

Death of Paul Seefeldt Sunday

Paul Seefeldt, 66, of the town of Kewaskum, a retired railroad section man, died Sunday evening, Jan. 10 at the Wood Veterans hospital, Milwaukee, following an illness of one week with pneumonia and complications.

He was born in the town of Kewaskum on April 25, 1887, a son of the late William and Magdalena Seefeldt. He resided in the town of Kewaskum all of his life with the exception of one year when he served his country in World War I. He served overseas in France part of this time. For the past eight years Mr. Seefeldt had made his home with Mrs. John Kohn and the late Mr. Kohn in the town of Kewaskum, just north of the village.

The deceased never married. He is survived by four sisters and two brothers, Emma (Mrs. Frank Rexilius) of Racine, Louis of the town of Kewaskum, Clara of Milwaukee, Lilly of the town of Kewaskum, Leona (Mrs. Emil Klumb) of the town of Barton, and August of the town of Kewaskum. Surviving also are many nieces, nephews and other relatives.

The body was in state at Miller's funeral home after 3 p. m. Tuesday. Funeral services were held there at 2 p. m. Wednesday, the Rev. Gerhard Kaniess officiating. Burial was in Lutheran Memorial park. Members of Robert G. Romaine American Legion post of Kewaskum took part in the services at the grave.

MRS. BERT E. ELLIOTT

Mrs. Bert E. Elliott, 48, of 333 Sheboygan st., Fond du Lac, wife of an insurance dealer, died at 6:30 p. m. Friday, Jan. 8, in St. Agnes hospital, Fond du Lac. The Elliotts are well known here. Mr. Elliott formerly played a star role on Kewaskum basketball and baseball teams some 20 to 25 years ago.

The former Lila H. Jantz and Mrs. Elliott were married on Aug. 29, 1926, at Hilbert and resided at Plymouth before moving to Fond du Lac in 1931. Surviving in addition to Mr. Elliott are a daughter and two sons, Mrs. John Grassy, Fond du Lac, Bert Elliott, Jr., a member of the Fond du Lac High school basketball team, and Stephen Elliott, at home; a brother and three sisters.

Funeral rites were held Monday at 2 p. m. at Our Saviour's church, Fond du Lac, the Rev. B. J. Stecker presiding. Burial was in Rienzi cemetery there.

Our Town

Pretty cold this week, huh? Yep, we had our coldest spell of the winter thus far. It started Monday night and continued through Wednesday. Tuesday morning the mercury dipped to 6 or 7 degrees, below zero, low for the season. But it warmed up nicely Thursday with a shift of the wind to the southeast. Rain, sleet or snow was predicted for Friday.

While down at the hospital in West Bend Sunday afternoon we were amazed while peering through a window to see a group of hospital Sisters playing a game of ball in the back yard in the biting cold wind. They were playing with gloves on. It takes more than cold to get the good Sisters down.

A Kewaskum wisecracker says he knows what everybody is doing in Kewaskum, but reads his Statesman each week to see if they've been caught at it.

Did you read about the game of basketball they had in the Kettle Moraine league Friday night? It was a little one sided. Poor little Glenbeulah High school found the basket for only four field goals. Cedar Grove didn't have that trouble. Final score: 107 to 16. Incidentally Cedar Grove must have quite a team this season. They are undefeated and rated among the top teams in the state's little ten.

It was one of those mountain roads and the tourist stopped to ask directions from a native. "Pardon me, sir," said the stranger, "can you tell me where hole"

Woman's Club Backs Chest X-Ray Survey

The chest x-ray survey of Washington county is in progress. Two State Board of Health mobile x-ray buses are working simultaneously at industries and open centers. One bus is at present working at the Hartford industries.

The Homemakers groups and Kewaskum Woman's club are making a special effort to promote this chest x-ray survey. A local organization has been formed within each township. These women's groups are publicizing this a full health service in every way possible. Posters and schedules are placed throughout the county.

Some areas will be contacted by letter, post card, telephone or door-to-door distribution of educational literature. Some groups will send the message home to adults through the school children. Educational films emphasizing the value of a chest x-ray are available through the county nurse's office for use any place in the county during this month.

The pastors have been requested to announce the schedule of the bus within each locality. These women's groups will also contribute volunteer help at the open and industrial centers in the county.

DR. WM. LAMERS SPEAKER AT HOLY NAME BREAKFAST

Following the 8:00 a. m. mass at Holy Trinity church Sunday a Holy Name breakfast was held in the parish hall. Society members received Holy Communion in a body during the mass. Dr. Wm. Lamers of Milwaukee was the speaker at the breakfast. On Sunday afternoon at 2 o'clock a Holy Name Hour was held in the church.

The regular meeting of the Ladies Altar society was held in the hall at 8:00 p. m. Tuesday. Hostesses were Mmes. J. Schoofs, D. Scheid and Miss Helen Schoofs.

The Catholic Youth Organization met Monday evening in the hall and on Thursday evening the C. Y. O. dancing class met.

COUNTY AGENTS IN NEW WTMJ-TV FARM PROGRAM

A new series of farm programs is being sponsored by WTMJ-TV. The program will be presented each Saturday afternoon at 1:00 p. m. and is under the direction of 'Big' Murray, who is the well known WTMJ farm news announcer.

Participating in the program will be the county agents from ten counties in the Milwaukee area which includes Washington county. Each agent will discuss some phase of agriculture in which his county excels. The first of these programs was presented last Saturday afternoon when nine county agents participated and told of one or more leading agricultural activity of their county.

FIREMEN ENJOY ANNUAL GET-TOGETHER AND FEED

Members of the Kewaskum fire department enjoyed their annual social event and lunch at the municipal building following the regular monthly meeting last Thursday night. Honorary firemen, members of the village board, police and a few others were guests.

Door prizes were awarded and it was also annual 'pay day' for the firemen. Card playing was the main pastime while some just spent the evening socially. Everyone had their fill of food and refreshments. Smokes, music and novelties were also furnished.

HOSPITAL NEWS

Mrs. Walter C. Schneider, Kewaskum, submitted to a major operation at St. Agnes hospital, Fond du Lac, Monday, Jan. 4. She returned to her home on Thursday of this week.

David Korth, Kewaskum, is a patient at St. Joseph's hospital, West Bend.

Angela Beishler, daughter of Mr. and Mrs. Byron Beishler, St. Kilian, is a patient at St. Agnes hospital,

this road goes?" "Yes," said the hillbilly. "This road just turns along a place, then it turns into a hog trail, then a squirrel track, and finally runs up a scrub pine and ends in a knot-stranger, "can you tell me where hole"

Indians Beat Oaks, Lions, Take Second

TRI-COUNTY STANDINGS

	Won	Lost
Campbellsport	5	0
Kewaskum	4	2
Oakfield	3	2
Lomira	2	3
North Fond du Lac	2	3
Rosendale	2	3
Brandon	1	4

Scores last Friday—Kewaskum 59, Oakfield 47; Rosendale 59, North Fondy 47; Campbellsport 46, Lomira 39.

Scores Tuesday—Kewaskum 57, Lomira 56; Campbellsport 70, North Fondy 60; Oakfield 53, Brandon 41.

The Kewaskum High school Indians won two very close games the past week from strong teams and as a result jumped into undisputed second place in the Tri-County conference, behind the unbeaten Campbellsport Belles.

Last Friday night the Indians played host to a good third place Oakfield five and came out on top by a close 59-47 margin. On Tuesday night Coach Mitchell's boys drove to Lomira to take on the veteran Lion squad. In this encounter the Indians squeezed out a one point victory, 57-56, to drop Lomira into the fourth spot and all but wreck their title chances.

The win over the Lions on their home floor was termed an upset. The Indians had to come from behind in the last 15 seconds of play to turn the tables on Lomira. Center Koepeke, who scored a total of 21 points, flipped in the winning basket for Kewaskum.

Kewaskum got off to a flying start in the opening period and led by a 16-9 margin. The Indians held a 33-26 advantage at halftime and were out in front by 45-39 at the end of the third period. Center Klebasadel was high scorer for Lomira with 24 points.

Kewaskum 16 17 12 12-57
Lomira 9 17 13 17-56

In the Oakfield game Kewaskum held a 32-18 lead at the end of the first half but came close to losing out in the third and fourth periods as the Oaks started to hit. Forward Russ Rodenkirch and Guard Mark Rosenheimer were top point-makers for the winners with 17 and 16 points respectively. Forward Bob Guelzow paced Oakfield with 17 markers, followed by Roger Bloom and Earl Dewitz with 11 tallies apiece.

Oakfield 8 10 15 14-47
Kewaskum 17 15 6 12-40

It was for this reason, the chairman said, that the March of Dimes has to raise all it possibly can in this year's campaign. Whether or not the hoped-for goal of \$20,000 will be reached in Washington county depends largely upon the efforts these volunteer leaders make to reach everyone in their respective communities and receive generous contributions.

BRAVES PLAYERS HEADLINE SPORTS SHOW AT WAYLAND

Lew Burdette, Joe Taylor and Billy "Go-Go" Bruton will headline a sports show January 30, at Wayland Academy gymnasium, Beaver Dam. The "Braves" are appearing under the sponsorship of Lutheran Hospital association and through the courtesy of Miller Brewing company, Milwaukee.

"The Milwaukee Story" depicting the Braves in action at home and on the road during the 1953 season will be shown along with film highlights of the Green Bay Packers pro-football games. A half hour movie of the Wisconsin-Illinois football game, college classic of 1953, will round out the film portion of the program.

The Beaver Dam "Barbershop" chorus, over thirty strong, will sing the favorites. Roman "Giz" Bantz, Horicon, Western League sumo, are, will M. C. the program which is under the direction of program chairman, Les Frinak, Beaver Dam.

MILLERS SEE NEW STYLES IN HOME FURNISHINGS

During the past two weeks leading home furnishings manufacturers from all over the U.S.A. and some foreign countries showed their new styles for the first time and thousands of interested furniture dealers, who came from all parts of our great country to Chicago for their trend style show.

Our local dealer, Miller's, was well represented. "Pat" notes that the show was very interesting and that many of the new items will soon be on display at Miller's store right here in Kewaskum. Watch later editions of the Statesman announcing the arrival.

Ralph Marx Heads Dimes Drive Here; Chairmen Named

The appointment of community volunteer leaders who have accepted chairmanships or committee posts in Washington county's month-long March of Dimes drive for 1954 was announced Monday by Michael J. Gonring, Jr. and Alan Pick, co-chairmen for the campaign in the county.

It looks as if everyone is in the polio prevention fight this year, the chairmen declared. "As usual, a number of local and civic organizations as well as churches and public schools have taken up arms against polio. Both Gonring and Pick emphasized, however, that more of everything is needed this year if the March of Dimes is to meet its obligations. "We need more workers, more special events, and more and bigger contributions."

Polio prevention—program four of the National Foundation for Infantile Paralysis—will cost an added \$26,500,000 this year, the chairmen stated.

"That's why we must raise more in 1954. This is the additional cost over and above the National Foundation's traditional programs of aid to patients, professional education and scientific professional research," they said.

"Here in Washington county the national and local chapter gave financial aid to all patients stricken during the past year," the chairmen pointed out. "Many of these people will need help right on through 1954 and some longer."

The fact that the chapter never knows in January how many cases it will be called upon to assist during the rest of the year poses the biggest question mark the March of Dimes faces.

"We know roughly," Gonring and Pick said, "how much we can earmark for laboratory research, how much for scholarships to train specialists, even how much will be needed to buy available gamma globulin and to start validity tests of a trial vaccine."

"But polio is an unpredictable epidemic disease that strikes without pattern or precedent. All we have to go by is the fact that 1953 marked the sixth consecutive year of high polio incidence. With a record like that, it would be foolhardy to expect light incidence in 1954."

It was for this reason, the chairman said, that the March of Dimes has to raise all it possibly can in this year's campaign. Whether or not the hoped-for goal of \$20,000 will be reached in Washington county depends largely upon the efforts these volunteer leaders make to reach everyone in their respective communities and receive generous contributions.

Named to work with Gonring and Pick in the northern portion of the county are the following:

Postmaster Michael J. Gonring, West Bend, who will head a special gifts group and solicit contributions from local industries; Mrs. Robert Haebig, who will again organize and direct a Mothers' March on Polio, which will take place in West Bend on Wednesday evening, Jan. 27. Mrs. Haebig is also assisting in organizing a similar 'March' in Hartford.

Township chairmen named to date include Louis Kuhaupt, town of Addison; Barney Strobel, town of Wayne; Mrs. John Donath, town of Farmington; John Van Beek, town of Barton; John Horlamus, town of West Bend; Fred Schroeder, town of Trenton; Walter Zastrow, town of Erin; Arthur L. Lichtenwalter, town of Hartford; Peter Merten and George Nehrass, town of Polk; and Gilbert Arnold, town of Germantown. Chairmen for the towns of Kewaskum and Jackson are yet to be named.

Village chairmen include Louis Kuhaupt, village of Allenton; Herb Matenaer, village of Barton; Ralph Marx, village of Kewaskum, and Leroy Fisher, village of Newburg.

Coin collectors, in the form of miniature test tubes, were distributed throughout the county last Saturday by members of the various American Legion posts. As in the past, parking meters in West Bend will again join this year's March of Dimes. City Clerk Kenneth H. Weiss announced that all dimes deposited in the meters during the campaign will be turned over to the local polio chapter. By depositing a dime in the meters during January, motorists will not only receive parking time, but will be doing their part in making the 1954 drive a success.

Kewaskum Woman's Club to Hold Banquet Jan. 23

Final arrangements have been made by the hostess chairmen, Mmes. P. N. Landmann and C. E. Mitchell, to hold the Woman's club's annual dinner at 6:30 o'clock in our local Republican Hotel, January 23. A delicious dinner menu, featuring ham and turkey, has been planned with the assistance of Mrs. Jilbert, and will be served buffet style.

The price, as previously announced, will be \$2.75 per person. There will be dancing and cards for entertainment.

The chairmen have requested that all postal cards be returned by Saturday of this week, so that the approximate number of reservations may be returned to the hotel management in sufficient time.

MRS. J. SAUTER DIES

Mrs. John Sauter, 73, of the village of Kewaskum, formerly of the town of Scott, died late Thursday night, Jan. 14. She was the mother of Mrs. Roland Heberer of New Fane, Lawrence Sauter of the town of Scott, and Arno Sauter of Adel. The body will be in state at Miller's funeral home, Kewaskum, after 2 p. m. Sunday. Funeral services will be held Monday at 2 p. m. in St. John's E. and R. church, Beechwood. The remains will be in state at the church from 12 noon to 2 p. m. Monday.

KEWASKUM MAN'S CAR INVOLVED IN MISHAP

Arno Maske, 737 Second Ave., West Bend, was driving south a long Main st. in that city Friday afternoon about 4:50 p. m. when his car went out of control and struck two parked cars owned by Lyle Siebenaler, R. 1, Kewaskum, and Frank Hron, West Bend. All three cars were damaged along with a parking meter post. Maske was taken to St. Joseph's hospital, West Bend, not with an injury, but a sudden illness that came upon him while he was driving. He was later released from the hospital.

SKAT TOURNAMENT TUESDAY; LAST WINNERS LISTED

A skat tournament will be held at Heisler's tavern, Kewaskum, Tuesday evening, Jan. 19. Entry fee \$2.15. Lunch served.

Prize winners at the last skat tournament were: 1. Walter Schmidt, 20-9-20 games, 652 points; 2. Ray Klein, 18-4-14 games, 501 points; 3. Wilmer Probst, 23-7-16 games, 480 points.

MISS WEILAND ENGAGED

Mr. and Mrs. Ferd. Weiland of St. Kilian announced the engagement of their daughter, Shirley, to Donald Sperger, at a dinner for immediate relatives Sunday. Mr. and Mrs. Ruben Sperger of LeRoy are the parents of Miss Weiland's fiancée.

LANDMANN INSTALLED

At installation ceremonies for the new officers of West Bend Lodge No. 138, Free and Accepted Masons, held at the Masonic temple there Thursday evening, Paul Landmann, Kewaskum, was installed as senior steward.

BIRTHS

BROECKER—A daughter to Mr. and Mrs. Raymond Broecker, R. 3, Kewaskum, Thursday, Jan. 7.

KUESTER—A daughter to Mr. and Mrs. John Kuester, R. 2, Kewaskum, Sunday, Jan. 10.

STERN SON BAPTIZED

The little son of Mr. and Mrs. Harold Stern was baptized by the Rev. Gerhard Kanless in St. Lucas Ev. Lutheran church Sunday. He received the name Michael James.

ing the campaign will be turned over to the local polio chapter. By depositing a dime in the meters during January, motorists will not only receive parking time, but will be doing their part in making the 1954 drive a success.

J. Tessar, Bilgo on Lakes All-Star Team

Johnny Tessar, league's topnotch scorer, and Augie Bilgo, versatile guard, were the Kewaskum Chevrolet members named to the northern division Land o' Lakes all-star team selected by the coaches last week.

Tessar and Doug Ritchie of Port Washington were the only unanimous choices on the 11-man squad selected. These two are having a neck and neck battle for the scoring lead. Besides Kewaskum, only Fond du Lac and Port placed two men on the squad.

Dick Russart is the other Port man chosen. Fond du Lac's two all stars are Fritz Lautenschlager and Jed Rashid. Jim Adams, Fondy's giant center, was ruled ineligible for further competition at the meeting. Other members of the squad are Tommy Miller of Brandon, Royce Wrucke of Horicon, George Helm of Mayville and Cliff Robde of Rosendale. Russart, Wrucke, Helm and Bilgo are the only repeaters from last year's star squad which defeated the southern all stars, 68-65.

The northern stars will meet the southern stars at a site and date to be announced next week, with West Bend and Cedarburg being possible sites. The game was played at West Bend last year and the southern division will choose the gym this season.

Lloyd Wagener of Horicon and Oliver Nehring of Rosendale will coach the stars. These jobs are awarded on a rotation basis now.

SON OF WOMAN EMPLOYED HERE KILLED IN ACCIDENT

Injuries received in a traffic accident near Roswell, New Mexico, proved fatal to an 18-year-old Fond du Lac youth Tuesday, Jan. 6. The victim was identified as Kenneth Austin, who resided with his mother, Mrs. Edith Austin, at 15 Royal ave. in Fond du Lac up until a week before Christmas when he went to the Southwest to seek employment. Mrs. Austin, who is employed in Kewaskum, was at work when authorities attempted to locate her. Details were lacking, except for the fact that Austin was driving a truck for a pipeline company at the time of the crash.

ANNOUNCE BETHROTHAL

The engagement of Louella Grasse to Pvt. Harold Reindl was announced by her parents, Mr. and Mrs. Ray Grasse of Port Washington during the holidays. Pvt. Reindl is the son of Mr. and Mrs. Killian Reindl of Kewaskum and is stationed at Parks Air Force Base, California. He is to report for overseas duty in the near future.

MARRIAGE LICENSE

Frank K. Krueger, Kewaskum, and Mary L. Martin, Kewaskum; wedding Jan. 16.

What Do You Think of Your Kewaskum?

Through unforeseen happenings this column did not appear last week. Our last column spoke of the HAZARDS of the pavements in winter.

This week we would like to direct a question at you young people of our community, for you as well as the older folks know it is dangerous to drive on village streets and alleys in excess of speeds set by the law.

How would you suggest to stop or minimize this danger which results in dented fenders, damaged car bodies, smashed car bodies, total loss of cars, injuries and even loss of life to occupants of one or more cars?

Please realize that this phase of careless driving is a main cause of the present high insurance rates, and if it continues, will boost the rates to such an extent that a person 25 years or under will not be able to afford an automobile. This type of driving will also result in the loss of your driver's license.

What say boys and girls? Let's think of these things as THE LIFE YOU SAVE MAY BE YOUR OWN. What do you think of your Kewaskum?

Chevs Win, Hold First Place Tie

LAND O' LAKES STANDINGS (Northern Division)

	Won	Lost
KEWASKUM	5	1
West Bend	5	1
Fond du Lac	5	1
Port Washington	3	3
Horicon	3	3
Mayville	2	4
Rosendale	1	5
Brandon	0	6

Scores Sunday—Kewaskum 63, Horicon 59; West Bend 55, Mayville 78; Port Washington 79, Rosendale 73.

Game Wednesday night—Fond du Lac defeated Brandon.

Games this Sunday—Kewaskum at Port Washington, Horicon at Rosendale, Fond du Lac at Mayville, Brandon at West Bend.

The Kewaskum Chevrolets traveled to Horicon Sunday afternoon and won but not until after Horicon put up a surprisingly stubborn fight. The score was 63-59, in a close one. By winning the Chevs retained their three-way first place tie with West Bend and Fond du Lac.

Kewaskum had to come from behind to pull the victory out of the fire. Big Center Don Bischoff nearly led Horicon to an upset win by tossing in 27 points, the high figure for the day. He outscored Johnny Tessar, Kewaskum's loop leading scorer. Tessar was held to "only" 19 points, his lowest of the season. However, Augie Bilgo, Wayland Tessar and Ellie Ramthun came through to help the Chevs end up on the long end. Wayland netted 11 points, Augie nine and Ellie eight. Other high scorers for Horicon were Wrucke and Weiss with 13 markers apiece.

Kewaskum took an 15-15 lead in the first quarter and was ahead by 16 points, 36-26, at the intermission. Horicon rallied well in the third period and went ahead a couple of times but still trailed at the third stanza's end, 47-46. After a stormy final quarter, the Chevs were able to take a four-point lead at the final whistle.

The first half of the split season ends this Sunday with Kewaskum facing the roughest going of the three first place teams. The Chevs play at Port Washington (tied for second) and will face a powerful team, led by Doug Ritchie, former University of Wisconsin ace, and high scorer Dick Russart. West Bend plays Brandon and Fond du Lac is at Mayville.

Kewaskum 18 18 11 10-48
Horicon 15 11 20 14-69

UNDEFEATED HORICON NIPS RIVERS TEAM BY ONE POINT

Mayville	0	6

Results of week—Horicon 49, Kewaskum 48; West Bend 61, Mayville 44; Slinger 69, Cedarburg 59. Games Sunday—Kewaskum at Fillmore, Slinger at Mayville, Horicon at Ixonia, Cedarburg at West Bend.

A free throw in the last seven seconds by Jack Pluckhan preserved Horicon's unbeaten string and sent Kewaskum down to its second straight defeat in a 49-48 heartbreaker there Sunday afternoon in a Rivers game. Pluckhan's free throw broke a 48-48 tie and made it six straight for Horicon. It was the only point scored by Pluckhan in the entire contest.

Bob Seibert and Jim Affeld of the winners and George Hanrahan of Kewaskum shared scoring honors with 16 points apiece. After a 7-7 first period Kewaskum jumped into a 21-16 lead. But Horicon scored 20 points in the third stanza to go ahead, 35-32. The locals fought back and tied it up in the final quarter only to be edged out by a meagre point.

Horicon 7 9 20 17-49

Excessive eating makes one thick to his stomach.—The Sharon Reporter.

FAO Shows Thailand How to Net Profits

Dr. S. W. Ling, a fisheries expert from the Food and Agricultural Organization of the United Nations (FAO) examines a fish netted from an experimental pond in Thailand. The fish which will be distributed to Thai farmers so that they can start their own breeding ponds, are known as tilapia, a form of perch. Recent experiments made by FAO at the request of the government show that the rice paddies which dot Thailand can be used for fish culture as well. The added yield not only provides extra cash to the Thai farmer but gives him a richer protein diet.

Rearrange House Plants in Winter

Light has a lot to do with the way plants grow. And, according to David Bosley, flower specialist at the U. of Wis., poor winter light conditions can mean success or failure for growing all kinds of house plants.

Bosley says winter light conditions in Wisconsin are among the poorest in the country. Unless plants get full advantage of the small amount of light available they'll develop weak, spindly stems with small leaves and poor flowers.

He says flowering house plants should be placed in windows which face south, since the best light will come from that direction. African violets and other green foliage plants may be placed in an east window where they will receive sun in the morning. Bosley says morning sun is more important to plants than afternoon sun.

The specialist says in some cases fluorescent lights can be used to make cuttings take root and to start seedlings. African violets can be started and even carried through to flowering entirely by fluorescent lights, he adds.

Soldier Sourdoughs Strike (Some) Gold In Arizona Desert

Fort Eustis, Va.—When three soldiers from here were sent to the Arizona desert, they didn't expect to find gold at the end of their trail.

But they discovered it still is to be found in the desert if you are willing to dig for it.

Private Sam Briant of El Paso, Texas, Private Leonard Schalkofsky of Alpina, Mich., and Private Kenneth York of Kansas City, Mo., went to the Army Transportation Corps' Test Station a Yuma, Ariz., for several weeks to help Army research.

While there, they caught the gold rush fever from permanent residents of the area and used their off-duty time to build a crude dry washer. Then—laden with picks and shovels—they set out for a likely looking spot on the military reservation. Many holes in the area indicated that

Used For Bridge Prizes
Governess — Methuselah was 900 years old.
Bobby — What became of all his birthday and Christmas presents?

Fish Story
Mess Sergeant: "You're not eating your fish. What's wrong with it?"
Soldier: "Long time, no sea."

Prior to June, 1950, when the war began, Korea ranked twelfth among countries of the world in population, with some 30 million inhabitants, the National Geographic Society points out.

other "prospectors" might have found some of the precious metal there.

Carefully sifting sand through the screen of the dry washer, they were surprised to find a few gold nuggets.

They're worth only a few dollars," said Private Briant, "but finding real gold was a thrill for all of us!"

NATURE'S FALL FROLICS
Dandelions bloomed in November, not only at Raymond, Minn., in the southern portion of the state, but at International Falls nearly 300 miles farther north. While lilacs bloomed at Wadena, Minn., and at Fergus Falls, Minn., Mrs. Harvey Morrill picked a lemon 13 inches in diameter from an 18-inch tree. . . But the week's prize goes to Farmington, where Robert Stegmaier combined six acres of oats the 18th day of November.

Pat Was Optimistic

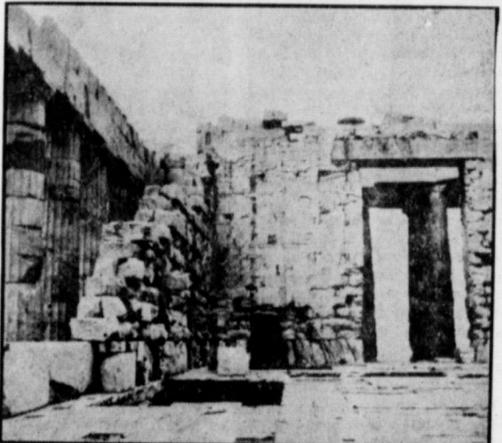

Two young Irishmen had just gone into the trenches in World War I, and their captain promised to pay \$1 for every one of the enemy they killed. Pat was asleep when he was awakened by Mike shouting, "The enemy is charging! Wake up! Wake up!"
"How many are there?" asked Pat.
"About 50,000," said Mike.
"Begorra!" shouted Pat, jumping up and grabbing his rifle. "Our fortune's made!"

Dehorn Beef Calves When They're Young

Dehorn your beef cattle when they are young—to avoid later loss and injury.
E. R. Hauser, animal husbandry specialist at the U. of Wis., says steers and cows can be dehorned by a veterinarian after they get to be three or four years old, but it will undoubtedly set them back considerably.

Hauser says calves should be dehorned at a very young age if at all possible. In some cases, when steers or cows are purchased, the farmer will have no control over dehorning. These cattle with horns will take a discount when they go to market. Packers make such a discount because there is apt to be some carcass damage due to bruising on horned cattle. The specialist says dehorned cattle feed a lot quieter in the feed lot. They require less room both in the lot and in the barn.

To remove a burned crust from bread easily, rub the loaf with a vegetable grater.

TEMPLE TO BE ROOFED—The Greek Archaeological Council will soon erect a roof over the ruins of the Parthenon, to protect the ancient Greek temple's sculpturing. The inner walls, such as the one shown to the right of the columns, will be demolished in hope of discovering ancient inscriptions of archaeological interest.

1953 SURGERY: INCA STYLE

Reports from Lima, Peru, state that two Peruvian surgeons recently performed a successful brain operation using instruments made by the Incas 2,000 years ago. The surgeons, Francisco Grana Reyes and Estaban Rocca, are reported to have decided some time ago to try out the Inca technique.

A phase of the operation was the use by the surgeons of a tourniquet which applied to the patient's head had almost completely stopped the flow of blood, with ill effect. Usually, in brain operations, the flow of blood is profuse.

The Peruvian surgeons are not the first to try an operation with Inca tools, but it is the most successful yet performed in modern times, as far as is known. For sometime the two doctors had studied hundreds of ancient skulls, many of which are found at Caracas, on the coast of Peru. In this town it is believed the Incas had either a major surgical center or a school of surgery, since so many instruments and so many skulls have been discovered there.

Some of the skulls show the effects of operations which removed parts of the skull several inches in length or width. In modern surgery the removal of large parts of the skull is considered an extremely dangerous operation and often results in death to the patient.

On Board the Ark
Captain Noah—Can you swim?
The Skunk—No, sir. I never learned how.
Captain Noah—Then, remember, your safe passage depends on your good conduct.

ON THE SPOT—Twelve-year-old Tommy Gilbert of Bristol, N. H., is justly proud of his marksmanship with the bow and arrow. The seventh grader recently shot a 248 score out of a possible 270 on the standard 50-foot range, setting a new record for the New England vicinity.

"Mister Fixum's Handy Hints"

BY ERNIE GARDNER

DO YOUR ELECTRIC FUSES BLOW?

CHECK EACH CIRCUIT FOR LOAD

1. Turn on all the lights in the house and garage.
2. Go to the fuse box and unscrew the first fuse.

The lights that go out are on that circuit.

4. Make a chart of each circuit in this manner.
5. Figure wattage of lights and appliances used on each circuit.

Wattage should not be more than 1,775

STAND ON DRY BOARD

DO YOUR ELECTRIC FUSES BLOW?

Electric fuses blow, mainly, for two reasons. One is because the circuits are over loaded. The other is because the wiring is defective, causing a short circuit.

The modern six room home with all of the customary electric appliances should have about 10 separate electric circuits. This means 10 fuses in the fuse box.

These circuits should be distributed over the house in such a way that there is no danger of an overload. The circuits most commonly found will carry, safely, a load of 15 amps. Therefore, a 15 amp fuse is placed in the fuse box.

If appliances using a total of more than 15 amps are all used on the same circuit at the same time, the fuse will blow. (burn

out).

We find many of the older homes that were wired 30 or 40 years ago having only one or two circuits. This may have been enough then, with only lights, and possibly a flat iron run by electricity. But with many electric appliances in use to day, more circuits are needed.

So, if you are tired of replacing fuses, the best thing to do is to add more circuits. If your house is old, it should probably be rewired so that the load can be distributed evenly.

Never! put a penny in the fuse socket. To do so invites a tragedy. Fire insurance companies do not pay claims where the cause can be traced to this practice.

Brown fuses due to short circuits usually have their origin in faulty cords, plugs, or sockets. The wiring in appliances may become shorted because of the rotting of insulation.

When you have a faulty appliance, replace it, have it repaired, or repair it yourself. If the cord is worn out or shorted, repair it, or throw it away and get a new one. Even a new cord is cheaper than a fire.

Never use a fuse heavier than 15 amps unless your circuits are wired for it. Inspection by an electrician is recommended to determine this.

In replacing fuses, be sure you are standing on a dry floor. In the basement, a rubber mat or dry board should be used. Never touch a water pipe while replacing a fuse.

So Goes The Mind

By Orin R. Yost, M. D.
Medical Director, Edgewood Sanitarium

(Editor's Note: Dr. Yost is a graduate of the Medical College of Virginia at Richmond, studied psychiatry at St. Elizabeth's Hospital in Washington, D. C., taught psychiatry at Columbia University, New York, was division psychiatrist of the 79th division in World War II, and is presently Medical Director of Edgewood Sanitarium Foundation.)

(Author of: What You Should Know About Mental Illness.)

Community Mental Health Problems

Part I

In general, the mental health program on the community level has two aspects: direct clinical services, and the education of the public. Obviously the work of the first is to be undertaken by professionals; in the work of the second, they have a part to play, but much can be done also by non-professional men and women.

Best results have been obtained when both parts of the program were in operation simultaneously, when both professionals and non-professionals are involved. There is an enormous disadvantage, quite impossible to surmount, in trying to convince the public of the value of recognizing the early symptoms of mental illness and applying early for clinical consultation, in the absence of any easily available clinical facilities to which to apply.

In mental health education, several types of material will be included: that dealing with personality growth and development, and that dealing with psychological mechanisms. Knowledge of normal personality growth and development can then become the basis for the education and guidance of children and young people, serving as the foundation for what has been called "anticipatory guidance."

For, since all human beings normally go through the same steps in their psychological and emotional development—just as there are definite steps in the normal physical development of an individual's bones, muscles, organs—sex education for example can be provided in time so that the individual may be prepared to meet problems as they are likely to arise.

In the second category, the more common psychological mechanisms, such as imitation, identification, projection, repression, suppression, sublimation, condensation, and so on, are to be explained so that they may be recognized and understood.

The underlying aim, of course, is to improve interpersonal relationships in the community, through an understanding of what makes human beings behave the way they do. That makes for better mental health.

Still another matter for mental health education in the community will be factual data on community organization and facilities insofar as these can be of help in affecting the mental health of the individuals of the community.

It will, of course, be much easier to perform this educational job in those communities where clinical facilities and clinical personnel are available. Stress will be put on the need for early recognition of symptoms of mental illness or disturbance, the advisability of early referrals, the availability of clinical facilities, and how to make the best use of these facilities.

(To Be Continued)

Clipping Dairy Cows Makes Cleaner Milk

Clipping your dairy cows is one way to improve the quality of milk.

Clipping actually cuts down the work needed to keep cows clean. But N. N. Allen, U. of Wis. dairy specialist says clipping is not a cure-all that in itself will insure clean or low bacteria count milk. It is simply one of many steps that contributes its bit to quality.

Dust or dirt floating in the air can get into milk and clipping just naturally cuts down this risk. Allen says that some dairymen prefer to clip cows all over, instead of just the hind quarter. He says work at the university has indicated that cows do not suffer from cold due to complete clipping, as might be feared. They quickly become adjusted to the shorter hair coat. One way in which the cows adjust is by breathing more slowly with a slightly lower heart rate, and they give off less heat through the lungs.

Allen says clipping also helps keep the herd free of lice. In recent tests, clipped heifers running with long haired stealmates remained almost entirely free of lice, even though the long haired heifers were infested.

Antibiotics promote growth in hogs and poultry by controlling intestinal organisms which "steal" feed nutrients, according to U. of Wis. research.

Sarah Anne's COOKING CLASS

Molasses Flavors A Home Barbecue

Barbecued spareribs and chicken are a tune to brisk weather days. If you think barbecued meats are elaborate of preparation, you're in for a surprise. The sauce is a sweet-spicy blend of unsulphured molasses, tomato sauce, vinegar, mustard and onion. These ingredients, heated one minute, are ready to baste baked spareribs or broiled chicken. Mellow unsulphured molasses contributes to the sauce's rich reddish-brown color, and it balances the tart flavor of tomato.

Molasses Barbecue Sauce

1/4 cup unsulphured molasses 1 8-ounce can tomato sauce
1 tablespoon prepared mustard 1/4 cup chopped onion
1 tablespoon vinegar 1/4 teaspoon Tabasco

Combine all ingredients in saucepan. Bring to a boil; boil one minute. YIELD: 3/4 cup.

Barbecued Spareribs

Have 3 pounds spareribs cut in serving pieces. Place in shallow pan. Roast in moderate oven (350°F.) 1 1/2 to 2 hours. Baste with Barbecue Sauce twice during last hour of roasting. YIELD: 6 servings.

Barbecued Chicken

Have a 1 1/2 to 2-pound broiler cut in half. Place in shallow pan; skin side up. Brush with melted butter; sprinkle with salt and pepper. Bake in moderate oven (350°F.) 1 1/2 hours; turn twice during baking. Baste with barbecue sauce during last hour of baking. YIELD: 2 servings.

During the sweet potato season in the South, no dinner is considered complete without a sweet potato dish. No vegetable, unless its season is very short, can stand even popularity without a change in preparation of the dish. Try a new way before your family becomes lukewarm toward the sweet potato. There are many simple variations which will completely change the old-time baked sweet potato.

Mashed Sweet Potato

Boil potatoes, peel and mash. Add 2 tablespoons of butter, one-fourth cup of milk, and from one-half to one teaspoon of salt to 3 cups of potatoes. Put in baking dish and cover with marshmallows. Sprinkle the marshmallows with cocoanut and brown in oven.

This Week's Pattern

9135 SIZES 2-10

by Marjorie Martin

Pattern 9135: Children's Sizes 2, 4, 6, 8, 10. Size 6 blouse, 1 1/2 yards 35-inch; skirt, 1 1/2 yards 35-inch fabric with nap; waist 1/4 yard. Print plainly NAME, ADDRESS with ZONE, SIZE and STYLE NUMBER.

Orange Sweet Potatoes

Boil, peel and cut 3 large sweet potatoes into thick slices. Arrange in layers in a baking dish, scattering each layer generously with brown sugar and bits of butter. Sprinkle lightly with paprika. When dish is full pour in three-quarters of a cup of orange juice. Bake in oven 350 degrees for forty minutes.

Sweet Potato Pone

Grate enough sweet potatoes to make three cupfuls. Add one-half cup of melted butter, one cup of brown sugar, and 2 well beaten eggs. Pour in one cup of milk and flavor with 1/4 teaspoon of cinnamon and nutmeg, also a few broken pieces of orange peel. Mix thoroughly and bake in a buttered pan 45 minutes in an oven 325 degrees. Stir while cooking.

Sweet Potato Pie

Line pie pan with pastry. Fill with the following mixture: 1 1/2 cups of mashed sweet potatoes, 1 cup sugar, 1 cup milk, 2 tablespoons of melted butter, 2 eggs beaten separately and 1/2 teaspoon of lemon extract. Mix thoroughly, and bake in an oven 400 degrees until done. Serve with coffee.

Sautéed Sweet Potatoes

Peel and slice in thick slices lengthwise cold baked sweet potato. In a frying pan put a small amount of butter. Cook until potatoes are brown.

Stuffed Sweet Potatoes

3 medium sized potatoes
1 tablespoon butter
1/2 teaspoon salt
1 tablespoon cream
1/2 cup drained crushed pineapple
6 marshmallows

Bake potatoes, cut in halves, scoop out most of the contents. Mash thoroughly, season with butter, salt, cream, add pineapple. Fill the shell. Slit marshmallows and stuff with pineapple. Place one on top of each half potato. Baste with pineapple juice rapidly boiled for a minute. Brown.

Ham with Sweet Potatoes

1 slice ham.
3 sweet potatoes (boil until almost tender)
2 tablespoons sugar
1 cup hot water

Brown the ham slightly on both sides and place in baking dish. Cover ham with slices of sweet potato. Add the hot water to the drippings, pour over ham and potatoes. Cover and bake in an oven 350 degrees until the ham is tender. Baste occasionally with the gravy. At the last remove the lid and let the top brown.

5TH ANNUAL ART SHOW TO BE HELD AT FOND DU LAC

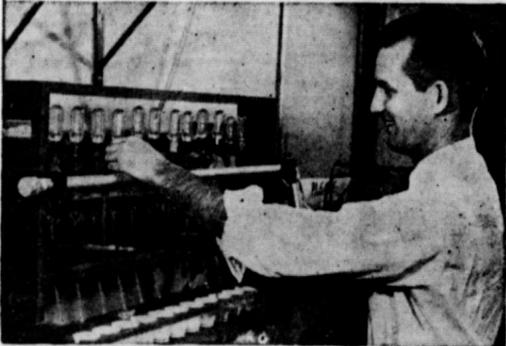

The 5th annual rural art show will be held at Fond du Lac January 26 to February 6. This show affords an excellent opportunity for ama-

teur artists to compare their art work with others of amateur standing. Entry forms may be obtained from the county superintendent of schools' office. It is hoped that local amateur artists will avail themselves of the opportunity to exhibit.

GROWING BETTER CROPS

Winter is Good Soil Test Time

One stage in testing soil samples for acidity

Winter is the time to have your soil tests made or to arrange for them as soon as good samples can be taken, according to the experts. Testing laboratories, whether at university, Experiment Station, county headquarters or privately operated as by food processors, have seasonal peak periods when volume of tests may slow service, just when the farmer wants speed. It is possible to sample the soil any time of the year that good samples can be obtained, advises Dr. Roy D. Bronson, in charge of soil testing at Purdue University. "The farmer must think as far ahead about soil testing as he does when he plants his corn in June in expectation of October harvest. Research work indicates that seasonal variations in soil tests are small enough to be ignored..."

Big Growth

How important professional testing of soil fertility has become is evident from some of the university statistics. Since Purdue established a central laboratory, test count rose from 7,000 in 1951 to over 30,000 in 1953. At the University of Maryland, Extension soils specialist Dr. Frank L. Bentz, Jr., reports 10,000 samples tested in 1953 as compared with 3,000 in 1946, and service expanding with a complete new laboratory and much new automatic equipment.

In Illinois, with some 60 county laboratories and about 20 commercial ones, 1,900,000 acres were tested last year for acidity, potas-

sum and phosphorus, according to soil fertility professor Dr. R. H. Bray, University of Illinois. "Laboratory testing of soils for their content of plant nutrients is rapidly becoming very important to both efficient crop production and soil conservation," says Charles E. Kellogg, chief, Soil Survey, U.S. Soil Conservation Service. "Although a soil survey... gives a basic description of the soil... and its probable nutrient deficiencies and responses to fertilizers, precise fertilizer needs depend on past cropping history and crops to be grown. By having proper tests made on well selected soil samples and results properly interpreted, a skilled agriculturist can make a much better recommendation for farmers than without the tests."

Now World-Wide

Interest in soil testing is "definitely on the increase all over the world," notes Dr. E. R. Purvis of Rutgers University. He cites, too, "major progress" in research on minor or trace elements, whose growing importance is also mentioned by Dr. K. C. Berger at the University of Wisconsin. Speaking in terms of canning crops, Dr. Berger says that vegetable growers these days need maximum profit yields, and that improper balances of nitrogen, phosphate and potash not only are wasteful but can actually reduce yields. And, though the need for lime and fertilizer is widespread, these materials are wasted when soils are not tested.

the navy's newest weapons at sea.

PVT. BINGEN AT CAMP CARSON; SENDS LETTER

Pvt. Kenneth L. Bingen, Kewaskum, son of Mrs. Margaret Bingen of San Francisco, Calif., formerly of this village, has been assigned to Camp Carson, Colo. He was home over the holidays. Pvt. Bingen sends a brief letter as follows:

January 11, 1954

Dear Mr. Harbeck:

Seeing I'm finally situated again I guess you can start sending me the paper again. I'll be here for a while now. I'm going to be working in a ward. I guess that's all.

My address is: Pvt. Kenneth L. Bingen, R. A. 16442222, Det. Ameds, U. S. Army Hosp., Camp Carson, Colo.

Hearing from you soon I hope.

Kenneth Bingen

P. S. If possible send me the papers I missed. OK?

CREDIT COURSES OFFERED BY VOCATIONAL SCHOOL

Two credit courses will be offered by the West Bend Vocational school, in connection with the extension division of the University

of Wisconsin, during the present school semester.

A class in fundamentals of speech I, for three credits, will begin on Monday, February 8, 1954, at 4:30 p. m., in room 225, West Bend High school building. This course is designed to give students an understanding of the speech function and principles of effective speech, with practice, analysis of individual performance in speech, and suggestions for improvement.

The second course to be offered is political science 7 DS, American government and politics. This is a new directed study course equivalent in major respects to the same course in residence. Thirteen tape recorded lectures, suggested readings and consideration of current events are included. Reports are made by mail. This is also a three credit course.

Any persons interested in either or both of these courses will please call or write the office of the vocational school at once, as the enrollments are limited.

Teacup Topics

by Betty Ann

EDITOR
THE MILWAUKEE JOURNAL
WOMAN'S PAGE

A scarf may be anything at all this year, says Betty Ann. Sparkling headband, fringe trimmed stole, confetti dotted shoulder cape or narrow neckband are all classified as scarves.

For giving as a gift, the scarf is ideal. Most women never have enough. Some women collect them in the same way that they collect soft cashmere sweaters, jewelry, perfume or toilet water.

Scarves for suits, scarves to fill in dress necklines, scarves to be used as belts. Sheer wool, silk, striped satins or gay prints. Every conceivable color to match or contrast with various favorites in the wardrobe.

A practical way to tote just sudsed laundry out to the line is to wear it in a plastic laundry bag. There's one that comes with a strap that fits right over the shoulder, allowing the use of both hands.

Once outside, hook it over the line. When it's empty, fill it with slightly damp laundry and use it to store clothes in the refrigerator before ironing. There's even a separate little plastic bag that comes with it to hook over the line and hold clothespins.

Since these bags and hooks are plastic, they take to the suds for washing just as easily as the clean clothes they carry.

Nutty Fingers

1 bar less 1 tablespoon (7 tablespoons) butter; 2 tablespoons powdered sugar; 1/2 teaspoon water; 1 teaspoon vanilla; 1 1/4 cups sifted all-purpose flour; 2/3 cup pecan halves.

Let butter soften in bowl. Add sugar, water and vanilla and cream thoroughly. Add flour and mix well, forming a smooth dough. Place a small round of dough in palm of left hand and press flat. Put a pecan half in center of dough. Roll dough over the nut enclosing it in a finger shaped covering. Place on greased cookie sheet. Bake in moderate oven, 350 degrees, 20 minutes or until light brown. Remove from oven and, while cookies are hot, roll them in powdered sugar, colored granulated sugar, or decorate them according to your fancy. When cold, store in covered tin containers. Makes about three dozen.

A smoked boneless pork butt, sometimes called a cottage roll, is about as handy a meat as you can find. First of all, it's so easy to prepare. Just cover it with water, add a few seasonings such as garlic bud, a few whole cloves and a bay leaf, and let it cook slowly for two to three hours. Then it's ready to slice and serve hot or cold.

Smoked butt leftovers are as easy to use as leftover ham. Thinly sliced smoked butt and rye bread sandwiches are tasty in the lunch box. Small pieces of the leftover butt may be ground and used in a "different" breakfast dish.

Make a medium thick white sauce and to it add ground smoked butt and diced hard cooked eggs. Cook over low heat, stirring carefully; season to taste and serve over hot buttered toast.

If your bridge club isn't counting calories, here's a suggestion for dessert: Arrange broiled pineapple rings on sponge cake squares and top with hot caramel sauce and a fluff of whipped cream.

If you find the last bit of red calf polish has been used, a corresponding shade of lipstick will do the trick. After applying the lipstick as you would a paste polish, then rub with a soft cloth.

To keep crumbs from dancing to the floor when putting dry bread through the food chopper, cover the mouth of the chopper with a paper sack.

ROLLIN' EM STRAIGHT

The first perfect 300 game ever rolled on Waseca bowling alleys is believed to have been Gil Mittelstaedt's recent achievement; it followed a mediocre, for Gil, 172 in the second line of a 3-game series; his season's top is 679, average about 600. . . Perfect games are getting to be an old story to Walt Ross of Morris, Minnesota, who recently, in a practice match, rolled his third 300; his average is 194. . . Chisholm, Minn., boasts two championship bocce ball players in Molly Franchak and Angeline Ball.

Attitude Towards Health Important For Children

Good health is a prime requisite for a happy home. Few families can achieve a sense of security and contentment without it.

Most parents readily assume that regular medical examinations, nutritious diets, healthful amounts of exercise, adequate sleep and rest, and good general hygiene are among the main responsibilities to their children.

But added to all these is still another less tangible, but nevertheless important health obligation for parents. This is the development of healthy attitudes towards health within their children.

Whether children are sick or well, handicapped or perfect specimens, their attitudes towards health are important. Since children are great imitators, the attitudes they develop towards health depend upon the feelings they have seen displayed by their parents. Because they copy our feelings and attitudes, it's important that these be wholesome and positive.

Wholesome attitudes are best built when we have the facts. But just collecting information and advice is not enough. After we have the facts, it's important to act on them.

Parents can help children understand that indifference to illness and recklessness in regard to injury stem from childish attitudes. Inadequate precautions against a cold, or ignoring a cut finger or blister because "I never get sick" isn't being brave or acting grown up.

Taking sensible precautions doesn't mean becoming so concerned about health and illness that it's impossible to think of anything else. One who is always fretting about an ulcer he doesn't have can eventually produce one. It is almost as damaging to good health to continually think you are sick as it is to be sick.

A child should learn to regard symptoms and illnesses realistically but not to fear them. He will do this if the adults around him treat illness and health in a rational, objective manner without mystery or emotion. With such healthy attitudes as examples the child will naturally grow interested in keeping healthy.

About Your Home

By FRANCIS DELL

The newest trend in home entertaining stresses quality rather than quantity. It is original and different without being bizarre.

Spaghetti is thought of as an economy dish in most circles. However, a really great spaghetti is not one made of commercial hamburger, a can of tomatoes and a few onions and a chopped green pepper. It is a dish made from choice meat, seasoned carefully with herbs and spices and cooked very slowly for many hours.

Even the noodles are not taken for granted. The water used for cooking is seasoned with salt and pepper, butter, a bay leaf and a drop of olive oil. After the noodles are cooked they are washed in a colander, first with hot and then with cold water. A cup of sauce can be stirred into the noodles to keep them from becoming gummy.

With a fine spaghetti you need serve only a green salad, hot French bread, with fresh fruit for dessert and coffee. This menu can be prepared to be fit for a king.

When planning a menu for your guests, there is a temptation to include too many rich dishes. Remember that one or two rich items will be much more appetizing than three or four.

Last but not least—don't try to put on a formal dinner unless you have the equipment and the servants to do the job correctly.

Sure Cure

On the porch of the general store talk had grown nostalgic about the old-time education when book learning was larpured into you to stay. It was agreed that fear of a licking helped children to learn. But one fellow disagreed.

"The only time I was ever licked," he said, "was for telling the truth." There was silence while his neighbors assimilated this fact. Then quietly, judiciously, one of them said, "Well, Sam, it cured ye."

Reverse Curve

"Yes, my boy, I'm a self-made man."
"Gee, Pop, that's what I admire about you. You always take the blame for everything!"

Blanket Is Styled for Baby's Protection

BY EDNA MILES

KEEPING a baby safe from accidents in the home is not an easy job, as mothers know.

Every year there are countless newspaper stories of babies who have smothered in their cribs, despite constant watching.

Knowing that this constitutes a major problem for mothers, one manufacturer has produced a baby blanket that cannot slip, slide or tangle around baby.

It attaches to the crib by means of plastic rings that fasten to the bars of the bed. While it eliminates all possibilities of smothering, it also keeps the baby completely covered and warm.

Made of filled and quilted jersey which will not shrink, it is moth and mildew proof. It's also made in wool and cotton or may be obtained in satin comforters.

Ribbon bound, the blanket is designed to fit in neatly at each side of the crib and thus provide maximum protection and warmth.

Mothers will find that they can leave baby for longer periods without worrying. At night they need not get up several times to see if the baby is uncovered.

New design in baby blankets that are attached to crib by plastic rings eliminates fear that child will be smothered or entangled in the covers.

Bible Comment:

We Can Know Jesus as Well as His Friends Did

READING the pages of the Gospels, we can perhaps become more familiar with Jesus than were His friends.

For we can learn from what the writers learned—but learned late and not until their Master was about to die, or after His resurrection.

Almost to the very last the chosen Twelve were quarreling about place and pre-ferment.

Even at the Last Supper in the Upper Room Jesus had still to teach them the lesson of humility and service by washing their feet.

It seems remarkable that those chosen by Jesus, men of initiative, intelligence and daring, should so seriously have failed to grasp His teaching and understand His mission and purpose.

Their hearts and wills were in the right place, but their minds were blinded by the intensity of their ambition and their vision of glory in an earthly kingdom.

They did not understand Him when He said, "My kingdom is not of this world."

But in the aftermath they understood, as the Comforter brought to their remembrance all that Jesus was, said and did. Under that spiritual guidance and remembrance they became what Jesus had intended.

It was John, whose mother had asked preference for him, and who had thereby aroused the indignation of his brethren, who was to express evidence of the effectiveness and power of the Gospel:

"We know that we have passed from death unto life, because we love the brethren."

We have the advantage of knowing the Master as John first knew Him, but also as John came to know Him with the fullness of love and insight.

firm.
Chop up cherries and nuts. Transfer ice cream to a bowl and mix with a spoon or electric mixer until ice cream is free of chunks. Stir in the cherries and nuts, spoon into a 1 1/2 quart mold and freeze until firm in your freezer. No freezer? Then pack as you would homemade ice cream. Will serve 8 to 10.

Glowingly Romantic Party Dresses Ready To Make From New Designs

Romantic party dresses that gleam like jewels are yours for the making from charming new McCalls Patterns. In fabrics that glow with the rich sheen of satins, moire faille or silk peau de sole, these fashions feature lovely necklines that are either decollete or softly draped with berthas and fan-pleated bosoms, says Helen Carlton, Associate Fashion Editor of McCalls' Magazine. She also describes new casual dresses for brown and gray backgrounds, treatment and apron ideas for every occasion.

"Soft as a gleaming pearl is a pure silk peau de sole dress. Fans of fine pleats over the bosom are accented by a low, curving collar. The skirt is cut in six gores. A cotton velveteen in blazing ruby red is thickly sprinkled with pink flowers and leaves. Tiny sleeves and a pointed berthas give interest to the neckline.

"A glowing sapphire in silk satin best describes an enchanting bare-shouldered dance dress. The closely fitted bodice with draped decollete is cut very low in back. The billowing skirt has four unpressed inverted pleats. A shimmering amethyst dress in moire faille is cut on princess lines and becomingly scalloped across the front of the strapless bodice. The pattern includes a waist-length cape jacket.

"Make the background for some of your casual dresses brown. Cocoa-brown wool, tailored with a crisp stair-step yoke on the bodice front, makes a sleek, smooth fitting dress. It buttons down the back of the bodice and off-center on the skirt back. Use taupe and black stripes on cotton corduroy for a coat dress that is as casual as a cardigan. The four-gore skirt has a wide flare, and the sleeves are cut with bodice. Beige gabardine makes a fine background for leather buttons and belt, and an amber-toned bag. The side-buttoned fastening gives a long, slimming line.

"Make the background gray. Use tweedy jersey and add the flash of jewel-toned gloves and hat. The gentle shoulders of one lovely design are emphasized with sprays of folds from the neckline and a smart mandarin collar. Make it of dark gray jersey that suggests flannel, and accent it with intense color. There is beautiful detail in a dress yoked with a back that forms deep tucks around the shoulders.

"Here are aprons for every occasion: One versatile style is reversible. Bright red-and-white stripes and a big gift-box pocket are the motif on one side. Party favors are applied on the other. An apron that's perfect for entertaining is done in brilliant turquoise felt. It fastens halter-wise at the neck. A pinafore in pink cotton is pretty enough to wear as a dress. The sash tied in back makes it flatteringly snug at the waist."

Sweet Potato Balls

6 cups sliced sweet potatoes
3 tablespoons milk
Salt and pepper
1 teaspoon minced onion
1 tablespoon melted fat
3 egg yolks

Add the milk, salt, pepper, minced onion, melted fat and the beaten egg yolks to the sweet potatoes. Shape into balls about 1 1/2 inches in diameter, using 1 heaping tablespoon for each. Then roll the balls in finely sifted dried bread crumbs, next in beaten egg (use 1 egg and 2 tablespoons water beaten together) then in crumbs again. Fry in deep fat until golden brown. Makes 15 balls.

To Reduce Food Bills Trade Time for Money

Whether you choose to spend time and energy preparing foods at home or spend money to buy ready-to-serve foods may depend on the kind of family you have, suggests Linnea Dennett, nutritionist at the U. of Wis.

If husband and wife both work outside the home, the family is likely to spend more for delivery service, higher priced quick-to-fix meats, baked products, and partially-prepared fruits and vegetables.

Food costs will add up faster for them because of the amount spent on service, Mrs. Dennett says. Using prepared foods, though, may take only one to three hours preparation time each day.

With the at-home family, spending five hours a day getting meals can save up to a third on food costs. How much it saves will depend on how well the market list is planned to avoid over-buying and waste, to take advantage of sales, and to buy in large quantities.

Quantity buying is a good idea if you have plenty of storage space. Better be sure that you know what quality food you're getting, though.

You can take advantage of good buys in seasonal foods, too, if you have freezer space or equipment for canning. Skills such as taking a cheaper, tough cut of meat and turning it into a tasty dish, and baking home-made bread, helps the budget, too, Mrs. Dennett says.

Sweet Potatoes In Casserole

Peel 1 1/2 pounds of sweet potatoes, cut in half-inch slices and cook until brown on both sides in a mixture of 4 tablespoons of butter and 2 of molasses. When well browned but not more than half cooked, remove to a two-quart casserole. Arrange in layers, seasoning each layer with bits of green pepper, pieces of mushroom chopped ham or any other left-over scraps of savory foods. Add the butter and molasses. In the pan put 3 or 4 tablespoons of flour (add more butter if there is not enough left to make a paste with the flour) rub the two smooth and add by degrees two cups of rich well seasoned brown stock. Stir until it boils. Pour over the sliced sweet potatoes. Cover casserole and let cook 30 minutes in a moderate oven.

DAV Sweetheart

The Sweetheart of the DAV is Mrs. W. Taylor Harney of Kansas City, Mo., an American Red Cross volunteer field consultant for the midwestern area, and Kansas City chairman of volunteers. Each year the Disabled American Veterans selects its "Sweetheart" from a group that has unselfishly assisted disabled veterans in their rehabilitation.

THESE WOMEN!

By d'Alessio

"If he thinks I'm such a dumb stenographer, why doesn't he marry me and hire a good one?"

Ten Word INTELLIGRAM

Check correct word.

- (Magellan) (Balboa) discovered the Pacific Ocean.
- Nicotine (does) (does not) yellow the teeth of smokers.
- A (kayak) (kalak) is an Eskimo conveyance.
- The Kentucky Derby is run at (Hialeah) (Churchill Downs).
- The Statue of Liberty was erected in (1886) (1904).
- The (Dardanelles) (Suez Canal) joins the Mediterranean to the Red Sea.
- In the Bible, the father of Cain and Abel was (Adam) (Joseph).
- Cows (do) (do not) have upper front teeth.
- An auk is a (sea bird) (device used by engravers).
- Coon cats are native to (Maine) (Wyoming).

Check your answers, scoring yourself 10 points for each correct choice. A score of 0-20 is poor; 30-60, average; 70-80, superior; 90-100, very superior.

Decoded Intelligram
1-Balboa, 2-Does not, 3-Kayak, 4-Churchill Downs, 5-1886, 6-Suez, 7-Adam, 8-Do not, 9-Sea bird, 10-Maine

THIRTEEN'S A CROWD—"Heidie" has her troubles, as the lines on her face plainly reveal. The Boxer has 13 pups, but only the conventional eight milk outlets. So the poodles have to eat in shifts to get a share of the food. Helping Heidie with her king-sized feeding problem is her mistress, seven-year-old Nancy Stadler of Salina, Kan.

PULLING RABBITS OUT OF HATS is just one of the tricks Sergeant Genevieve F. Harris uses to delight soldier audiences at Fort Meade, Md., and Andrews Air Force Base in the District of Columbia. Her magic touch also makes snakes rise from baskets and cards mysteriously disappear. "These tricks baffle me too," she says.

SPORTS AFIELD

By Ted Kesting

To look at a plump, friendly, buck-toothed beaver, you'd never suspect that he is the fellow who led the white man from the Atlantic to Pacific, for it was in search of his soft fur that scouts kept pushing beyond the rim of civilization. His influence in settling the West was tremendous.

But even more remarkable are his feats of engineering which are in evidence from Alaska to Labrador and south to the Rio Grande. The land is filled with monuments commemorating the services of this busy night-shift worker. He is surveyor, logger, water engineer, builder and landscape architect all in one writes Frank Dufresne of the U. S. Fish and Wildlife Service.

The big job of the beaver is its vast landscaping; its quieting and clearing of floodwaters; its creation of lakes attractive to fish and game; the slow filling of these lakes by settling silt, and finally the building of grazing meadows.

That sort of thing has been going on for centuries. In pre-glacial

times there existed a species of huge beaver as heavy as a bear; it built enormous dams across America's rivers of the past. Down through thousands of years the beavers have been creating fertile lands. They're still doing it wherever they find a stream that needs slowing down, and today there are many of these.

It's hard for us to believe that natural erosion—the continual washing of good earth into our rivers—is more damaging than all industrial pollution. And that's where the eager beaver steps in to the picture. Not only does he do a good job in regulating the water runoff in many parts of the country, but the methods he employs for doing it—the building of brush dams across the gullies one above the other, is good practice for the landowner too. If you have eroding stream banks on your land, consider the ways of the beaver. You might also consider bringing in a few to work for you.

WE HOPE IT IS LUCKY

Diane Hanson, in the news two or three weeks ago, has company in her "eleventh heaven." Kathleen Wessbecker of Waconia, Minnesota, joins the Kennedy lass in an affinity for 11's; each was 11 years old November 11, having been born at the 11th hour on the 11th day of the 11th month. Diane has 11 letters in her name, but Kathleen evened the score by having 11 girl friends at a birthday supper—which should have been either at 7 or 11 o'clock but actually was at a prosaic five.

HATS OFF—Blaine Shoemaker, 16, of Aledo, Ill., takes his hat off to his Angus steer, "Teddy." "Teddy" won first blue ribbon in the Junior Calf class at the International Livestock Show held recently in Chicago. Blaine's entrees have won 15 ribbons in six years of competition in the annual show.

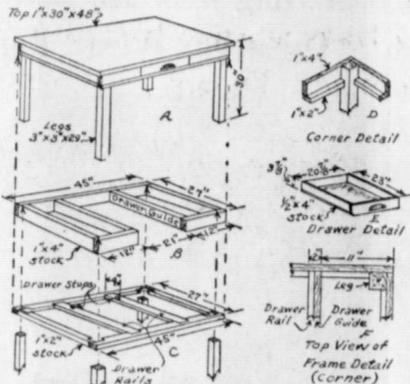

HERE'S HOW . . .

MAKE A TABLE-DESK

A simply-constructed table-desk can be made of wood with just a few tools and skills.

To start, construct a rigid frame, B, all of 1x4 material, both glued and screwed together for rigidity. Frame section, C, calls for sawing out the corners to accommodate the legs, and cutting the slots with saw and chisel for the drawer rails.

When B is glued to C and drawn tightly together with screws, the legs fit into the corners as shown in D and F.

The table-desk top may be of 1-inch or 2-inch material. If two 12-inch boards and one 6-inch board, each 48 inches long are used, there will be only two joints in the top.

The top is fastened either by screws from the top or right-angle brackets from beneath, and has a 1 1/2-inch "overhang" all around.

Drawer detail is shown in E. As for the best wood and finishes, your local lumber dealer will be able to advise you.

MAKE A TABLE-DESK

An extra table or exclusive working space for the student, whether he be in grade school, high school or college, is almost as important as the books or papers with which he works. Basic requirements are a broad flat surface, plenty of leg room and a handy drawer for pencils, papers, and other much used materials.

All this can be provided by the home craftsman with a very minimum of tools—hammer, saw, chisel, screw driver, and plane—and with easy-to-work wood.

First step in the construction is to provide a frame for the structure as shown in two steps in Drawings B and C. The frame section shown in B also provides the sides for the finished table and the guides for the drawer. All the joints are but joints requiring no special carpentry skill. These should be both glued and screwed together for greater rigidity, since the draw guides will have to remain true to permit easy sliding of the drawer. Material for this section is all 1x4 stock.

The next section of the frame is all 1x2 stock, as shown in Drawing C. A bit more carpentry is required here, but not much more. The corners are cut out to accommodate the legs. This is a simple saw cut, removing a 1x4 inch piece from each end of the 45-inch frame pieces, and a 1x3 inch piece from each end of the 25-inch frame pieces. The other "fancy" bit of carpentry is making the slot for inserting the two drawer rails. These slots are placed 11 inches in from the end of the frame, and are 1 inch deep and 2 inches wide. Each slot is made by making two saw cuts 1 inch deep and 2 inches apart carefully removing the piece with a wood chisel. The 25-inch drawer rails fit into these slots, and when the frame section shown in B is placed on top of the frame section shown in C, the drawer rail and drawer guide will come together properly to form a "seat" for the drawer.

The frame section shown in C should be glued and screwed together. Then Section B is glued on Section C and drawn tightly together with screws from the bottom of Section C.

The legs, which are of 3x3 material, 29 inches long, are inserted into the assembled frame. Drawings C, D, and F show the detail. The legs are held in place with glue and screws, and drawn up tightly to produce a rigid construction.

The table-desk top measures 30 by 48 inches, which provides 1 1/2 inches overhang on all sides, and may be of 1 or 2-inch material. If this is made of two 12-inch boards and one 6-inch board, each 48 inches long, there will be only two joints in the top to be filled with wood filler before finishing.

The table-desk top may be screwed to the outer edge of the frame, or it may be fastened to the frame from below with right-angle brackets.

The drawer is of 1/2-inch material, except for the drawer front which is made of 1-inch stock. Wooden or metal drawer handles are obtainable from building supply dealers.

CLIFF SWALLOW

CLIFF SWALLOW
© 1953 National Wildlife Federation

In some areas this relatively common swallow is known as the Eaves Swallow. The names suggest that the birds may nest under the eaves of buildings or on cliffs. The nests are often more obvious than the birds. They are usually gourd-shaped structures of mud with a lining of grass, leaves, feathers and wool. Of course, they differ from the burrows of the Bank Swallows and the mud nests of the Barn Swallows.

The National Wildlife Federation is interested in all kinds of wildlife whether this refers to game species or not and would welcome observations made on these birds. The Cliff Swallow, *Petrochelidon pyrrhonota*, is approximately 6 inches long with a wingspread of just over 1 foot and a tail about 2 1/2 inches long. The sexes are about equal in size. The most distinguishing field character is the light brown to buffy rump and the square-tipped tail. The upper parts are steel blue, much like those of the Barn Swallow. While the Bank Swallow has a whitish throat patch, the throat of the Cliff Swallow is dark.

There are 3 subspecies of the Cliff Swallow recognized: the Northern, the Mexican and the Lesser. Of these, the Northern has as its breeding ground the region from central Alaska to Cape Breton Island south through the United States except for Florida and the Rio Grande Valley. In winter, the birds migrate south through Florida and Central America to Brazil and the Argentine returning to the North in time for the Spring breeding season.

In the nest the female Cliff Swallow lays 4 or 5 white or creamy and pinkish eggs that are mottled with dark or reddish brown. The eggs are about 4/5 inch by 2/3 inch at their maximum and it would take 16 of them to reach a weight of one ounce. There is but one annual brood and the incubation and the care of the young is shared by both parents. Incubation takes from 12 to 14 days.

The fact that Cliff Swallows nest in colonies is often to their disadvantage. Such colonies are bound to attract attention and survival in any species is more likely if attention of potential enemies is avoided.

In the nest-making, muddy materials may be dropped to the porch floors beneath the eaves and this creates a condition that is not appreciated by tidy folk. The result of course is that the cause is removed. This is unfortunate both for the swallows and for the men involved. The food of these swallows is almost exclusively insects. Among the insects found in some 375 stomachs of these birds were the following whose names are likely to raise the ire of farmers and those whose living depends on the raising of plant crops: Alfalfa weevils, chinch bugs, rice weevils, and cotton boll weevils. With them were spiders and now and then a few wild berries.

One should not evaluate all of nature solely on an economic basis and anyone who has taken the

Leptospirosis Affects Both Swine & Cattle

A disease which has been a serious threat to cattle in recent years now is causing swine losses in the midwestern "hog belt."

And, says Dr. H. J. O'Connell, State Veterinarian, laboratory tests prove definitely that the disease, leptospirosis, has caused breeding failures in midwestern herds. The disease organism has been isolated in several cases of swine abortion.

Leptospirosis may cause fever, abortions, loss of appetite, jaundice, anemia, abnormal milk and reduced milk flow in swine.

When leptospirosis is suspected an accurate diagnosis is needed to make sure other types of infection are not causing the losses.

Veterinarians report that treatment is successful in some instances. Control measures to prevent further spread of the infection include immediate isolation of all sows which lose their pigs, and burning or burial of all infected matter.

Sows which recover from the disease apparently are immune to further attacks, O'Connell said, but they may remain as carriers, furnishing a potential source of more infection. Blood tests can be used to detect infected or exposed animals.

Farmers should make sure infected hogs are kept from contact with cattle herds, because the disease may be transmitted from hogs to cattle. It likewise presents a public health problem because the disease may be transmitted to human beings also.

AGE NEED NOT BE A HANDICAP

At 78 Paul Heinisch painted, all alone, his two-story workshop in Norwood, Minn. . . On a good old-fashioned wood-burning range at Winnebago, Minn., Grandma Claridge prepared Thanksgiving dinner for 40. She's 84. . . James W. Nunn of Ponsford, Minn., shot and dressed a fine buck this fall, despite his 90 years. . . Mrs. Sarah Utendorfer baked the pies for her own 100th birthday party at Gaylord, Minn. . . Rev. Paul C. Dowdlat, in half a century as pastor of St. John's Evangelical Lutheran church, Minneapolis, has baptized 2,936, confirmed 2,526, and performed 1,358 marriages. . . Some automobiles, too, grow old gracefully: Joe Setnosky's 1926 model is familiar on Bovey and Coleraine, Minn., streets, while over at Sedan and Oliver Iron colleague drives a 1919 car. Guess the make.

Behind The Scenes In American Business

By Reynolds Knight

New York—A package is being prepared at this time which small business, especially where wages are lowest, may not like when it is opened in the spring. This is a proposed increase of 10 cents in the federal minimum wage of 75 cents an hour.

The Labor Department hopes at the same time to widen the coverage of this minimum, so that it will apply not merely to workers in interstate commerce, but to all jobs affecting interstate commerce. This would mean that employees in a building tenanted by offices of nationwide corporations would be covered. Store employees and farm workers would also be brought in, under present plans.

In the inflationary times since 1939, successive rises in the minimum have gone almost unnoticed. In some industries, however, they did kill quite a few jobs. If we are now facing a downturn from inflation, this effect will be sharper.

It has been found in the past that the principal cost of a higher minimum wage is not in the increases paid to earners of the lowest pay, but in restoring the margins above this minimum which successive layers of skilled workers and supervisors feel is their due.

FIXING-UPPING—Experts in the building field predict a good 1954 in all phases of construction. Although the last few months of 1953 saw a slight decline in starts of new dwelling units, residential building is expected to pick up. The wide range of non-residential building—schools, churches, motels, filling stations—is also on an uptrend.

By far the biggest market, the Tile Council of America prophesies, will be in remodeling. Five of eight builders, queried by a national magazine about 1954 prospects, said 100 per cent of their business was in bringing homes up to date. Others said this was profitable between big-jobs business for them.

The Tile Council represents manufacturers of clay floor and wall tile. Members' biggest markets are bathrooms and kitchens. Builders specializing in remodeling will find their largest activity in jobs for those two rooms, the Council believes.

THINGS TO COME—Plastic accessories for school or work lunch boxes keep the pie and the sandwiches separated. . . If your goldfish are bothered by the gurgling sound of the pump that keeps the tank oxygenated, a new soundless pump would make a nice gift. . . Rubber-based paint for concrete surfaces now comes in enamel finish in pastel colors. . . **GROWING SIDWAYS**—A new trend in expansion, which might be called growing sideways, has supplanted the vertical integration of immediate postwar days, as the scarcity of raw materials has ended and the nation's industrial plant has been built up to demand.

Prime example of the new departure is the Sheaffer Pen Company. Since its founding in 1913 Sheaffer has concentrated on manufacturing writing equipment, and has done very well at it. Now the company has set up a tool and die division, housed in a \$1,500,000 building near the pen company's headquarters in Fort Madison, Iowa, to take full advantage of the skills developed in pen-making.

The new division makes tools and dies for the parent company, and also for such hard-to-please outside customers as Solar Aircraft, Bendix Aviation, Ford Motor Company, the Dexter Company, General Electric and J. I. Case.

LIVING COST RISE CHECKED—The National Industrial Conference Board, which surveys 39 cities monthly for its consumers' price index, found the first drop since April in the mid-September-October period.

Housing, with a 1.1 per cent rise, registered the largest increase. This is true also of the year as a whole so far; the increase has been 6.6 per cent. As an aggregate, services, as distinct from commodities, are the segment still going up. They have now met commodities coming down, so the long rise in total living costs has probably ended for a while.

As a footnote on the control vs. decontrol argument, the 18-month rise since decontrol of practically all commodities was 1.5 per cent. For the last 18 months under controls it was 5.5 per cent.

BITS O'BUSINESS—Steel operations last week were off to 85 per cent of capacity. . . Sugar use quota for 1954 was set by Secretary Benson at 8 million tons, more than 100 pounds for each of us. . . The Treasury thinks it will get \$63 billion from the taxpayer in fiscal 1955—beginning July 1, 1954.

More Convenient Storage

MASONITE "Peg-Board" panels and metal hangers, which take the headache out of home storage, may be obtained now from most building material dealers. This happy combination of holes and hangers gives homemakers a versatile method of hanging a variety of things ranging from kitchen utensils to lawnmowers.

As illustrated, these strong, splinter-free panels have scores of perforations. Into them are slipped self-locking hangers and fixtures which hold the items to be stored. Of course, the hangers can be moved to whatever spot desired on the "Peg-Board" panel.

The panels, which come in standard sizes from two feet by three feet to four feet by eight, may be attached to an existing wall or directly to studs in new construction. The large panels may easily be cut with a cross-cut saw into the sizes wanted.

Here are a few of the uses for "Peg-Board" panels in the home—in the kitchen for hanging utensils, in the workshop for tools, in the utility closet for brooms, mops and dustpans, in the garage for garden equipment, in the sewing room for spools and scissors, in closets for hats, neckties and shoes, in the bedroom for a useful and decorative bed headboard, in a child's room for a wall, in the living quarters as a decorative divider.

County Has 80 Students Enrolled at Wisconsin U.

Eighty students from Washington county are enrolled at the University of Wisconsin on its Madison campus this year, the university announced Friday.

Total enrollment on the Madison campus this semester is 13,346 with another 2,983 students enrolled in the university's nine extension centers throughout the state, making a total enrollment of 15,432 full-time students at UW this year.

The large enrollment this year also continues Wisconsin's state university in its position as America's sixth largest university for the second consecutive year. A statistical study of the nation's 830 colleges and universities shows that the UW continues again this year to maintain its position among the 10 top universities of the nation.

Three-fourths of its students come from Wisconsin homes this year, representing every one of Wisconsin's 71 counties.

The figures also reveal that enrollment of veterans of the Korean War has more than tripled at the UW this year. Of the total of 2,499

is a part of the recent reorganization of the department. The brief designation "ASC Committees" will hereafter identify the old "PMA Committees," according to A. John Cleary.

Responsibilities and functions of the committees, according to Wm. R. Merriam, chairman of the Wisconsin State ASC committee, will be essentially the same as before the reorganization. These include

field responsibility for adjustment activities of the Commodity Stabilization Service such as acreage allotments and marketing quotas, sugar programs, price support, and the Agricultural Conservation program.

Saving is fine, but it's better to spend all you make than not to make all you spend.—Phillips Bee.

40 Years Ahead with Overhead Valve Engines

NEW 1954 CHEVROLET

The new 1954 Bel Air 4-Door Sedan.

It stands to reason that you'll get the finest Valve-in-Head engine in the low-price field from the world's largest builder with 40 years of experience in developing and improving this type of engine. And now for '54... New power! New economy of operation! Smoother, quieter, finer performance!

For 1954, Chevrolet brings you your choice of two great high-compression Valve-in-Head engines. One, the advanced "Blue-Flame 125" engine, delivering 125-h.p. and teamed with the highly perfected Powerglide Automatic Transmission, now available on all models at extra cost. And the other, the advanced "Blue-Flame 115" engine, delivering 115-h.p. and teamed with the highly improved Synchro-Mesh Transmission, providing smooth, quiet gear engagement. Both of these engines bring you sensational new power and performance as well as new and improved gasoline economy. Come in; see and drive this smarter, livelier, thrifter Chevrolet and place your order now!
