade. Two narrow panels of peach shade edged the front of the skirt. A bonnet of antique white tulle, faced with moire completed the bride's costume. She carried a white prayer book that had been carried by her mother at her marriage. Satin streamers falling from the missal were caught with lilies of the valley.

Miss Mary Foy attended her cousin as bridesmaid. Her princess gown of rose rust satin edged with a narrow cord of self material at the bottom of the full skirt. The bodice was finished with a V neck-line and the sleeves were shirred. She wore a brown velvet halo and brown accessories. Her arm bouquet was of bronze chrysanthemums.

Stephen O'Connor, brother of the bride, attended as best man. Ushers were John O'Connor of Gary, Ind., brother of the bride, and Joseph Shea, cousin of the bridegroom.

Mrs. O'Connor wore a gown of hunter green crepe trimmed with eggshell satin and a green felt hat for her daughter's marriage. Her corsage was of roses and sweetpeas.

Members of the immediate families were served breakfast following the ceremony at the home of the bride's mother. A reception was held during the afternoon.

Mr. and Mrs. Shea left on a honeymoon to St. Paul. They will be at home after Oct. 15 at Armstrong. Mrs. Shea's travel costume was of green wool worn with brown and gold accessories.

Wedding guests included Mrs. Amelia Monk of Greenbush, Mr. and Mrs. Clyde Walters and John O'Connor of Gary, Ind., Mr. and Mrs. John Boswer and daughter Mary of Sheboygan Falls, and Mr. and Mrs. Robert P. Cardwell of Chicago, Ill.

PEDESTRIAN TRAFFIC—Racine recently checked pedestrian traffic for an hour at a busy corner; 163 obeyed traffic lights and 124 walked against them.

CITY HAS \$200,000 FIRE

FOND DU LAC—Rock debris, tilted walls, and smoldering embers Tuesday night were all that remained of Fond du Lac's historic Amory building, which was razed by a \$200,000 fire. The fire, discovered shortly after 7 p. m. Monday, continued until late Tuesday. Called to aid local firemen was an Oshkosh fire department unit headed by Chief George J. Revland. The blaze was reported to have started under Gamble Stores, Inc.

GUILTY OF MANSLAUGHTER

PLYMOUTH—A jury found Edwin Guhl guilty of fourth degree manslaughter last Wednesday. This crime carries with it a penalty of from one to two years in the state penitentiary. The case resulted from the death of Joseph Behr and Robert Warner in an auto accident in which the prosecution charged that Guhl was driving his car while intoxicated.

FOY FAMILY HURT IN WRECK

CAMPBELLSPORT—Mr. and Mrs. John Foy, daughter Ruth and son Ad. dis of the town of Empire were injured in an auto accident at 7:50 p. m. Saturday, Sept. 18, when their car was struck by another near the Takodah Springs Golf club near Fond du Lac on Highway 55, driven by Pat Barcier, R. 3, Fond du Lac. All involved were quite painfully injured and were treated at St. Agnes hospital. Miss Foy was the most seriously injured while her parents suffered fractures, lacerations, cuts and bruises. Mr. and Mrs. Foy are the parents of the late David Foy, 26, killed on June 23, this summer when his car hit a culvert near Campbellsport.

FALL FROM TREE IS FATAL

WEST BEND—Homer Pearson, 39, West Bend, a combination man in the employ of the West Bend exchange of the Wisconsin Telephone Co. was fatally injured Sunday, Sept. 19, when he fell 18 feet while picking crab apples in a tree on the farm of his mother, Mrs. Emma Pearson, a mile east of Pewaukee. He was standing on a limb, which snapped off, throwing him to the ground. He sustained a fractured spine, from which he died a half hour later.

REPORT NOTED GANG SEEN

HARTFORD—It is reported that search for Al. Brady, Indiana bank robber, and a member of his gang, Clarence Lee Shaffer Jr. centered in Wisconsin after two men seen at Hartford Monday night, Sept. 20, were identified as the gangsters. Ray Haselow identified rogues' gallery pictures of the pair as the men who stopped at his filling station for gasoline that night, it is said.

PLAN UNION FREE HIGH SCHOOL

CEDARBURG—A group of interested citizens from towns Thiensville, Grafton and Cedarburg discussed advantages and disadvantages of a union free high school at an informal meeting held in the Cedarburg high school rooms Wednesday evening, Sept. 22. A survey will be made by the state superintendent's office so as to more intelligently estimate the probable area covered.

BURGLARS RAID TAVERN

WALDO—The Lee Greisch tavern at the intersection of highway 57 and 28 was entered by forcing open the front door Friday night, Sept. 17, some time. A total of \$34 in cash, two slot machines and a considerable quantity of bonded liquor was taken. The broken slot machines were found about three miles east of the tavern.

GET POST OFFICE CONTRACT

PORT WASHINGTON—A contract construction of a post office building in Port Washington was awarded to the A. C. Atherton Company of Chicago, it was announced by the treasury department at Washington. The Chicago firm's bid was \$45,307.

DEATH OF FRED HEIDER

DUNDEE—Fred Heider, 71, of Dundee, died at St. Agnes hospital, Fond du Lac, on Tuesday, Sept. 13, at 5 p. m. Mr. Heider was born in the town of Barton on June 15, 1866, and resided there the major portion of his life, moving to Dundee a few years ago. On Mar. 23, 1907, he was united in marriage with Miss Emma Ebert at Kewaskum. Surviving are his widow, a daughter, two sons, two sisters and 5 grandchildren.

WITTMAN FLIES TO RECORDS

FOND DU LAC—Flying 233.225 miles per hour for 62 miles, S. J. Wittman, Oshkosh, brother of Hubert Wittman, Kewaskum, set what officials of the Detroit national air show believed to be two new records in the light racing class at Detroit Sunday, Sept. 19.

WOMAN DIES IN CRASH

PLYMOUTH—Mrs. R. H. Koehler was fatally injured and her husband suffered cuts and bruises in an auto accident Monday afternoon, Sept. 20, on Highway 57 near here. The accident occurred as Mr. Koehler was driving his car across the highway, when it was struck broadside by a Sheboygan county highway truck, driven by Jos. Webb. Mr. Koehler failed to see the truck approaching, which turned his car completely around.

BARN DESTROYED BY FIRE

WAUCOUSTA

Chris. Johnson of Van Dyne was a caller here Sunday.

Walter Buslaff of Kewaskum spent Sunday at his home here.

Miss Gladys Bartelt of New Prospect visited relatives and friends here last Friday.

Mr. and Mrs. Walter Haupt of Milwaukee visited Gust and Emil Flitter here Sunday.

Miss Betty Stubbe of Fond du Lac spent the week end at the W. C. Pieper home here.

Mrs. Sciro Onesto and son of Campbellsport are spending several days at the Wm. Schultz home here.

INSTALL BARLEY CLEANER

LOMIRA—Workmen were busy last week installing a new barley cleaner and grader in the elevator of the Star Malt & Grain Co. The new machine will separate oats and other foreign matter from the barley and at the same time will grade the barley so that a more even grade of malt may be procured.

HELD IN ASSAULT CASE

PLYMOUTH—Fred Roeseler was bound over to circuit court on a criminal charge of assault with a dangerous weapon with intent to murder here Tuesday at a preliminary hearing. His bond was reduced from \$5,000 to \$2,000. Roeseler is charged with attacking his wife and his sister-in-law with the butt of a shotgun after firing at them two times.

MINISTER IS TRANSFERRED

CAMPBELLSPORT—The Rev. I. A. Mielenz, pastor of the local Methodist church and the Oakfield and South Byron churches for the past six years, has been transferred to the parishes of Fall River and Windsor. The Rev. Alfred Atwood, who has been pastor at Fall River, has replaced Rev. Mielenz.

BARN DESTROYED BY FIRE

HARTFORD—The series of night fires, which recently have visited this community, arrived at a climax at about 11 o'clock Sunday evening, Sept. 19, when one of the large barns and its contents on the Wm. Quandt farm, located a mile northwest of this city, was consumed together with an adjoining shed and a stove silo. The total loss is estimated at \$6,000.

MOVE TO NEW HEADQUARTERS

RANDOM LAKE—Jac. Gessner, manager at the local office and yards of the Barker Lumber Co., and his crew of men have moved into the new building erected and just completed by the company. The building is a 32x90 brick veneer front structure.

TAVERN IS BURGLARIZED

PLYMOUTH—The Valley Inn, west of the city on highway 23, was burglarized at about 4 o'clock last Wednesday afternoon, when money was removed from the till while the proprietor was in another room. He claimed a loss of about \$55.

ESTABLISHES LAW OFFICE

WEST BEND—Atty. Gerhard E. Otten, son of Mr. and Mrs. Henry Otten of Barton, has established law offices on the second floor of the Central building here.

Fall Tillage Calls For McCORMICK-DEERING Tillage Tools

McCormick-Deering Farmall 30 Tractor pulling a McCormick-Deering Disk Harrow.

For fields that should get the benefit of fall disking, harrowing, and pulverizing, there is no better line of implements than McCormick-Deering Tillage Tools. You'll find our store headquarters a complete line of tractor and horse-drawn disk harrows, field cultivators, spring-tooth harrows, rotary hoes, soil pulverizers, harrow-plows, and other tools.

We're especially enthusiastic about McCormick-Deering Disk Harrows with their heat-treated, heavy-gauge, crimped-center disks. The tractor harrows have crossed-draft connections that provide quick angling and accurate trailing. Other disk harrow models are the wide type and the offset type for orchard work.

Come in and talk over your requirements.

—Bill Bartelt and gentlemen friends of Mayville spent Sunday afternoon with the former's parents, Mr. and Mrs. Ed. Bartelt.

—Mr. and Mrs. Lloyd Bartelt and family and Mrs. Heide of Milwaukee visited Sunday with Mrs. Tillie Bartelt and son Alvin.
—Mrs. Adelaide Opgenorth of West Bend, Mr. and Mrs. John Flasch of St. Killian visited with Mrs. Catherine Harter, Sunday afternoon.

—Mrs. Meta Schaefer of Milwaukee is spending the week here visiting her sister, Mrs. Lulu Davies and sister-in-law, Mrs. Edw. C. Miller.
—Miss Marcella Prost, who is attending the Fond du Lac Business college spent the week end with her folks, Mr. and Mrs. Arnold Prost.

—Miss Marcella Heisler is employed since Monday at Brussels's Beauty Shoppe, assisting as apprentice under Mrs. Brussels's supervision.
—Mrs. Henry Kleineschay of Fond du Lac spent from Tuesday until Sunday with Mr. and Mrs. John Kleineschay and daughter Mary.

—Mr. and Mrs. John McLaughlin and daughter Dorothy of Wausau spent from Friday until Sunday with his sister, Miss Rose McLaughlin.
—Mr. and Mrs. Roy Schreiber and daughter Jacqueline, in company with friends from West Bend, made a motor trip to Rockford, Ill. on Sunday.

—Dr. and Mrs. R. H. Quade and daughter Faith Elizabeth of Milwaukee visited this week at the home of his parents, Mr. and Mrs. H. W. Quade.

—Mrs. Irene Demler of West Bend visited with Mrs. Mary Schultz on Saturday.
—Dr. and Mrs. E. L. Morgenroth spent Sunday at the Chas. Firme home near Batavia.

—Mr. and Mrs. A. P. Schaefer and daughter Pearl spent Sunday morning at Holy Hill.
—Mrs. S. E. Witzig, John Witzig, Mrs. M. Zeimet and son Ray spent Sunday at Menasha.

—Aug. C. Ebenreiter was confined to his home the forepart of this week on account of an ailment to his foot.
—Mr. H. Hansen of Sturgeon Bay and Mr. and Mrs. C. Meyer of Milwaukee called on Mr. and Mrs. John Kleineschay Saturday.

—Mrs. Chas. Geidel and Mrs. Ervin Gritzmaier of West Bend visited with Mrs. Emil C. Backhaus and daughter Viola on Sunday.
—Mrs. S. E. Witzig, Mrs. Mathilda Zeimet and son Ray were at St. Lawrence last Thursday to visit with the former's sister, Mrs. John Folz, who is quite ill.

A Wisconsin agricultural engineer, F. H. King, did much of the pioneer work on ventilation which came to be of such great service to American stockmen.
—Mr. and Mrs. Jos. Schwind and Mrs. Henry Becker visited with Mr. and Mrs. Harry Marx and family and Mrs. Mary Hutchinson at Milwaukee on Sunday.

—Mr. and Mrs. A. J. O'Leary and daughter Kathryn of Milwaukee and Mrs. Kate Whittaker of Grand Rapids, Mich. visited Miss Rose McLaughlin on Sunday.
—Mr. and Mrs. Jac. Harter and family, John Mertes of the town of Auburn and Miss Maggie Schneider of St. Francis visited with Mr. and Mrs. Nic. Schiltz Sunday.

—Otto Weddig and Tony Uelmen, who are employed in Milwaukee, and Ralph Marx, who is attending Marquette university, spent the week end at their homes here.
—Mr. and Mrs. Louis Schaefer and son Wilbur, Armella and Clara Baden of Juneau and Russell Schaefer of Milwaukee, Marquette university student, were Sunday visitors at the home of Mrs. Mary Schultz.

—Mr. and Mrs. Phillip Marquardt and family of Fillmore, Mr. and Mrs. Edw. Weddig and son Leon of here, Mr. and Mrs. Ed. Krustzinger of Beechwood were Friday evening guests of Mr. and Mrs. Henry Weddig and children.
—Mr. and Mrs. Chas. Ramthun of Shawano, Mr. and Mrs. Allen Koepke, Mr. and Mrs. Eldon Ramthun and family of Milwaukee, Mr. and Mrs. Fred Bassil and daughter of West Bend were week-end guests of the Ramthun families.

—Mr. and Mrs. Ralph Kastenholz, son Claude and Miss Sylvia Marx of Milwaukee spent Sunday with the Nicholas Stoffel family. They were accompanied here by Miss Priscilla Marx, who spent two weeks at the Stoffel home.
—Mrs. Allen Miller, who is at present making her home here with Mrs. Edw. C. Miller and Mrs. Lulu Davies, spent from Friday evening to Sunday evening at Chicago with her husband, Dr. E. Allen Miller, intern at Michael Reese hospital.

—Mr. and Mrs. K. A. Honeck, accompanied by Mr. and Mrs. Ben Remmel of Waupun spent Sunday at Kickapoo Valley and Richland Center, Wis. Upon their return in the evening they called on Mr. and Mrs. Mike Skupniowitz at Dalton.
—Mrs. Mary Herman of this village, who is spending some time at the home of her son-in-law and daughter, Mr. and Mrs. Harold Riley at West Bend, was quite ill at their home the past week, suffering from a heart attack with which she was stricken Saturday.

—Our Chevrolet dealer made the following deliveries during the past month: a panel 3-4-ton truck to Leroy Yahr of Boltonville, a Master De Luxe Sport sedan to Math. Mura of Kenosha, and a De Luxe Town sedan to Harvey Bunkelmang of route 1, Kewaskum.—K. A. Honeck, dealer.
—Harold "Droopy" Stark, member of Heinie's Grenadiers, WTMJ radio artists, his wife and family, Mr. and Mrs. Carl Meinhardt and family, Mr. and Mrs. Phillip Meinhardt, Mrs. Emma Stark and Mr. Charles Krahn, all of Milwaukee, were guests of Mrs. Ida Demarest Sunday.

—The following from Kewaskum attended the Washington-Ozaukee county W. N. A. convention at Singer hall, Waubesa, Thursday afternoon and evening, Sept. 23: Mrs. Jac. Becker, Mrs. E. L. Morgenroth, Mrs. Jac. Brussels, Mrs. Louis Brandt, Mrs. Armella Mertes, Mrs. George H. Schmidt, Mrs. Fred Schiefel, Mrs. Minnie Mertes, and Mrs. Leo Vyvan.
—Mr. and Mrs. Albert Schaefer of Milwaukee, Mr. and Mrs. John F. Schaefer and daughter Kathleen motored to Manawa last Friday, from where they were accompanied by Mr. and Mrs. John L. Schaefer to spend until Sunday at the Schaefer cottage on Horn lake near Townsend. Miss Kathleen remained at her brother's home in Manawa over the week end.

—Mr. and Mrs. Louis Bath, the Misses Helen and Mary Remmel and Mrs. Don Harbeck visited with Mrs. Mary Harter at St. Agnes hospital at Fond du Lac on Sunday afternoon.
Mrs. Harter, whose home is in this village, came to the hospital from Wabeno where she has been confined by illness at the home of her son-in-law and daughter, Mr. and Mrs. John Volk, for several months past. Mrs. Harter is now under the care of another daughter, Sr. M. Adelaide, who recently returned from a 4-year stay at the Leo Home, New York City, to resume her nursing duties at St. Agnes hospital.

NOW IS THE TIME TO SUBSCRIBE FOR THE KEWASKUM STATESMAN.

TRANSIENT KILLED BY TRAIN
WEST BEND—George Higgins, a 35-year-old man, was fatally injured when he was struck by a moving Chicago and North Western railroad train just before 10:30 p.m. last Friday evening. He died at St. Joseph's Community hospital here where he survived until 10:30 a.m. today. He was identified as George Franklin, Penn.

THREE INJURED IN CRASH
SLINGER—Peter and Frank Margraf of Slinger and Geo. Kuhaupt of the town of Polk, driving north on Highway 41 about 1 mile south of Ad. Center Sunday morning, Sept. 19, at 3 o'clock, careened to the left side of the road in some manner and entered the ditch, striking a telephone pole. All were quite seriously injured.

News Review of Current Events

PARITY PRICES ABANDONED

Would Cost Too Much, Says Wallace . . . Japanese Air Fleets Bomb Nanking . . . Protests Disregarded

American Legion Members From West Reach New York City by Airplane for Their National Convention.

Edward W. Pickard SUMMARIZES THE WORLD'S WEEK

Drops "Parity Prices"

ONE of the administration's chief policies for agriculture has been abandoned, Secretary Wallace announced in Washington. "Parity prices" for farm products, he said, could not be attained. The aim now will be to give "the average farmer the same purchasing power he had in the half century before the World War."

Sec. Wallace

"I don't think there is any way of getting enough money out of the Treasury," Wallace said, "to give farmers parity prices during the next ten years for cotton, wheat, corn, hogs, or any other product that is exported. You might be able to get enough for a year or two to do this. But the consumer would soon rise up in protest." Wallace also talked about the soil conservation program, under which farmers must hold acreage of major crops below the 1928-37 average in order to obtain benefit payments. He said the only fault with this was that normal yields would be too large in view of the prospective markets.

The secretary still believes that national control over production of the major farm crops is necessary. "In my opinion," he said, "the principle of co-operative crop adjustment is sound and will eventually be applied again."

Douglas Heads SEC

WALL STREET didn't like the idea of having William O. Douglas as chairman of the Securities and Exchange commission, preferring the more conservative George C. Mathews. However, Douglas was elected to the post, succeeding James M. Landis; and to reassure the financiers he described himself as "a pretty conservative sort of fellow from the old school, a school too old for some to remember," who has in mind "no ruinous theories of social experimentation."

The commission, said the former Yale professor, is not interested in prices as such and will interfere with market trends only when the forces that shape them are artificial. "There will be direct and aggressive prosecution of any cases we discover of pools and manipulation of security prices. We are in favor of a free market, not a fixed one." "The government cannot provide any substitute for investment judgment," he pointed out. "It can act to prevent manipulation and to prosecute fraud, but in the final analysis the investor's judgment must govern his actions. We cannot save a fool from his folly."

Roosevelt Goes West

NOMINALLY to visit his daughter in Seattle, actually to find out what recent events have done to his popularity among the people of the Middle and Far West, President Roosevelt left Hyde Park on a special train that also carried members of the White House staff and several cars full of reporters and camera men. Mrs. Roosevelt was with her husband. The President had nothing to say, before his departure, concerning Justice Black, who was on his way back across the Atlantic and was scheduled to take his seat on the Supreme court bench before Mr. Roosevelt's return to Washington.

Plan to Fight "Polio"

JUST before leaving for the Pacific coast, the President announced that he was organizing a new foundation to direct the war against

poliomyelitis or infantile paralysis. It will carry on an educational campaign supervised by experts and put within reach of all doctors and hospitals. The foundation also will see to the financing of responsible research agencies and aid the afflicted in becoming economically independent.

Mr. Roosevelt also gave approval to John Biggers' plans for a voluntary enrollment of the nation's unemployed, to be carried out with the aid of the Post Office department.

Nanking and Canton Bombed

PAYING no attention to the protests of the United States, Great Britain, France and Germany, Japan sent her air fleets on bombing raids that spread death and ruin in Nanking and Canton. Chinese planes met them and fought bravely but with little avail. American Ambassador Nelson Johnson, under instructions from Washington, regretfully abandoned his embassy in the Chinese capital and put his staff aboard the patrol boat Luzon, but they returned to Nanking. It was reported in Tokyo that Chiang Kai-shek would remove the seat of the Chinese government to Chengtu.

The "soviet republic of China" has dissolved itself and the communist Chinese army decided to unite with Chiang's forces.

Madam Perkins Snubbed

FOR the first time in the history of the Labor department, the secretary is not asked to address the annual convention of the American Federation of Labor, to be held in Denver. The list of invited speakers was released, but the name of Madam Perkins was not there. The secretary, whose administration of her office never has been taken very seriously by the country, is considered by the A. F. of L. to be prejudiced in favor of its rival, the C. I. O.

Legion Head Hits Naziism

FOUR hundred thousand members of the American Legion and their families and friends gathered in New York for the annual convention of the organization which opened with a memorial service for dead veterans. Parades, sham battles and plenty of fun-making marked the proceedings, but the former soldiers also gave much time to serious business. Harry W. Colmer, retiring national commander, delivered a notable report on his stewardship, warning against dangers confronting the nation from within and without.

Harry W. Colmer

Colmer declared attempts to subjugate judiciary would destroy the "checks and balances" in government; and he proposed that the American Legion undertake an educational program on the principles set forth in the Constitution. He asked each post to hold at least one meeting this fall on the basic law. The commander's warning against perils from without led him to condemn severely German propaganda in the United States and the alleged action of the German government in fostering the organization of Nazi groups and camps in this country. This he called "a gratuitous insult to our free institutions."

The Legion elected Daniel J. Doherty, a lawyer of Boston, Mass., national commander and awarded the 1938 convention to Los Angeles. Besides condemning Communism, Fascism and Nazism, the convention called for a larger and better equipped army and navy and for a ban on the export of helium gas.

passes down a narrow tunnel. Every fifty feet it intersects a beam of light falling on a photocell, resulting in a permanent record on photographic film. The curtains of light are created by metal frames whose upper and lower surfaces consist of mirrors. A light beam started from the bottom is reflected back and forth until its ray finally touches the photocell concealed in a small box at the top of the frame. Thus the entire space is filled with a light beam.

Invisible Beam Aids in Checking Shell's Speed

Artillery shells are fired through invisible curtains of light to determine their speed by a method developed at the National Research laboratories in Canada, says Popular Mechanics Magazine. The equipment is portable, lending itself to use in the field. Light beams, mirrors, photo-electric cells and sensitive recording apparatus make the speed tests. In effect the shell

Spenic Extract Knits Bones Broken bones heal faster when the patient is fed with spenic extract, Dr. Thomas Foster Wheeland, of Richmond, Va., reported in a recent issue of Modern Medicine, a medical magazine. Administration of spenic extract speeds the firm making of the bone and also improves bone condition, the physician said. Since bones are composed largely of calcium, it is probable the spenic extract stimulates the deposit of calcium in the bone.

Eden Still Hopeful

ANTHONY EDEN, British foreign minister, hurried from Geneva to attend a special cabinet meeting to which he reported on developments in the Mediterranean situation that is so threatening to European peace. He told of Italy's reiteration of its demand for parity in the "anti-piracy" patrol, and it was believed both he and Prime Minister Chamberlain were hopeful that a rupture could be averted by a partial yielding to Mussolini in this matter. British public opinion was said to be strongly against a complete concession.

Anthony Eden

Meanwhile events in the Mediterranean were such as to bolster Eden's peaceful designs. The British aircraft carrier Glorious reported it had been attacked by a submarine near Malta just as it arrived to take part in the patrol of the sea. Also the admiralty announced an unidentified airplane dropped six bombs close to the destroyer Fearless. The British and French fleets began their search for "pirate" submarines.

Spain's premier, Juan Negrin, stood up before the League of Nations and fearlessly presented the evidence of Italian and German intervention in the Spanish civil war, demanding that the league take steps to stop it. He called Mussolini and Hitler "international highwaymen."

The assembly of the League of Nations voted down the Spanish government's request for re-election as a member of the league council.

President on Constitution

ALL orators on the one hundred fiftieth anniversary of the signing of the Constitution were loud in praise of that great document. President Roosevelt, speaking from the foot of the Washington monument, was emphatic in his expression of admiration for and loyalty to the basic law which his opponents have accused him of trying to undermine. But he called it a "layman's constitution, not a lawyer's contract." He reiterated his assertions that the Constitution was intended by its makers to be a statement of objects and not a rigid document, and that democratic government in this country can do all things which "commonsense people, seeing the picture as a whole, have the right to expect." "I believe that these things can be done under the Constitution without the surrender of a single one of the civil and religious liberties it was intended to safeguard," Mr. Roosevelt continued, "and I am determined that under the Constitution those things shall be done."

Green Slams Lewis

DENUNCIATIONS of William Green by John Lewis and of Lewis by Green came almost daily, but the attack on the C. I. O. leader by the president of the A. F. of L. in a speech in Washington was especially vigorous. He declared the "little-brother Lewis was an opportunist who hopes to gain political power through the formation of a party combining labor and agriculture, and reiterated the opposition of the federation to the organization of such a party.

Lewis, said Green, was to blame for the bloody strike in "little steel" plants and for its collapse which he attributed to C. I. O.'s disregard of the rule that the workers themselves should decide when to strike. "Surely those who are to suffer and sacrifice in a strike ought to be accorded the right to say whether they are ready and willing to do so," Green asserted. "The issues involved in any impending industrial conflict ought to be made clear and thoroughly understood."

Vandenberg's Battle Cry

"WE HAVE just begun to fight" was the battle cry adopted by Senator Vandenberg of Michigan in a speech at Bay City that was taken as the opening of his campaign for the Republican Presidential nomination in 1940. He made it evident that he hopes to be the standard bearer for a coalition party, asserting that a realignment of political parties is inevitable. "Indeed," he declared, this probably was the one thing that could save our national institutions. He was not so sure that the opposition to the Roosevelt policies would unite under a new party name. Said he: "There may be a realistic realignment which will bring like-thinking patriots into common battle front, whether they live north or south of the Mason and Dixon line, whether they live east or west of the Mississippi."

Biggers to Manage Census

UNCLE SAM is going to make a count of his unemployed nephews in the hope that this will help solve the re-employment and relief problem. Just how the census is to be managed is not yet determined, but John D. Biggers of Toledo, president of the Libby-Owens-Ford Glass company, has been named administrator of the undertaking and is formulating his plans. At the suggestion of the President, Mr. Biggers has established his headquarters in the Department of Commerce, and he hopes to complete the tabulation of the unemployed before December 1. Mr. Biggers said he proposed to do the job without salary.

Originated Railway Guides George Branchaw (1801-53), an English map engraver, was the originator of railway guides. In 1839 he published Bradshaw's Railway Time Tables, which later were known as Bradshaw's Railway Companion.

Important Underground Station Oberlin, Ohio, was the most important station on the Underground railroad. Escaping slaves knew that to reach this town was to reach a haven of safety, for none was ever returned to bondage from there.

What Irvin S. Cobb Thinks about

Our National Bird. LAS VEGAS, NEV. — Those folks back East who're agitating to make the turkey our national bird are late. Benjamin Franklin had the same notion 150 years ago.

Old Ben pointed out that the eagle was a robber and a tyrant and was the emblem of various European monarchies, whereas the turkey was not only our largest and gamest wild bird, but a native of America.

To be sure, young turkeys aren't so smart. They love to get their feet wet so they may die from it. In dry sections, young turkeys have been known to jump down an artesian well 90 feet deep in order to get their feet wet. But the adult turkey is wise and wily, a noble spectacle in the woods and popular in a cooked state, owing to his magnificent bust development and his capacity for holding stuffing or insertion, and his superiority when worked over into turkey hash.

But if we are going to make a change in emblems, why not choose the worm—the humble, dumb, unresisting worm—as typical of most of the present populace? It could be a one-sided worm, too, which would save costs in modeling, because so many of us are the kinds of worms that never turn.

The Sucker Crop.

PARLIAMENT, next month, will pass statutes to curb stock market tricksters, fly-by-night brokers, and bucket shop operators who, it's estimated, are fleecing the British public to the tune of \$25,000,000 annually. We've tried it and it doesn't work. As Barnum stated, a sucker is born every minute—and sometimes twins. But the crooks who prey on the sucker crop, like the Dionne quintuplets, come along in batches. That breed spawn close to shore and the young all survive.

Thus is the rule of supply and demand balanced. In good times, there are just enough suckers to go around. In hard times, the suckers grow scarce, but when one comes along, the crooks raffle him off and the winner takes all.

Anyhow, legislation won't save a sucker from himself—at least not in this country. He'll break through the law in order to prove he's a sucker in good standing in the suckers' lodge.

By the way, brother-member, how many degrees have you taken?

Restrained Statements.

A WAYFARER in Oklahoma, who claimed to have starved himself for forty-one days, on being asked how he felt, replied that he felt sort of hungry. Investigation showed the stranger had been cheating now and then to the extent of a clandestine beef stew or a surreptitious stack of wheat, but wasn't it a magnificently restrained statement?

For underemphasis, I can think of but a single instance to match it. In my youth, we had a policeman in our town with a nervous mannerism of killing folks.

One night, I was passing Uncle Tom Emery's saloon and snackstand for colored only. A group of subdued-looking customers fetched out the limp remains of a dark person who had been bored thrice through the heart.

"Uncle Tom," I inquired of the proprietor, "isn't that Monkey John?"

"Sho' is suh." "How did it happen?" I asked. "Well, suh," said Uncle Tom, "it seem like he musta antagonized Mr. Buck Evitts."

Smoked Glasses for Snakes.

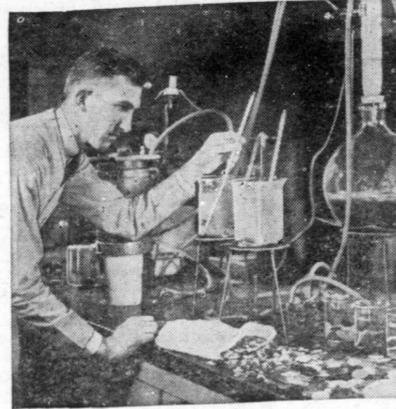

ON THE way here, I attended the year's snake dance. The snake dance has become indeed a strange sight—for the snakes. If the tourists don't modify their wardrobes by next year, I expect to see the snakes wearing smoked glasses. Veteran snakes that have taken part during past seasons are showing signs of the strain. The bull snakes still hiss—as who could blame them?—but the rattlers no longer rattle freely, evidently fearing it might be mistaken for applause.

The commissioner of Indian affairs wants the Navajoes to grow fewer goats. The Navajoes are killing. Goat hair is a profitable crop; goat meat makes good eating—for an aborigine stomach, anyhow—and goat smell is agreeable for Navajo noses. It seems to neutralize some of the other perfumes noticed during shopping hour in a reservation trading post.

GEMS MADE FROM CARBOLIC ACID

Country Newspaper Editor's Discovery Led to Huge Industry, affecting Every Walk of Life in "the Plastic Age."

By WILLIAM C. UTLEY

COUNTRY newspaper editors have exerted upon American life an influence which is perhaps second to that of no other group of men. But one country editor little dreamed 65 years ago that he had started something destined to become a new and amazingly common factor in the daily life of virtually all Americans—indeed, in the lives of persons in every corner of the world. He simply believed he had failed to win \$10,000.

Now country newspaper editors are not wealthy as a rule, and John Wesley Hyatt, editor and printer of Starke, N. Y., was no exception. He had ideas, though. And when a billiard ball manufacturer, discouraged by the expense of stalking African pachyderms for the raw material of which his product was made, offered \$10,000 for a synthetic ivory substitute, Hyatt began some serious tinkering with test tubes, retorts and a Bunsen burner in the back of his shop.

Somehow, between type cases, an old Washington hand press and his laboratory, Editor Hyatt managed to keep from getting highly explosive gun cotton mixed up with the local items and the legal notices, and conducted exhaustive experiments. From this gun cotton (nitrocellulose) he failed to produce synthetic ivory, and of course he missed out on the \$10,000 prize. But he did stumble upon something of far vaster importance to the human race than all the ivory in the world—he found the formula for celluloid.

Celluloid was the first commercially usable plastic; it opened the pages of history to what we now think of as "the plastic age." They make billiard balls, jewelry and a few fancy doo-dads out of ivory, and they still do. But today, through the magic of modern chemistry, more than 300,000 articles in general use are manufactured by the men who pioneered in plastics.

What Plastics Are.

The end is nowhere in sight; in fact the plastics industry is still in its swaddling clothes. But the effect it will have upon society in the days to come is not going without recognition. The national resources committee, in its much-publicized report to the President, recommending social planning for the development of new inventions and young industries, named plastics with television, airplanes, the mechanical cotton-picker and other innovations, as one of the inventions most likely to have profound effect upon our society of the next fifteen years. Yet you cannot find one person in fifty who can tell you much about how plastics are made, or one person in ten who can even tell you what they are.

Actually, a plastic is anything that can be molded or pressed into a desired shape. In industry the term applies to a wide range of synthetic materials classified according to their chemical nature and the way they are made. The most important classification in industry—and in our daily life—is phenolic resin. The utility of this plastic was accidentally discovered; in fact fortunate accidents were largely responsible for "the plastic age."

Ten years after Editor Hyatt stumbled upon celluloid, the material was in general use; 10,000 highly diversified articles were made from it, the most famed probably being the old celluloid collar that reached popularity in the days of handlebar moustaches.

Catalin Was a War Baby. Next in the succession of plastic accidents was the discovery made by Dr. Leo Baekeland, Belgian-American scientist, forty years after the Hyatt incident. Experimenting in his laboratory at Yonkers, N. Y., Dr. Baekeland was searching for a highly insulating material much in demand by the electrical industry. He inadvertently hit upon the formula for a cast phenolic resin which was non-inflammable. This was highly important. Any

one who can remember back three decades can recall when "the best dressed man in town" had to be mighty careful with his cigar because his celluloid collar, which could be wiped off with a damp cloth, could also be touched off by a tiny spark, leaving him a bit hot under the collar. The inflammability of celluloid and the consequent hazard of storing it had precluded the extension of its use, but the discovery of the new non-inflammable material gave impetus to the broadening use of plastics.

The World war set the stage for the third and most recent important development in the world of plastics. European Entente chemists worked feverishly trying to create a synthetic rubber from phenol (the carbolic acid derivative of coal) and formaldehyde (a gaseous derivative of wood alcohol captivated in water). Desperate they were, these researchers. With their ports blockaded and supplies cut off, the Entente nations needed raw materials. Rubber was sorely needed to soften the screech of iron-tired wheels of military equipment, which creaked and rattled, indicating their positions to the enemy just as definitely as if they had shouted, "Here we are." Gas masks, footwear and other articles required the precious rubber.

Synthetic rubber eluded them. But the German scientists did discover catalin, a material similar to that discovered by Dr. Baekeland, and made from the same ingredients, but so processed that it would be produced in a new aura of color ranging from water-clear white, resembling glass, to delicate pastels, vivid hues, black, white, ivory and many combinations of colors deftly divided or blended by mottling.

The Germans had too much other business on hand to spend a great deal of time in the development of catalin, so the formula, patent rights and manufacturing privileges were bought by Americans.

Industry Still in Infancy.

Three important plastics had now been introduced to American industry. It was not long before 3,000 manufacturers, many of whose wheels had been idle, learned that they could make many salable items from plastic materials, using the same machinery which had formerly been used in tooling wood or soft metals and with the same craftsmen and technique. A shining example is a Canadian firm which made spoons for thread. Its community depended upon the employment it offered for a living; yet its market had fallen to nearly nothing. The plant turned to the manufacture of catalin articles and now, with the same equipment and craftsmen, it produces buttons, jewelry and scores of other items that amaze the public with their brilliant beauty.

The flood of plastic articles to the market has in a few years altered fashion trends in costume jewelry, made insignificant accessories an important part in the fashion picture, created thousands of new versions of useful articles—and the President's natural resources committee warns that the industry is only in its infancy, that society will have to plan to adjust itself to its development. Thus is the magnitude of this "plastic age" being recognized by men who contemplate our future!

Left: In testing laboratory, a chemist puts catalin buttons through the same trials they would "face in years of wear. Right: Adding color to catalin.

through a plastic switch, fittings, and in all that serves a table lamp with shade. (For lamp shades being made of paper, glass, liquid phenolic resin, or commonly used plastic materials commercially. Dials for radios and speedometers are treated, providing an efficient and economical method for previous processes.) This is just a fair sampling. Driving to business, we see handle and all sorts of plastic instrument panels. The telephone is made of plastic, and a "on" bet that so are the ashtray on the desk, surface woods in the home cemented in place with plastic adhesive.

How Catalin is Made. Almost no matter what you encounter plastic, colorful wall panels, window frames, dwellings and many made of them. So many articles, cosmetics, buckles, umbrella handles, golf club fittings, and many more. Even "store" and "we are here" signs are made of plastics, as are the to which they are affixed. Who like to quaff the beverage of certain drinks, the advent of certain drinks was a welcome boon, but type plates were determined, catalin, while catalin was in the distillery is only one of the professional fields in which turn into almost any shape, endeavor and there is a making important new materials.

Catalin is made by formaldehyde and phenol in lined bottles of approximately pounds capacity. The reduced to about 1,500 pounds complete. The mixture is at a low temperature. Reduced by the reaction of the ingredients and held down even temperature by the water, vacuum or steam on the side jacket. At this stage it is added.

Here catalin has the molasses, and is poured lead molds to form the required by the fabricator. Three color combinations cast at a single pouring, leading the different colors their proper places. Can poured into pans and cured (heated) until it gels (gelatinous) is sliced into thicknesses.

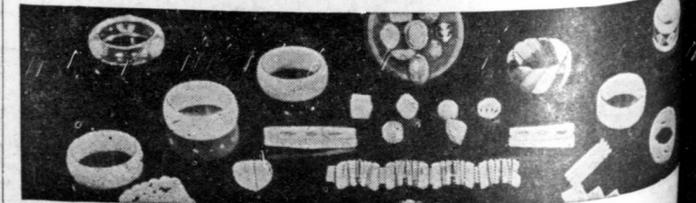

Magnificent Future. In the curing operation, moderate temperature would permit a turning around in them, catalin is then ready for delivery to the fabricator, who cuts it into bufts it and otherwise uses the finished product into the market.

So great has been the priority about plastics, since the national resources committee's report, that one Hollywood has filmed the picture of multi-colored catalin colors. The picture was for release in 8,000 theaters.

What of the future? The utter lack of limitations for cast resins, dyes, and because of its beauty, its extreme "workability," its many peculiar characteristics, the stuff for pioneers in every branch of industry.

Country newspaper editor Wesley Hyatt really started something when he began to resin which his chosen field 65

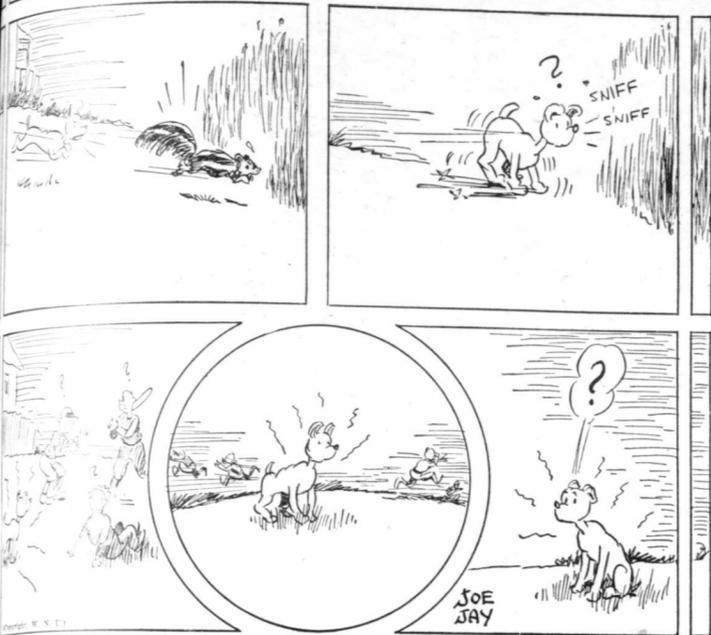

How do the 300,000 articles now made from catalin and other plastics affect our daily lives? We start the day with a plastic-handled tooth brush, razor and comb. At the breakfast table we may find knives forks and spoons with colorful handles of catalin—the insulating handles of the toaster and percolator are of the same material. The kitchen electric service comes

This catalin jewelry was once carbolic acid, and before that, just plain coal.

World's Foremost Authority on Etiquette

There's Good Reason for Visiting Cards

DEAR Mrs. Post: Visiting card formalities are something I never will understand. I've moved into a strange community and neighbors and friends are calling and leaving their cards. Why do they leave cards when I'm in and receive them? I can understand why they would leave cards in my absence but not otherwise.

Wedding Announcement Need Not Name Town

DEAR Mrs. Post: On wedding announcements may I omit the name of the town in which we were married? Or if there must be some town mentioned may I use the name of my home town instead? We were married out of the state and I don't care especially to use the name of the town if it is possible to omit it.

Proper Invitation Form.

DEAR Mrs. Post: Will you suggest a form for an important dinner to be given by the children of a couple who are to be honored on their fiftieth wedding anniversary? Everything I write out doesn't seem correct.

How to Accept.

DEAR Mrs. Post: How in the world can so much be written by hand when answering a third person invitation sent out by a committee of a certain organization, both names appearing on the form as well as the names of two guests of honor?

The Wedding Breakfast

DEAR Mrs. Post: Will you suggest a good menu for a ten o'clock wedding breakfast? There will be only about two dozen guests.

No "Tails" on Sunday

DEAR Mrs. Post: Will you kindly settle a question in dressing for us? I have always understood that "tails" for men are absolutely correct at any time after dark, no matter what the day. We have just been told that this does not include Sunday.

How You Do It

WHEN someone says "How do you do" is it correct to say "I am fine, thank you" or is "How do you do" to be taken only as a greeting?

Washington Digest

National Topics Interpreted by William Bruckart

Washington.—Wall Street and the securities market generally have been undergoing a bad case of jitters. It has been several years since those dealing in money and shares of stock have been so uncertain as to the future and this uncertainty obviously is the cause of the jitters among all people who dabble in the stock market, whether the dabbling be small or large, on margin or for cash.

It seems a proper time, therefore, to examine the picture and try to see what lies beneath. And, let me hasten to say at the very outset that anyone who makes a positive statement about the securities market these days must be either a fool or a supernumerary—and thus far the supernumerary who have lived on this earth number only one.

I said that Wall Street lacked unanimity within itself. That is true because within Wall Street there are all kinds of selfish groups operating. For example, an influence like inflation is highly pleasing to the brokers and dealers in shares while the same influence frightens bankers and likewise gives a sickening feeling to those who must buy raw products.

Block Case Involved

Wall Street can't agree. They do not show, however, why there is so much uncertainty and why the bulls or the bears have been unable to adjust themselves to the future probabilities. The reasons, therefore, must lie deeper. It is possible that the appointment of Hugo Black of Alabama as an associate justice of the Supreme court of the United States has had more effect on the business world than any of us realize.

Then, there comes the resignation of James M. Landis as chairman of the securities and exchange commission which regulates operations of the great stock exchanges. Mr. Landis has been regarded as rather fair, rather just, in his dealings relating to stock market operations.

Now, as to Effects

Let us look at possible effects. It will be remembered how President Hoover was blamed for the depression. He and the Republican party were punished on that account and badly licked in the elections. It ought to be said in Mr. Hoover's behalf that the conditions which led to the depression had their real beginning in the World War.

highest point our United States ever has known, a great many people, including bankers, have become fearful of what they might get for United States bonds that they now hold. It is obvious that this influence adds to the general uncertainty although it is difficult to measure the exact influence of this condition, or to see whether it is a major or a minor factor.

Having enumerated a few of the influences known to be at work, we come now to that condition which heretofore always has been basic. I refer to general business conditions. New Deal press agents have tried valiantly to make it appear that business is booming; that prosperity is here instead of around the corner; and that the country has nothing to fear.

Business Conditions

I am not saying that we are confronted with another depression. I do say, however, that we are facing a condition that is not at all satisfactory—a condition that can lead to a depression as easily as it can lead to sound prosperity in commerce and industry.

Anyone talking with a hundred different individuals will hear these various factors and influences mentioned. He will hear different weight given by each individual to each factor.

Let us look at possible effects. It will be remembered how President Hoover was blamed for the depression. He and the Republican party were punished on that account and badly licked in the elections.

But we are coming to another election. If conditions should become worse and business should decline perceptibly again, Mr. Roosevelt will be held responsible just as definitely as was Mr. Hoover. He will be charged with having made a mess of government and any attempt on his part to prove the condition was natural will be regarded as an alibi.

Okapi of Giraffe Family Okapi is the native African name for an animal of the giraffe family (Ocapia johnstoni). The okapi is about five feet high at the withers. The forehead is red, the cheeks yellowish white, while the neck, shoulders and body range from jet black to purplish and wine red.

Bad Case of Jitters

Washington.—Wall Street and the securities market generally have been undergoing a bad case of the jitters. It has been several years since those dealing in money and shares of stock have been so uncertain as to the future and this uncertainty obviously is the cause of the jitters among all people who dabble in the stock market, whether the dabbling be small or large, on margin or for cash.

Business Conditions

Having enumerated a few of the influences known to be at work, we come now to that condition which heretofore always has been basic. I refer to general business conditions.

Black Case Involved

A dozen other illustrations could be given to thus illustrate the point and show why Wall Street cannot agree. They do not show, however, why there is so much uncertainty and why the bulls or the bears have been unable to adjust themselves to the future probabilities.

Now, as to Effects

Let us look at possible effects. It will be remembered how President Hoover was blamed for the depression. He and the Republican party were punished on that account and badly licked in the elections.

Okapi of Giraffe Family

Okapi is the native African name for an animal of the giraffe family (Ocapia johnstoni). The okapi is about five feet high at the withers. The forehead is red, the cheeks yellowish white, while the neck, shoulders and body range from jet-black to purplish and wine red.

highest point our United States ever has known, a great many people, including bankers, have become fearful of what they might get for United States bonds that they now hold. It is obvious that this influence adds to the general uncertainty although it is difficult to measure the exact influence of this condition, or to see whether it is a major or a minor factor.

Business Conditions

But that fact does not destroy the value of an examination of a condition which exists as a fact. Indeed, I think a review of the various factors and influences at work now can provide a clarification of general conditions even though it may fail utterly to show why men and women act as they do with respect to stock market investments.

First, it should be said that Wall Street, as the term is commonly used, is not unanimous within itself. The violent fluctuation of market securities in the last several weeks might easily be said to be due to the war crises in Europe and in the Far East. Only those fluctuations are not traceable to war conditions.

I am not saying that we are confronted with another depression. I do say, however, that we are facing a condition that is not at all satisfactory—a condition that can lead to a depression as easily as it can lead to sound prosperity in commerce and industry.

So, if one is compelled to make a guess why Wall Street is so concerned or so jittery, it would seem that the explanation must lie in the combination of circumstances. No one of them, except possibly the adverse business outlook, could accomplish as much doubt about the future.

Anyone talking with a hundred different individuals will hear these various factors and influences mentioned. He will hear different weight given by each individual to each factor. I think no one has the gift or the power to calculate the relationship of the various factors completely but that does not alter my definite conviction or feeling that caution must be exercised among government officials as well as among those in private life if we are to avoid a repetition of the crash of 1929.

We have been dealing with causes. Let us look at possible effects. It will be remembered how President Hoover was blamed for the depression. He and the Republican party were punished on that account and badly licked in the elections.

Then, there comes the resignation of James M. Landis as chairman of the securities and exchange commission which regulates operations of the great stock exchanges. Mr. Landis has been regarded as rather fair, rather just, in his dealings relating to stock market operations. His retirement to return to a professorship in Harvard, of course, opens up the question as to his successor. This is to say that most of the financial world is hoping and praying that the new chairman will not go off at a tangent; that he will avoid extreme radicalism and that he will not blame the whole financial structure for the crookedness of a part of it.

Thus, it becomes easy to see how this minor factor may have weight with some individuals dealing in corporate shares and bonds. William O. Douglas, a member of the commission, has been slated to become chairman but developments in recent weeks give considerable doubt over that result. Mr. Douglas is recorded as being a radical. Bankers and investors in many parts of the country fear that if he is made chairman he will become not unlike the famous bull in a china cabinet. But, according to the undecurrent of gossip around Washington Mr. Douglas has done something to offend Postmaster General Farley, and no man can draw an appointment as important as the chairmanship of a great commission without Mr. Farley's approval.

Aside from personalities, various phases of President Roosevelt's monetary policies continue to be disturbing and in addition to these there is the certainty that new taxes must be levied. That is, new taxes must be levied if we are ever going to balance the federal budget and begin paying off the gigantic national debt which now amounts to more than \$38 billion. With a debt at the

EDITORIAL

At last the drivers of cars at our school have realized the cost of the wasted gas and the hazards of noon-hour driving, and have agreed not to drive around in town at noon unless they should find it necessary and then, they alone will go. There will be no more guest-riders as there has formerly been; no more packing five, six, or seven boys into a car to fly off for a little noon-hour joyride.

These drivers, who have the family car as their responsibility, have realized that the gas would disappear quickly from the tanks and knew, too, that the riders had not paid for it, and that their parents could not pay for it, and that they, the students, earned no money so they couldn't afford it either.

There has never been an accident at school due to noon-hour drivers, but "an ounce of prevention is worth a pound of cure." There are many dangers involved in the carefree, careless actions on the part of the driver of the car. As they ride down the street the driver joins in the merriment of the rest of the group and forgets that he is coming to a corner, a cross-road, or a stop sign. That is where the hazards begin. Have you ever stopped to consider the real cost of an automobile accident? It is not the money which must be paid to have the car repaired, but look at the side of things which money cannot repay. It may be ill-luck take the life of some student or disable someone for life. Then you say to yourself, "Wouldn't it have been cheaper to walk?"

If someone thinks that a candy bar or an ice cream cone is essential to top off his meal, it will harm no one to walk one or two blocks for it. Many students who ride to school each day do not walk a great deal and are in need of this exercise.

Parents give their boys or girls the car to drive to and from school. They do not think that their cars are being used for pleasure-jaunting purposes. Yes, our young high school people are aware of the fact that it is neither safe, sane, nor inexpensive to drive a car during noon-hours and they have signified their intentions of leaving the cars at school.

EDITORIAL

At last the drivers of cars at our school have realized the cost of the wasted gas and the hazards of noon-hour driving, and have agreed not to drive around in town at noon unless they should find it necessary and then, they alone will go. There will be no more guest-riders as there has formerly been; no more packing five, six, or seven boys into a car to fly off for a little noon-hour joyride.

These drivers, who have the family car as their responsibility, have realized that the gas would disappear quickly from the tanks and knew, too, that the riders had not paid for it, and that their parents could not pay for it, and that they, the students, earned no money so they couldn't afford it either.

FIRE PREVENTION WEEK

October 3 to 9 is fire prevention week. It is a special occasion and offers a special opportunity to enlist with friends and town officials and the public for a concentrated and continuous fire prevention program. October 9 marks the anniversary of the great Chicago fire of 1871.

Fire is one of man's greatest servants and yet at times it has proved to be man's most vicious enemy and destroyer of life and property. Fire can destroy the happiest home, the busiest shop, or the most pleasant community at most any time and without the slightest warning. Fire on the rampage respects no man.

Last year in the United States fire was responsible for approximately 9000 deaths, and a money loss in property amounting to \$293,000,000. In Wisconsin there were 12,977 fires at a cost of \$5,890,245. More than 8,000 residences were involved.

The sacrifice of precious lives, limbs and property in Wisconsin and elsewhere is needless and a serious reflection on our citizens. Fire departments, all civic, commercial and luncheon clubs through appropriate programs during Fire Prevention Week can do much to awaken civic pride and "fire consciousness."

Fire prevention talks, essay contests and programs in schools are very effective. Every fire department has men who can give fire prevention talks. One of the greatest causes of fires is poor housekeeping in homes, stores and places of employment. Last year many thousands of dollars worth of stock were destroyed by basement fires. Under work benches, machines, and in corners of shops may be sawdust, oily rags, waste material.

Now is the time to clean up all basements and garages, sell salable junk and destroy the rest. Old wooden shingle roofs, moss grown and deteriorated, need fixing, and may just be waiting for a spark from the chimney to ignite them. Clean out chimneys and smoke pipes before the cold weather sets in.

Dry grass, leaves and weeds should be cleaned up and removed. Burn rubbish in a safe place away from buildings.

Hunters and hikers frequenting woods and forest areas should be urged to be particularly careful with camp fires, matches, cigarettes, cigars and pipe smoking. Forest and marsh lands are dry and ready to burst into flames. It gives a chance. Remember it takes many years to grow a forest of good timber but it can be destroyed by fire in a day.

Just plain common sense if applied will eliminate many easily prevented causes of fires in every community of our state.

EAST VALLEY

Mr. and Mrs. Joe Schiltz spent Sunday with Mr. and Mrs. John Klug. Jerome Schiltz of Milwaukee spent Sunday with Mr. and Mrs. Joe Schiltz. Mr. and Mrs. Julius Reysen and family spent Tuesday with friends at Poyntte.

Mr. and Mrs. William Pesch of West Bend spent Sunday with Mr. and Mrs. Elroy Pesch and family. Mrs. Henry Reysen and daughter, Edna of Beechwood called at the Julius Reysen home Saturday.

Mr. and Mrs. Julius Reysen and daughter Ruth called on Mr. and Mrs. John Sell Thursday evening. Miss Flora Reysen of La Grange, Ill. spent the week end with Mr. and Mrs. Julius Reysen and family.

Mr. and Mrs. Joe Hammes and daughter of West Bend spent Sunday with Mr. and Mrs. Nic. Hammes and son John.

Mr. and Mrs. J. P. Uelmen entertained the following guests at supper at their home Sunday: Mr. and Mrs. Emil Schleis, daughters Alice, Agnes and Janis and son Junior of Kewaunee and Mrs. Mary Uelmen of Campbellsport.

Louis Stern and family of Scott, Mr. and Mrs. John Schulz and daughter Emma of Lake Fifteen, Mr. and Mrs. Arnold Butzke and daughter Lucille of Round Lake, Mr. and Mrs. Clarence Stern and family, Mr. and Mrs. Henry Becker and daughter Gladys of Kewaskum, Mr. and Mrs. Hilbert Roehl, daughter Shirley and Otto Stern of Waubesa, Fred Marquardt and son Marvin of Dundee, Mr. and Mrs. Geo. Stern and family and Mr. and Mrs. Wm. F. Schulz of here spent Sunday with Mr. and Mrs. August Stern.

Miss Ruth Koepsel spent the week end at Milwaukee. Mr. and Mrs. Martin Koepsel and daughter Alice spent Sunday at Milwaukee.

A number of friends and relatives from here attended the funeral of Valeria Meyer, Sunday. Mr. and Mrs. C. Beisbier of Ashford visited with Mr. and Mrs. Lester Butchlet and daughter Joyce.

Mr. and Mrs. Ben. Rauen and son Bobby, Mr. and Mrs. Paul Glander and sons of West Bend visited with Mr. and Mrs. Fred Schleif and family Sunday.

Mr. and Mrs. Ben. Steinacker and family of Campbellsport accompanied Mr. and Mrs. Fred Schleif and family to West Bend Thursday evening where they attended the opening of the new General Electric company building.

To Dr. Stephen M. Babcock and H. L. Russell is due much of the credit for the present process for cold curing of cheese.

ADELL

Elmer Staeger was a Kewaskum business caller Wednesday. Mr. and Mrs. Marvin Weisbold and family were Plymouth callers Saturday.

Mr. and Mrs. Wm. Schmidt and family visited Sunday afternoon with Mr. and Mrs. Art Winter. Miss Neida Staeger of Milwaukee visited from Saturday until Sunday with her parents, Mr. and Mrs. Staeger.

Mr. and Mrs. Elmer Staeger and family visited Sunday evening with Mr. and Mrs. Julius Staeger and family and Mrs. David Winter. Misses Anita and Marian Hanneke and Albert and Clarence Hanneke visited from Saturday until Monday with friends and relatives up north in Michigan.

Mr. and Mrs. Arno Plautz and daughter Alice, Mr. and Mrs. George Goedde of Sheboygan Falls, Arno and Philip Schmidt and Verma Plautz visited Sunday evening with Mr. and Mrs. Wm. Schmidt.

Those who were Plymouth callers Saturday evening were: Mr. and Mrs. John Borgehagen and family, Mr. and Mrs. Otto Spieker and family, Mr. and Mrs. Staeger and family, Mr. and Mrs. Plautz and family, Mr. and Mrs. Goedel and family and Clarence Hanneke.

Those who visited last Tuesday evening with Mr. and Mrs. Elmer Staeger and family, where they helped celebrate Little Miss Mildred Staeger's tenth birthday anniversary were the following: Mr. and Mrs. Edgar Sook and Albert Janathon of Kewaskum, Mr. and Mrs. Emil White and son Lester, Mr. and Mrs. Wm. Hanneke and daughter Doris and son Herman, Mr. Herman White, Mr. and Mrs. Leonard Klug and son Floyd, Ed. Koepke, all of Scott; Miss Anna Hanneke, Albert and Clarence Hanneke, Mrs. Julius Staeger and son Herman and Grandma Hammen of Bushong.

FARM AND HOME LINES
Something like one thousand temporary silos will be used this year. Wisconsin farmers to conserve soil or flow supply of cut or stored feed.

Failure of market poultry receipts show the usual seasonal conditions brought August poultry prices to their highest point they have reached this year.

With the large storage stocks of moving rather slowly and with larger numbers of hens being marketed to exceed those of last year.

The proposed marketing program is designed to improve the growers and to insure better prices for the out-of-state shipments of grown potatoes.
