

Tom Green Buys Decorah Dairy at West Bend

Tom Green of Kewaskum has purchased the dairy business of the Decorah Dairy, Inc. at West Bend. Announcement of the sale was made public by the dairy Monday in a letter delivered to its patrons. The new owner took over operation of the business on Wednesday, Oct. 1.

Prior to purchasing the Decorah Dairy, Green was employed as laboratory and field director for the Wm. H. Heinemann Dairy in Kewaskum, which position he held for a number of years past.

Green is a graduate of the University of Wisconsin College of Agriculture. He specialized in dairy manufacturing at the state university and for the past 12 years has been employed by various large dairy plants in the state. He has a wide variety of practical and technical experience.

Green stated that it is his intention to maintain the present high standards of Decorah Dairy, but he also hopes to use his experience to create new products and to improve them in every way to give his customers complete satisfaction. Green, his wife and seven children will move to West Bend at the earliest opportunity.

The history of the Decorah Dairy dates back to 1929 when the Decorah farm was purchased by the late B. C. Ziegler. People began stopping at the farm house for milk in increasing numbers until the amount of milk sold in this manner warranted the processing and distribution of milk on a limited scale.

It became evident that the supply of milk produced by the Decorah herd was insufficient to meet the requirements of the business. Gradually other high-quality milk shippers were enlisted to provide milk for the prospering business.

Since its inception, Decorah Dairy has been the exclusive distributor of Golden Guernsey milk in West Bend, dairy officials report. During its 20 odd years of operation the dairy has enjoyed an excellent reputation for high quality products. Irvin E. Holzhueter has managed the farm and dairy since 1942 and plans to continue operating the farm. Holzhueter is a former classmate of Green at the Wisconsin College of Agriculture.

Green has severed his connection with the Heinemann Dairy here.

IN THE SERVICE

BOEGEL HAS NEW ADDRESS
Pfc. Lambert Boegel, son of Mr. and Mrs. Oscar Boegel, town of Waukegan, who is serving overseas with the marine corps, has the following new address: Pfc. Lambert Boegel 119742, U.S.M.C., H & S Co. Motor Transport, 1st Mar. Regt., 1st Mar. Div. F.M.F., c/o F.P.O., San Francisco, Calif.

PVT. NIGH TRANSFERRED
Pvt. Leo Nigh, son of the Elmer Nighs of the town of Auburn, returned Korean veteran who has been a patient at Percy Jones hospital, Battle Creek, Mich., has been transferred to Walter Reed Army hospital, Washington, D. C. His new address is Pvt. Leo A. Nigh US 5521306, Ward 166, Forest Gen. Sec., Walter Reed Army hospital, Washington 12, D. C.

BIRTHS

HORN—A daughter to Mr. and Mrs. Claire Horn, Kewaskum, on Thursday, Sept. 26.
STROBEL—A son to Mr. and Mrs. Bernard "Barney" Strobel, R. 2, Kewaskum, Friday, Sept. 26.
THULL—A son to Mr. and Mrs. Edmund Thull, R. 2, Kewaskum, Friday, Sept. 26.

KAROSIN—A daughter to Mr. and Mrs. John Karosin, Campbellsport, Saturday, Sept. 27, at St. Agnes hospital, Fond du Lac, Wis. Karosin is the former Marian Rohlinger.

SMITH—A daughter to Mr. and Mrs. Les Smith, Green Lake, Wednesday, Sept. 17. Mrs. Smith is the former Helen Bunkelman, daughter of Mr. and Mrs. Wm. Bunkelman, Kewaskum. The Smiths also have a son, Tommy.

Alma Buss Honored for 50 Years As Deaconess

Deaconess Alma Buss of the town of Auburn and four other deaconesses of the Bethesda hospital, Cincinnati, Ohio, were honored recently at a turkey dinner with all the trimmings in the Deaconess home dining room from 6:30 to 9 p. m. The dinner, which included a program, was to celebrate the 25th anniversary of one deaconess, the 40th of three others, and the 50th of Deaconess Buss.

Deaconess Buss' only classmate of a class of eight, now retired and living in Texas, was unable to attend. However, an enjoyable evening was had with the Deaconess family and invited friends, numbering 80 at the table. After the dinner Deaconess Buss was the first one called upon to give her testimony. She recalled the time when the Lord called her to be a deaconess.

Deaconess Buss writes that she is very happy to have the record of being one of the youngest deaconesses to have served 50 years in the Methodist church.

Two Nurses of County Leave for Polio Duty

Miss Doris Ruhnke, 709 S. 4th ave., and Miss Elaine Bohn, R. 3, West Bend, left last week for Minneapolis for polio duty. After their arrival there, they reported to Miss Margaret Aldrich, director of nursing services in Minneapolis for the Hennepin County Red Cross chapter.

Miss Ruhnke is the daughter of Mr. and Mrs. Henry Ruhnke, West Bend. She is a 1952 graduate of St. Mary's School of Nursing in Madison. Miss Bohn, daughter of Mr. and Mrs. Roman Bohn, graduated this year from the St. Agnes School of Nursing in Fond du Lac.

A letter received by Miss Clara B. Jaehnic, executive secretary of the local Red Cross chapter, the director of nursing services in the Minneapolis area said, "Our unfilled needs continue to be between 75 and 80 nurses. You probably have read that this threatens to be the worst polio epidemic in history. This partially accounts for our predicament regarding the recruiting of nurses."

According to Miss Jaehnic, inactive registered nurses are especially urged to respond. Nurses recruited by the Red Cross are requested to serve for a minimum two-month period. Their salaries of \$275 per month are paid by the National Foundation for Infantile Paralysis. In addition, this organization pays the cost of transportation to places of assignment and provides maintenance plus salary while the nurse is serving in polio work.

All nurses who are available for polio duty should contact the West Bend Red Cross chapter in its offices above the library, or Dr. A. H. Heidner, Red Cross medical disaster chairman, Mrs. Harold Fischer, Red Cross nurse enrollment chairman or Mrs. George Sampson, Red Cross disaster nursing chairman.

SENTINEL FEATURES STORY ON MRS. MITCHELL'S FATHER

In the "Jaunts with Jamie" column, the Milwaukee Sentinel ran a story Monday featuring Jack Kinziger, famous taxidermist of Lena, Wis. He is the father of Mrs. Ernest Mitchell of Kewaskum. Mr. Kinziger, 67, has been practicing his art of taxidermy for 43 years and has mounted specimens for sportsmen in 30 of our states. Kinziger's famous collection of animals, birds and fish numbers into many hundreds. He and Mrs. Kinziger operate the Hunter's and Fisherman's tavern at Lena.

GRANTED AMENDMENT TO MOTOR CARRIER LICENSE

The Public Service Commission of Wisconsin has granted without public hearing the following amendment to contract motor carrier license:

Ruben A. Opperman, R. 2, Kewaskum: Milk from the towns of Auburn, Ashford and Eden, Fond du Lac county, and Kewaskum and Wayne, Washington county, to the Orchard Grove cheese factory, town of Farmington, Washington county.

Jean Trapp Bride of Francis Gilboy

Holy Trinity church, Kewaskum, was decorated with palms, white gladioli, white pom poms and autumn leaves for the 9:30 o'clock nuptial ceremony on Saturday morning, Sept. 27, in which Miss Jean Trapp, daughter of Mr. and Mrs. John Trapp, Kewaskum, became the bride of Francis Gilboy, son of Mr. and Mrs. George Gilboy, Cascade. The Rev. F. C. LaBawi officiated at the rite and read the nuptial high mass.

The bride wore a gown of white slipper satin with a nylon net yoke trimmed with French Chantilly lace applied on the train. Her French illusion veil was gathered to a seed pearl headdress. Two white orchids and stephanotis were fastened to the white prayer book she carried. The prayer book was a gift of the bridegroom.

Gold satin gowns with lace jackets and matching hats were worn by the maid of honor, Bernice Trapp, sister of the bride, and Virginia Ashenbrenner, a cousin, from Wisconsin Rapids, who attended as bridesmaid. They carried muffs made of bronze and white pom poms. The bridegroom was attended by his brother, Lawrence Gilboy, as best man and Leo C. Hall, a cousin, as groomsmen. Ushering duties were performed by Louis Trapp and Cyril Gilboy.

Dinner was served and a reception held at Crystal Isle Inn. Later the newlyweds left on a honeymoon through the eastern states. Upon returning they will reside at Long Lake. Both Mr. and Mrs. Gilboy are employees of Regal Ware, Inc., Kewaskum.

LOCAL DRIVER'S CAR RUNS OFF OF ROAD, INTO FIELD

An auto driven by Robert Staehler, Kewaskum, was damaged early Monday morning in a mishap which occurred on Hwy. 28, about one-half mile east of the village. The driver, traveling west, apparently fell asleep at the wheel and his auto crossed the highway and ran into a field on the opposite side where it struck a stump and tore through fences. Staehler was uninjured.

ATTENTION

The Kewaskum library board invites all regular bridge players and substitutes who participated in the card games for the benefit of the library to attend a party on Tuesday, Oct. 7, at 8:00 p. m. at the library.

A secondhand trumpet is a bargain at any price—if it belongs to the boy next door.—R. LeRoy Logan

OFFICE OF THE GOVERNOR MADISON, WISCONSIN

TO THE NEWSPAPER EDITORS AND PUBLISHERS OF WISCONSIN

In recognition of the period Oct. 1 to 8 as National Newspaper Week, I wish to convey my appreciation of the important service you are rendering to the people of this state.

The importance of the press was amply attested by the founders of our country when they included in the Bill of Rights the right to freedom of the press. This right, however, is a responsibility, and an obligation. The unique freedom of the press must reside in the hands of men of integrity and discernment and must not become the tool of demagogues or those who would undermine our nation.

Our democratic way of life is currently being challenged as never before in history. A successful defense against these threatening forces will depend to a very great extent on the performance of the American Press.

Your efforts in presenting the facts to the public deserve the special recognition that is embodied in the occasion of National Newspaper Week.

I congratulate you on the uniform excellence of your efforts and the fine contribution you are making to the public good.

With good wishes,
Sincerely yours,
Walter J. Kohler, Jr.
Governor

Install New Tower Clock at Catholic Church Next Week

Installation of the newly purchased tower clock and bell ringers at Holy Trinity church, which has been eagerly awaited by citizens of Kewaskum and community since the old clock broke down and was stopped last February, will take place next week.

The Rev. F. C. LaBawi, pastor of the parish, was informed in a letter this week from the I. T. Verdun Co. of Cincinnati, Ohio, from which firm the clock and bell ringers were purchased, that their Eugene Dorr and another man will leave Cincinnati this Sunday and bring with them to Kewaskum the entire equipment for the installation. They are expected to arrive here on Monday to start the work and should have the clock and ringers all set up by the end of the week.

The new tower clock was purchased with funds solicited by the Kewaskum Kiwanis club in a drive the members conducted among the businessmen and other adults of the village and community in recent months. The approximate cost of the tower clock money can buy and should faithfully serve the community for a good many years to come. The task of purchasing the bell ringers for the clock was undertaken by members of Holy Trinity congregation who donated the necessary funds.

The old clock, now idle, served the community constantly for a period of 47 years. Better and longer service could not be expected from such a piece of equipment. It was installed when the present church building was erected in 1905. Finally, last February, when the parts had become hopelessly worn and could no longer be replaced, and the clock could not be depended upon anymore, it was stopped at 12 o'clock. It has been 12 o'clock ever since but after next week it is hoped that the hands will again be moving to accurately tell the passerby the time of day.

Duck Hunting Season Opens This Saturday

Hunters will be out for the opening of the duck season and other migratory bird and waterfowl season on this Saturday, Oct. 4, at 1 p. m. The season for wild ducks, coot, sora rail, geese and rails and gallinules will extend through Nov. 27.

The bag limit on duck is four, including not more than one wood duck. The possession limit is eight, with no more than one wood duck. Bag and possession limit on coot or mudhen is 10 and on rail 25. The bag limit on geese is five, with no more than two Canada geese or its sub-species or two white-fronted geese or one of each. Possession limit is five in the aggregate. Both the bag and possession limit on rails and gallinules is 15.

The woodcock season also begins Saturday afternoon and lasts until Nov. 2, inclusive. The bag limit is four and possession eight.

The season on upland birds and squirrels does not open until Oct. 18.

MILLING CO. BUYS WAYNE FACTORY; HOLDS OPENING

The Glenn Milling company of Mayville recently purchased the Purity Cheese factory at Wayne and officially opened the place for business on Monday, Sept. 14. A grand opening was held on the Saturday before, at which prizes were awarded to lucky winners and refreshments were served.

ANOTHER NEW HOME

Work is underway on another new home going up in Roseland Heights, Kewaskum. It is being built by Louis Bunkelman & Son.

HOSPITAL NEWS

Mary Ann Ruplinger, St. Kilian, is a patient at St. Agnes hospital, Fond du Lac, since Sunday.

IT'S NOT true that a woman always has the last word. She must talk to other women sometimes.

Kewaskum Wins 25-0 Over Oaks

TRI-COUNTY STANDINGS

	Won	Lost
Lomira	2	0
Kewaskum	1	1
Campbellsport	1/2	1/2
Brandon	0	0
Oakfield	1/2	1/2
North Fond du Lac	0	1

Results last Friday—Kewaskum 25, Oakfield 0; Lomira 26, North Fond du Lac 6.

Games this Friday—North Fond du Lac at Kewaskum, Campbellsport at Brandon, Lomira at Oostburg (non-conference), Oakfield bye.

Kewaskum rolled over Oakfield by a 25-0 margin on the home gridiron last Friday afternoon. In the only other conference contest Lomira remained undefeated by romping over North Fondy, defending champion, 26-6.

The Indians bounced back from their defeat at the hands of Lomira the previous week by running over the Oaks. Halfback Dick Bunkelman was the scoring ace with 18 points to his credit on three touchdowns. It was the first time this season that a team was shut out.

The fleet-footed Bunkelman has a sizable lead in the circuit's scoring race with 24 points in two games. Seyfert and Michels of Lomira are tied for second with 12 points each.

The Mitchellmen scored in the first quarter after racking up a series of first downs on hard ground battling. With the ball on the five-yard stripe, Bunkelman crashed over for the TD and the extra point was missed.

Then came the big second quarter for Kewaskum. Halfback Bob Hulme broke loose from the line of scrimmage on a 25-yard scamper and crossed the Oakfield goal standing up. A pass from Mark Rosenheimer to Tom Tessar accounted for the extra point and the host team led by 13-0. A few minutes later Bunkelman roared down the field on a brilliant 45-yard run and another touchdown.

In the third period the Kewaskum backfield ace took the ball on the Oakfield 26 yard marker and crashed his way through the opposition for the final score of the game. On his three touchdown runs, Bunkelman rolled up a total of 66 yards.

Kewaskum 6 13 6 0—25
Oakfield 0 0 0 0—0
Touchdowns: Bunkelman 3; Hulme 1; extra point: Tessar 1.

GLENN EDWARD STAELER IS BAPTIZED ON SUNDAY

The Rev. F. C. LaBawi baptized the little son of Mr. and Mrs. Alois Staehler, Jr., Kewaskum, in Holy Trinity church Sunday afternoon. He received the name Glenn Edward. Sponsors were Edward Dreher, Jr. and Kathleen Staehler. Supper guests entertained at the Staehler home for the occasion included Mr. and Mrs. Ed. Dreher and family, Mr. and Mrs. A. M. Staehler and family, Misses Shirley Kohler and Jeanne Gill, Mrs. Julius Dreher, Mr. and Mrs. Clayton Kohn and family.

TWELVE TEAMS IN KETTLE MORAINÉ DARTBALL LEAGUE

The Kettle Moraine Lutheran Dartball league, with 12 teams entered, started its 1952-53 season the past week. There will be two rounds of competition this season or a total of 22 playing nights for each team.

The following teams are represented in the league: West Bend, Adell, Batavia, Dundee, Fredonia, Kohlsville, Kewaskum, New Fane I, New Fane II, Scott, Sherman Center and Slinger.

MISSION FESTIVAL HELD

St. Lucas Ev. Lutheran church celebrated its annual mission festival on Sunday. Guest speakers were the Rev. Richard Ziesener of Ripon, who spoke in the evening, and Professor C. Lawrence of Thiensville, who spoke in the morning.

MARRIAGE LICENSE

Albert C. Wagner, Campbellsport, and Lorena J. Eichstedt, Kewaskum; wedding Oct. 4.

Miss Elizabeth Fellenz, Town Scott Native Dies

Miss Elizabeth Fellenz, 585 Glenview avenue, Wauwatosa, died on Thursday, Sept. 25, after a long illness. Miss Fellenz was 75 years of age and was a native of the town of Scott, R. 1, Kewaskum. A daughter of the late Mr. and Mrs. Henry Fellenz, she had been a resident of Wauwatosa for more than 50 years.

She is survived by five sisters, Mrs. Christine Janssen of West Bend, Mrs. Math. Kies, R. 3, West Bend, Mrs. Cella Byrnes of Okla. South Dakota and Mrs. Lena Schiltz. She also leaves two brothers, Bernard and Gregor Fellenz of West Bend.

Funeral services were conducted from the Becker Funeral home, Milwaukee, to St. Jude's church at 10 o'clock Monday morning, Sept. 29. Burial was in St. Mary's cemetery at Menomonee Falls.

LAWRENCE SCHOENHAAR

Funeral services were held for Lawrence Schoenhaar at Melrose, Minn. last Friday. Mr. Schoenhaar, who was well known locally, was 72 years of age and was born in Kewaskum.

Elect Officers at Meeting of Kewaskum Co-op

The dairy industry is facing a crisis, but indications are that farmers will receive higher prices for their milk for a time in the immediate future.

This was stated by Wm. F. Groves, president of Pure Milk Products Co-operative, who addressed the members of the Kewaskum Local of the organization at a meeting in Kewaskum on Thursday night.

The crisis, Groves said, is resultant of changing consumer trends. He cited the greatly decreased per capita consumption of butter itself, of a growing preference for dairy foods of lower butterfat content and inroads made into dairy markets by manufacturers of synthetic and imitation dairy foods. The market for all dairy products except fluid milk is in jeopardy, Groves warned.

Because consumer demand for butter fat is falling off and demand for the nonfat solids of milk is increasing, the basis for pricing milk should be changed, Groves pointed out. Since all efforts have been directed to producing milk with a higher butterfat content, he said that the change in basis for pricing milk should be made in an evolutionary manner.

To a large degree, Groves declared, the public is being misled concerning imitation dairy foods. Dairymen, he said, must assume responsibility for exposing those products for what they are and get laws passed and enforced that will protect the public against trickery and fraud. He urged that dairy farmers should do everything possible to promote the consumption of genuine dairy products even though they might be of the low butterfat type.

Groves stated that one of the greatest achievements of organized dairying this year was getting the government to retain the law which controls import of foreign dairy products. This action, in which Pure Milk Products Co-operative had a large part, has saved American dairy farmers millions of dollars, he said, pointing out that milk is now selling at 102% of parity and that it would have been driven down to below parity had import restrictions been lifted. Since prices are supported by the government when they fall to below 99% parity, retentions of the import control law also saved the government money.

Arnold Rosenthal, R. 3, West Bend, was re-elected president of the local. Elwyn Hamlyn was named the local's state advisory board member, and Clarence Stageman, by-laws and resolutions committee man.

Other members of the board of directors for the ensuing year are: Vice-pres, Harold Westerman, Kewaskum; sec.-treas., Elwyn Hamlyn, West Bend; directors, Clarence Stageman, Saukville; Orin Peters, West Bend; Elwood Bell, West Bend; Carl Herzig, Kewaskum;

100 Dogs in State Beagle Club Show, Trial Held Here

A total of about 100 dogs competed in the 20th annual American Kennel club licensed championship field trial and specialty bench show of the Wisconsin Beagle club held at Kewaskum over the week end. Although the entry was large, the number of beagles participating did not come up to last year's record entry.

The field trial was held in the area surrounding Kewaskum from Friday through Sunday with about 75 dogs competing in the events. The bench show was held Saturday night at the Woodmen hall with 25 dogs entered to be judged for type and appearance.

Dogs from several states besides Wisconsin were entered in the events. The field trial was held in the wooded areas and swamps surrounding the village. Headquarters for the dogs were at Joe Eberle's kennels. He serves as president of the state club.

The beagles were judged on their ability to track and run rabbits. Due to a scarcity of rabbits, the trial ran until after dark on Sunday. Trophies, ribbons and championship points were awarded to the winning dogs in the trial and show. A list of the winners was not available.

This year's event again proved to be an outstanding success and the club is grateful for the co-operation and treatment given the members.

Induct Six County Men Into Service

Six young men from Washington county were inducted into the armed forces last week, representing the county's quota for the month of September. The selective service office at Hartford revealed that the October quota will be 13, the largest it has been for several months.

Men inducted last week were: Lyle W. Butzke, 20, Jackson; Eugene P. Fay, 22, R. 1, Kewaskum; Robert E. Keller, 34, R. 1, Rockfield; Walter F. Peters, 22, R. 3, Hartford; Vincent D. Kohn, 23, R. 3, Kewaskum, and Charles R. Reid, 25, Hartford.

RUPLINGER INFANT IS BAPTIZED ON SUNDAY

The infant daughter of Mr. and Mrs. Wilbert Ruplinger of Barton was baptized in St. Mary's church in Barton by Rev. O. E. Ullrich. The little girl was named Marlene Crescentia. The sponsors were Miss Crescentia Ruplinger of Kewaskum and Cpl. Leonard Biersack of Camp Atterbury, Ind. Supper guests included Mrs. Art Ruplinger, grand-mother, of Kewaskum; Mrs. Richard Ruplinger and son Eddie of St. Michael's; Sylvester, Grace and Marvin Ruplinger of Kewaskum, and others from Barton, West Bend, Milwaukee, Neno and the town of Barton.

FIVE-YEAR-OLD SELECTED AS QUEEN IN POPULARITY POLL

Miss Margy Mary Bell, the five-year-old daughter of Mr. and Mrs. Charles Bell of Grafton, was selected by a popularity poll to reign as queen of "Flying High" night conducted by the American Legion. Mrs. Bell will be remembered here as the former Ardel Greiten.

PETERSON PRESIDES AT SCOUT BOARD MEETING

Members of the executive board of the Badger council, Boy Scouts of America, held their first meeting of the fall season last Thursday at the Scott street church in Ripon at 6:45 p. m. L. N. Peterson, Kewaskum, president of the council, presided. A dinner was served by the women of the church.

Walter Theusch, Kewaskum. Elected delegates to the state convention, which will be held in Fond du Lac on Oct. 28, were: Arnold Rosenthal, Harold Westerman, Elwyn Hamlyn, Clarence Stageman, West Bend; Elwood Bell, West Bend; Carl Herzig, Kewaskum;

Today's Fashions
by Betty Rose

CASUAL GLAMOUR AND SLIMMED-DOWN SILHOUETTE LEND FEMININE ALLURE TO FALL-WINTER FASHIONS

The paradox of glamour and casualness is resolved in the 1952 fall stylings of Betty Rose coats and suits. The slim silhouette, fabrics with exciting surface interest and a brand new theme in colors all are the hallmarks of milady's 1952 fall wardrobe. Glamour in fall fashions is achieved through the slim silhouette: Narrower shoulders with ample lines sustained through the rest of the garment; a new cut in sleeves which widen at the bottom and have a turn-back or simulated turn-back cuff. The casual effect is achieved through the fabrics themselves. These fabrics are characterized by surface interest such as that noted in tweeds, zibelines and boucles. Thus, the harmony of glamour and casualness is achieved through a wedding of feminine styling with virile fabrics. This harmony is accentuated, too, in the new fall color story. In coats and suits, the mixture of black over color or black with white is dominant. This "blackening" goes on with red, brown, blue and green to create shades with subtle color appeal which develops the casual-glamour theme. In nubby, hairy and "bloom" surface fabrics these blackened colors have a rich and handsome new effect. The coats and suits shown here, styled by Betty Rose, emphasize the general theme of the 1952 fall fashions. The versatile short coat on the left, increasing in popularity this season, certainly fits the casual-glamour theme. Gray, oatmeal, burgundy, gold and blue colors are available in this garment in an exciting combination of solid, contrasting with dramatic zibeline plain. Feminine allure characterizes the worsted twist boucle suit, center, as a "soft touch." Leather, green, mulberry, blue and black provide an exciting color selection. At the right, texture makes the material difference in the dressy coat with a casual twist. In wool boucle, accented by contrast trim of poodle cloth, it is a favorite in blue, gray, red, with gray trim, and black with black trim.

Don't Blame Dry Cleaner For Spots Unnoticed Before

Your dry cleaner is usually not to blame if a garment comes back to you with a stain that wasn't there before. Cleaning carmelizes the sugar in spots made by fruits or soft drinks and so far cleaners have no way of removing the stain without bleaching the fabric. This and facts about classroom driving lessons and insurance for school athletes are among the household and family news reported in McCall's National Newsletter for September: "Is your child insured against injury in athletic games this fall and winter? Such insurance is now taken out by many members of recognized collegiate and high school conferences, without expense to the young athlete or his family. It is written by private companies and in some instances is paid for by state funds. Don't blame your dry cleaner if a garment comes back with a spot that wasn't there before. It's usually from the sugar in fruits or soft drinks that carmelized during cleaning. On wool or silk it cannot be removed without bleaching the fabric—and cleaners so far are stumped about what to do. "Your car needn't practice on the family car if his school follows the example of a New York City school, where trainer units with standard controls are brought into the classroom to teach students how to drive."

The Silver Lining
"Johnny, I am rather shocked. I have had a note from your schoolmaster in which he tells me that you are last in a class of thirty boys. What have you to say about that?"
"Well, dad, I'm sorry, but it might have been worse."
"How could it have been worse?"
"It might have been a larger class."
Never expect good luck to make up for loafing.

DON'T WASH RICE

Packaged rice is a clean product and doesn't need to be rinsed before or after cooking. Washing rice is a waste of time these days. And it's also a waste of nutritive value, since much of the vitamin content of rice is in the powdery polish that rinses off.

No Co-Ordination
"Tenshun!"
No response from the recruit.
"Tenshun!"
No response.
"See here you! I said attention!"
"But, I am at attention, major. It's this uniform that's at ease."

There are individuals in every community who care little for the respect of the people if they can get 100 per cent.

DRUGS

"Can't you ever forget that you're a butcher?"

Nice Lad

A lady was entertaining the small son of her married friend. "Are you quite sure you can cut your meat, Willy?" she asked, after watching him for a moment. "Oh, yessum," he replied without looking up. "We often have it as tough as this at home."

Good Lad

Cleric—Little boy is that your cigarette stub there on the sidewalk?
Boy—No. Go ahead Pop. You saw it first.

Advice: If you have a job to do and, after making every effort, can find no way to get somebody else to do the work, do it yourself and it serves you right.

"Well, don't just stand there—retrieve your master."

Taking Tips From an Oldtimer

Connie Mack, 89-year-old peer of baseball, passes on a few pitching pointers to four-year-old Billy Morgan, Little-League mascot of the Monongahela ball team during Little League World Series at Williamsport, Pa. Billy's team lost 4-3 to Norwalk, Conn., champs. Mack, who will be 90 on Dec. 23, urged little leaguers to "Take over for us." He is president of the Philadelphia Athletics.

STRICTLY FRESH

PRETZELS were first given as a reward to good children. The loops represent folded arms. Today arms are folded across a bar and a lot of pretzels are eaten by not-so-good children.

Office of economics minister in Schleswig-Holstein, poorest state in Germany, has been empty for six months. Nobody, it seems, wants the job. Does it pay a salary?

Found imbedded in wood of a prehistoric canoe, a lotus seed over 2000 years old just bloomed in

Japan. Probably hidden by a survivor of the Flood in case of another rainy day.

A hotel being built by an American in Pakistan, cost 10,000,000 rupees. Someone is really reaping rupees in Pakistan.

A New Jersey wife asked for divorce because hubby thought her daily hot showers too expensive. Probably the only shower he did like was the pre-wedding gift variety.

THOSE WERE THE DAYS

HOT MUSIC BOX—This electrically heated clothes dryer gives with a wail when wet wash is dry, thanks to inventiveness of William A. Wasmann of Mansfield, Ohio. The 30-year-old laundry-equipment creator rigged up the device that plays "How Dry I Am" at the end of each drying cycle. Wasmann earned his mechanical-engineering master's degree with a thesis on harmonics of vibrating strings, was assigned development of the musical attachment at Westinghouse's Electrical Appliance Division.

"Mister Fixum's Handy Hints"

BY ERNIE GARDNER

HOW TO PUT A GRAPE ARBOR OVER A TERRACE

A well constructed grape arbor over a flagged terrace and fire-place, just about completes the picture for those outdoor barbecues. Any kind of trailing vines may be grown over the arbor.

The possibilities of designing an arbor are unlimited. The design I have sketched is more or less basic. You may add or change according to your own tastes.

Four supports will be needed

for the arbor. They may be posts, or regular porch columns, either round or square. They may also be built partly of stone.

Posts should be set at least 30 inches into the ground to prevent raising by frost.

Round or square porch columns should be set on a cement footing, high enough above the ground to permit good drainage.

Stone columns should have a footing of cement, at least 30 inches deep.

When porch columns are set on cement, the arbor should have cross braces on at least two sides to keep it stable.

The rafter supports should be 2x6 lumber, nailed to the side of the posts, or mortised in the center as illustrated.

The rafters should be 2x6 lumber, set on edge on top of the supports. Toenail each rafter to the supports.

Nail two or three cleats on top of the rafters to prevent twisting, and to hold them in place.

White pine lumber is suggested. Paint with ordinary house paint.

For climbing vines, especially grapes, some kind of ladder or trellis will be necessary.

ORDER TODAY

"MR. FIXUM'S HANDY HINTS" is a collection of 31 selected jobs from this column, printed in attractive form, for 35c.

Send coins, not stamps, to Ernie Gardner, 14189 Faust Avenue, Detroit 23, Michigan.

Use New Roosters To Improve Eggs For Hatching

Summer drop in egg production in poultry flocks is now a more critical problem than it used to be—because the rapidly growing broiler industry depends upon year-round production of chicks and of good quality hatching eggs.

W. H. McGibbon, poultry specialist at the University of Wisconsin, points out that it's now important to have a good supply of hatching eggs in all seasons—not just spring.

McGibbon says one's problem in getting good hatching eggs develops because roosters take a longer time to molt than hens. And with molt comes a decline in rooster fertility, he says.

You can solve this problem by using early hatched cockerels in breeding pens after they are five months old. McGibbon says this change in males will improve fertility of those summer hatching eggs.

Our Stake In Oil Exploration

Scarcely more than a stone's throw from my home, ditching machines and other mechanical wonders recently buried long sections of a huge steel pipe. These formed parts of the amazing 1460-mile-long natural gas pipeline between East Texas and Joliet, Illinois, and through it today passes fuel for the factories and homes of Chicago. The laying of the pipeline across a wide expanse of our nation, and beneath such great rivers as the Red, the Arkansas and the Mississippi constituted one of the engineering miracles of the 20th century.

The huge undertaking benefits our city, state, and nation. Many communities along the pipeline which did not have gas for fuel now have it. In Searcy we already had gas, but the new pipeline has brought employment to a number of our citizens. Just southwest of the city a big booster station is being built. Surrounding it a small community is being constructed for the families of the people who will operate the station. By transporting a great new supply of fuel into the industrial heart of our nation, the pipeline becomes a priceless national asset.

Lots of Gas

A big-inch pipeline 1460 miles long carrying fuel from Texas on the Gulf to Illinois in the Great Lakes region is an almost unbelievable reality to anyone not familiar with the petroleum industry or the magic of engineering. I watched some of the pipe being lowered into the long ditch in half-mile-long sections, and I turned to one of the executives of the Texas Illinois Natural Gas Pipeline Company to inquire: "How much gas will be carried through this pipeline in a single day?"

"About 325,000,000 cubic feet," he said in a matter-of-fact tone.

"You mean each day?"

"Yes, each day," he said.

All the gas wells in Arkansas—and we're one of the big producers—couldn't supply such a pipeline for more than a few years. I asked the pipeline official if his company weren't taking a pretty big chance on there being enough gas reserves available to supply the pipeline over a period of years.

Huge Investment

"Yes, there is, of course, an element of chance," he said. "We're spending about \$140,000,000 on this pipeline. We couldn't invest that kind of money if we weren't reasonably sure additional gas wells, and new gas fields, would be brought in. That's the chance we're taking."

Intensive exploration by the petroleum industry has been carried on since 1926, when Congress became alarmed at the dwindling reserves of oil and gas and provided an extra incentive. At that time, the 27 1/2 per cent depletion allowance was written into the Federal income tax law, giving incentive to wildcaters as well as the big petroleum companies to drill, drill, drill for new producing wells. In the 25 years the incentive has been in effect, United States oil reserves have been increased from 8 1/2 billion barrels to 30 billion barrels in spite of a tremendous increase in yearly production and consumption. Natural gas reserves have increased accordingly.

Like Plant Depreciation

The incentive established in 1926 and reaffirmed by a number of Congresses merely permits the petroleum company or the wildcatter to set aside about a fourth of his profits on successful drilling ventures so that funds will be available for new explorations. O. C. Bailey, chairman of the Arkansas State Oil and Gas Commission, explained the depletion allowance to me as being similar to the depreciation allowance on buildings and equipment permitted business and industry.

"The value of an oil well depreciates, of course, when the first barrel from it is drawn out," Mr. Bailey said. "In other words it wears out, or its value does. The oil operators must lay aside a sum to drill new wells, just as an industry must lay aside a sum to buy new machinery and worn-out factory facilities. The depletion allowance, permitting tax deduction for depletion, serves this purpose." It costs \$90,000 on the average to drill an oil well. Only one out of nine wells drilled proves to be a producer. This explains why the President's Materials Policy Commission has just recommended to Congress: "That percentage depletion be retained because of its strong inducement to risk capital to enter the relatively risky business of searching for (oil and gas)." The discovery of new oil and gas fields means more wealth—and more strength in war or peace—for our nation.

When you measure cooking liquids in a glass cup, be sure you read the measurements at eye level.

Sarah Anne's COOKING CLASS

September Calls For Better Breakfasts

Better breakfasts belong to September as surely as the end of summer vacation or the first new tints of early-turning leaves. This, after all, is the month when school begins and studies demand a sturdy breakfast to see your youngster through the day. It's also a time when business activities—and the weather—get brisker, suggesting that Father could do with a better breakfast, too!

Fried Wheat Meal, a hot and hearty cereal treat for all the family, is one sure and tasty way to do your bit by the Better Breakfast. You'll find its recipe given below, along with other ideas to make the first meal of the day one of the finest.

Breakfast Menu I

- Stewed Prunes and Apricots
- Grape-Nuts with Milk or Light Cream
- Scrambled Eggs
- Buttered Toast
- Coffee (milk for the children)

Breakfast Menu II

- Orange Juice
- Candy-coated Puffed Wheat with Milk or Light Cream
- Raw Apple Slices and Broiled Sausages
- Fried Wheat Meal
- Coffee (milk for the children)
- Fried Wheat Meal
- 1/2 teaspoon salt
- 2 1/2 cups boiling water
- 3/4 cup wheat meal

Add salt to boiling water in saucepan. Add cereal slowly, stirring constantly. Bring again to a boil and cook 3 minutes, stirring constantly. Pour into cold wet mold. Let stand overnight, or until cold and firm.

Turn from mold. Slice in 1/2-inch slices and saute in small amount of fat, turning to brown both sides. Serve with maple-syrup. Makes 6 servings. Left-over cooked wheat meal may be used in this way.

Now that apples are getting plentiful, encourage the family to get their share of them. You get the greatest good by eating apples raw—the skin, too; but follow these recipes and you will have delicious apple dishes.

Tossed Apple Salad Bowl

- 2 raw apples unpeeled
 - 2 peeled oranges
 - 1/4 cup peanuts chopped
 - 2 teaspoons minced onion
 - 2 cups finely shredded green cabbage
 - 1/4 cup French dressing
- Cut apples into small wedges. Separate oranges into sections. Combine with peanuts, onion and cabbage. Just before serving, add French dressing and toss well.

Bean Pot Applesauce

- Apples
 - Brown sugar
- Peel and quarter enough apples to fill bean pot. Roll each apple quarter in brown sugar and place in bean pot. Add enough water to keep apples from sticking, (about 1/4 cup), cover the pot and bake in an oven 325 degrees for several hours or until apples are tender and mushy. Serve with pork or duck, or as a dessert served with cream.

Fritter Batter

- 1 1/2 cups flour
- 1/4 teaspoon salt
- 2 teaspoons baking powder
- 1 egg
- 2/3 cup milk

Cranberry and Apple Mousse

- 1 1/2 cups apples
 - 1 1/2 cups cranberries
 - 1 1/2 cups cream whipped and sweetened
 - 1/2 cup chopped pecans
 - Sugar
- Wash apples and cranberries. Run through the food chopper. Mix well. Add sugar to taste. Add whipped cream and nuts. Freeze.

Fried Apple Pie

- 2 cups flour
- 1 teaspoon baking powder
- 1 teaspoon salt
- 2 tablespoons shortening
- 1 egg yolk
- 4 tablespoons sugar
- 1/2 cup milk

Thick apple sauce, well seasoned with cinnamon and nutmeg. Sift baking powder and salt with flour. Work in shortening. Combine egg, sugar, and milk. Stir into flour mixture. Roll out on a floured board to 1/4 inch thick. Cut into rounds about 4 to 5 inches in diameter. Spread 1/2 the circles with well seasoned apple sauce. Fold over the other half of crust, fastening the edges with a fork. Fry in deep fat heated to 360 degrees or until an inch of bread browns in 60 seconds. Drain on absorbent paper. Sprinkle with powdered sugar.

Apple Ring

- 4 tablespoons butter
- 1 cup firmly packed brown sugar
- 6 tart apples
- 1 egg
- 1 cup white sugar
- 1/4 cup boiling water
- 1 teaspoon vanilla extract
- 1 cup sifted flour
- 1/2 teaspoon baking powder
- Salt

Melt butter with brown sugar in a medium casserole. Peel, core and quarter apples. Mix thoroughly with the melted butter and sugar. Beat the egg until light, add the sugar gradually. Add boiling water and vanilla extract. Sift flour, baking powder and salt and combine with apple mixture. Pour batter over apples and bake 45 to 60 minutes in an oven 375 degrees. Serve with sweet cream or ice cream.

U.N. Aids Yugoslavia in Vocational Training

Yugoslavia gets ready to open its first Center for Rehabilitation of disabled persons who number about 500,000 in that country. Some of these are partisans, injured during the war. Others are farm hands, some are industrial workers. This vocational training workshop is the first of several and is planned as a demonstration project aided by the United Nations Technical Assistance Board. Here the director, Dr. Miroslav Zotic (center), assisted by two patients, examines plans for proper placing of machines supplied by the U.N.

THE UMP DUCKS—Umpire Scotty Robb pulls his almost bruised head in just in time. The ball thuds into White Sox Chico Carasquel's glove too late to tag Boston's Faye Throneberry who stole second base in the game won by Boston, 4-3.

RED CLUNKER—Captured by United Nations forces in Korea, this Russian-made truck bogs down in a mud hole. When G.I.'s put it into service the Red clunker broke down under the strain of heavy duty. It just couldn't take the punishment that American trucks are built to endure.

GOOD HEALTH

1. ARE PEOPLE SPENDING LESS TIME IN HOSPITALS?

3. IS ALCOHOLISM CURABLE?

2. MUST OLD PEOPLE BE TIRED?

Answer to Question No. 1:

The average length of stay in general hospitals in the United States today is about 20 to 25 per cent less than it was in 1940. This improvement is largely the result of medical advances, early ambulation after surgery and childbirth, and the use of blood transfusions.

Answer to Question No. 2:

Healthy old people are not necessarily tired. Much of the weariness is due to improper diet. An increase of proteins and a lessening of starch, sugar and fats will often relieve the feeling of exhaustion. Elderly

persons' diets, under the direction of the family doctor, will include plenty of meat, fowl and green vegetables, with less bread, butter, sweets and the like.

Answer to Question No. 3:

Yes, in many cases. If the alcoholic has the will to be cured, his doctor can, with the aid of new drugs and psychiatric procedures, help him to give up drinking. To be certain of continued cure, the patient must always abstain from drinking alcoholic beverages. (Copyright 1952 by Health Information Foundation)

"Monthly Pains" stopped or amazingly relieved

in 3 out of 4 cases in doctors' tests!

Chances are you're putting up—unnecessarily—with the functionally caused pains, cramps and weak "no good" feelings of menstruation! For, in actual tests by doctors, Lydia Pinkham's Compound brought complete or striking relief from such distress in 3 out of 4 of the cases!

Lydia Pinkham's is modern in its action! So get Lydia E. Pinkham's Vegetable Compound—or new, improved Tablets with added iron. See if—taken through the month—it doesn't give relief from those backaches, jitters—help you feel better before and during your period!

Or—if you suffer from functional "hot flashes" or "change of life," find out how wonderful Pinkham's is for that, too!

It has a quieting effect on uterine contractions that often cause "period" pain!

And We Can Prove It The North Star is Not Visible in the Southern Hemisphere This is because the axis of the earth points almost directly toward the polestar. From any given point in the Northern Hemisphere the North Star occupies about the same apparent position throughout every night of the year. "Nuggets of Knowledge"—Geo. W. Stimson.

ENDLICH'S Jeweler and Optometrist ESTABLISHED 1906 KEWASKUM, WIS.

Behind The Scenes In American Business

NEW YORK—Many a businessman looks forward to having a little plot of ground to retire to. Judging from government real estate holdings, Uncle Sam expects to live a long, long time.

The United States Chamber of Commerce recently added up all the Federally-owned land in this country and came up with the surprising total of 455,146,726 acres. This equals 711,166 square miles, or about 23.5 per cent of the total area of the country. According to the C. of C., if you put this all together, it would cover Japan, Italy, France, Germany, Belgium, the Netherlands, Switzerland and Portugal, and still lap over at the edges.

Eighty-five per cent of Nevada, one of the least populated states, belongs to the government.

SHORTAGE OVER—One shortage the nation need no longer worry about is that of sulphur. Ever since the outbreak of the Korean War, the magic mineral of industry has been in short supply. In recent months, however, the shortage has eased to the point where virtually all sulphur requirements in the U. S. are being met.

This optimistic note is sounded by Langbourne M. Williams, Jr., president of Freeport Sulphur Company, who reports that the outlook for the future is "extremely encouraging," as the result of nearly 100 new projects to increase the supply of sulphur, in all forms, in this and other free world countries.

These projects, it is estimated, will add approximately 4,000,000 long tons of sulphur per year by the end of 1955, Mr. Williams said. Taking cognizance of the improved situation, the National Production Authority has relaxed inventory controls on sulphur, and rescinded all those affecting distribution of sulphuric acid.

THINGS TO COME—A peewee electric motor for toys and models, among other things, comes with gear box, gears, shafts and connector sleeves. . . New car radiator cleaning tank for use by small and medium size garages is available. Hot chemicals are utilized in the tank to prepare radiators for repairing. . . Plastic light detergent, pre-cut to window pane size and available in eight colors in factories, offices and hospitals. The shade is simply applied to a glass pane with water. The makers state it resists moisture, mould, mildew, oils, grease and alcohol, and can be removed with water and reused. . . Winter is coming: a pocket hand warmer for outdoor workers, school children, and sports enthusiasts, is being marketed.

HOME TRENDS — Like many other fields, the home building industry is being forced to consider personal needs of purchasers more closely these days. E. C. Carlyle, chairman of the Tile Council of America, in an analysis of current trends in home design, notes that the dwindling domestic labor supply and the rising cost of living are having a marked effect on architects and builders alike.

Another factor, Mr. Carlyle points out, is a great demand by the large group of oldsters and young married couples, for more and more easily washed surfaces, such as clay tile—not only in time-honored places, such as the kitchen and bathroom, but also in other rooms, including the living room and recreation areas.

Elderly persons haven't the energy to keep up hard-to-clean floors and young mothers don't have the time. A first floor bathroom is also a "must" for both age groups.

A fourth factor of top importance is automatic, economical heating.

All in all, the trends seem to be away from frills and toward basic essentials of comfortable living.

BITS O' BUSINESS—In an effort to increase depleted winter stocks of iron ore to a safe level industry shipped 3,247,327 tons down the Great Lakes in the most recently reported week—only slightly below the record 3,280,094 tons shipped the week before. . . The salmon pack to mid August totaled 2,812,158 cases, the highest since 1947. . . The O. P. S. put its foot down and refused to jack hot dog prices to 20 cents. . . Manufacturers inventories were \$42 billion at the end of July, down \$900 million from March, \$300 million from June, but still \$2.2 billion higher than July, 1951.

Modus Operandi

Two pickpockets had been following an old man whom they had seen display a fat wallet. Suddenly he turned and went into a lawyer's office:

"Oh oh," said one, "a fine mess! We'll we do now?"

"Easy," said his mate, lighting a cigarette. "Wait for the lawyer."

The truth is a great enemy to conversation.

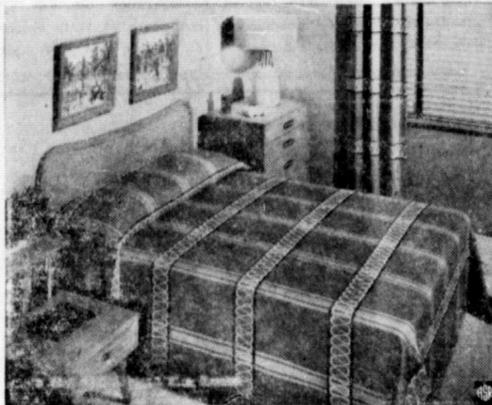

Man's Invisible Chore Boy

Fluorescence, with which everybody is familiar through the modern fluorescent lamp, was discovered just about a hundred years ago by Sir G. G. Stokes. A fluorescent material is one that has the power of absorbing invisible, ultraviolet rays and re-emitting visible light. Stokes observed that some substances glowed when held in the darkness near to the violet rays of the visible spectrum of "black light," first suspected by the German physicist Ritter in 1801.

The fact that certain substances give off light under the ultraviolet radiations has been used in countless ways, says the Better Vision Institute. An invisible laundry mark on the clothing of a murdered man glowed visibly when put under black light and led to the capture of the killer. Fluorescent tests are used for detecting forgeries. Ultraviolet light is put to work testing eggs. The fresh ones give off a rose colored fluorescence, while the not-so-fresh glow in blue or violet. A jar of jam, subjected to ultraviolet rays, will betray by its glow any turnip pulp, molasses, or glucose that may be contained in it. Bakers and confectioners can give their flour and sugar the "ultra" treatment to detect impurities. Worms in nuts reveal their presence under the beam of black light.

Ultraviolet rays themselves, apart from the fluorescent stunts which they perform, can impart health to the human body and can add the vitamin D2 to food. This is the "sunlight" that combats rickets. Turning in the other direction, the versatile black light does a chore at killing germs. Penicillin, the wonder drug, is itself liable to contamination by bacteria. So bactericidal lamps have been turned on the penicillin in process of manufacture, and even used to sterilize the air through which the penicillin passes.

Decorating Hints For Your Bedroom

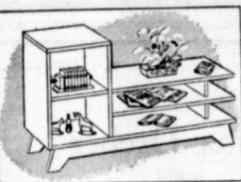

Good taste and comfort in a bedroom highlighted by a distinctive, colorful bedspread with matching draperies, Cannon's "New Regency."

Your bedroom is your own personal sanctuary. Behind its door, you find a restful haven from the world, and, at times, from members of the family. In decorating your room, it is important that the color and furnishings express your individuality and create an effect of serenity.

This hint comes from the Cannon Home-making Institute: Give particular attention to the covering of your bed or studio couch. This usually represents the largest covered surface of the room.

For modern or traditional rooms, new ready-made decorator-type fashion bedspreads and matching draperies in glamorous colors create brilliant accents. You can contrast or harmonize them with your wall and floor covering.

You can even upholster or slip cover your bedroom chairs with the same fabric, using an extra bedspread. This is often more economical than buying drapery material. Many decorators also use bedspreads for upholstering headboards.

This combination table is easy to build with Handy Panels, the new stock small sizes of plywood now available at most retail lumber yards. Plans can be obtained by writing Douglas Fir Plywood Association, Tacoma 2, Wash.

Fall Coats And Suits To Blend With The Rest of Wardrobe

You'll want your new fall coat and suit to go with the rest of your clothes. But you'll do better to coordinate your colors rather than match them exactly, says Fashion Editor Estelle Lane in McCall's for August. Also on hand in the same issue to advise you about the right clothes for every hour in your busy fall schedule is Nancy Wieler, who describes three daytime and three evening outfits to fit every occasion:

"Pink-and-brown tweed for your fall coat is perfect over all tones of brown, from beige to chocolate, with pink or mulberry or clear blue. A separate stole, in the same lacy wool loop fabric, adds winter coziness. A natural companion of the coat or stole is a suit in brown wool boucle, piped with fringe. The suit, with fitted jacket and slim skirt, is ideal to wear from early morn to after dark.

"A gray flannel suit, trim as a West Point cadet, is outlined with black grosgrain, looks lovely with black, gray or bright colors. The narrow skirt is released at the knees with kick pleats front and back. A charcoal-and-black tweed fall coat with black faille trim is smart with the suit and would look just as beautiful over black, cherry-red, jade, violet-blue. Its material is all-wool poodle loop.

"For the busy career woman—at college, at home, or in the office—lunch would be fine in a wool flannel bolero jacket and skirt by Haymaker and a silk broadcloth blouse with elbow puffed sleeves. A meeting at eleven?—and what looks more charming than a linen blouse with a detachable medallion, and a tweed skirt? — by Nan Westley. The whole day starts right if she wears a tuck-in cardigan jacket, skirt of all-wool waffle-weave tweed — by M. Sloat.

"For evening and a date, you'll look very gay in a pleated chiffon blouse and a faille skirt with a cummerbund waistline — by Carolyn Schnurer. Viewing TV is the right time for at-home velveteen trousers and wool jersey cardigan blouse — by Carolyn Schnurer. For a supper party, dress up in a halter-back dress of wool challis printed in a feathery design—by Jenny Bell of Masket."

Stewed Chicken Offers Economy In Fall Menu

Stewed chickens, plentiful on markets now, are good buys for fricassee, creamed chicken, salads and chicken sandwiches, says Linnea Dennett, University of Wisconsin nutritionist.

These meaty hens are also fine for canning and for cooked chicken for freezing. Stewing chickens need long, slow cooking in water below the boiling point, Mrs. Dennett points out. They can also be steamed. Whole or in pieces, they'll probably need to simmer three to four hours until tender.

The meat will be juicier if it's allowed to stand in the broth after cooking. Since warm broth spoils easily, it's a good idea to let the meat cook in the broth for just an hour. It should be cooled as rapidly as possible to prevent spoilage, and then both chicken and broth should be stored in the refrigerator.

Court Scene
Useless Partner—I'm afraid I played rather badly in that set, but my racket is a bit warped. I'll have to keep it in a frame.
She (bitingly) — You ought to keep it in a glass case.

Bible Comment

Jesus, the Superior High Priest, Offers Himself for All

THE writer of the Epistle to the Hebrews has a deep sense of the spiritual heritage of Israel "God," he writes, "at sundry times and in divers manners spoke in times past unto the fathers by the prophets." He is convinced of God's promise, and of His covenant with the people.

But his faith and outlook as an earnest Israelite is dominated by the conviction that God has spoken "in these last days" through His Son, Jesus Christ, "the brightest of His glory" and the "express image of His person."

Holding thus strongly a belief in the divinity of Jesus, what is remarkable about his Epistle is the clarity with which he presents the fact of Christ's humanity.

With all the greatness of the past religion of Israel, it is the writer's contention that there was something incomplete, and a promise unfulfilled. Saints and prophets "obtained a good report through faith, but have received not the promise: God having provided some better thing for us that they without us should not be made perfect."

It seems evident that the Epistle was addressed to Jewish Christians subject to persecution. To the charge that they were untrue to the religion of their fathers, the writer asserts the realities of the new covenant, and nature and mission of Christ as the minister of better things.

The key passage is in the second chapter. Though greater than the angels, the Son of God made Himself lower than the angels, taking upon Himself human nature, and being made "like unto His brethren that He might be a merciful and faithful high priest in things pertaining to God, to make reconciliation for the sins of the people."

But what of priestliness and sacrifice in the Jewish religion? The writer's answer is that Jesus is a superior high priest, inasmuch as He has offered Himself a sacrifice, once for all.

How much of religious faith and practice of today is in the realm of unfulfilled promise, awaiting the supreme experience of Christ Himself as the Minister of better things?

Safety Movement Has Reduced Death Toll

Death and taxes may be inevitable—but the experts are beating the former.

Since 1913, the year of the formal organization of the safety movement, about 500,000 persons have been saved from accidental deaths.

From 1900 until 1913 an average of nearly 75,000 persons were killed in accidents each year—a rate of 85 deaths per 100,000 population. The toll would have reached 84,000 persons in 1914 if this rate had continued, but it was reduced to 79 and the death toll to 77,000—a saving of about 7,000 lives. Similar comparisons based on rates for succeeding years show that about half a million lives were saved by 1951.

Despite these accomplishments, "Accident Facts," the National Safety Council's statistical yearbook, just off the press, shows that one home in every five is touched by a serious accident each year.

NEW DRESS—Lady leatherneck will be prettier in new green winter-service uniforms seen above. It is highlighted by more-feminine jacket, skirt, blouse and tie. The new blouse is pale green broadcloth. The redesigned tie is really an ascot-shaped, green fieldscarf matching the color of the outfit.

Sports Afield

By Ted Kesting

The duck hunting outlook as this September copy goes to press is the best in 15 years. Our reporter, Jimmy Robinson, writes that in his annual tour of the Canadian duck factory this summer, he found more optimism among the provincial authorities, Ducks Unlimited experts, guides, farmers and sportsmen than since he made his first survey in 1936.

He was told that the waterfowl breeding stock was more than double that of last year in Saskatchewan, strongly improved in Alberta and reduced approximately 20 per cent in Manitoba. Heavy rainfalls in June and early July, particularly in eastern Saskatchewan and southwestern Manitoba restored or maintained water levels and eliminated the threat of drought which prevailed earlier in certain sections of the prairie provinces. Here is the midsummer picture in more detail:

SASKATCHEWAN: The western portion of this province showed a spectacular increase in breeding ducks. The southeast was down somewhat from last year, and the central-eastern portion also was slightly below last year. High and moderate increases were shown in south and central. Pintails showed the greatest increase with mallards second.

MANITOBA: Southwestern Manitoba was dry this spring and the north-flying ducks did not stop, but went farther north to permanent waters. Thus much potential loss in this district was averted. The great producing area in the Minnedosa pothole country in west-central Manitoba had a high breeding population. The hatch here was good, with ideal nesting conditions. There was a little less water than last year, but sufficient to carry the ducks through. The young duck population over the province as a whole probably was equal of last year.

ALBERTA: The hatch here was nothing short of spectacular. Nesting conditions were ideal and broods of 12 to 15 were common. There was a dry spring but a good carry-over of water and rains came in plenty of time, not only preventing loss of ducklings but making rearing conditions ideal.

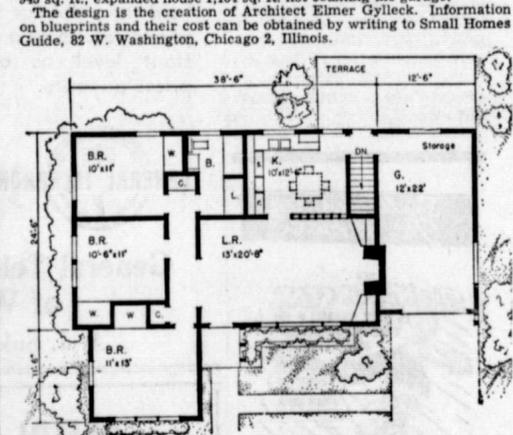

In the United States, North Dakota is the biggest waterfowl producing state. The over-all population is down between 15 and 20 per cent because of water conditions. The South Dakota outlook is good; more than 100 per cent increase in breeding ducks. Montana, barring unforeseen disaster, will have more ducks than at any time during the last three years.

A House that Grows, From Small Homes Guide

2 or 3 Bedrooms

Shown above and below are two views of the same house in different stages of development. The plan expands to meet the needs of a growing family. The top house can be built as a two-bedroom cottage, with exceptionally large living room and big, square kitchen. Later the third bedroom can be added at the front, with but minor alterations to existing walls and partitions. At the same time, or still later, the garage can be added. This is a basement-type house, but the basement can be omitted, utility placed where the stairway is shown. Area of the basic house is 943 sq. ft., expanded house 1,104 sq. ft. not counting the garage. The design is the creation of Architect Elmer Gyleck. Information on blueprints and their cost can be obtained by writing to Small Homes Guide, 82 W. Washington, Chicago 2, Illinois.

Construction-Tips for Home Builders

HOLD THE ROOF—In high-wind areas, lengths of steel strapping carried from studs over the tops of joists or rafters and nailed securely are inexpensive insurance against loss of your roof in a strong gale.

STUBBORN NAILS—If you have difficulty withdrawing a nail with a claw hammer, try putting a small block of wood almost up against the nail and under the hammer head. Even large nails will draw easily.

STAIR CLEARANCE—For most home stairways a vertical clearance of 7 feet between the edge of the stairwell opening and the front edge of the step beneath it is considered a necessary minimum.

WEEKEND BUILDING—If you are a do-it-yourself builder, working on weekends, framing with galvanized nails will minimize structure weakening caused by rusting of nails exposed to weather for long periods without protection.

Clean Campaign---

QUESTION: Our backyard is full of mole tunnels. They've torn up the lawn and now are going to other areas. What can we do to control these pests?
—R.S.B., Rockaway, New Jersey

ANSWER: Here are several methods used in combating moles: (1) Poison—in pellet form as a rule under various name-brands. Pellets are inserted in runways by carefully lifting a chunk of turf over the runs. After a day or two press turf down over all runways to check effectiveness of poison. (2) Cyanogas—a deadly poison and to be handled only with extreme care. Use only as directed. (3) Traps—usually of the spear type which, when the trigger is set on pressed-down turf over runway is sprung by passing mole. Remove moles and reset traps.

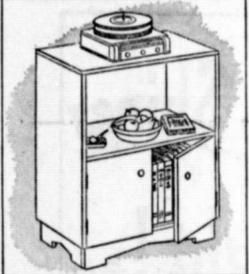

QUESTION: Can you tell me what to do about faucets that screech when they are turned on?
—J.S., New York City

ANSWER: Among causes are: excessive water pressure; ragged pipe edges at joints which cause water to hiss in passing; defective washers in fixtures; water hammer. Pressure should be kept at about 50 pounds, never above 60 pounds. Pipe ends at joints should be reamed to produce smooth flow inside. Check washers and valve seats for ragged edges. Install a 3-foot length of pipe in water lines to provide an air chamber, preferably just past the meter or storage tank.

QUESTION: During a fire, one side of my electric water heater was very much scorched. What will remove the scorch and what can be applied to cover the damaged side?
—M.C., Madison, Ind.

ANSWER: Once fire has badly damaged a baked-on enamel, little can be done to restore it to perfect condition. You can apply a coat of shellac as a base, then float on a coat of good wood enamel or metal enamel, selecting the color you wish. If carefully applied, this coating will be virtually as good as the original in appearance.

This column is prepared by the editors of THE FAMILY HANDYMAN MAGAZINE as a service to home owners. If you have any questions or problems relating to your own home, please address a letter, stating your problem to THE FAMILY HANDYMAN, 211 East 37th Street, New York, New York, Attention: News Syndicate Editor. If the question has widespread appeal in the opinion of the editors, it will be printed with the answer in this column at a later date. However, we cannot enter into detailed correspondence with everyone. THE FAMILY HANDYMAN is available at newsstands and hardware stores everywhere.

If you can handle a hammer and saw you can build this space-saving record cabinet with plywood. Parts can be cut from new small sized plywood panels now available in many lumber yards. Write Douglas Fir Plywood Association, Tacoma 2, Wash., for plans.

DON'T SHOOT—Jane Kean, pretty blonde comedienne, makes them laugh beside the pool at Las Vegas, Nev., hotel. With her sister Betty, Jane makes up a funny-girl team headlined at the hotel. Jane did not lose her shirt at gambling, legal in Nevada. She just likes to cool off with a swim.

ANSWERS TO Intelligence Test

1—Moscow. 2—decade. 3—Salem. 4—Philippine. 5—Robert E. Lee. 6—Prince Edward Island. 7—(A) Les Miserables; (B) Dickens' Christmas Carol; (C) Uncle Tom's Cabin; (D) Tom Sawyer.

Coffee Frosting Adds Tang to Chocolate Cake

By Dorothy Maddox

NOTHING like a good chocolate cake to make the family happy. When made with economical, nonfat dry milk, it carries first-class nutrition at a lower price. When covered with coffee frosting, your cake will have even further appeal. Nonfat dry milk, which is milk with only the fat and water removed, is an excellent source of protein, calcium, riboflavin and lactose. A one-pound package yields five quarts of nonfat milk for only about nine cents a quart. It will keep almost indefinitely on a cool, dry shelf if the package is closed carefully after each using.

Chocolate Cake (Makes two 8"x1 1/2" layers)

One and one-half cups sifted flour, 1/2 cup nonfat dry milk, 1 teaspoon salt, 3/4 teaspoon baking soda, 1/2 cup cocoa, 1/2 cup shortening, 1 cup sugar, 1 teaspoon vanilla, 2 eggs, slightly beaten, 1 tablespoon vinegar, 1 cup water. Sift together flour, nonfat dry milk, salt, baking soda and cocoa. Cream shortening; gradually add sugar and cream until light and fluffy. Add vanilla and eggs; beat until well blended. Combine vinegar and water, stirring only enough after each addition to blend well. Grease and line with waxed paper, two 8 x 1 1/2-inch layer pans. Pour mixture into pans. Bake in moderate oven (350 degrees F.) about 40 minutes until cake springs back when lightly pressed with finger. Remove layers from oven; allow to cool in pans 5 minutes. Turn onto cooling rack.

Coffee Frosting

One-quarter cup nonfat dry milk, 2 3/4 cups sifted confectioners' sugar, 1 tablespoon instant coffee, 1/2 cup butter, 1 teaspoon vanilla, 1 to 2 tablespoons water. Sift together nonfat dry milk powder, sugar and coffee. Cream butter. Gradually beat in half of dry ingredients. Stir in vanilla and 1 tablespoon water. Stir in remaining dry ingredients. Add remaining water if needed to give a good spreading consistency. Beat until fluffy.

Coffee and cake make a delicious snack-time combination. Especially when the rich, dark coffee flavor is repeated in smooth cake frosting. Serve this mouth-watering ensemble to your guests dropping in on a Sunday afternoon. Better yet, whip up this delicious icing and surprise friends with coffee-iced cake and hot coffee after an evening at bridge or the theater.

Schools Need Improvements For Health's Sake

Most of the little schools at Wisconsin crossroads are open again after a summer's idleness.

Weeds and grass have been cut in the yards. House cleaning has made the windows shine, the blackboards invite chalk marks, and the floor and furniture smell of polish. New paint has brightened up dark corners. Everything has been made ready for the thousands of rural boys and girls who are now answering the call of the school bell.

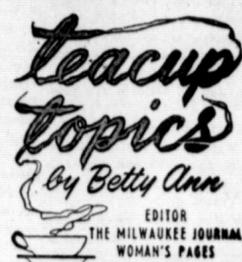

But is everything ready? Recent studies have shown that nearly 70 per cent of our 4,000 or more one-room schools have actually or potentially unsafe water supplies—many have no water supplies at all.

Along with this is the unhappy fact that slightly over 70 per cent of these schools have inadequate or insanitary toilet facilities. Minimum equipment for handwashing is often forgotten. Heating and ventilation are often poor.

A safe school well, like a safe well anywhere, has construction features which protect the water against contamination both underground and at the surface. It's located on the highest ground practicable.

While water-flush toilets are the goal of any school, other types of toilets can be sanitary. Construction of out-door toilets should be fly-tight, rat-proof, and properly vented.

School boards are responsible for providing and maintaining adequate and safe water supplies and other sanitary facilities. Assistance in studying school sanitation problems and in solving them is available from the state board of health through its nine district public health engineers. Unfortunately, they can give direct service to only a small percentage of schools each year.

Three cornered stoles, chunky, short jackets, the new longer skirt, elaboration of sleeves and the ornamentation of formal gowns have been making talk now for some weeks since the opening of the Paris collections, says Betty Ann.

We've already felt the influence of the three corner stole which grandmother would have called a shawl for it made its appearance at the New York fall openings in June but in Paris it has added fur as well as fringe to its design.

Grandmother would recognize the fringe, too, although it is riper than anything she thought of in the horse and buggy days. Petit point, too, is a means of elaboration in the mode of our times appearing often to ornament cocktail and ball gowns.

No one seems much concerned about the longer skirt but everyone is interested in the straight skirt. The appearance of important sleeves has made itself felt here as well as in Paris.

Beauty knows no age limit. It is dependent only upon good taste, constant care and an appreciation of maturity.

If you have passed your 40th birthday, it is time for a review of your appearance and your new-found potential. Every age brings a different kind of beauty.

Start with your hair. Are you still wearing it in exactly the same fashion as you did when you were 20? How much lovelier you would look if you adapted your coiffure to the other changes that have naturally taken place.

Analyze your face and figure. Recognize that your make-up requirements will be different. Perhaps you need more color and less base.

Refuse to dress in maternally looking clothes, but at the same time choose a wardrobe that complements instead of distorts your new figure line.

Wear hats for more than their fashion value. Be certain they suit your facial contour and hair. If your hair is graying you will discover wonderful new colors in hats that will be most flattering.

The important thing to remember is not to be afraid of change. Every day of your life—since you were a child—changes of all kinds have been taking place. But for some reason many women think these changes only begin at maturity. It just isn't so.

Get into the habit of looking for perfectly coiffured and exquisitely groomed mature women. Once you do, you'll discover a beauty richer and fuller than you ever imagined possible.

Encourage family consideration of towels. For example: Have plenty of cleaning cloths or extra washcloths in the bathroom and kitchen so that, when something spills on the floor, one is not tempted to mop up with a bath towel.

Do not use good towels for removing make-up. To wash lipstick, rouge, powder or face creams from towels requires hard rubbing and causes them to wear out faster. It may be advisable to buy inexpensive lightweight face towels for the purpose.

Use old bath towels as ironing pads or for wrapping sweaters and other articles after washing. Good bath towels may be stained with dye.

If you select the snap tape removable style shoulder pad for your dressmaking projects, you can use these pads in more than one garment of similar sleeve-lines by purchasing extra snap tapes. This type of shoulder pad comes with snap fasteners and separate tapes which are sewn into the garment.

Here is the suggested recipe for butter crisp oven fried chicken. Dip pieces of frying chicken in milk. Roll in flour seasoned with salt and pepper (one and one-half teaspoons salt and a dash of pepper to a cup of flour; leftover flour may be used in making the gravy). Using equal parts of butter and lard so that, when heated, it will be a half inch deep in the frying pan, cook floured chicken over moderate heat until golden brown on one side. Turn, using tongs. When browned on all sides, place chicken in casserole. Dot liberally with butter. Cover and place in a moderate oven, 350 degrees, to finish cooking, allowing about 35 minutes. The heat then may be reduced to a very slow oven to keep the chicken warm.

Test Your Intelligence

Score 10 points for each correct answer in the first six questions.

- The Chinese-Russian Communist leaders met recently in which Russian city?
—Minsk —Moscow —Leningrad —Archangel
 - Which of the following words does not belong in this group:
—red —heliotrope —mauve —decade
 - In which city were the famous colonial-American witch trials held?
—Baltimore —Wheeling —Salem —Lynchburg
 - Which of the following governments cannot claim American citizenship for its people?
—Alaskan —Puerto Rican —Philippine —Virgin Islands
 - Pick out the Confederate military leader who surrendered to General Grant.
—P. T. G. Beauregard —James Longstreet —Robert E. Lee —Stonewall Jackson
 - Canada's "Island Province" is:
—Baffin Island —Prince Edward Island —Vancouver Island —Peelee Island
 - Match the following literary characters with the novels in which they appear. Score yourself 10 points for each correct choice.
(A) Jean Valjean —Tom Sawyer
(B) Ebenezer Scrooge —Les Miserables
(C) Eva Sinclair —Dickens' Christmas Carol
(D) Aunt Polly —Uncle Tom's Cabin
- Total your points. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

Famed Expert Dr. Spock Tells How To Restore Fun To Parenthood

Today's simpler housekeeping and child care routines haven't necessarily made either mothers or children happier. Much of the fun and prestige have been taken out of homemaking and child-rearing by the experts and the educators, says Dr. Benjamin Spock, well-known pediatric authority and author of Baby and Child Care. Writing in McCall's for September, he tells parents how to enjoy their children and advises them to be firm and to give clear guidance.

"Home management has certainly changed a lot since I was a baby—mostly for the better. Everybody has at least heard about the days when babies were wrapped in layers and layers of clothing, all explicitly prescribed by tradition, when formula-making was an elaborate and complicated routine, when there were no precooked cereals or strained baby foods, when cleaning was done largely by hand, and when toilet training had to be given according to somebody's rule, rather than the baby's readiness. "To list this drudgery of the past makes today's methods seem surprisingly simple. But I'm not sure this means that being a housewife and mother today is necessarily or always more enjoyable. The increased leisure we have today isn't really as satisfying as working hard at a job that seems important.

"There are a number of reasons why an easier life doesn't always make a happier life, in America at least. For one thing, some of the fun of taking care of babies and children has been taken away, unintentionally, by the physicians, psychologists, educators who have muscled in on mothers this past half-century. The discoveries they make have upset the old custom of child-care and the old self-confidence—and often have contradicted theories the scientists themselves advanced as gospel only a few years before. As a result, American mothers have lost much of their natural self-confidence and have often felt that the experts were looking over their shoulders, disapprovingly.

"The disapproval that we often feel as we grew up has made us overconscientious and vacillating in handling our own children. I think it helps some for parents to know that all of us got pretty mad at our own parents in our childhood and that we all carry over some of the irritation and guiltiness to our children. But the solution is not for parents to be afraid to be firm or to give their children clear guidance.

"Perhaps all this makes it sound unbearable to be a parent. Certainly we all feel like quitting the job in a huff occasionally. But there is so much deep satisfaction in it that even if there were a harmless way out we wouldn't give up. This is no reason, though, for not making it more fun.

"Many grandparents say they have much more joy with their grandchildren than they ever had with their children. They say they can for the first time appreciate the affectionateness, the gaiety and the humor, the originality of the children, now that they themselves don't have the heavy feeling of responsibility. Can't we gain this grandparental pleasure without waiting that long?"

Contrary to what many people supposed during the war, isolationism is not dead in this country.

THESE WOMEN!

The Look Before The Leap

Mistress—I hope, you realize Mary, that matrimony is a serious matter. Maid (about to be married)—Oh yes, mum, I ain't one to marry reckless like. I've been to two fortune tellers and a clairvoyant, and looked in a sign book and dreamed on a lock of his hair and been to a palmist. And they all say it's all right."

1952 POLIO PRECAUTIONS

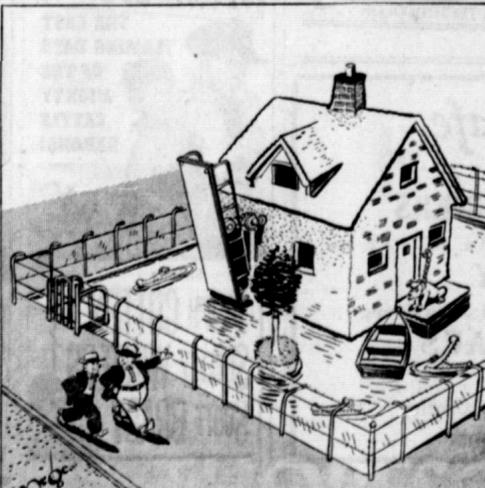

RECOMMENDED BY THE NATIONAL FOUNDATION FOR INFANTILE PARALYSIS

Seven-year-old Karen Blecha enacts 1952 polio precautions recommended by the National Foundation for Infantile Paralysis. When polio is around, the National Foundation cautions parents to watch for these signs: headache, fever, sore throat, upset stomach, tenderness and stiffness of neck and back. A person showing such symptoms should be put to bed at once, away from others. Then, call your doctor and follow his advice. If polio is diagnosed, call your local chapter of the March of Dimes for advice and assistance, including needed financial help.

Ticklers

By George

"I hear the new neighbors aren't very sociable."

New Prospect

Edith Meyer spent the week end with Mr. and Mrs. Leo J. Ketter near Campbellsport.

Mr. and Mrs. O'Day of Fond du Lac and Mr. and Mrs. Gordon Krueger of Milwaukee visited Mr. and Mrs. Jos. P. Uelmen the past week.

Miss Virginia Trapp of Burlington and Miss Maude Griffin of Fox Lake spent the week end with the former's parents, Mr. and Mrs. Richard Trapp.

Mr. and Mrs. Frank Bowen entertained the following Saturday to a \$3.50 dinner in honor of the former's birthday anniversary. Dr. and Mrs. Alex Ulrich and family, Mr. and Mrs. Leo Bowen and daughter of Plymouth, Mr. and Mrs. Jerome Bowen and family of Dundee, and Mr. and Mrs. Wm. King of Adell.

The Ted Konwent home at New Prospect was the scene of a bridal shower last Thursday evening featuring Miss Elaine Wruck of Milwaukee, fiancée of Edward Konwent. The following guests were present: the Meses. Feilenz, Jake Blumer, Norbert Uelmen, K. Jabubiak, E.

Kagut, B. Skanicka, R. Trapp, B. Matthias, H. Bauer, J. Kempf, V. Ludwig, F. Geidel, W. Jandre, R. Mathieu, Don Matthias, P. Althouse, J. Geidel, L. E. Reilly, Paul Giese, F. Bowen, L. Butzke, G. Stern, H. Stern, George Meyer, Stan Porubcan, A. Butzke, F. Tuttle, M. Feuerhammer, H. Kolata and Joyce Raether, Edith Meyer, Beverly Feuerhammer, Virginia and Dixie Blumer, Joanne and Kathleen Kempf, Marilyn Giese, Janet Geidel and Dianne Konwent. Cards were played and prizes went to the highest scores. The home was beautifully decorated for the occasion. The future bride received many beautiful and useful gifts, some very clever that brought about a lot of laughter. The hostesses, Mrs. Konwent and daughters, Patsy and Aeta, served a delicious lunch. The honored guest was presented with a

beautiful corsage.

(Items of Sept. 26)

Those entertained at a dinner by Mr. and Mrs. Richard Trapp at their home on Sunday were Mr. and Mrs. Charles Narges of Waucousta, Mr. and Mrs. Richard Horbing of Fond du Lac, Charles Jandre of Kewaskum, Mr. and Mrs. Reuben Backhaus of near Campbellsport, Mr. and Mrs. Aug. Jandre and Mr. and Mrs. Walter Jandre, Kenneth and Janice of here.

Mr. and Mrs. Frank Bowen visited their daughter and son-in-law, Dr. and Mrs. Alex Ulrich at Plymouth Thursday.

* Mrs. Jake Hammon of Beechwood is visiting her daughter and son-in-law, Mr. and Mrs. Ervin Matthias.

Mr. and Mrs. George H. Meyer received the news of the birth of a grandson, born to Mr. and Mrs.

David Tennesen at Fond du Lac on Sept. 26.

Dundee

Miss Joan Krueger of Plymouth visited Sunday with Mr. and Mrs. C. W. Baetz and Charles Roethke. Mrs. Lenore Rock and son Dennis of Milwaukee visited the week end with Mr. and Mrs. Sylvester Majesky.

Mr. and Mrs. William Lenz visited the week end with the former's parents, Mr. and Mrs. William Lenz at Wauzeka.

Mr. and Mrs. Vilas Ludwig and daughter Delores and Joan Heider

visited the week end with relatives in Milwaukee.

Mr. and Mrs. August Krueger of Cascade visited Sunday with the latter's father, Albert Koepke, and daughter Lulu.

Mr. and Mrs. Paul Becker of Ogden, Utah, visited the past week with the latter's parents, Mr. and Mrs. George Gilboy.

Mr. and Mrs. Anton Langenkamp of Milwaukee visited Tuesday with the latter's sister, Mrs. Clara Dins and Mr. and Mrs. Roland Dins.

Mr. and Mrs. Herbert Heider and Allan, Mr. and Mrs. Walner Pieper, Betty and Dwayne visited Sunday with Mr. and Mrs. Lester Butzke at Doumen.

CARD OF THANKS

Our sincere thanks are extended to all our relatives and friends for their kindness and sympathy shown us during our late bereavement, the death of our dear son and brother, Cpl. Raymond Rosbeck. Special thanks to Father Heichel, Cpl. Paul E. Barber, escort, members of the American Legion, Holy Name members, the organist and choir, donors of cars, for the floral pieces and spiritual bouquets, ladies who served the meal, and all who showed respect by attending the funeral or calling at the funeral home.

Mr. and Mrs. Martin Rosbeck and Family

The Sun Shines Bright!

... in every electric **CLOTHES DRYER**

"The sun shines bright" in every electric clothes dryer. Clothes are tumbled sunshine-dry in a matter of minutes — and right inside the house!
When you dry clothes with a modern electric clothes dryer — there's no longer any need to try and second-guess the weather man. It's always nice weather for drying clothes — inside an electric clothes dryer. Clothes are tumbled gently dry and wrinkle-free with no more work than it takes to flick a switch. It's the modern way!

ENJOY A LIFETIME OF WONDERFUL WASHDAYS!
