

528 Fans Desert Kewaskum to See The Braves Play

Kewaskum—population something over 1200—was sort of a ghost town Monday night. About 528 or more of our citizens and other nearby fans vacated the village to see the Milwaukee Braves play those Bums, the league leading Brooklyn Dodgers at Milwaukee county stadium.

And Bums they proved to be as they went and nosed out our Braves 1 to 0, in a tilt that was called after seven complete innings because of rain. Low Burdette and Russ Meyer hooked up in a 6-0 pitching duel for six innings. Then those Dodgers broke the ice with a run in the 7th. The rain came next (and how) and the contest was halted temporarily. When action resumed the Braves were held scoreless in their half of the 7th. Duke Snider, power hitting Bum outfielder, then smacked a long home run in the top of the 8th to make it 2-0. But before Charlie Grimm's boys could get in their half of the inning, the rain poured down again. After some time, with the field drenched, the game was called off. As a result of the 8th inning being incomplete, the score reverted back to the end of the 7th when it was 1-0.

Despite the rain and some of the bunch getting wet, everyone had a real good time. Those in the lower grandstand seats sat high and dry but many of the group were in upper and lower box seats over which there is no roof. They were chased to cover twice. However, a little rain and wet seats didn't dampen the enthusiasm of the local party.

Announcement was made over the air by Earl Gillespie and Blaine Walsh, Braves network announcers, that the Kewaskum delegation was in attendance. They added further color by ringing in some dope on Chief Kewaskum.

Many members of the caravan traveled to the city in chartered Greyhound buses while the majority drove in private cars. Kewaskum cars and people were seen all along the highway going to and from coming from the affair. It almost seemed every time you passed an auto or one passed you, it contained Kewaskum folks. Many local autos were also seen at stopping places aside of the road on the trip back.

All in the group were handed out Indian headresses with feathers at the drug store corner before leaving. They were given out by the Kiwanis club and contained the words Heinemann's Kewaskum Dairy. Looking down from the upper deck in the park, those headresses could be seen spread all around the lower deck seats, making it easy to locate the Kewaskum gang.

The delegation included young and old alike. Many of them were seeing the Braves, big league baseball and the new county stadium for the first time. If more tickets could have been obtained, the group would have been much larger.

Enthusiasts from Barton, Campbellsport, New Fane, Boltonville and St. Michaels helped make up the contingent.

Yessir, Kewaskum night at the home of the Braves was a lot of fun and most of those who attended went to go again—soon. They hope someone will instigate another Kewaskum night.

Seven County Draftees Leave; Three From Here

The July draft quota of seven Washington county men left recently for the armed forces, the Hartford selective service office revealed last week.

Inducted in July were: Richard Herring, 24, R. 2, Kewaskum; John Werner, 23, R. 4, West Bend; Bruno Weninger, 23, R. 5, West Bend; Harold Reindl, 24, R. 3, Kewaskum; Harvey Dieball, 23, R. 1, Colgate; Fredric Goldammer, 22, West Bend, and Ray Kluever, 23, Kewaskum.

Six county men are scheduled to leave on August 25, representing this month's quota.

WA-FON-DO BOWLING MEET

The Wa-Fon-Do Bowling league will hold a meeting at King-Pin alleys, Campbellsport, on Tuesday evening, Aug. 11, at 8 p. m. Election of officers will take place.

Death of Mrs. Mary Seefeldt

Mrs. Albert Seefeldt, 86, nee Mary Hartkopf, one of the older residents of the town of Kewaskum, died on Wednesday morning, Aug. 5, at St. Joseph's hospital, West Bend, following an illness of ten days with leukemia. For the past 5 1/2 years she had made her home with her son Alfred in the town of Kewaskum.

Mrs. Seefeldt was born May 4, 1867 in the town of Richfield. Prior to her marriage to Albert Seefeldt, which took place on Dec. 24, 1895, at Appleton, she had resided in Menomonee Falls, Appleton and Milwaukee. Since her marriage she had made her home in the town of Kewaskum. Mr. Seefeldt predeceased her on March 26, 1937.

Surviving are two sons, Alfred H. Seefeldt and Oscar Seefeldt of the town of Kewaskum; one daughter-in-law, five grandchildren, Fredric, Aldwin, Mariel, Carol and Carlton Seefeldt of the town of Kewaskum; one sister, Mrs. Caroline Spindler of Milwaukee, and two brothers, William Hartkopf of Rio and Jacob Hartkopf of Menomonee Falls.

The body is in state at Miller's Funeral home since 7:30 p. m. on Thursday. At 11 a. m. Saturday it will be taken to the St. Lucas Ev. Lutheran church to lie in state from 12 noon until the time of services at 2 o'clock. The Rev. Gerhard Kanies will officiate and burial will take place in Lutheran Memorial park.

Tavern Property at Wayne Sold to Jaeger at Auction

The Bartelt Real Estate Agency of Kewaskum at a public auction on Sunday, Aug. 2, sold the Forester property in which the Wayne tavern was operated to Raymond "Spitz" Jaeger. The new owner took possession on Monday, Aug. 3, Mr. and Mrs. Jaeger will operate the tavern.

Jaeger will continue operation of his barbershop, which is located across from the tavern property.

The Forester brothers, hardware and implement dealers in the village, were the owners of the building since 1936, and had operated it as a rental property since that time.

STAYTONS LEAVE TOWN, OTHER PEOPLE MOVE

Mr. and Mrs. Merwin Sta-ton moved from the Harry H. Maaske home in Roseland Heights to Waukesha on Aug. 1. Mr. and Mrs. Maaske intend to move back to Kewaskum from Jackson rural route about the middle of this month.

Mrs. Linda Below and daughter Rosalie moved from the upper apartment of the Joe Sukawaty home on First st. into the upper apartment of the Frost home, the former Clarence Bingen residence, on South Fond du Lac ave. The lower apartment in the home is occupied by Mr. and Mrs. Leonard Rindt and family, who moved here recently from Clintonville.

SOFTBALL TEAM LOSES TO WAYNE; OTHERS POSTPONED

The Kewaskum softball team was defeated by Wayne Sunday, 5-3. This was the only game played in the Cross Country league, all others being postponed because of rain or wet grounds. This Sunday the unbeaten, loop leading West Bend Bears play at Kewaskum. Other games are Wayne at West Bend Merchants, New Fane at Fillmore and Allenton at Beechwood.

SR. ROSE IN ST. AGNES ORDER FOR FIFTY YEARS

A jubilee program at St. Agnes convent, Fond du Lac, Sunday, Aug. 2, honored two Sisters of St. Agnes celebrating 60 years with the C.S.A. An 8 a. m. high mass was offered by Fr. Robert Hoewel, Pierceton, Ind. The program also honored seven sisters marking golden jubilees. They included Sister Rose, who formerly taught in Holy Trinity parish school, Kewaskum.

HOSPITAL NEWS

Mrs. Henry Weddig, Kewaskum, submitted to an operation at St. Joseph's hospital, West Bend, last week.
Mrs. Herbert Ramei is a patient at St. Joseph's hospital.

Kewaskum Host to Blood Donor Clinic Tuesday

Kewaskum, staunch supporter of the community blood donor program since its start almost four years ago, will be the host at its own donor clinic on Tuesday, August 11.

Next week's clinic, just like all of those held in West Bend in the last two years, will be a combined effort with blood collected going both to the "bank" of the Washington County-West Bend Community Blood Donor club and to the armed forces for GI's wounded in battle. The Community Blood Donor club and Washington County chapter of the Red Cross are joint sponsors of the clinic.

It will be held in the gymnasium of Kewaskum high school. Hours are from 1 p. m. in the afternoon until 7:30 o'clock in the evening. Goal of the Kewaskum drive is 150 pints of blood. Kewaskum also held its own clinic a year ago and 98 donors gave blood at that time.

Henry Rosenheimer, a director of the Community Blood Donor club, is organizing the enrollment of volunteers for next Tuesday's clinic. Gordon Ohlrogge, president of the Community Blood Donor club, pointed out today that, "Washington county residents shouldn't forget next Tuesday's donor clinic is not just for Kewaskum but benefits everyone in the county alike. Therefore, residents of West Bend and everywhere else in the county is asked to pledge their support to it and sign up to give a pint of blood. The goal of 150 pints is not large but we will need the help of donors throughout the county to put this drive over the top."

"Many people have expressed a desire to give blood who were not able to make it at the clinic in June held in West Bend. Now is their chance to sign up and give at Kewaskum to the very same cause."

All residents of Washington county, with the exception of the townships of Hartford, Polk, Erin and Richfield, are automatically members of the Community Blood Donor club and may receive transfusions of as much blood as the emergency requires, of the exact type needed, completely free of charge. The program has been in successful operation here now for almost four years, saving county residents thousands of dollars and vital time in surgical and accident emergencies.

Small quantities of whole blood of more common types are kept constantly ready for immediate use in a special refrigerator at St. Joseph's hospital in West Bend.

The mobile unit of the Junior League Blood Center in Milwaukee with its trained staff of medical and technical personnel will be on hand next Tuesday to service the clinic.

Refreshments, always a high spot at the blood donor clinics, will be served by the Kewaskum American Legion post auxiliary.

Volunteers for Tuesday's clinic may enroll this week by calling Henry Rosenheimer in Kewaskum or West Bend phone 21.

The hardest thing about making money last is to make it first. —Hartford Times-Press.

Board Receives Bids On Painting, Lighting Estimate

Regular Meeting, July 5, 1953
The Village Board of the Village of Kewaskum, Washington County, Wisconsin met in regular monthly session with President C. Miller presiding and all board members present except Trustee Sparks.

The minutes of the previous meetings were approved as presented.

The following bids on the painting of the buildings in the village park were received, tabulated and tabled until the next meeting:

Leonard Rindt, hand brushed—\$760.00.

Herbert L. Justman, hand brushed—\$392.60.

Eldon L. Meinecke, hand brushed—\$900.00; sprayed—\$678.00.

L. Bunkelman & Son presented a counter proposal to their sidewalk, curb and gutter contract of May 1st, 1953 as follows:

Sidewalk—(5 ft. width) \$1.75 per lineal ft.

Curb and Gutter—\$2.15 per lineal ft.

Driveways—(6 in. thickness) 37c per sq. ft.

Village to do all necessary excavating. All other conditions to remain the same as in the original contract.

Motion by J. Stelplflug, seconded by A. Martin and carried that this amendment be accepted and that it be made a part of the original contract.

Motion by A. Martin, seconded by J. Eberle and carried that Regal Ware, Inc., for the consideration of one hundred dollars (\$100.00), be given a ninety-nine (99) year lease to a portion of the Water Dept. property to be used as a driveway.

The Wert Electric Co. of Sheboygan, Wisconsin presented the following estimate for the improving and modernizing of the village owned lighting system:

Laying underground cable & rewiring present standards—\$7,682.23.

Laying underground cable & new luminaires put on present standards—\$12,204.06.

Laying underground cable, new steel poles and new luminaires—\$13,874.90.

Laying underground cable, new concrete poles and new luminaires—\$16,286.70.

Motion by J. Eberle, seconded by L. Kohn and carried that this proposal be tabled pending further investigation.

Motion by J. Eberle, seconded by J. Stelplflug and carried that no charge be made to any local person, group or organization for the use of the village park or any of its facilities.

Motion by J. Eberle, seconded by L. Kohn and carried that the village assume the responsibility of maintaining a new Kettle Moraine sign to be erected by the local Kiwanis club on the Louis Klein property presently leased by the Village of Kewaskum.

Motion by J. Stelplflug, seconded by M. Schaefer and carried that the next regular meeting date be changed from August 3rd to August 4th.

Upon motion made, seconded and carried, the board adjourned until Tuesday evening, July 14, 1953 at 7:00 p. m.

Rev. Kanies, Wife Are Feted Again On Triple Anniversary

On Sunday, Aug. 2, St. Lucas congregation celebrated a threefold anniversary: the twenty-fifth wedding anniversary of their pastor and his wife, July 23, 1928; the twenty-fifth anniversary of their pastor's ordination, August 5, 1928, and the twenty-fifth anniversary of pastor and Mrs. Gerhard Kanies' stay in Kewaskum.

To celebrate the occasion, the congregation conducted a special service on Sunday morning, Aug. 2. The festival preacher was Prof. Dudley Rohda of Northwestern college, Watertown, an intimate friend of pastor and Mrs. G. Kanies. The text upon which he based his address was Psalm 109, stressing that all glory and honor is due God alone. After the service a pot-luck dinner was served by the congregation for the congregation and its friends.

At 2 o'clock in the afternoon all present once more assembled in the church proper for an appropriate program, under the able direction of Marvin A. Martin and Dr. J. L. Raschbacher.

The program began with a few band selections, under the leadership of Mrs. Carl Johnson. Orville Koehler, president of St. Lucas congregation, welcomed all present and gave a short resume of the past twenty-five years. Accompanied by a trio of clarinets, the assembly sang: "Auld Lang Syne," "The Little Brown Church," "Beautiful Savior," and "What a Friend We Have in Jesus." A poem, written by Walter Meilahn, was read by Erich Joske. Thereupon the president presented the following gifts to pastor and Mrs. G. Kanies: a sizable check and a silver service set. The pastor now addressed the audience and thanked all who helped in the preparation of this never-to-be-forgotten anniversary.

Closing the program with the singing of "Abide with Me," the assembled group once more returned to the church parlors to partake of lunch and refreshments.

After wishing pastor and Mrs. G. Kanies many more happy years of service in their midst and in this community, the assembly disbanded.

RACHEL PETERMANN IS FASHION REVUE WINNER

Two young women were selected to represent Fond du Lac county at the annual state fair dress revue as the result of judging in the county-wide style show for 4-H girls held at Lakeside park in Fond du Lac last Wednesday under the auspices of the Fond du Lac county agricultural extension office.

Rachel Petermann of the Kettle Moraine 4-H club, town of Auburn, and Doris Harrison of the Trail Blazers club modeled clothing, made by themselves, which was judged outstanding. Their next competition will be the state fair.

A blue chambray ensemble with striped trim was modeled by Miss Petermann. 100 girls took part in the show, divided into 11 classes.

William S. Martin,
Village Commissioner

Area Boys Do Well at the County Fair

Nine boys who attend Kewaskum High school from this area, exhibited livestock at the Washington County Fair.

Gerald Schulz received a blue and crimson ribbon for his purebred Chester White aged sow. Other blue ribbon winners were: William Seefeldt, sire calf; Jerry Schacht, sire calf; Gerald Schulz, sire calf, and Jim Walters for a grade ewe.

Red second place ribbons were awarded to: Reuben Schultz, sire calf; Lloyd Schacht, sire calf; Lyle Schacht, sire calf; Jim Walters, sire calf and grade Angus senior calf steer, and Barry Murrie for his grade Holstein senior calf.

Competing against heavy competition and being awarded white third place ribbons were: Kenneth Blank, purebred Holstein junior calf, and Jim Walters, with a grade market lamb and a grade ewe lamb.

Although attendance at the fair was down due to the rainy weather quality and numbers of livestock was high according to D. W. Scheid, local high school agricultural instructor. Although swine numbers decreased there was an increase in the number of cattle shown and sheep numbers set a record for those being shown.

The Kewaskum High School Future Farmer of America booth with the theme "Making Quality Concrete on the Farm" was also given a blue ribbon again this year.

Chev Game at West Bend is Postponed

The Kewaskum Chevrolets' game at West Bend and all other contests in the northern division of the Land o' Lakes league were postponed Sunday because of rain and wet grounds. They will be made up at a later date.

In the only game played the past week, West Bend nosed out Belgium 6-5, in a night tilt played at West Bend last Thursday. The "Benders" win puts them two games behind loop leading Grafton.

The team will play at Germantown this Sunday and should win over the eighth place team. Other games will find Grafton at Belgium in the feature, Newburg at Mequon, Saukville at Port Washington, and Cedarburg at West Bend.

BIRTHS

STAEHLER—A second son to Mr. and Mrs. Aloys Staehler, Jr., Kewaskum, Friday, Aug. 7, at St. Joseph's hospital, West Bend. Mrs. Staehler was taken to the hospital Thursday night in the firemen's ambulance.

MILLER—A daughter to Mr. and Mrs. Roman "Jimmy" Miller, Kewaskum, Saturday, Aug. 1, at St. Joseph's hospital. The Millers also have two sons, Robert and Michael.

FOOTLAND—A daughter to Mr. and Mrs. Elmer Footland, Milwaukee, Saturday, Aug. 1. Mrs. Footland is the former Adeline Vorpahl, daughter of the John Vorpahl, Kewaskum.

MAUL—A son to Mr. and Mrs. Roland Maul, R. 3, Kewaskum, on Wednesday, July 29.

STEVENS—A son to Mr. and Mrs. Allen Stevens, Sheboygan Falls, Monday, July 27. Allen is a former Kewaskum resident and a grandson of the Jim McElhattens.

THREE PERSONS HURT WHEN CAR ROLLS OVER

Three persons sustained minor injuries at 11:30 p. m. Friday when a car driven by James Rasmussen, 19, of 329 East Merrill ave., Fond du Lac, went out of control on a County Trunk GGG curve one mile north of New Fane and rolled over. Rasmussen and two West Bend girls whose names were not known were given first aid treatment for abrasions at St. Joseph's hospital, West Bend.

ATTENDS CAP ENCAMPMENT

Several cadets and senior members of the West Bend Civil Air Patrol attended summer encampment at Chanute Field, Rantoul, Ill. from July 25 to Aug. 3. They included Lt. Betty Koerbie of Kewaskum. During the encampment Lt. Koerbie was a flight commander.

Kewaskum Mutual Opens New Office; Holds Open House

The Kewaskum Mutual Insurance company of Kewaskum, officially opened their new office building on Main street on Thursday, Friday, and Saturday of this week. Three hundred agents of the company were guests on Thursday afternoon. The open house on Friday from 3 to 9 p. m. was for the general public. The members of the Mutual Insurance Managers Association will be guests on Saturday evening.

This completely fire-resistive building is one story with a full basement and is built of brick, concrete, and steel. It is 62 feet deep with 73 feet frontage with a stone and glass entrance. The first floor has three private offices, a large general office, punch-card room, vault, ladies rest room and lavatory. The basement has a kitchen and lounge room for the employees, a conference room, supply room, storage room, men's lavatory, and the heating room. Feclier, Schöber, Berners, Safford, and John of Green Bay are the architects, and Ben Tennes of West Bend is the general contractor.

Officers of the company are L. P. Rosenheimer, president; M. W. Rosenheimer, vice-president; Theodore R. Schmidt, secretary-treasurer and general manager; Robert W. Schmidt, assistant secretary; Elmer Possin, special representative. Directors are Peter J. Haug, August E. Koch, Edward E. Miller, Carl E. Schaefer, L. P. Rosenheimer, M. W. Rosenheimer, and Theodore R. Schmidt. The first president of the company was A. L. Rosenheimer, Sr. and the first secretary and manager was Joseph Schmidt.

Miss Loomis Bride of Richard Baker

Miss Joanne Dorothy Loomis, daughter of Mr. and Mrs. Stanley Forubcan, R. 2, Campbellsport, (New Prospect), became the bride of Richard Thomas Baker, son of Mr. and Mrs. John Baker, Waukesha, in a 10 o'clock ceremony read by the Rev. Father Schwamb in St. Matthew's church, Campbellsport, on Saturday morning, July 25. The altars were decorated with bouquets of gladioli for the service.

The bride wore a gown of imported French marquisette over satin with a dropped shoulder line edged with fluted ruffle. With it she wore a fingertip veil and carried a prayer book and a bouquet with a white orchid.

She was attended by her aunt, Mrs. Betty Forubcan, as matron of honor. She was attended in a gown of yellow nylon net with off shoulder ruffle. She carried a wicker bird basket with cascades of lilac roses and daisies. The bridesmaids, Mrs. Janet Loomis, sister-in-law of the bride, and Miss Marion Cudnoskoske, a friend, wore gowns of blue net with an off shoulder ruffle. They carried wicker bird baskets of yellow roses and daisies.

Gerald Jarvis, a friend of the bridegroom, served as his best man, while the groomsmen were Howard Baker and Norbert Papke.

A wedding dinner and supper were served at Forest Lake resort and a reception was also held there for over 500 guests. In the evening a wedding dance was held at the resort. Later the newlyweds left on a honeymoon in northern Wisconsin.

The bride, a graduate of Kewaskum High school, had been employed by the Wisconsin Electric Power Co. in Milwaukee. Mr. Baker, a Waukesha High school graduate, is employed by Waukesha Transit.

KC BRATWURST FRY IN KEWASKUM PARK MONDAY

The Hartford, Port Washington and West Bend Councils of the Knights of Columbus will hold a joint bratwurst fry in the village park at Kewaskum on Monday evening, Aug. 10, at 6 o'clock. In the event of rain it will be held in Holy Trinity church hall. Cy Wietor of Kewaskum is general chairman in charge of the event.

Ice Cream Sundae Cake's A Dream

You can dream, can't you, of a luscious cake easy to make? Well, Ice Cream Sundae Cake is a dream come true. It is two desserts in one, cake and ice cream sundae, and all the makings can be bought at the grocery store. Whether you make the cake layer yourself or buy the ready baked at the store, the result is delicious. Now that pre-packaged ice cream is sold in half-gallon cartons you can keep the main part of this dessert conveniently in stock in the freezing compartment or home freezer. Cake or cupcakes, a can of chocolate sauce and a can of shelled nuts complete the dessert.

LITTER-ALLY GOOD—A proud mama sheep keeps a close watch on her abnormally large litter of five lambs on a farm in Schleswig-Holstein region of Germany. Normally sheep reproduce only two or three at a time.

OFF DUTY—Leo Nomellini, wrestler and football star, isn't thinking about the ring as these Waikiki hula dancers give him a colorful drupe in Honolulu. But the powerful athlete might be storing up some hula footwork for his fans.

A GAL'S BEST FRIEND—Diamonds, baseball diamonds, that is, are pretty Joan Crosby's source of joy and support. In her New York office, she writes the biographies that appear on the famous ballplayer cards tucked inside bubblegum wrappers. Here she checks statistics so as not to mislead her rabid readers.

How And When To Borrow Money; Debts Normal Part of Family Budget

Borrowing money has become, very respectable and usual these days, with one out of six American families borrowing cash at least once a year. People have different reasons for seeking loans, says James C. G. Coniff in Redbook Magazine, but if they are wise, they will observe certain rules of safety. Writing in the July issue, he tells you the six legitimate sources of money and other important facts you need to know about getting a loan.

"Anybody can learn the basic rules of safety in borrowing. If you don't, you may wind up leaving more of your shirt at the lender's than you planned to. Ask yourself two big questions: (1) How soon do I get it? (2) How much do I pay back each month? Then ask yourself several more: (1) Is the lender being too easy? (2) Does he want interest only and not insist on monthly payment of principal? (3) Are his lending operations regulated by law?"

"People borrow (1) to pay what they owe and (2) to buy what they want. The first reason covers two-thirds of all borrowing, and one-third is for what is called the consolidation of debts. If you owe money to six people long enough, they start hounding you. To get them off your back, you borrow enough to pay all six. Thus you reduce the pressure to a single creditor.

"The other half of the borrowing to pay debts covers the unexpected kind. That means sudden doctors' and dentists' bills, accidental property damage not covered by insurance, and death. It is a rare family that can, without borrowing, weather an emergency demand for cash greater than a single month's income.

"Borrowing isn't all done to square up with past purchases, though. The remaining third of all loans is for current buying — cars, household goods and clothing.

"These are the six legitimate sources of loans:

"Life-insurance policy: You can borrow on your life-insurance policy up to 100% surrender value. It takes only a few days. Once or twice a year you have to pay interest at 5 to 6%, or 4% on a GI policy. You never have to pay back the full amount of the loan unless you want to, but you must keep the policy in force, and you've reduced your protection by the amount of the loan.

"Commercial banks: Most bank loans are secured by pledge of your household goods or car, or by a comaker — a friend who agrees to pay the loan if you don't. It takes a few days to investigate you, and most banks still practice the discount method of charging interest. That is, at 6% on a \$100 loan for a year, they take off \$6 before they grant

you the loan. That means you get \$94, and if you have to have \$100, you have to take out a \$107 loan to get \$100 after discount. Then you pay back the full, not the discounted, amount of the loan in installments. Bank loans average \$500 to \$600.

"Consumer finance companies: This is for you if you are in a hurry and don't want to pledge your shirt or undergo the embarrassment of having a friend sign for you as comaker. There's one 'if' — if your state has a small-loan law with teeth in it. You can get from \$10 to \$500 in most states. You pay 2½% to 3% a month on the unpaid balance of your loan. No other charge is per-

mitted, and they'll help you budget your payments.

"Industrial loan companies: These are very much like commercial banks. They like larger loans and follow the advance discount method of taking interest. They usually deal in straight dollar charges, and do not quote percentages.

"Credit unions: These are mutual groups in which you buy shares or make deposits and from whose general funds you, as a member, can get a loan at a legal maximum rate of 1% a month on the unpaid balance. Most of them are conducted by large business firms or churches, and you have to work for the company or belong to the church to buy shares.

"Pawnbrokers: The only source of credit available to the really broke. They are licensed and state-regulated and, although they have to charge a high interest rate, give you the fastest service.

High-Low
Hubby—Don't you think your gown is cut a little too low, my dear?
Wife—Not at all. Why it's made in the height of fashion.

They will lend you immediately about 50% of what they figure they can get for your pledged article at auction if you fail to redeem it and thus repay the loan.

"There are a few basic precautions you should take with any lender. Never borrow money from anyone who does not have a current state license prominently displayed in his office. Always ask for the total dollar cost of the loan, and the true interest rate. Where a small-loan law is in force, the state requires the lender to tell you. If he hems and haws or refuses, grab your hat and run."

I Word Can Change Your Life—SIGHTS

If you want to see some wonderful sights, open the eyes of your heart as well as the eyes of your head. Entertain the spiritual as well as the material.

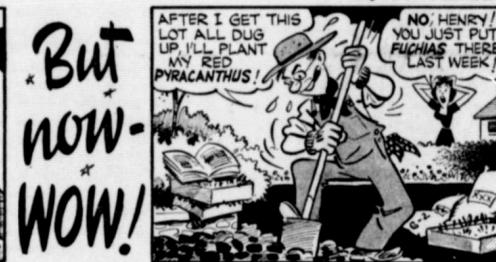

The Holy Bible is full of insights and outsgits. The great men of the Bible saw with both. They observed with their physical sense and they discerned with their spiritual sense.

Take Moses, for example. When he came upon the burning bramble bush, he said: "I will turn aside and see why the bush is not burned." He turned aside to contemplate it, to fathom its meaning, to learn its lessons, to grasp its significance.

You too can join outsgit with insight. Open the eyes of your heart. Worship God. Study the Bible. Pray without ceasing. Then you'll be bound to see some wonderful sights, the word that can change your life.

THOSE WERE THE DAYS

STRICTLY FRESH

A CHICAGO drunk walked home, went to bed unaware he was shot in a saloon fight. Guess he had too many liquid shots to notice a few lead ones.

An 80-year-old Colorado lady divorced her husband because he let her lie for four hours after a fall. She fell for him once but not again, eh?

A feline bundled up in a laundry bag, was freed just before getting a suds-dunking. Wonder

how many lives the cat left behind when let out of the bag?

Two Venezuelan brothers went back to car-washing after spending \$45,000 in horse-race winnings. Guess they figure it's better to have won and lost than never to have won at all.

A jailed Chicago youth claimed exemption from the draft because he was descended from extinct Neanderthal man. There's no exemption for extinction, bud!

HAIR BREADTH HARRY

"Mister Fixum's Handy Hints"

BY ERNIE GARDNER

FOR THE GARDEN

Colored flagstones can be used with pleasing effect for the garden path, terraces, or around the outdoor fireplace. You can make them at home, out of colored cement. While the cost is not much less than natural flagstones, these can be made into exactly the shapes desired without the problem of cutting.

Buy cement color from your dealer in masonry supplies. It comes in red, yellow, and blue. It can also be obtained in black (mortar color). Use also, Portland

cement and sharp sand as for regular mortar.

Make forms as illustrated. If you are using a pattern which is to be repeated several times, make a form for each piece. Then you can make all the flags of one color on the first pouring. Use a different color for second and third pourings.

Place waxed paper in the bottom of the forms. This will wrinkle when the wet mortar is poured on top of it, and leave a natural pattern. Remember, the face of the flag will be down when poured.

Make a dry mix of three parts sand and one part cement. Add a small amount of color, and mix thoroughly.

Make a test mix by adding water to a small amount of the dry mix. Remember, the color of the cement will be lighter when it has dried. Add more color if desired.

Add enough water to the dry mix to make a good mortar. It should not be thin enough to run, yet thin enough to fill all parts of the form.

Pour only about one-half inch of mortar in each form. Do not trowel, but be sure the corners are filled.

Mix another batch of plain mortar to finish filling the forms. Do this before the colored mortar has had time to set.

Leave flags in forms at least 48 hours to set. Keep covered with wet burlap to prevent drying out. Flags should cure for about a week before using.

So Goes The Mind

By Orin R. Yost, M. D.
Medical Director, Edgewood Sanitarium

(Editor's Note: Dr. Yost is a graduate of the Medical College of Virginia at Richmond, studied psychiatry at St. Elizabeth's Hospital in Washington, D. C., taught psychiatry at Columbia University, New York, was division psychiatrist of the 79th division in World War II, and is presently Medical Director of Edgewood Sanitarium Foundation.)

MENTAL HEALTH OF WORKERS

Mary T. told the doctor at the plant that due to many home worries, she could not work. She was too jittery, she was tired, she could not eat properly or sleep well.

Dorothy J. felt that the girls with whom she worked were not talking to her, and this fact worried her so that her work and her health suffered.

John H. was tense, shaky and depressed because he was moved so often from machine to machine.

William F. was anxious because his wife was ill and he could not keep his mind on his job.

John J., an executive, was depressed, feeling that he was totally inadequate for his job.

These people, troubled on the job, and thousands of others like them in our industries throughout this country, are being helped by the industrial physicians to understand their problems. The doctors are aiding in straightening out the emotions, the thinking and the behavior of these troubled workers.

According to Dr. Ralph T. Collins, who is Chairman, Committee on Psychiatry and Industry of the American Psychiatric Association, psychiatrists are working with the doctors in industry, to assist them in handling those problems that develop on the job. Knowledge of actual conditions, of personalities, and of the emotional climate of the job is essential for the physician and the psychiatrist.

However, most of the emotional problems of employees originate off the job, and the physicians refer employees with such problems to community psychiatrists. Therefore, the psychiatrists in industry are turning their attention more and more to the preventive aspects of industrial psychiatry. They emphasize the prevention of those conditions which produce anxiety, worry, fears, insecurity, frustration, and misunderstanding on the job.

Psychiatry has helped to demoralize in industry, and in fact, in every occupation including the military services; the importance of good, sound, effective human relations. The most important problems facing American industry today involves people—not production. Our social skills have not kept pace with our technical skills.

Familiar Foot Work

Brown — What made you start clapping your hands when that woman stepped on your foot in the crowded car?
Barlow — I was dozing and I thought my wife was giving a musicale and was signaling that it was time to applaud.

Credit Balance on Husbands

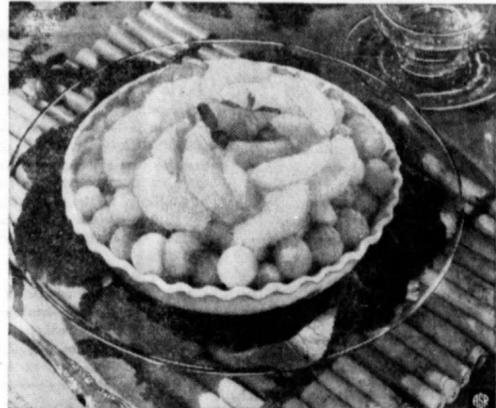

Film Star — "Isn't that a good joke on Mary?"
Director — "Hahn't heard it."
Star — "Her secretary got the records mixed up, so now she finds she has had two more divorces than she has had weddings."

TAKING OVER—R. A. Butler, British Chancellor of the Exchequer, arrives at 10 Downing Street in London to preside at a cabinet meeting. Butler is substituting for Prime Minister Sir Winston Churchill, who is taking a needed rest.

Sarah Anne's COOKING CLASS

Citrus Fine Foil For Other Fruits

Nothing looks or tastes better on scorching days than a cool fruit salad or fruit dessert, and nothing's easier if you use ingenuity in your combinations. The handiest ingredients are the canned Florida grapefruit and orange sections, which lend their shimmering touch and refreshing flavor to summer's sweeter fruits. The supply and quality this year are both tops. You'll want to combine this tawny citrus fruit with melons of all varieties, with succulent green avocado meat, with fresh berries and pineapple, and use the variety of dishes possible for breakfast, lunch or dinner often. Here's the recipe for the cool salad bowl pictured:

Florida Summer Citrus Salad
2 No. 2 cans orange and grapefruit sections
Watermelon and cantaloupe
Mint leaves
Chill cans of orange and grapefruit sections. Make melon balls from watermelon and cantaloupe. Drain orange and grapefruit sections; reserve syrup. Arrange melon balls around edge of serving bowl. Pile drained orange and grapefruit sections in center. Pour over 1 cup of the drained syrup. Garnish with mint leaves. YIELD: 6 to 8 servings.

These days, while the sun shines and the vegetables are ripening the wise housekeeper makes pickles, catsup, chili sauce and relish. Why not convert your surplus vegetables into pickles?

Pickle Relish

2 heads cabbage
8 green peppers
12 onions
10 carrots

Grind through a food chopper with the medium knife. Add ½ cup salt and let stand 2 hours. Drain very dry. Add 3 pints vinegar, 6 cups sugar, 1 tablespoon celery seed. Mix well and seal.

Relish

Select large bell peppers half green and half red. Remove the seed and fibre. Put through the food chopper. Use green tomatoes and onions. Measure each after they have been put through the food chopper. Use half as much tomatoes as peppers; half as much onions as tomatoes. Mix well, salt generously. Put in a bag and let drip over night. Next morning put vegetables in a porcelain vessel and cover with sweetened spiced vinegar. To each ½ gallon of vinegar put 3 cups of sugar and 1 teaspoon each of cinnamon, all-spice cloves, nutmeg, tumeric and black pepper. Mix thoroughly by stirring and boil 5 minutes. Fill sterilized jars and seal.

Pimiento Sandwich Spread

1 peck red bell peppers
1 pint vinegar
1 pint sugar
4 tablespoons flour (rounded)
1 jar prepared mustard
1 tablespoon salt
Remove the white fibre and the seeds from the peppers. Stir all ingredients together except the mustard. Cook until thick, about 15 minutes. Put mustard in just before taking it up. Pour into jars and cover with paraffin. This will keep several months. When ready to use mix with grated cheese.

Pepper Hash

2 dozen bell peppers
1 quart vinegar
3 cups sugar
6 onions
Remove the white fibre and seed from the peppers and peel the onions. Chop finely, then pour boiling water over them. Cook together the vinegar, sugar and salt, add the peppers and onions. Boil up once. Put in sterilized jars and seal closely.

Cucumber Catsup

Pare very thinly 6 large cucumbers, chop finely, add a scant tablespoon of salt and let drain in colander for an hour or two. Add 1 large onion chopped finely, 1 teaspoon of white pepper and 1 pint of vinegar. Stir thoroughly and seal in jars. This keeps well and retains the flavor of fresh cucumbers so perfectly that those who like the vegetable are sure to like the catsup.

Tomato Catsup

1 peck tomatoes
¼ gallon vinegar
3 onions
1 teaspoon mace
2 tablespoons cloves
2 tablespoons cinnamon
1 teaspoon spice
Sugar and salt to taste
Slice tomatoes and onions, add 1 pint of water, boil until soft, mash through a sieve. Add vinegar, mace, cloves, cinnamon, spice, sugar and salt. Boil until thick. Pour into bottle and seal.

Sweet Pickled Beets

Wash beets thoroughly & cook in clear boiling water until tender. Plunge into cold water and slip the skins off. Make a sweet pickle syrup by boiling together sugar and vinegar in the proportions of two cups of sugar to one cup of vinegar. Place beets in hot syrup and let beets boil a minute or two. Pack in hot sterilized jars. Cover with hot liquid and seal.

Tomato Jam

6 lbs. ripe tomatoes
1 lb. raisins
3 lbs. brown sugar
1 pint vinegar
1 tablespoon salt
2 tablespoons cinnamon
1 tablespoon cloves
1/8 nutmeg grated
½ teaspoon black pepper
Scald and peel tomatoes. Chop raisins, then combine all ingredients. Cook slowly for 2 hours and pack in jars that have been sterilized.

Male Dove of Peace

"Jack and I have parted forever."
"Good gracious! What does that mean?"
"A five-pound box of candy in about an hour."

His Failing

Hubby — Ah, let me back just one more horse, dear, and I promise it will be the last.
Wife — It always is.

Pattern of the Week

Food Sense—Not Nonsense

'BEARING' THE COLD FACTS

Food makes the picnic. In this modern age, good food comes out of the picnic basket fresh and wholesome even in warm, sultry weather. It is how you handle it that counts.

To preserve the goodness of picnic fare, give those foods to be served cold—cold treatment. Life begins at 50 degrees for bacteria, especially those trouble makers responsible for undesirable spoilage. Perishables, such as salads and salad-type sandwich fillings should be chilled before being packed for travel. Here is an idea—don't let bacteria come to the picnic—prepare most of the food at the picnic site. Food can become contaminated in unsuspected ways in even the spotless kitchen. It's more fun to do the final mixing of salads or spreading of sandwiches under open skies. Fortunately, bread is a good hot weather traveler and needs no chilling.

To keep the picnic basket cool, select one of the new insulated types and tuck in a refrigerator. A bucket of ice cubes or the handy new gels, encased in plastic tubes, which can be frozen at home, do satisfactory jobs of keeping perishables cool en route.

Bacteria bypass acid food but ride along with moist mixtures of poultry, meat, fish or eggs. Addition of several tablespoons of vinegar or lemon juice to mixtures of protein foods help to stave off bacterial action. Among acid foods which carry well are fruit pies. Cream pies, however, must be refrigerated if taken along. Good picnic fare also includes breads of all kinds, cake and cookies, all easily bought at your local bakery. Because these baked products are comparatively low in moisture, they do not need refrigeration.

When sandwiches must be completed in advance, choose fillings that carry well—processed cheese, peanut butter, jelly or summer sausage. For that right ending of the out-of-door meal, have it well-balanced. Provide a food with staying power—as cheese, meat or fish. The menu needs fresh fruits and vegetables to eat with plenty of buns or flavorful sandwiches made with enriched or whole grain bread.

GOSH!—Absolutely fascinated, this youngster looks on in seeming wonderment as G. B. Chiltoskie, a Cherokee Indian, carves wood figures such as those above. Mr. Chiltoskie demonstrates each year at the Craftsman's Fair of the Southern Highlands, being held this year July 20-24 in Asheville, N. C.

SOMETHING NEW—The "Corvette," the first automobile with a plastic body ever built by mass production methods, rolled off an assembly line last month at the Chevrolet plant in Flint, Mich.

CONQUEROR TRAINS THE CONQUERED—Having fought a losing battle across the Pacific for nearly five years, Japanese troops finally reach American soil, but not as conquerors. These Jap officers, members of the Japanese National Security Force, are being trained in American tactics at Ft. Benning, Ga.

Teacup Topics

By Betty Ann

EDITOR
THE MILWAUKEE JOURNAL
WOMAN'S PAGE

The straw cloth you've been seeing this season is actually a plain weave cotton fabric, processed to give a durable straw-like effect, says Betty Ann. It comes in natural straw color and in colors, white, prints and embroideries.

Straw cloth is available in ready to wear separates, shorts, pedal pushers, jackets, bathing suits, shoes, belts and bags.

Keeping straw cloth clean is simple because of the special processing which prevents dirt and stains from penetrating the fibers. The soil stays on the surface.

Shoes and other accessories in this fabric can be sponged with thick soapsuds and then wiped clean with a damp cloth. Use a soft brush on especially soiled articles. Dry in the shade in the breeziest spot you can find.

Straw separates can go into the washing machine but avoid spin-drying and use no bleach. Starch is unnecessary. If you wash by hand, avoid twisting.

If travel clothes are washable you'll need fewer garments in your suitcase. Double duty washable clothes are good investments. Petticoat and camisole ensembles go under dresses or out in the open, sleeveless night shorts serve as blouse slips, petticoat and weskit combinations double as early morning outfits, attractive pajamas whip into bloomer and blouse duos. Wise shoppers will find quick drying miracle fibers in lingerie, hose and blouses, easy to suds with soap and water. Small clothesline will insure jiffy drying after wash basin laundering.

If you are plump the rule for necklines is simple. Avoid the round—whether in a high, round neckline, a peter pan collar, or a bateau. You are limited here. There is only the square neckline or the narrow V, as plunging as modesty permits.

The fleshiest part of the arm should always be covered but never with a puffed sleeve. The sleeve should never cut into and outline the flesh.

Try a honey crisp topping on your breakfast coffee cake. This sweet, delectable, crunchy topping will lend sunshine to the day. Cream together three tablespoons softened butter and one-third cup honey until light and fluffy. Add one-fourth cup shredded coconut, one-half cup crushed corn flakes and one-half cup drained, crushed pineapple and mix thoroughly. Spread on coffee cake batter. Makes topping for one coffee cake.

Strawberry Pie Supreme
One package strawberry flavored gelatin; 1 cup hot water; 1 cup strawberry juice and cold water; 1 cup drained, sweetened, crushed strawberries; corn flakes pie shell.

Dissolve gelatin in hot water. Add fruit juice and water. Chill until slightly thickened. Place in bowl of ice and water and whip with rotary egg beater until fluffy and thick like whipped cream. Fold in fruit. Turn in fruit. Turn into pie shell. Chill until firm. Garnish with whipped cream, whole strawberries and mint leaves.

Here's a picnic novelty for an outdoor grill. Cut both ends off an unpeeled banana. Now slice through the top skin and down the center of the banana, but do not cut through under skin. Sprinkle a little brown sugar into the cut. Wrap the banana in aluminum foil, sealing ends tightly. Bake on hot coals about six minutes on each side. Serve hot, making one package for each of your hungry gang.

Hot sandwiches are the answer to simple warm weather cooking. This one's a whole meal for six. Make six sandwiches of canned corned beef and place in shallow baking pan together with six cinnamon sprinkled canned peach halves. Slip under broiler to toast sandwiches. Spoon one can cream of mushroom soup diluted with one-third cup milk over sandwiches. Sprinkle with grated cheese and return to broiler until bubbly and browned. Serve hot with broiled canned peach half.

Test the weave of a sheet by rubbing it between your fingers. If a powdery substance comes off, you'll know it contains sizing and won't stand up under washing.

Keep needles and thread in a spot convenient to your ironing board. This will encourage you to re-secure buttons and sew dropped hems and seam rips as you find them.

Hot Weather Brings Problem Of Eating Right Kind Of Food

Whether the temperature is in the 90's, or 20 degrees below zero, we need food to keep going. However, our appetite seems to slacken off when the temperature starts to soar. Then the problem of planning, preparing, and even eating food becomes a real chore.

Fortunately, hot weather brings with it an abundance of fresh fruits and vegetables with all their color. These make it easy to obtain the recommended four servings of vegetables and/or fruit each day. Be sure your diet includes at least one leafy green or yellow vegetable, a fruit or vegetable salad, and a good source of vitamin C every day. Citrus fruits, cantaloup, tomatoes, and some berries contain large quantities of the latter.

Hot weather also brings with it the desire for tall, cool drinks. Some of these are chock full of nourishment while others provide only calories and flavor. A good start toward satisfying your body's need for water is to include a pint to a quart of milk each day. Try buttermilk or skimmed milk if you need to cut calories. Another good source of water is fruit and vegetable juices. Hot or iced tea and coffee, and bottled beverages are refreshing and supply needed fluid, but they have little food value other than the added sugar.

Protein, needed by young and old, can most easily be obtained from eggs, cheese, meat, fish, or poultry. Although some feel that meat is heating, our body's daily requirement of this important body building element continues whether the temperature is high or low.

Go easy on the fats or foods containing fats, starches, and sugars. Your body still needs energy, but chances are you are

not quite so active during the warm days.

Whatever you choose to eat in hot weather check up on the sanitation. Bacteria grow much faster as the temperature rises. Extra care is needed in preparation and storage of food to avoid spoilage. In hot weather do not change your food habits drastically. As long as you continue your usual daily activities, you still need three well planned meals per day.

Make Delicious Desserts With Nonfat Dry Milk

BY DOROTHY MADDOX

If your youngsters won't drink their milk let them "eat" it. Nonfat dry milk contains all the qualities of fluid milk except the fat.

Therefore, when you use it in baking or in desserts, you are actually giving the children the valuable constituents of milk so essential to normal health and growth.

A one-pound package of nonfat dry milk, available at the grocers, will make five quarts of nonfat milk for as little as nine cents a quart.

Here are two dessert recipes, both of which will make them "eat" their milk and love it.

MARBLED BUTTERSCOTCH PUDDING

(Makes 6 servings)

One 4-ounce package butterscotch pudding mix, 5 tablespoons nonfat dry milk, 1½ cups water, ½ cup water, ½ cup nonfat dry milk, ½ cup semisweet chocolate chips.

Blend pudding mix and 5 tablespoons nonfat dry milk powder in saucepan. Gradually stir in 1½ cups water until blended. Place over low heat and cook, stirring constantly, until thickened. Cool to lukewarm.

Pour ½ cup water into 1-quart bowl. Sprinkle ½ cup nonfat dry milk powder over surface of water. Beat with rotary beater or electric mixer until stiff (about 8 to 10 minutes). Fold into pudding. Stir in chocolate chips. Pour into 6 individual serving dishes. Chill.

APPLESAUCE TAPIOCA

(Makes 4 to 6 servings)

One egg separated, 2 tablespoons sugar, 2 cups liquefied nonfat dry milk, 3 tablespoons quick-cooking tapioca, 5 tablespoons sugar, ½ teaspoon salt, ¼ cup sweetened applesauce, 2 tablespoons raisins, ½ teaspoon cinnamon, ¼ teaspoon vanilla.

Beat egg white with rotary beater until foamy. Add sugar, 1 tablespoon at a time, continue to beat until mixture stands in soft peaks. Mix egg yolk with about ½ cup liquefied nonfat dry milk in top of double boiler. Add tapioca, sugar, salt and remaining liquefied nonfat dry milk.

Place over hot water and cook, stirring constantly, until mixture thickens and comes to a boil. Remove from heat. Pour a small

Marbled butterscotch pudding, made with nonfat dry milk, pleases and nourishes everyone, including nonfat milk drinkers.

amount of the hot mixture over beaten egg white, blend quickly, then quickly stir in remaining tapioca mixture.

Add raisins, cinnamon and vanilla to applesauce; stir applesauce into tapioca mixture. Allow to cool at room temperature for 15 minutes. Stir and place in refrigerator to chill.

Note: To make liquefied nonfat dry milk, follow directions on the package.

About The Home

By FRANCIS DELL

If you like to garden but want to do it the lazy way, give mulches a try. You will find that a good mulch will control weeds by smothering them, conserve moisture in the soil, keep temperature of the soil more moderate, as well as improve soil structure and promote aeration.

You may have a problem with compacted soil or erosion. Mulching will reduce both and at the same time keep your plants and fruits cleaner.

Use for mulches whatever is available and cheap. The best time to apply is late spring when the excess moisture is gone.

Straw, hay or grass clipping are good mulches. To protect your plants from nitrogen starvation add three-fourths pound of ammonium sulphate per bushel of mulch.

Sawdust or ground corncobs make a fine mulch for strawberries, glads and roses. The usual depth of mulch is three to five inches.

Leaves usually go to your compost pile. However, try using them as a mulch as they decompose. Put them on deep and add more each fall.

INDIAN DESIGNS

For those who go for novel decorations, this one can't be beat. Ideal for shirts, jackets, pillow tops, or even embroidered pictures or linens. Easy-to-do stitches make it easy for the youngsters to work their own designs. Also excellent for textile painting. This usable-several-times hot iron transfer, C3080, only 20c.

Size And Age Of The Universe Doubled By Palomar Discovery

How old is the universe? How big? Can such questions be answered at all?

Astronomers are busy recomputing former estimates following discovery of the most far-reaching error man ever made. Measurements at Palomar Observatory have shown the entire visible universe outside the earth's own galaxy to be twice as far away, twice as old, and eight times as big as science previously thought.

Dr. Walter Baade of the California Institute of Technology's Mount Wilson and Palomar Observatories has opened a new perspective on the whole of creation, the National Geographic Society says. What do his measurements mean?

Two-Billion-Year Journey
They mean that Palomar's 200-inch Hale telescope, largest in the world, can see twice as far. Light that it captures from the farthest faint star has been on its way to earth for two billion years instead of one.

"PRECIOUS" IS THE WORD FOR REFRIGERATORS, especially in warm weather.

Treat your refrigerator right and it will perform like magic for you. Follow these tips to make the best use of this helpful piece of equipment.

1. To store meat, remove grocer's wrappings and wrap it loosely in waxed paper. Place in coldest part of refrigerator, near freezing unit. This helps keep it in good condition.

2. Clean vegetables and fruits before putting in refrigerator. This helps to keep them in best condition and to keep the refrigerator clean.

3. Store leftovers and liquids in covered containers. This will help prevent drying of foods. And frost will not accumulate as fast on freezing unit.

4. Keep a supply of plastic bags on hand for storing many items. Handy for bread, lettuce and other vegetables, and cheese.

REFRESHING COLD FOODS from the refrigerator are most welcome during warm weather. Cheer your family with cold gelatin salads.

often. Here's one that simply requires a can of tomato soup, gelatin, cottage cheese and onion. A joy to taste.

Red and White Salad
1 envelope unflavored gelatin
½ cup water
1 can (1½ cups) condensed tomato soup
1 teaspoon grated onion
Lettuce
1 cup creamy cottage cheese or mayonnaise
Soften gelatin in cold water. Heat soup; mix in softened gelatin and grated onion. Pour into 1 large or 4 individual molds that have been rinsed with cold water. Chill until firm. Unmold on lettuce. Serve with a top-knot of cottage cheese and/or mayonnaise. 4 servings.

Bible Comment:

Jesus Never Failed To Suppress Life's Many Temptations

THE writer of the Book of Hebrews says that Jesus "was in all points tempted like as we are, yet without sin." As we read the Gospels we can see how persistent were the temptations to which the Master was subjected.

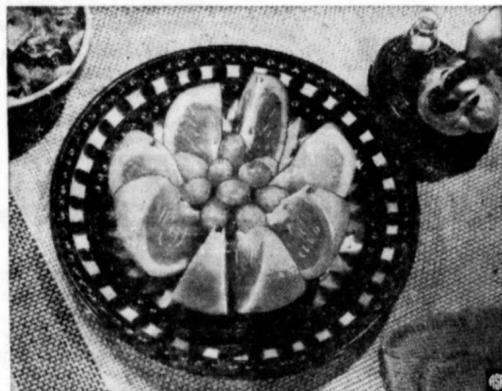

The "temptation of Jesus" was not all of one time or place. For Him, as for us, it lasted through to the end, and His admonition to the disciples was, "Watch and pray."

But the three temptations of Jesus that Matthew records were basic and had a significance beyond any later, or inherent, temptations. There is a point in all our lives at which temptation is crucial, at which the decision we make or the victory we achieve determines and marks our whole life.

In Matthew's three temptations of Jesus the allurements were of the things that ambitious men have sought: power of achievement, "Command that these stones be made bread"; the sense of personal grandeur and superiority, "Cast thyself down" (from the pinnacle of the temple); and wealth, combined with power, "All these things will I give thee."

They were the temptations to which strong men have succumbed, and to which Jesus must have been susceptible. He was tempted, as He was tempted later, even to the last hour. But He never succumbed.

Novel Way To Serve Breakfast Oranges

If breakfast time is just one mad rush at your home, here's an idea for getting the family off to a good start with fresh California oranges: Have one orange for each member of the family. For hurry-up serving, as well as fast eating, cut the orange into halves starting at the top and going almost to the bottom peel. Cut each half into quarters and then each quarter into eighths. It's as simple as can be; with four quick cuts of the knife, the orange is ready to serve. Pull each piece apart slightly until it resembles opening flower petals. To dress up the orange, you could insert a cluster of grapes or a maraschino cherry in the center. Orange sections served this way can be pulled apart in a jiffy and eaten watermelon style.

By giving your family fresh whole oranges for breakfast, you're providing them not only with vitamin C and other important nutrients, but also the newly recognized proteofectins. These remarkable proteofectins aid in digestion and help you make the best use of all foods you eat. All parts of the orange—the juice sacs, membranes, and white outer parts—contain proteofectins so now it's doubly important to eat whole oranges.

GOOD HEALTH

1. WHAT IS A COMMUNITY SELF-SURVEY OF HEALTH FACILITIES?

Answer to Question No. 1:
These community self-surveys are the method by which the people themselves study what local health facilities and services they have as a first step toward improving community health conditions where the need is indicated. These surveys, which are being used in an increasing number of communities throughout the United States, are conducted with a maximum participation of the community. Factors studied are frequently family life, school, industrial and rural health, health of the aged and dependents, dental health, hospital care, nursing and sanitation.

Answer to Question No. 2:
Leprosy, now called Hansen's disease after the discoverer of the bacillus which causes this dreaded illness, was until recently incurable. Use of a new drug, first tried out in the United States in 1943, has produced striking results and shortened the previously long, drawn-out treatment. The number of people being returned to useful lives from the desolation of the leper colony is mounting steadily, and some experts predict that within 10 to 15 years the disease will be controlled.

Answer to Question No. 3:
In most instances nose-bleed is not serious and it usually stops after a short time even without treatment. It is most commonly caused by a local condition of blood vessels in the nose. However, blows on the nose, infections, new growths, etc. can also cause bleeding. Frequently a severe nasal bleeding may require medical care. Call your doctor. Here's the Answer

Sports Afield

By Ted Kesting

Woodcock are birds of mystery. They sound an electric little whistle when flushed by dog or man but do not sound it when they fly of their own free will. How and why do they whistle? One woodcock rises in twisting flight like a jacksnipe, another wavers away like a will-o'-the-wisp. Why this erratic flight, as if the bird does not know where he is going? Other game birds are found on their feeding grounds, except during the middle hours. Why not woodcock also?

Dr. William J. Long, noted naturalist and writer, has some ideas on these questions, but he adds that you are quite free to challenge them. Let's take that whistle first.

There are reputable ornithologists who tell us that it is made by the bird's wings. Long's answer is this: "The last time I went out for woodcock my setter locked up on point at the edge of some poplar saplings. Just within the thicket a woodcock crouched low in plain sight. Noting that the bird was facing me, his bill pointed straight at me, I relaxed for a difficult shot, having learned long before that in the direction a woodcock's bill is pointing, in that way he will almost surely go when flushed. Out he came, right at me. As he sidestepped over my shoulder, his bill opened and closed rapidly while he whistled into my ear. A moment later the bird's bill was closed and the whistling had stopped. That was only one of several occasions when a woodcock seemed to say to me that his whistle comes from inside, that it is vocal, and that his wings have nothing to do with it."

The answer to their erratic flight may be told in one word, and that is "habit." Long explains that a woodcock's formative months are spent in quick

cover, where the old birds have learned by experience to rise above the brush tops before heading away. It is possible that young birds know as much by instinct; but even so they must of necessity make their first flights through the brush. Their wings are not yet strong enough for the lifting flight, which is the second flying lesson learned by any bird. So it happens that by dodging around alder clumps, or twisting through them, young woodcock acquire a habit which clings to them all season, or longer.

That you rarely find woodcock on a feeding ground is due also to a habit which sets them apart from other game birds. Woodcock feed largely on earthworms and they feed by night as a rule. Before sunrise they fly with full stomachs to a resting ground, which is often a dry, sunny ridge or hillside. Very seldom do they rest in big shadowy woods. Look for them in abandoned orchards, in the mottled light-and-shade of saplings—birch or poplar preferred—or in dwarf alder.

Your Eye Is A Chemical Factory

Taking some Vitamin A from the circulating blood stream, the eye manufactures it into "visual purple," or rhodopsin, according to the Better Vision Institute. This marvelous and mysterious substance is distributed among the rods, or specialized nerve ends, of the retina, and enables us to see in darkness.

If you are short of Vitamin A, and hence of visual purple, you are "night blind." Light bleaches out the visual purple, turns it yellow, and converts it back into Vitamin A. In the process, you lose the ability to see well in the dark. The reason you are blinded at night by an approaching headlight is that your visual purple has been destroyed. But the eye at once sets to work to manufacture a new supply.

Handy Jim's
FIX-UP TIPS
for farm and home

angle is not important. Always grind on the rim of a grinding wheel, never against the flat side.
With the cutoff, it becomes simple to rest the new edge against the glass to steady the knife while the other edge flattens the putty. Following the usual method, with the point in the way, it is nearly impossible to make a straight line.
The improved putty knife permits much speedier work, too.
Grind the tool slowly so that the temper will not be removed from the blade by overheating.

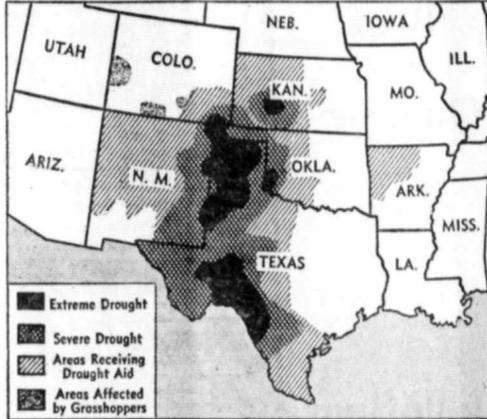

A farmer for 65 years, J. W. Williams of Renner, Tex., stands before his burned-up corn crop holding a stalk that was dried out during the days of 100-plus-degree temperature which marked the crisis in Texas' 4-year drought. Williams says this is the worst corn crop since 1911.

Ribbon Seal
©1952 National Wildlife Federation

Few readers of this have ever or will ever see our subject the Ribbon Seal. Not only is the animal relatively rare but it is found only off the coast of Alaska and about the Aleutian Islands neither of which are included in the majority of vacation trips. Even books dealing with mammals or with such specialized subjects as aquatic mammals do little more than list and illustrate Ribbon Seals. One has to get most of his information about the animals through implication and through what one knows of close relatives.

The Ribbon Seal is about five feet long and in general built like its close relative the Harbor Seal, Hair Seal or Common Seal. It differs most conspicuously from this better known animal in its conspicuous markings some of which give the animal its common name. The basic color of a Ribbon Seal is dark brown. Unlike any other seals, however, there are around the neck, the rump and each shoulder, conspic-

Map above shows the stricken areas in the Southwest allocated aid from President Eisenhower's eight-million-dollar emergency fund. Also shown are the areas in Colorado where 1,200,000 acres of farm and ranch lands were menaced by grasshoppers.

uous, usually definitely defined bands of yellow or orange yellow. Sometimes these join each other but usually they are well separated. In the females the bands are much more obscure than they are in the males. Because of these markings it would be difficult to confuse a Ringed Seal, male or female, with any other seal likely to be found within its range. The Saddle-backed Seal of the North Atlantic may have conspicuous back markings but they are not so regularly placed as are those in the Ringed Seal nor are they so conspicuous. Besides this the North Atlantic and the Aleutians and Alaska are well separated.

The typical story of reproduction for members of the family to which the Ribbon Seal belongs may be helpful here. The family includes the Harbor Seal, which is relatively common along our Atlantic Coast south to the Carolinas; the Hooded Seal which is one of the most abundant North Atlantic seals and the Harp Seal that is found in the Arctic waters of both the Atlantic and Pacific. In most of these animals the herds form at rookeries in early spring when the young "pups" are born. The mating that is responsible for next year's young takes place shortly after. The females are excellent mothers and nurse the young on land for a few weeks before the family takes to the sea. The size of these seals is much smaller than one finds with the group to which the fur seals belong.

Fur dealers give a numerical rating to indicate the durability of furs with otter given as a standard of perfection at 100. In this scale the fur seals yield pelts rated at 80% while the Hair Seals to which the Ribbon Seals belong are more likely to be rated at about 25%. Just because a coat or wrap may be made of seal skin then does not warrant that it will become a family heirloom. The domestic rabbit has a rating of 5% in this classification and the muskrat 45%. The fur seals have been harvested more for the oil that may be extracted from their carcasses than for their pelts and even this practice is usually limited to species that congregate in large numbers.
—E. Laurence Palmer.

Light Receptors By The Million

The retina, or inner coating of the eyeball, is practically made up of nerve-ends, known because of their shapes as "rods" and "cones," according to the Better Vision Institute. The rods, of which there are about 130,000,000, are what we use to see in dim light, and the images they give are indistinct. The cones number a mere 7,000,000. They enable us to focus on small objects such as letters on a printed page, and they are able to distinguish colors. Rods and cones merge into about a million strands which make up the optic nerves leading to the brain.

FRUITS, FLOWERS, AND VEGETABLES

A Christmas cactus is blooming somewhat out of season at Plainview . . . Cecil Fallon's apricot trees are bearing at Hutchinson . . . A South St. Paul restaurant man displayed a potato shaped exactly like a heart . . . Rosemary Schugel found in her New Ulm flower garden a single stem bearing 14 June lily blossoms.

You Can Get Tourist Ailments At Home

They call it "tourists' disease"; but it's something you can get at home, too, especially in hot summer weather, according to a bulletin issued recently by the Minnesota State Medical association.

Tourists' disease is, actually, just an intestinal upset that comes from eating or drinking contaminated food or drink. It happens oftenest in vacation time on tourist by-ways where ordinary sanitary protections are likely to be relaxed, or are entirely unknown.

It also happens with surprising frequency at home, the doctors say, especially where such foods as creams or cream-filled bakery goods, salads, uncooked or half-cooked meats are prepared in quantity in advance and without proper refrigeration. What happens in cases like these is that organisms like streptococci or staphylococci are introduced into the food by dirty or infected food handlers and are left exposed to summer temperatures too long. The poisoning comes from chemical toxins produced in the food by a large growth of the organisms. It is not usually detectable either by taste or smell; but within a few hours a whole party may be afflicted with violent cramps, nausea, vomiting and diarrhea.

The greatest danger for travelers comes with foreign travel. But there are tourist routes right in the United States, according to the doctors, where sanitary protections for water, food and milk are lax or absent entirely. The following rules are therefore proposed to keep summer vacations and outings happy.

1. Don't travel where you are not sure of water, food and milk protections, especially with small children.
2. Watch what you eat at home as well as on the road. See that food is properly refrigerated and prepared, especially in hot weather.
3. Be sure that hands are washed before preparing food, as well as before eating it.

R. O.: What can we do to get rid of cat odor? Beside scrubbing I mean.

ANSWER: Oil of juniper is said to be a good covering odor. A few drops to the floor may help. Repeat it when the juniper odor fades.

Misunderstood
Fay: "I shouldn't be surprised if Freddy breaks the ice with Mabel this Christmas."
May: "You mean you think he will propose to her at last?"
Fay: "No, but she gave him his first lesson in skating yesterday."

Behind The Scenes In American Business

By Reynolds Knight

NEW YORK — The industrial history in the United States for nearly four decades has been shaped by the passionate love of the American for his automobile. Nineteen-fifty-two was no exception, and it appears that 1953 will carry on the story.

In a tabulation by the National City Bank of the largest American corporations on the basis of sales in 1952, the 25 largest corporations are shown to have sold \$56,635,000,000 worth of goods. And of this, 42½ per cent—or \$24,150,000,000—was credited directly to automotive business.

First-half 1953 has seen automobiles made at a record pace, but now come reports that used cars—which must be sold before the dealer gets home with his profit—are piling up on lots. The automobile industry is sure it can sell all the cars it makes this year, but chances are that the second half will see cutbacks in production.

PLUMBING ROOM — That extra bath or half-bath, once regarded as the last word in household convenience, is fast moving from the status of a luxury to that of a necessity, and therein the Tile Council of America sees the makings of a plumbers' boom.

Recent statistics indicate that the three-bedroom house is in greatest demand, because of the rising birth rate. And as soon as the small fry grow large enough to take an interest in their appearance, some additional bathing facilities, if only a clay-tiled shower-stall with handbowl, become essential.

Remodeling to provide these extra baths will be one of the major building activities of the coming months, the Council predicts. Fortunately, the recently developed adhesive method of clay tile installation cuts the cost of bath modernization considerably.

THINGS TO COME — An outdoor barbecue stand has a 26-inch spit rotated by an electric motor . . . An attachment converts a home electric hand-drill into a hedge-shear . . . The single-rotating-blade lawn mower, hitherto an electric gadget, makes its appearance with a gasoline motor . . . Furniture with sprayed-on vinyl plastic upholstery over foam rubber cushions has appeared on Long Island . . . Aspirin-sized tablets of lindane, to be vaporized by a heating element, power a new insect control device.

DESERTED DOORSTEPS — Whereas 95 per cent of all packaged milk was delivered directly to the nation's doorsteps two decades ago, today fewer than 45 per cent of U. S. families get all their milk from the milkman.

V. K. Shuttleworth, American Can Company dairy division manager, credits this revolution to Caneo's introduction of rectangular lightweight disposable paper milk containers, to the increasing use of automobiles for shopping, and to the development of food supermarkets. Forty per cent of homemakers now buy all their milk at retail stores; 15 per cent patronize both the milkman and the supermarket.

The total market for milk in paper containers keeps rising. Production of paper milk containers has multiplied tenfold in the last 13 years, Mr. Shuttleworth said. Production in 1952 was 8.5 billion units, and an added billion are expected this year.

SIMPLER CONTROLS — Good news for thousands of minor users of the three major construction metals—steel, copper and aluminum—comes in a plan for materials controls in future emergencies, now being handed around among Washington agencies.

Where the dying Controlled Materials Plan sought to allot every user's share of these materials, the proposed new one would set aside military requirements, then fix ceilings on output of cars and consumer durable goods at a point which would leave some of the total supply of metals for other users.

Nature would be left to take its course from then on. The alert small user and the producer who had metal to spare after filling his military and big-consumer orders would have to find one another. Present thinking is that they could do so better than CMP orders could do it for them.

BITS O' BUSINESS — The furriers' union offered a prize for economies in coat-assembly. Someone came up with a gadget that would make obsolete the furrier's skill in thumbing together strips of fur. No prize . . . Huge stocks on hand may do more to push back kerosene and heating oil prices than the current congressional probe . . . Rayon, first artificial fiber, plans an advertising drive to get out of the shadow of all the postwar miracle yarns . . . Chicago's four big mail-order houses—one of which in past years has paid as much as 9 per cent of the nation's total postage—fear the effect of a further 36 per cent increase in parcel post rates, urged by Postmaster General Summerfield.

THESE WOMEN!

"Oh-oh! Daisy claims she's 24, but they're awarding her a 30-year service pin!"

Ten Word INTELLIGRAM

Check the correct word.

1. Man has (32) (28) teeth.
2. (South American) (Afro-Asian) monkeys have prehensile tails.
3. Water (expands) (contracts) when frozen.
4. (Nixon) (Knowland) is vice president.
5. Russia rules (East) (West) Berlin.
6. Black (is) (isn't) a color.
7. (Wellington) (Auckland) is New Zealand's capital.
8. (Bartholdi) (Michelangelo) made the Statue of Liberty.
9. Joe Louis was boxing champion (8) (11) years.
10. Pluto is (visible) (invisible) without a telescope.

Check your answers, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

Kewaskum, Wis.
Dear Sir:

With reference to the article on garbage disposal orders, in your April 10th edition:

It is more likely that everyone is greatly concerned with doing away with all dreaded disease and germs. However, in the case of the garbage and rubbish, the orders given by the health officer are only part of the solution.

It is agreed with the health officer that by rinsing all tin cans and keeping them in a covered container is a great help in discouraging flies, although the rinsing of the used tin cans may bring some discontentment to the dishwashing housewives.

Every other Wednesday your containers are placed at the curb, emptied and the refuse hauled away to the village dump, a few miles from the eastern village limits.

Also in agreement with the health officer, the idea of wrapping garbage in several layers of paper and placing it in a covered container...but, have you ever given thought to the where abouts of that neatly wrapped garbage after it leaves your curb???

worry about it after that? Simply because after all the effort you've made to help keep things in a more sanitary condition your garbage is dumped in a hog pen hardly out of the village limits. (This I witnessed on Friday, July 10th). Yes, your practically gift wrapped garbage is dumped in a hog pen, so the hogs may root and wallow at the packages of their choice. Christmas comes twice a week for them, and during warm weather, everyday for the germ carrying fly!!

THIS is proper disposal of garbage? Very much to the contrary! It is an excellent breeding place for germs, disease and contamination...

...RIGHT AT THE VILLAGE DOOR STEP!
Since we are urged to make the picking up of rubbish and garbage more sanitary, I suggest the village do something about their outmoded method of its final disposition!

According to the state law on garbage being fed to hogs, (passed some time ago) garbage is supposed to be boiled for 30 minutes before feeding it to the hogs, plus the farmer paying a permit fee. The village of Kewaskum, located in Washington Co., being in the state of Wisconsin is surely not exempt from the state law!!

Sincerely,
A Citizen.

New Prospect

Mr. & Mrs. Gordon Krueger, daughter Linda and Mrs. Anna Krueger of Milwaukee were guests

of Mr. & Mrs. Jos. P. Uelmen Sun. On Sunday Mr. & Mrs. Edgar Sook, Jaughter Mary and Mrs. Amanda Bartelt of Wauwasta were callers in this village.
Mrs. Howard Newell and Mrs. Ida Spencer of Burlington are guests of Miss Virginia Trapp at her home here. On Tuesday they motored to Oshkosh to spend the day there visiting places of interest and Wednesday spent the day in Sheboygan.
Mr. and Mrs. Vilas Ludwig and Mr. and Mrs. Elton Ludwig and family visited at the home of Mr.

and Mrs. Walter Jandre Tuesday evening.
Mr. and Mrs. Joe Koenen of Fond du Lac visited the latter's parents, Mr. and Mrs. Erwin Matthies Sunday and on Sunday p. m. Mr. and Mrs. Erwin Matthies and Mrs. Koenen visited Mr. and Mrs. George Krautkraemer.
Mrs. Frank Bowen, in company with Mr and Mrs. Leo Bowen and daughter Mary Ann, Mrs. Alex Ulrich and Mrs. Ribbrec visited the Cave of the Mounds Wednesday. Special school meeting, August 10, District No. 7, Important.

the Easiest Fall Plowing you've ever done...

That's what the Allis-Chalmers WD Tractor and its 3-bottom mounted plow offer:
Let us put you in the soft-riding hydraulic seat of an Allis-Chalmers WD Tractor. Hydraulic power lifts the plow for transport to the field. There, the powerful WD engine and Traction Booster take over. When the going gets tough, implement weight is automatically added to the drive wheels to keep you moving.
With the mounted Free-Swing plow, there's no crowding, no strain on tractor or implement.
Find out for yourself how easy plowing can be. Let us demonstrate the Allis-Chalmers WD.
